The Secretary may, in his sole discretion, and without instituting or commencing proceedings for withdrawal of approval of the Cooperative Agreement, notify the State Regulatory Authority that it has failed to comply with the provisions of the Cooperative Agreement. The Secretary shall specify how the State has failed to comply and shall specify and state the period of time within which the defects in administration shall be remedied and satisfactory evidence presented to him that the State remedied the defects in administration and is in compliance with and has met the requirements of the Secretary. The period of time specified shall not be less than 30 days. Upon failure of the State Regulatory Authority to meet the requirements of the Secretary within the time specified, the Secretary may institute proceedings for withdrawal of approval of the Cooperative Agreement as set forth in Article IX.

Article IX. Termination of Cooperative Agreement

This Cooperative Agreement may be terminated as follows:

A. *Termination by the State.* The Cooperative Agreement may be terminated by the State upon written notice to the Secretary, specifying the date upon which the Cooperative Agreement shall be terminated, but which date of termination shall not be less than 90 days from the date of the notice.

B. *Termination by the Secretary.* The Cooperative Agreement may be terminated by the Secretary pursuant to paragraphs D, E, and F of this Article whenever the Secretary finds, after giving due notice to the State Regulatory Authority and affording the State Regulatory Authority an opportunity for a hearing:

1. That the State Regulatory Authority has failed to comply substantially with a provision of this Cooperative Agreement; or

2. That the State Regulatory Authority has failed to comply with any assurance given by the State upon which this Cooperative Agreement is based, or any condition or requirement which is specified in Article III.

C. *Termination by Operation of Law.* This Cooperative Agreement shall terminate by operation of law under any of the following circumstances:

1. When no longer authorized by Federal laws and regulations or Utah laws and regulations;

2. When a State program is finally disapproved, pursuant to Section 503 of the Act.

3. Within 120 days of the approval of a permanent State program pursuant to § 503 of the Act.

4. Following promulgation of a Federal lands program pursuant to Section 523(a) of the Act in the event the Secretary determines in writing that the State Regulatory Authority lacks the necessary personnel, legal authority, or funding to fully implement the Federal lands program in accordance with the provisions of the Act.

D. *Notice of Proposed Termination.* Whenever the Secretary proposes to terminate the Cooperative Agreement he shall:

1. Give written notice to the Governor and to the State Regulatory Authority specified in Article III.

2. Specify and set out in the written notice the grounds upon which he proposes to terminate this Cooperative Agreement.

3. The Secretary shall also publish a notice in the **Federal Register** containing items 1 and 2 of this paragraph, and specifying a minimum 30 days for comment by interested persons.

E. *Opportunity for Hearing.* Whenever the Secretary proposes to terminate this Cooperative Agreement pursuant to paragraph B hereof, in addition to the notice required by paragraph D, he shall:

1. Specify in the notices required by paragraph D the date and place where the State will be afforded an opportunity for hearing and to show cause why this Cooperative Agreement should not be terminated by the Secretary. The date of such hearing shall be not less than 30 days from the date of the publication in the **Federal Register**, and the place shall be in the State.

2. Within thirty (30) days of the date of the written notice specifying the date of the hearing, the State shall file a written notice with the Secretary stating whether or not it will appear and participate in the hearing. The notice shall specify the issues and grounds specified by the Secretary for termination which the State will oppose or contest and a statement of its reasons and grounds for opposing or contesting. Failure to file a written notice in the Office of the Secretary within thirty (30) days shall constitute a waiver of the opportunity for hearing, but the State may present or submit before the time fixed for the hearing written arguments and reasons why the Cooperative Agreement should not be terminated, and within the discretion of the Secretary may be permitted to appear and confer in person and present oral or written statements, and other documents relative to the proposed termination.

3. The hearing will be conducted by the Secretary. A record shall be made of the hearing and the State shall be entitled to obtain a copy of the transcript. The State shall be entitled to have legal and technical and other representatives present at the hearing or conference, and may present, either orally or in writing, evidence, information, testimony, documents, records, and materials as may be relevant and material to the issues involved.

F. *Notice of Withdrawal of Approval of Cooperative Agreement.*

1. After a hearing has been held with respect to a proposed termination of this Agreement under paragraph B of this Article, or the right to a hearing has been waived or forfeited by the State, the Secretary, after consideration of the evidence, information, testimony, and arguments presented to him shall advise the State of his decision. If the Secretary determines to withdraw approval of this Cooperative Agreement, he shall notify the State Regulatory Authority of his intended withdrawal of approval of the Cooperative Agreement, and afford the State an opportunity to present evidence satisfactory to the Secretary that the State has remedied the specified defects in its administration of this Cooperative Agreement. The Secretary shall state the period of time within which the defects in administration shall be remedied and satisfactory evidence presented to him, and upon failure of the State to do so within the time stated, the Secretary may thereupon withdraw his approval of the Cooperative Agreement without any further opportunity afforded to the State for a hearing.

2. After the close of the comment period required by paragraph D. 3. of this Article with respect to a proposal to terminate this Cooperative Agreement pursuant to paragraph C of this Article, the Secretary shall consider the comments received and after a review of the questions of law presented, shall publish notice of final action, either terminating the Cooperative Agreement or withdrawing the proposed termination, and stating his reasons therefor.

G. Nothing in this Article shall be construed as a waiver of any right the State Regulatory Authority may have to seek judicial review of any decision by the Secretary to terminate this Cooperative Agreement.

Article X. Reinstatement of Cooperative Agreement

If this Cooperative Agreement has been terminated, it may be reinstated upon application by the State and upon giving evidence satisfactory to the Secretary that the State can and will comply with all the provisions of the Cooperative Agreement, and has remedied all defects in administration for which this Cooperative Agreement was terminated.

Article XI. Amendments of Cooperative Agreement

This Cooperative Agreement may be amended by mutual agreement of the Governor and Secretary. An amendment proposed by one party shall be submitted to the other with a statement of the reasons for such proposed amendment. The party to whom the proposed amendment is submitted shall signify its acceptance or rejection of the proposed amendment, and if rejected shall state the reasons for rejection. If accepted, the amendment shall be adopted after rulemaking.

Article XII. Changes in State or Federal Standards

The Secretary of the Interior and/or the State of Utah may from time to time revise and promulgate new or revised performance or reclamation requirements or enforcement and administration procedures. The Secretary and the Governor shall immediately inform the other of any final changes in their respective laws or regulations. Each party shall, if it determines it to be necessary to keep this Cooperative Agreement in force, change or revise its respective laws or regulations. For changes which may be accomplished by rulemaking, each party shall have 6 months in which to make such changes. For changes which require legislative authorization, the State has until the close of its next legislative session at which such legislation can be considered in which to make the changes. If changes which are necessary for the State to have authority to administer and enforce Federal requirements are not made, then the termination provision of Article IX may be invoked.

Article XIII. Conflict of Interest

The State Regulatory Authority shall require its employees to comply with the requirements of 30 CFR 705.

Article XIV. Exchange of Information

A. *Organizational and Functional Statement.* The State Regulatory Authority and the Secretary shall advise

each other of the organization, structure, functions, and duties of the offices, departments, divisions, and persons within their organizations. Each shall promptly advise the other in writing of changes in personnel, officials, heads of a department or division, or a change in the functions or duties of persons occupying the principal offices within the organization. The State Regulatory Authority and the Secretary shall advise each other in writing of the location of its various offices, telephone numbers, addresses, and the names, location, telephone numbers of their respective mine inspectors and the area within the State for which such inspectors are responsible, and of any changes in such.

B. *Laws, Rules and Regulations.* The State Regulatory Authority and the Secretary shall provide each other with copies of their respective laws, rules and regulations and standards pertaining to the enforcement and administration of this Cooperative Agreement and promptly furnish copies of any final revision of such laws, rules, regulations and standards when the revision becomes effective.

Article XV. Reservation of Rights

This Cooperative Agreement shall not be construed as waiving or preventing the assertion of any rights the State of Utah and the Secretary may have under the Mineral Leasing Act, as amended, the Mineral Leasing Act for Acquired Lands, the Federal Land Policy and Management Act of 1976, the Surface Mining Control and Reclamation Act of 1977, the Constitution of the United States, the Constitution of the State or State laws, nor shall this Agreement be construed so as to result in the transfer of the Secretary's duties under sections 2(a), 2(b), and 2(a)(B) of the Federal Mineral Leasing Act, as amended, or his duty to approve mine plans, or his responsibilities with respect to the designation of Federal lands as unsuitable for mining in accordance with Section 522 of the Act, or to regulate other activities taking place on Federal lands.

Article XVI. Definitions

Terms and phrases used in this Agreement which are defined in 30 CFR Part 710 shall be given the meanings set forth in said definitions.

Dated: October 30, 1978.

Scott M. Matheson
Governor of Utah.

Dated: October 30, 1978.

Cleon Feight,
Director, Division of Oil, Gas, and Mining.

Dated: October 18, 1978.

Cecil D. Andrus,
Secretary of the Interior.

Appendix A

This Appendix A identifies the laws of the State of Utah and the regulations of the State Regulatory Authority which are incorporated into the 1978 Federal-State Cooperative Agreement between the State of Utah and the Secretary of the Interior pursuant to Article III. C. of said Cooperative Agreement. This Appendix is approved as part of the Cooperative Agreement. The requirements contained in the laws and regulations identified in this Appendix shall be applicable to surface coal mining and reclamation operations on Federal lands in accordance with the terms of the Cooperative Agreement. Included in this Appendix are:

1. Laws of the State of Utah:

(a) The provisions of the Utah Mined Land Reclamation Act Title 40, Chapter 8, Utah Code Annotated, 1953, as amended, which are specifically identified in (i)–(xxiii) hereof:

(i) § 40–8–1.
(ii) § 40–8–2.
(iii) § 40–8–3.
(iv) § 40–8–4, provided, however, that the 500-ton per year exclusion contained in the definition of "mining operations" shall not be included in Appendix A and shall not apply on Federal lands.
(v) § 40–8–5.
(vi) § 40–8–6, provided, however, that the 500-ton per year exclusion contained in the definition of "mining operations" shall not be included in Appendix A and shall not apply on Federal lands.
(vii) § 40–8–7(1), provided, however, that with respect to the application of subsection (1)(e) any bond applicable to the performance of duties on or affecting Federal lands shall conform to the requirements of Article VII of this Cooperative Agreement in addition to the requirements of state law.
(viii) § 40–8–8(1), (2), and (3).
(ix) § 40–8–9, provided, however, that this section shall be limited to actions taken by the State Regulatory Authority under state law pursuant to this Cooperative Agreement and nothing in this section or in this Cooperative Agreement shall be construed so as to create jurisdiction in a state court over actions taken by or pursuant to authority delegated by the Secretary, including the denial or approval of mining plans.
(x) § 40–8–10, provided, however that this section shall be limited to actions taken by the State Regulatory Authority under state law pursuant to this Cooperative Agreement and nothing in this section or in this Cooperative Agreement shall be construed so as to govern actions taken by or pursuant to authority delegated by the Secretary, including the denial or approval of mining plans.
(xi) § 40–8–11.
(xii) § 40–8–12.
(xiii) § 40–8–13(1), (3), (4), provided, however, that the "one time only" publication requirement relating to a "tentative decision" on a proposed agency action to approve a mining operation is not incorporated into this Appendix and shall not apply to Federal lands.
(xiv) § 40–8–14, provided, however, that any cash or securities posted in lieu of bond under this section conform to the requirements of Article VII of this Cooperative Agreement and applicable requirements of federal law; and provided, further that any bond applicable to the performance of duties on or affecting federal lands may be released only on consent of the Secretary in accordance with Article VII of this Cooperative Agreement; and also provided further that the bond may also be forfeited by the Secretary under federal law pursuant to Article VII of this Cooperative Agreement.
(xv) § 40–8–15.
(xvi) § 40–8–16(2), (3), and (4).
(xvii) § 40–8–17.
(xviii) § 40–8–18.
(xix) § 40–8–19.
(xx) § 40–8–20.
(xxi) § 40–8–21.
(xxii) § 40–8–22.
(xxiii) § 40–8–23.

2. Rules and Regulations of the Utah Board of Oil, Gas, and Mining, Division of Oil, Gas, and Mining including the amendments approved as Surface Mining Reclamation and Enforcement Provisions for coal adopted on May 25, 1978, except:

(i) The preamble of the rules pp. 66–67.
(ii) M–3 The paragraph following (h) due to the confidentiality portion which is not in conformity with the Act.
(iii) M–4.

Protocol for Cooperative Review of Mining and Reclamation Plans for Surface Coal Mining and Reclamation Operations on Federal Lands

I. *Purpose.* This Protocol is intended by the Utah Division of Oil, Gas, and Mining (hereinafter the "State

Regulatory Authority") and the Secretary to establish procedures governing the conduct of the respective Interior agencies and the State Regulatory Authority regarding the coordinated review of mining and reclamation plans, or modifications or revisions thereto for surface coal mining and reclamation operations on Federal lands pursuant to the Surface Mining Control and Reclamation Act of 1977, Pub. L. 95-87 (hereinafter referred to as the "Act"). These procedures are intended to implement the requirements of Article IV of the State/Federal Cooperative Agreement (hereinafter referred to as "Cooperative Agreement") between the State of Utah by its Governor and the Secretary dated , 1978, and are incorporated therein and made a part thereof.

II. *Procedures.* 1. Operators shall be required to submit identical copies of mining and reclamation plans and permit applications, or modifications or revisions thereto, to both the State Regulatory Authority and the Regional Director, Denver Region, Office of Surface Mining. The number of copies submitted to the State Regulatory Authority and the Regional Director shall be specified by regulation by each agency and may be changed according to need.

2. The State Regulatory Authority will be the point of contact for operators regarding matters subject to the requirements of the Act and Appendix A of the Cooperative Agreement. Following the initial submission of the mining plan and permit application, all correspondence from the State Regulatory Authority and the Secretary regarding matters subject to the requirements of the Act and Appendix A of the Cooperative Agreement will be coordinated and sent from the State Regulatory Authority on behalf of both. Interior agencies will not independently initiate contacts with operators regarding the completeness or deficiencies of plans and applications with respect to matters which are properly within the jurisdiction of a State Regulatory Authority under the Act, provided that any matters of concern raised on behalf of the Secretary are adequately addressed by the State Regulatory Authority in accordance with the provisions of this Protocol.

3. The Office of Surface Mining will coordinate all activities relative to the review of mining plans and permit applications for all concerned Interior agencies and will act as the point of contact for communications between the State Regulatory Authority and the Department of the Interior.

4. Review and evaluation of each mining plan and permit application, or modifications or revisions thereto, and the data or documentation submitted in support thereof, will be conducted independently, but concurrently, by the State Regulatory Authority and the respective Interior agencies having responsibility for review of mine plans. During such review and evaluation, the staffs of the State Regulatory Authority and each Interior agency will coordinate their respective activities through the Office of Surface Mining by informal contacts as appropriate.

5. Based upon the coordinated review, the State Regulatory Authority will draft a response letter to the operator outlining the status of the completeness and deficiencies of the plan and application with respect to the requirements of the Act and Appendix A to the Cooperative Agreement. Such draft letter will be sent to the Denver regional office, Office of Surface Mining, within 60 days of receipt of the plan and application. The Office of Surface Mining will coordinate review of the draft letter on behalf of Interior agencies. The Office of Surface Mining will communicate to the State Regulatory Authority within a reasonable time any proposed additions or modifications to the letter. If any such proposed additions or modifications are objected to by the State Regulatory Authority, a meeting will be held between the Regional Director, Office of Surface Mining, and the State Regulatory Authority to resolve the specified objections. If the Regional Director and the State Regulatory Authority cannot resolve such objections, the State Regulatory Authority and the Regional Director shall summarize their disagreement in writing and request a meeting with the Director, Office of Surface Mining, and such other representative of the Secretary as may be appropriate, to discuss a resolution of such objections. Following the resolution of such objections or in the absence of any such objections, the draft letter will be revised to incorporate the language proposed by the Office of Surface Mining and sent to the operator by the State Regulatory Authority, with a copy to the Regional Director, Office of Surface Mining.

6. The Secretary may at his discretion incorporate into the draft letter any matters related to mining plan review and approval which are not within the jurisdiction of the State Regulatory Authority and which the Secretary is required to address under any federal statute or regulation other than the Act. The State Regulatory Authority agrees to incorporate such matters into the draft at the Secretary's request. Failure to incorporate such matters into the draft letter shall not deprive the Secretary of the right to contact an operator directly regarding such matters. Whenever written communications regarding such matters are made directly between an Interior agency and an operator, the State Regulatory Authority shall be supplied with a copy.

7. The Secretary, acting by and through the Office of Surface Mining, will be given an opportunity to review and propose additions or modifications to all substantive written correspondence from the State Regulatory Authority in accordance with paragraph 5 hereof.

8. Copies of all written communications, data, documents, or other information received by the State Regulatory Authority from operators will be forwarded to the Office of Surface Mining by the State Regulatory Authority or sent directly to the Office of Surface Mining by the operator when requested to do so by the State Regulatory Authority.

9. The Secretary and the State Regulatory Authority agree to inform each other of any communciations received from the operator regarding any matter subject to this Protocol.

10. Either the Secretary or the State Regulatory Authority may request and schedule meetings with the operator or site inspections. No meeting with the operator or site inspection will be scheduled by either the Secretary or the State Regulatory Authority without adequate advance notice to the other party and an opportunity to participate.

11. Upon receipt of a mining and reclamation plan and permit application, or major modification or revision thereto, the State Regulatory Authority and the Office of Surface Mining will designate an Environmental Impact Statement team and coordinate the drafting of an Environmental Assessment or Environmental Impact Statement which will comply with the National Environmental Policy Act and any applicable requirements of State law. It is understood and agreed by the parties that no formal, final action regarding approval or disapproval of any pending plan and permit may be taken by either party until said requirement of law is met. In addition, the State Regulatory Authority shall take action as is necessary to prevent approval of the application by default under State law.

12. Upon completion of review and evaluation of the plan and application, or modifications or revisions thereto, by the State Regulatory Authority, the State Regulatory Authority shall notify the Regional Director, Office of Surface Mining, of any proposed action to be taken regarding approval or disapproval, including any proposed special conditions or stipulations. After receipt of concurrence with any such action from the respective Interior agencies with responsibilities for the review of mining plans under any Federal statute or regulation other than the Act, and upon concurrence with any such action by the Regional Director for the Office of Surface Mining, and following completion of any procedures referenced in paragraph 11 hereof, a joint recommendation by the Regional Director, Office of Surface Mining, on behalf of all Interior agencies and the State Regulatory Authority will be forwarded to the Secretary or his authorized delegee for final action. If the Regional Director and the State Regulatory Authority cannot agree upon such a recommendation, the State Regulatory Authority and the Regional Director shall summarize their disagreement in writing and request a meeting with the Director, Office of Surface Mining, and such other representatives of the Secretary as may be appropriate, to discuss what final action may be appropriate under the circumstances of the case. If the State Regulatory Authority approves the mining and reclamation plan or permit or request for amendment in whole or in part, it shall condition any approval on obtaining approval of the plan, permit or amendment from the Secretary so that mining cannot commence on Federal lands until the Secretary approves the mining and reclamation plan.

13. Any final approval of the mining plan and permit, or modifications or revisions thereto, by the parties which will create a right of appeal by any aggrieved person shall not be complete until the document recording such action is signed by both the Secretary (or his authorized delegee) and the authorized representative of the State Regulatory Authority.

III. *Interpretation.* (a) This Protocol shall be construed so as to give effect to the intent of the parties as set out in the Cooperative Agreement of which this is a part. Any words or phrases used in this protocol shall be defined in accordance with Article XVI of said Agreement.

(b) If any question of legal interpretation is raised by either party with respect to any matter subject to this Protocol, both the State Regulatory Authority and the Secretary shall defer to the opinion of the State Attorney General where interpretations of State law or regulations are involved, and to opinions of the Solicitor of the Department of Interior where interpretations of Federal law or regulations are involved.

IV. *Revisions to Protocol.* As a part of the Cooperative Agreement referenced in Part I hereof, this Protocol may be revised at any time during the duration of said Cooperative Agreement with the consent of the appropriate officer of the State Regulatory Authority and the Regional Director. Such revision shall become effective upon publication in the **Federal Register.**

30 CFR Part 211

Regulation of Coal Mining on Federal Lands in Wyoming; Federal/State Cooperative Agreement

AGENCY: Office of Surface Mining Reclamation and Enforcement and Geological Survey, Interior.

ACTION: Final rule.

SUMMARY: This final rule completes the approval and promulgation of a Federal/State cooperative agreement between the Department of the Interior and the State of Wyoming for the regulation of surface coal mining and reclamation operations on Federal lands in Wyoming.

EFFECTIVE DATE: June 11, 1979.

FOR FURTHER INFORMATION CONTACT: Donald Crane, Regional Director, Region V, Office of Surface Mining, 1823 Stout Street, Denver, Colorado 80202, (303) 837–5421.

SUPPLEMENTARY INFORMATION: This cooperative agreement modifies the prior cooperative agreement (30 CFR 211.77(a)) in accordance with the requirements of section 523(c) of the Surface Mining Control and Reclamation Act of 1977 (Pub. L. 95–87), "Surface Mining Act," and § 211.75(b) and (c) of Title 30 CFR. This cooperative agreement was published as a proposed rule on March 5, 1979 (44 FR 12052). This agreement establishes conditions for State regulation of surface coal mining and reclamation operations on Federal lands, and requirements for such operations on Federal lands including but not limited to (1) the adoption of State statutes and amended regulations containing new environmental protection standards and reclamation requirements applicable to surface coal mining and reclamation operations as substantive Federal law enforceable by the State and the United States; (2) the requirement that the State Regulatory authority exercise State enforcement powers on Federal lands so as to achieve results consistent with those which would be achieved by Federal enforcement pursuant to section 521 of the Surface Mining Act; (3) the creation of procedures for the cooperative review and approval of integrated mining and reclamation plans for surface coal mining and reclamation operations on federal lands or on commingled State and/or private lands and Federal lands; (4) the termination of such agreement in the event the State does not implement the permanent Federal lands program or receive approval of a permanent regulatory program under section 503 of the Surface Mining Act; and (5) the creation of requirements for joint Federal and State approval and release of performance bonds for surface coal mining and reclamation operations which include Federal lands.

Three comments were received in response to the proposed rulemaking. Two of the comments raised a similar issue:

The commenters object to the provision of Article IX that allows the proposed interim program agreement to become the permanent program agreement without any action by the Secretary. The commenters argue that the provision is inconsistent with Section 523(c) of the Surface Mining Act and Part 745 of 30 CFR. One of the commenters suggested alternate language for the agreement that would provide for automatic termination 120 days after the approval of a permanent State program unless the Secretary does not notify the State of inadequacies in the proposed permanent State program.

The objections appear to be grounded in a concern that the interim program agreement will become the permanent program agreement following approval of a permanent State program for Wyoming without the benefit of Secretarial and public review as set forth in 30 CFR Part 745.

The Secretary believes that the agreement is consistent with Section 523

of the Act. The commenters choose to read the first sentence of Section 523(c) as calling for creation of a new cooperative agreement following approval of a State program, starting with a *tabula rasa* regardless of whether a cooperative agreement was in existence in that State for the initial regulatory program. And yet the language of the first sentence merely states that a "State with an approved State program *may elect* to enter into a cooperative agreement * * *" (emphasis added). This is a general sentence which is silent as to how the election is to be implemented.

Assuming that under the more specific language of the second sentence in section 523(c), a cooperative agreement could be modified in such a fashion as to comply fully with not only the initial program requirements, but also the permanent program requirements, the commenters reading of Section 523(c), would attribute to Congress the imposition of a superfluous requirement, i.e., that an adequate agreement be terminated and a new one negotiated. Rather than attribute such a result to Congress, the Secretary has interpreted Section 523(c) in a more pragmatic fashion.

The language of Section 523(c) is silent as to the consequences of State program approval on an existing cooperative agreement. Rather than starting as the commenters do, from the assumption that an existing cooperative agreement must automatically be discarded upon approval of a State program regardless of the adequacy of that existing agreement, the Secretary has chosen to reserve that determination until State program approval. If, at that time, a State with an existing cooperative agreement elects to continue regulation of surface coal mining operations on Federal lands, the Secretary will determine whether the existing cooperative agreement remains adequate. If he determines the existing cooperative agreement is inadequate, the provisions of Article IX and XI will apply, as will 30 CFR Part 745. Should the Secretary determine that the agreement remains adequate, its termination consistent with the commenter's reading of Section 523(c) would be contrary to principles of good management and administrative efficiency.

Although the Secretary appreciates the commenter's concerns on this issue, for the reasons given, he believes the language of the cooperative agreement is consistent with Section 523(c) of the Act.

The third commenter states the proposed agreement is unacceptable because it:

a. will perpetuate the interim regulatory program;

b. was initiated prematurely;

c. fails to comply with Section 523(c) of SMCRA;

d. lacks correpondence (sic) with Section 521 (Enforcement);

e. is not supported by evidence of compliance with or capacity to comply with assurances upon which the agreement depends, including adequate State funding of the State Regulatory Agency.

As pointed out in the response to the first comment, the cooperative agreement will be reexamined when the permanent State program is approved. It will be revised or continued as appropriate for the permanent program. The interim program will not be perpetuated as suggested by the commenter's first argument. With regard to argument "b," the commenter appears to be confused between the modification of an existing agreement and the development of a permanent program agreement. Modification of existing agreements prior to the permanent program is clearly authorized by Section 523(c). Point "c" is covered by the response to the first comment and by the reply to "b."

Argument "d" appears to refer to the delegation of Federal authority to State inspectors to issue notices and orders. The Office believes that the Secretary has legal authority to delegate Federal enforcement responsibility to State inspectors. Through the cooperative agreement, the State agency responsible for administering and enforcing the terms of the agreement is acting as an authorized representative of the Secretary to regulate surface coal mining operations on Federal lands. This includes mine inspections. Section 521(a)(3) of the Act clearly states, "when, on the basis of a Federal inspection * * * the Secretary *or his authorized representative* determines * * * the Secretary or his *authorized representative* shall issue a notice to the permittee * * *." (emphasis added). If the authorized representative issues a notice or order consistent with an pursuant to Section 521(a)(3) and the permittee fails to comply, under the terms of Article VI (E) of the agreement the State shall report the failure to comply to the Secretary, and under Article VI (F) the Secretary may take appropriate legal action to correct conditions that violate Federal law or to suspend the right to conduct surface coal mining and reclamation operations. For these reasons, the Office believes that delegation of inspection and enforcement responsibilities to State inspectors is in full compliance with the Act, and the authority in Article VI (F) provides an effective enforcement tool to require compliance with a State inspector's orders.

Finally, with regard to point "e," through the award of grants to the State, OSM has determined that the State has adequate capacity and funds to comply with the agreement.

Other Information:

1. *Significance.* The Department of the Interior has determined that this document is not a significant rule and does not require a regulatory analysis under Executive Order 12044 and 43 CFR Part 14. This "Determination of Significance" document prepared by the Office of Surface Mining concludes that because a State/Federal cooperative agreement between the State of Wyoming and the Department has been in effect for quite some time, the modified agreement in question does not incorporate any changes or revisions which would impose a major social, economic, or recordkeeping burden on any level of Federal, State, or local government or upon industry. This document is available for public inspection in the Director's Office, Office of Surface Mining, Room 233, South Interior Building, 1951 Constitution Ave., NW., Washington, D.C. 20240.

2. Pursuant to Section 702(d) of the Surface Mining Act, adoption of this rule is part of the Secretary's implementation of the Federal Lands Program and is therefore exempt from the requirement to prepare a detailed statement pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

3. Because of the delay in the publication of this rule and the necessity to implement the provisions of the cooperative agreement, the Department has determined that good cause exists to make the rule effective upon the date of publication.

Dated: June 6, 1979.

Cecil D. Andrus,

Secretary.

1. Accordingly, Title 30 CFR 211.10(e)(1) is amended as follows:

§ 211.10 Exploration and mining plans.

* * * * *

(e) States with § 211.75(c) agreements.

* * *

(1) Wyoming. A federal coal lessee in the State of Wyoming who must submit

a mining plan under both State and Federal law shall submit to both the State Regulatory Authority and the Denver Regional Office, Office of Surface Mining, in lieu of the submission required in this Section, a mining plan or revision or modification to an approved plan containing the information required by or necessary for the State Regulatory Authority and the Secretary to determine compliance with the statutory, regulatory and other requirements identified in paragraph B1 of Article IV of the modified Cooperative Agreement, the statement required by paragraph B2 of Article IV of the modified Cooperative Agreement and the requirements of 30 CFR 211.10(c).

* * * * *

§ 211.76 [Deleted]

2. Title 30 CFR 211.76 is deleted in its entirety.

3. Title 30 CFR 211.77 is amended as follows:

§ 211.77 States with cooperative agreements.

(a) Wyoming. The administration and enforcement of reclamation requirements of Federal coal leases in Wyoming, subject to this Part, shall be done according to the cooperative agreement between the State of Wyoming and the Department which became effective February 1, 1977, as modified on October 26, 1978, and published on June 11, 1979.

4. The State of Wyoming and the Department enter into a modified Cooperative Agreement to designate the State of Wyoming as the principal party to administer surface coal mine reclamation operations on Federal leases in Wyoming to read as follows:

Cooperative agreement between the U.S. Department of the Interior and the State of Wyoming under section 523(c) of the Surface Mining Control and Reclamation Act of 1977, Pub. L. 95-87 (hereinafter referred to as the "Act") 30 U.S.C. 1273(c), between the State of Wyoming, acting by and through Ed Herschler, Governor (hereinafter referred to as the Governor) and the United States Department of the Interior, acting by and through the Secretary of the Interior (referred to as the Secretary).

Article I. Purpose

This Cooperative Agreement provides for a cooperative program between the United States Department of the Interior and the State of Wyoming with respect to regulation of surface coal mining and reclamation operations on Federal lands within the State of Wyoming. The basic purpose of this Agreement is to prevent duality of administration and enforcement of mining and reclamation requirements by providing for state regulation of surface coal mining and reclamation operations on Federal lands within the State.

Article II. Effective Date

This Cooperative Agreement is effective upon signing by the Secretary and the Governor and upon publication as rulemaking in the Federal Register, and shall remain in effect until terminated as provided in Article IX. This Cooperative Agreement constitutes a modification to, an extension of, and supersedes that Cooperative Agreement effective February 1, 1977, 42 FR 3644 (1977), 30 CFR 211.77(a).

Article III. Requirements for Cooperative Agreement

The Governor and the Secretary affirm that they will comply with all of the provisions of this Cooperative Agreement and will continue to meet all the conditions and requirements specified in this Article.

A. *Responsible Administrative Agency.* The Wyoming Department of Environmental Quality and the Environmental Quality Council (hereinafter referred to together as the "State Regulatory Authority"), is, and shall continue to be, the sole agency responsible for administering this Cooperative Agreement on behalf of the Governor on Federal lands throughout the State.

B. *Authority of State Agency.* The State Regulatory Authority designated in paragraph A of this Article has, and shall continue to have, authority to carry out this Cooperative Agreement.

C. *State Reclamation Law.* Enforcement of the environmental performance standards and reclamation requirements of Wyoming listed in Appendix A, will provide protection of the environment at least as stringent as would occur under the exclusive application of the standards and procedures set forth in the Act, and the regulations promulgated thereunder.

D. *Effectiveness of State Procedures.* The procedures of the State for enforcing the requirements listed in Appendix A, are and shall continue to be as effective as the procedures of the Department of the Interior.

E. *Inspection of Mines.* The State Regulatory Authority agrees that the State will inspect all surface and mining operations on Federal lands located in the State, in accordance with the minimum schedules in Article V.

F. *Enforcement.* The State affirms that it will enforce the requirements contained in Appendix A, in a manner that ensures effective protection of the environment and public health and safety consistent with the requirements of Article VI of this Agreement.

G. *Funds.* The State has devoted and will continue to devote, adequate funds to the administration and enforcement of the requirements listed in Appendix A. If this Cooperative Agreement has been carried out to the satisfaction of the Secretary, and if necessary funds have been appropriated, the Secretary shall reimburse the State of Wyoming as provided in Section 705(c) of the Act, for costs associated with carrying out responsibilities under the Cooperative Agreement. Reimbursement shall be in the form of annual grants and applications for said grants shall be processed and awarded in a timely and prompt manner. The Secretary shall advise the State of Wyoming within a reasonable period of time after the effective date of this modification of this Cooperative Agreement of the amount the Federal Government would have expended if the State had not entered into this Cooperative Agreement.

H. *Reports and Records.* The State Regulatory Authority shall make reports to the Secretary containing information respecting its compliance with the terms of this Cooperative Agreement, as the Secretary shall from time to time require. The State Regulatory Authority and the Secretary shall exchange, upon request, information developed under this Cooperative Agreement.

I. *Personnel.* The State Regulatory Authority shall have the necessary personnel to fully implement this Cooperative Agreement in accordance with the provisions of the Act.

J. *Equipment and Laboratories.* The State Regulatory Authority shall have equipment, laboratories, and facilities with which all inspections, investigations, studies, tests and analyses can be performed or determined, and which are necessary to carry out the requirements of this Cooperative Agreement, or have access to such facilities and personnel.

K. *Variances.* In accordance with § 35-11-112 of the Wyoming Environmental Quality Act, the State Regulatory Authority shall not grant any request for variances from any rule, regulation, standard, or permit if such variance would render any State requirement less stringent than a similar requirement contained in sections 502(c), 510(d), and 516 of the Act, and regulations promulgated thereunder or

any environmental protection and regulation provision of 30 CFR Part 211.

Article IV. Mining and Reclamation Plans and Permit Applications

A. State and Federal laws and regulations require the operator on Federal lands leased, permitted, or licensed for coal mining to receive approval from the State Regulatory Authority and the Secretary of a mining and reclamation plan and permit application, or amendment to an existing plan or permit (hereinafter referred to as the "application"), prior to conducting operations.

B. *Contents of Mining and Reclamation Plans and Permit Applications.* The Governor, the State Regulatory Authority, and the Secretary agree, and hereby require that an operator on Federal lands must submit a single application, which application must be submitted in the form required by the State Regulatory Authority along with any supplemental forms required by the Secretary and must include the following information:

1. The information required by, or necessary for the State Regulatory Authority and the Secretary to make a determination of compliance with:

a. Wyoming State Statutes sections 35–11–406 (a), (b)(i)–(ix), and (xiii)–(xviii), and (c).

b. Wyoming Land Quality Rules and Regulations.

c. The Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.;* 91 Stat. 445) and the regulations promulgated pursuant thereto.

d. The Mineral Leasing Act of 1920, as amended, 30 U.S.C. 181 *et seq.*

e. The environmental protection and regulation requirements, and resource conservation requirements of 30 CFR Part 211.

f. Applicable conditions of the lease or license unless such conditions would be contrary to the requirements of the Act.

g. The information required by applicable requirements of other federal laws.

2. A statement certifying that identical copies of the application have been given to both the State Regulatory Authority and the Secretary.

3. Upon receipt of each application the Office of Surface Mining shall designate a single contact person as its representative on all matters concerning that application and all communications concerning review of and final action on that application by either the State Regulatory Authority or the Secretary shall be conducted with or through this representative or with the Secretary.

4. If the State Regulatory Authority requires the operator to submit additional information, the operator shall submit the information to the State Regulatory Authority and to the Secretary. If the Secretary requires additional information, such request shall be directed to the operator through the State Regulatory Authority, and the operator shall submit the information to the State Regulatory Authority and the Secretary.

5. The State Regulatory Authority and the Secretary shall review the application concurrently and shall promptly notify each other of their proposed action on the application, including proposed conditions and stipulations if approval of the application is proposed. Upon receipt of notice of the proposed action of the Secretary, the State Regulatory Authority shall modify its proposed action on the application to include those matters and conditions in the Secretary's proposed action which were not included in the proposed action of the State Regulatory Authority, and shall consult with the Secretary's contact person for the purpose of agreeing to the final actions to be taken by the Secretary and the State Regulatory Authority on the application.

6. Any final approval of an application, or modifications or revisions thereto, by the State Regulatory Authority or the Secretary which would create a right of appeal by an aggrieved person shall be mutually acceptable to the State Regulatory Authority and the Secretary, and shall be concurrent. The State Regulatory Authority and the Secretary agree that each of them will not take final action approving an application which fails to comply with the requirements of the laws and regulations listed in paragraph B of this Article. The Secretary agrees that he will not take final action approving an application which fails to comply with an environmental protection requirement of the State which is more stringent than the requirements of Federal law.

7. In the event the State Regulatory Authority and the Secretary's contact person cannot agree to the final actions to be taken by the State Regulatory Authority and the Secretary on the application, the matter shall be referred to the Governor and the Secretary for resolution.

8. When acting on a mine plan, the Secretary reserves the right to impose such additional conditions or requirements not required by the Act or Appendix A of this Cooperative Agreement which are authorized or required by law or by his general authority to supervise the activities of persons on Federal lands.

Article V. Inspections

A. The State Regulatory Authority shall inspect without prior notice to the operator, as authorized by Wyoming state law as frequently as necessary, but at least quarterly, the area of operations as defined by the approved mining plan and state permit, and any other areas outside the area of operations which are or may be affected by the surface coal mining and reclamation operations on Federal lands. Such inspections shall be conducted for the purpose of determining whether the operator has complied with all applicable requirements of the Act and Appendix A hereof, all environmental and reclamation requirements of the approved mining plans or permits, but not to determine compliance with the development, diligent production, and resource recovery requirements established under the Mineral Leasing Act, as amended, or to regulate other activities on Federal lands not subject to the Act.

B. The State Regulatory Authority shall, subsequent to conducting any inspection, file with the Secretary a report adequately describing (1) the general conditions of the lands under lease, permit and license; (2) the manner in which the operations are being conducted; and (3) whether the operator is complying with applicable performance and reclamation requirements. A copy of this inspection report shall be furnished to the Secretary in accordance with regulations adopted pursuant to the Surface Mining Control and Reclamation Act. A copy of this report shall be furnished to the operator upon request, and shall be made available for public inspection during normal business hours at the office of the State Regulatory Authority and the Office of Surface Mining.

C. For the purpose of evaluating the manner in which this Cooperative Agreement is being carried out and to insure that performance and reclamation standards are being met, the Secretary shall conduct inspections of surface coal mining and reclamation operations on Federal lands, and shall provide the State Regulatory Authority with a copy of the report. Inspections by the Secretary may be in association with regular inspections by the State.

D. The Secretary may also conduct inspections to determine whether the operator is complying with requirements

that are unrelated to environmental protection and reclamation.

E. Personnel of the State and representatives of the Secretary shall be mutually available to serve as witnesses in enforcement actions taken by either party.

Article VI. Enforcement

A. If the State Regulatory Authority finds any conditions or practices, or violations of the requirments of Appendix A hereof or of an approved mining plan or permit which would authorize the issuance of an order of cessation under section 521(a)(2) of the Act, the State Regulatory Authority shall immediately exercise the discretion authorized by section 35–11–412 of the Wyoming Environmental Quality Act to suspend or revoke the license of an operator.

B. 1. When, during any inspection, any representative of the State Regulatory Authority who has been designated an authorized representative of the Secretary determines that any operator is in violation of the Act, any requirement of Appendix A, or any requirement of an approved mining plan or permit, but such violation would not require an action in accordance with paragraph A of this Article, the representative shall:

a. Report such violation(s) to the Administrator of the Land Quality Division, Wyoming Department of Environmental Quality (DEQ) and to the Director of the DEQ, who shall issue an order and Notice of Violation pursuant to W.S. 35–11–701; and

b. Issue a notice and abatement schedule to the operator consistent with and pursuant to section 521(a)(3) of the Act. Nothing in this Agreement prohibits the issuance of an order and Notice of Violation under Wyoming law concurrent with the action required by this paragraph.

2. When a notice and abatement schedule have been issued under B(1)(b) of this Article and a representative of the State Regulatory Authority who has been designated an authorized representative of the Secretary determines that the operator has failed to abate the violation within the time fixed or subsequently extended consistent with section 521(a)(3) of the Act, the representative shall immediately issue an order consistent with and pursuant to section 521(a)(3) of the Act.

C. For the purposes of implementing paragraphs B (1) and (2) of this Article, the Secretary delegates his authority to issue notices and orders pursuant to section 521(a)(3) of the Act to representatives of the State Regulatory Authority who shall each be identified by a letter of authorization signed by the Director of the Office of Surface Mining. Such letters of authorization shall be rendered null and void upon the termination of this Agreement or upon revocation by the Director.

D. The State shall promptly notify the Secretary of all violations of applicable laws, regulations, orders, approved mining and reclamation plans and permits subject to the Agreement and of all actions taken with respect to such violations.

E. Appeals or requests for relief from any action taken by an authorized representative of the Secretary acting in his capacity as the Secretary's representative pursuant to paragraphs B (1) and (2) of this Article shall be filed in accordance with the rules of procedures adopted by the Secretary (43 CFR Part 4).

F. This Agreement does not limit the Secretary's authority to seek cancellation of a federal coal lease under federal laws and regulations, or prevent the Secretary from taking appropriate legal or other actions to correct conditions or practices that violate federal law or Appendix A incorporated into federal law as a part of this Cooperative Agreement, or to suspend or revoke the right to conduct surface coal mining operations on federal lands in accordance with 30 CFR 211.72 or assess civil penalties in accordance with 30 CFR 211.78.

G. Failure of the State Regulatory Authority to enforce approved mining and reclamation plans, permits, and applicable laws and standards and regulations in accordance with this Agreement, shall be grounds for termination of this Cooperative Agreement.

Article VII. Bonds

A. *Amount and Responsibility.* The State Regulatory Authority and the Secretary shall require all operators on federal lands to submit a single bond payable to both the United States and the State Regulatory Authority. Such bond shall be of sufficient amount to comply with the requirements of both state and federal law and shall be conditioned upon compliance with all applicable requirements of federal law and Appendix A hereof.

B. *Notification.* Prior to releasing the operator from his obligations under the bond required by State law for federal lands, the State Regulatory Authority shall consult with and obtain the advice and consent of the Secretary.

C. *Release of Bond.* The State Regulatory Authority shall hold the operator responsible and liable for successful reclamation as required by State law.

D. Either the State Regulatory Authority or the Secretary may forfeit the bond under state or federal law.

Article VIII. Opportunity To Comply With Cooperative Agreement

The Secretary may, in his sole discretion, and without instituting or commencing proceedings for withdrawal of approval of the Cooperative Agreement, notify the State Regulatory Authority that it has failed to comply with the provisions of the Cooperative Agreement. The Secretary shall specify how the State has failed to comply and shall specify and state the period of time within which the defects in administration shall be remedied and satisfactory evidence presented to him that the State remedied the defects in administration and is in compliance with and has met the requirements of the Secretary. The period of time specified shall not be less than 30 days. Upon failure of the State Regulatory Authority to meet the requirements of the Secretary within the time specified, the Secretary may institute proceedings for withdrawal of approval of the Cooperative Agreement as set forth in Article IX.

Article IX. Termination of Cooperative Agreement

This Cooperative Agreement may be terminated as follows:

A. *Termination by the State.* The Cooperative Agreement may be terminated by the State upon written notice to the Secretary, specifying the date upon which the Cooperative Agreement shall be terminated, but which date of termination shall not be less than 90 days from the date of the notice.

B. *Termination by the Secretary.* The Cooperative Agreement may be terminated by the Secretary pursuant to paragraphs D, E, and F of this Article whenever the Secretary finds, after giving due notice to the State Regulatory Authority and affording the State Regulatory Authority an opportunity for a hearing:

1. That the State Regulatory Authority has failed to comply substantially with a provision of this Cooperative Agreement; or

2. That the State Regulatory Authority has failed to comply with any assurance given by the State upon which this Cooperative Agreement is based, or any

condition or requirement which is specified in Article III.

C. *Termination by Operation of Law.* This Cooperative Agreement shall terminate by operation of law under any of the following circumstances:

1. When no longer authorized by Federal laws and regulations or Wyoming laws and regulations;

2. When a State program is finally disapproved, pursuant to Section 503 of this Act, or an approved State program is suspended or revoked pursuant to the Act or regulations promulgated pursuant thereto. Provided further that upon suspension of an approved State Program this Cooperative Agreement shall be suspended for the same period of time and shall be deemed reinstated upon reinstatement of the State Program.

3. If the Secretary determines that this Cooperative Agreement is not adequate for the purpose of implementing the permanent regulatory program requirements after approval of a State Program pursuant to § 503 of the Act. Notice of this determination shall be given in writing to the State Regulatory Authority and shall specify the inadequacies of this Agreement. This Cooperative Agreement shall terminate within 120 days of said notice unless amended by mutual agreement of the State Regulatory Authority and the Secretary to remedy the inadequacies identified by the Secretary in his notice.

4. Following promulgation of a federal lands program pursuant to Section 523(a) of the Act in the event the Secretary determines in writing that Wyoming lacks the necessary personnel, legal authority, or funding to fully implement the federal lands program in accordance with the provisions of the Act.

D. *Notice of Proposed Termination.* Whenever the Secretary proposes to terminate the Cooperative Agreement he shall:

1. Give written notice to the Governor and to the State Regulatory Authority specified in Article III.

2. Specify and set out in the written notice the grounds upon which he proposes to terminate this Cooperative Agreement.

3. The Secretary shall also publish a notice in the **Federal Register** containing items 1 and 2 of this paragraph, and specifying a minimum 30 days for comment by interested persons.

E. *Opportunity for Hearing.* Whenever the Secretary proposes to terminate this Cooperative Agreement pursuant to paragraph B hereof, in addition to the notice required by paragraph D, he shall:

1. Specify in the notices required by paragraph D the date and place where the State will be afforded an opportunity for hearing and to show cause why this Cooperative Agreement should not be terminated by the Secretary. The date of such hearing shall be not less than 30 days from the date of the publication in the **Federal Register**, and the place shall be in the State.

2. Within thirty (30) days of the date of the written notice specifying the date of the hearing, the State shall file a written notice with the Secretary stating whether or not it will appear and participate in the hearing. The notice shall specify the issues and grounds specified by the Secretary for termination which the State will oppose or contest and a statement of its reasons and grounds for opposing or contesting. Failure to file a written notice in the Office of the Secretary within thirty (30) days shall constitute a waiver of the opportunity for hearing, but the State may present or submit before the time fixed for the hearing written arguments and reasons why the Cooperative Agreement should not be terminated, and within the discretion of the Secretary may be permitted to appear and confer in person and present oral or written statements, and other documents relative to the proposed termination.

3. The hearing will be conducted by the Secretary. A record shall be made of the hearing and the State shall be entitled to obtain a copy of the transcript. The State shall be entitled to have legal and technical and other representatives present at the hearing or conference, and may present, either orally or in writing, evidence, information, testimony, documents, records, and materials as may be relevant and material to the issues involved.

F. *Notice of Withdrawal of Approval of Cooperative Agreement.* 1. After a hearing has been held with respect to a proposed termination of this Agreement under paragraph B of this Article, or the right to a hearing has been waived or forfeited by the State, the Secretary, after consideration of the evidence, information, testimony, and arguments presented to him shall advise the State of his decision. If the Secretary determines to withdraw approval of this Cooperative Agreement, he shall notify the State Regulatory Authority of his intended withdrawal of approval of the Cooperative Agreement, and afford the State an opportunity to present evidence satisfactory to the Secretary that the State has remedied the specified defects in its administration of this Cooperative Agreement. The Secretary shall state the period of time within which the defects in administration shall be remedied and satisfactory evidence presented to him, and upon failure of the State to do so within the time stated, the Secretary may thereupon withdraw his approval of the Cooperative Agreement without any further opportunity afforded to the State for a hearing.

2. After the close of the comment period required by paragraph D. 3. of this Article with respect to a proposal to terminate this Cooperative Agreement pursuant to paragraph C of this Article, the Secretary shall consider the comments received and after a review of the questions of law presented, shall publish notice of final action, either terminating the Cooperative Agreement or withdrawing the proposed termination, and stating his reasons therefor.

G. Nothing in this Article shall be construed as a waiver of any right the State Regulatory Authority may have to seek judicial review of any decision by the Secretary to terminate this Cooperative Agreement.

Article X. Reinstatement of Cooperative Agreement

If this Cooperative Agreement has been terminated, it may be reinstated upon application by the State and upon giving evidence satisfactory to the Secretary that the State can and will comply with all the provisions of the Cooperative Agreement, and has remedied all defects in administration or law for which this cooperative Agreement was terminated.

Article XI. Amendments of Cooperative Agreement

This Cooperative Agreement may be amended by mutual agreement of the Governor and Secretary. An amendment proposed by one party shall be submitted to the other with a statement of the reasons for such proposed amendment. The amendment shall be adopted after rulemaking and the party to whom the proposed amendment is submitted shall signify its acceptance or rejection of the proposed amendment, and if rejected shall state the reasons for rejection.

Article XII. Changes in State or Federal Standards

The Secretary of the Interior and/or the State of Wyoming may from time to time revise and promulgate new or revised performance or reclamation requirements or enforcement and administration procedures. The Secretary and the Governor shall

immediately inform the other of any final changes in their respective laws or regulations. Each party shall, if it determines it to be necessary to keep this Cooperative Agreement in force, change or revise its respective laws or regulations. For changes which may be accomplished by rulemaking, each party shall have six months in which to make such changes. For changes which require legislative authorization, the State has until the close of its next legislative session at which such legislation can be considered in which to make the changes. If changes which are necessary for the State to have authority to administer and enforce Federal requirements are not made, then the termination provision of Article IX may be invoked.

Article XIII. Conflict of Interest

The State Regulatory Authority shall require its employees to comply with the requirements of 30 CFR 705.

Article XIV. Exchange of Information

A. *Organizational and Functional Statement.* The State Regulatory Authority and the Secretary shall advise each other of the organization, structure, functions, and duties of the offices, departments, divisions, and persons within their organizations. Each shall promptly advise the other in writing of changes in personnel, officials, heads of a department or division, or a change in the functions or duties of persons occupying the principal offices within the organization. The State Regulatory Authority and the Secretary shall advise each other in writing of the location of its various offices, addresses, telephone numbers, and the names, location and telephone numbers of their respective mine inspectors and the area within the State for which such inspectors are responsible, and of any changes in such.

B. *Laws, Rules, and Regulations.* The State Regulatory Authority and the Secretary shall provide each other with copies of their respective laws, rules and regulations and standards pertaining to the enforcement and administration of this Cooperative Agreement and promptly furnish copies of any final revision of such laws, rules, regulations, and standards when the revision becomes effective.

Article XV. Reservation of Rights

This Cooperative Agreement shall not be construed as waiving or preventing the assertion of any rights the Governor and the Secretary may have under the Mineral Leasing Act, as amended, the Mineral Leasing Act for Acquired Lands, the Surface Mining Control and Reclamation Act of 1977, the Federal Land Policy and Management Act, the Constitution of the United States, the Constitution of the State or State laws, nor shall this Agreement be construed so as to result in the transfer of the Secretary's duties under sections 2(a), 2(b), and 2(a)(3) of the Federal Mineral Leasing Act, as amended, or his responsibilities for designation of Federal lands as unsuitable for mining in accordance with Section 522(b) of the Act, or to regulate other activities taking place on Federal lands.

Article XVI. Definitions

Terms and phrases used in this agreement which are defined in 30 CFR Part 700 or Part 710 shall be given the meanings set forth in said definitions.

Dated: October 26, 1978.

Ed Herschler,

Governor of Wyoming.

Dated: October 26, 1978.

Robert E. Sundin,

Director, Department of Environmental Quality.

Dated: October 26, 1978.

Cecil D. Andrus,

Secretary of the Interior.

Appendix A

This Appendix A indentifies the laws of the State of Wyoming and the regulations of the State Regulatory Authority which are incorporated into the 1978 Federal-State Cooperative Agreement between the State of Wyoming and the Secretary of the Interior pursuant to Article III. C. of said Cooperative Agreement. This Appendix is approved as part of the Cooperative Agreement. The requirements contained in the laws and regulations identified in this Appendix shall be applicable to surface coal mining and reclamation operations on federal lands in accordance with the terms of the Cooperative Agreement. Included in this Appendix are:

1. Laws of the State of Wyoming:

(a) The provisons of the Wyoming Environmental Quality Act, W.S. § 35–11–101 to § 35–11–1104 (1977), as amended, including Enrolled Act No. 31, House of Representatives, 44th Legislature of the State of Wyoming, 1978 Session, which are specifically identified in (i)–(xxx) hereof:

(i) § 35–11–103(e)(i)–(xx).

(ii) § 35–11–109.

(iii) § 35–11–110.

(iv) § 35–11–112, provided, however, that subsection (a)(v) is not included in this Appendix and shall not be applicable to federal lands.

(v) § 35–11–406(a)(i)–(vi).

(vi) § 35–11–406.

(vii) § 35–11–406 (a), (d), (f), and (g).

(viii) § 35–11–406 (a), (b)(i)–(ix), (xiii)–(xix), (c) and (h).

(ix) § 35–11–407.

(x) § 35–11–408.

(xi) § 35–11–409.

(xii) § 35–11–410.

(xiii) § 35–11–411.

(xiv) § 35–11–412.

(xv) § 35–11–415.

(xvi) § 35–11–416, except that this section shall not apply where the surface owner is the United States in which case the laws of the United States shall exclusively apply.

(xvii) § 35–11–417, provided, however, that any bond applicable to the performance of duties on or affecting federal lands shall conform to the requirements of Article VII of this Cooperative Agreement in addition to the requirements of state laws.

(xviii) § 35–11–418, provided, however, that any cash or securities posted in lieu of bond under this section conform to the requirements of Article VII of this Cooperative Agreement and applicable requirements of federal law.

(xix) § 35–11–419.

(xx) § 35–11–420.

(xxi) § 35–11–421, provided, however, that the bond may also be forfeited by the Secretary under federal law pursuant to Article VII of this Cooperative Agreement.

(xxii) § 35–11–422.

(xxiii) § 35–11–423, provided, however, that any bond applicable to the performance of duties on or affecting federal lands may be released only on consent of the Secretary in accordance with Article VII of this Cooperative Agreement.

(xxiv) § 35–11–601, provided, however, that this section shall not apply to permits and mining plans applicable to federal lands approved by the Secretary, but shall only apply to Wyoming rules, regulations, or standards incorporated into this Appendix A which are determined by the Secretary pursuant to 30 CFR § 211.75(a) to be more stringent than the federal standard(s) which address the same subject matter. Any variance granted pursuant to this section with respect to such more stringent standards shall comply with the requirements of Article III. K. of this Cooperative Agreement.

(xxv) § 35–11–801, provided, however, that this section shall be limited to actions taken by the State Regulatory Authority pursuant to this Cooperative Agreement and nothing in this section or in this Cooperative Agreement shall be construed so as to create jurisdiction in

the Wyoming Quality Council over actions taken by the Secretary, including the denial or approval of mining plans.

(xxvi) § 35–11–802.

(xxvii) § 35–11–901, provided, however, that the imposition of a penalty by the State pursuant to this section shall not be construed as barring the Secretary from assessing a penalty pursuant to 30 CFR 211.78.

(xxviii) § 35–11–902.

(xxix) § 35–11–1001(a), provided, however, that this section shall be limited to actions taken by the State Regulatory Authority pursuant to this Cooperative Agreement and nothing in this section or in this Cooperative Agreement shall be construed so as to create jurisdiction in a state court over actions taken by the Secretary, including the denial or approval of mining plans.

(xxx) § 35–11–1101.

2. Regulations of the Wyoming Department of Environmental Quality, Land Quality Division, including the amendments approved by the Environmental Quality Council and filed with the Wyoming Secretary of State on September 5, 1978, except:

(i) Section 2. Definitions.

(32) *Subirrigation.* The second sentence of the Wyoming definitions shall not be included in this Appendix A. For the purposes of implementing this Cooperative Agreement only the first sentence shall apply on federal lands: "Irrigation of plants with water delivered to the roots from underneath."

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

This is a voluntary program. (See OFR NOTICE FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	MSPB*/OPM*		CSA	MSPB*/OPM*
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

*NOTE: As of January 1, 1979, the Merit Systems Protection Board (MSPB) and the Office of Personnel Management (OPM) will publish on the Tuesday/Friday schedule. (MSPB and OPM are successor agencies to the Civil Service Commission.)

REMINDERS

The items in this list were editorially compiled as an aid to Federal Register users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.

Rules Going Into Effect Today

HOUSING AND URBAN DEVELOPMENT DEPARTMENT

Interstate Land Sales Registration Office—

21442 4-10-79 / Registration, advertising, sales practices and posting of notices of suspension regulations
[Effective date corrected at 44 FR 22069, 4-13-79]

TRANSPORTATION DEPARTMENT

CONTINUED INSIDE

Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies of 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Area Code 202-523-5240

33679 **Housing** HUD requires that payments on 312 loans be applied first to accrued interest and then to outstanding principal; effective 7-12-79

33804 **New Construction Program** HUD/FHC proposes to revise its regulations to produce clarity, completeness, and coordination; comments by 8-13-79 (Part VII of this issue)

33695 **Narcotic Raw Materials** Justice/DEA request comments on advanced notice of proposed rulemaking on limiting importation; comments by 7-12-79

33746 **Migrant and Seasonal Farmworker Programs** Labor/ETA extends acceptance period for preapplication to 6-25-79 if postmarked by original deadline of 6-1-79

33697 **Redwood Employes Protection** Labor/Secy proposes that Labor Management Services Administration has responsibility for all provisions concerning affected employee benefits; comments by 8-16-79

33708 **Employee Retirement Income Security** Labor proposes exemption from reporting and disclosure requirements of the Act of 1974; comments by 8-21-79

33711 **Public Participation Procedures** USDA/FS extends comment period to 7-9-79 on formulation of standards, criteria and guidelines

33679 **Uniformed Services Benefits** DOD/Secy clarifies position of "last pay" for Civilian Health and Medical Program of the Uniformed Services (CHAMPUS)

33601 **Animal Shipping Containers** USDA/APHIS issues request for information relative to minimum ventilation standards; comments by 8-13-79 (Part VI of this issue)

33797 **Multicandidate Political Committees** FEC announces availability of comprehensive index (Part V of this issue)

33760 **Sunshine Act Meetings**

Presidential Documents

Title 3—

The President

REORGANIZATION PLAN NO. 1 OF 1979

Prepared by the President and transmitted to the Senate and House of Representatives in Congress assembled, April 2, 1979, pursuant to the provisions of Chapter 9 of Title 5 of the United States Code.

Office of the Federal Inspector for Construction of the Alaska Natural Gas Transportation System

Part I. Office of the Federal Inspector and Transfer of Functions

Section 101. *Establishment of the Office of Federal Inspector for the Alaska Natural Gas Transportation System*

(a) There is hereby established as an independent establishment in the executive branch, the Office of the Federal Inspector for the Alaska Natural Gas Transportation System (the "Office").

(b) The Office shall be headed by a Federal Inspector for the Alaska Natural Gas Transportation System (the "Federal Inspector") who shall be appointed by the President, by and with the advice and consent of the Senate, and shall be compensated at the rate now or hereafter prescribed by law for Level III of the Executive Schedule, and who shall serve at the pleasure of the President.

(c) Each Federal agency having statutory responsibilities over any aspect of the Alaska Natural Gas Transportation System shall appoint an Agency Authorized Officer to represent that authority on all matters pertaining to preconstruction, construction, and initial operation of the system.

Section 102. *Transfer of Functions to the Federal Inspector*

Subject to the provisions of Sections 201, 202, and 203 of this Plan, all functions insofar as they relate to enforcement of Federal statutes or regulations and to enforcement of terms, conditions, and stipulations of grants, certificates, permits and other authorizations issued by Federal agencies with respect to pre-construction, construction, and initial operation of an "approved transportation system" for transport of Canadian natural gas and "Alaskan natural gas," as such terms are defined in the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719 *et seq.*), hereinafter called the "Act", are hereby transferred to the Federal Inspector. This transfer shall vest in the Federal Inspector exclusive responsibility for enforcement of all Federal statutes relevant in any manner to pre-construction, construction, and initial operation. With respect to each of the statutory authorities cited below, the transferred functions include all enforcement functions of the given agencies or their officials under the statutes as may be related to the enforcement of such terms, conditions, and stipulations, including but not limited to the specific sections of the statute cited. "Enforcement", for purposes of this transfer of functions, includes monitoring and any other compliance or oversight activities reasonably related to the enforcement process. These transferred functions include:

(a) Such enforcement functions of the Administrator or other appropriate official or entity in the Environmental Protection Agency related to compliance with: national pollutant discharge elimination system permits provided for in Section 402 of the Federal Water Pollution Control Act (33 U.S.C. 1342); spill prevention, containment and countermeasure plans in Section 311 of the Federal Water Pollution Control Act (33 U.S.C. 1321); review of the Corps of Engineers' dredged and fill material permits issued under Section 404 of the

Federal Water Pollution Control Act (33 U.S.C. 1344); new source performance standards in Section 111 of the Clean Air Act, as amended by the Clean Air Act Amendments of 1977 (42 U.S.C. 7411); prevention of significant deterioration review and approval in Sections 160–169 of the Clean Air Act, as amended by the Clean Air Amendments of 1977 (42 U.S.C. 7470 *et seq.*); and the resource conservation and recovery permits issued under the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6901 *et seq.*);

(b) Such enforcement functions of the Secretary of the Army, the Chief of Engineers, or other appropriate officer or entity in the Corps of Engineers of the United States Army related to compliance with: dredged and fill material permits issued under Section 404 of the Federal Water Pollution Control Act (33 U.S.C. 1344); and permits for structures in navigable waters, issued under Section 10 of the Rivers and Harbors Appropriation Act of 1899 (33 U.S.C. 403);

(c) Such enforcement functions of the Secretary or other appropriate officer or entity in the Department of Transportation related to compliance with: the Natural Gas Pipeline Safety Act of 1968, as amended (49 U.S.C. 1671, *et seq.*) and the gas pipeline safety regulations issued thereunder; the Federal Aviation Act of 1958, as amended (49 U.S.C. 1301, *et seq.*) and authorizations and regulations issued thereunder; and permits for bridges across navigable waters, issued under Section 9 of the Rivers and Harbors Appropriation Act of 1899 (33 U.S.C. 401);

(d) Such enforcement functions of the Secretary or other appropriate officer or entity in the Department of Energy and such enforcement functions of the Commission, Commissioners, or other appropriate officer or entity in the Federal Energy Regulatory Commission related to compliance with: the certificates of public convenience and necessity, issued under Section 7 of the Natural Gas Act, as amended (15 U.S.C. 717f); and authorizations for importation of natural gas from Alberta as predeliveries of Alaskan gas issued under Section 3 of the Natural Gas Act, as amended (15 U.S.C. 717b);

(e) Such enforcement functions of the Secretary or other appropriate officer or entity in the Department of the Interior related to compliance with: grants of rights-of-way and temporary use permits for Federal land, issued under Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185); land use permits for temporary use of public lands and other associated land uses, issued under Sections 302, 501, and 503–511 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732, 1761, and 1763–1771); materials sales contracts under the Materials Act of 1947 (30 U.S.C. 601–603); rights-of-way across Indian lands, issued under the Rights of Way Through Indian Lands Act (25 U.S.C. 321, *et seq.*); removal permits issued under the Materials Act of 1947 (30 U.S.C. 601–603); approval to cross national wildlife refuges, National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd–668jj) and the Upper Mississippi River Wildlife and Fish Refuge Act (16 U.S.C. 721–731); wildlife consultation in the Fish and Wildlife Coordination Act (16 U.S.C. 661 *et seq.*); protection of certain birds in the Migratory Bird Treaty Act (16 U.S.C. 703 *et seq.*); Bald and Golden Eagles Protection Act (16 U.S.C. 668–668d); review of Corps of Engineers dredged and fill material permits issued under Section 404 of the Federal Water Pollution Control Act (33 U.S.C. 1344); rights-of-way across recreation lands issued under the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 4601–4–4601–11); historic preservation under the National Historic Preservation Act of 1966 as amended (16 U.S.C. 470–470f); permits issued under the Antiquities Act of 1906 (16 U.S.C. 432, 433); and system activities requiring coordination and approval under general authorities of the National Trails System Act, as amended (16 U.S.C. 1241–1249), the Wilderness Act, as amended (16 U.S.C. 1131–1136), the Wild and Scenic Rivers Act, as amended (16 U.S.C. 1271–1287), the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), the Act of April 27, 1935 (prevention of soil erosion) (16 U.S.C. 590a–f), and an Act to Provide for the Preservation of Historical and Archeological Data, as amended (16 U.S.C. 469–469c);

(f) Such enforcement functions of the Secretary or other appropriate officer or entity in the Department of Agriculture, insofar as they involve lands and programs under the jurisdiction of that Department, related to compliance with: associated land use permits authorized for and in conjunction with grants of rights-of-way across Federal lands issued under Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185); land use permits for other associated land uses issued under Sections 501 and 503–511 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1761, 1763–1771), under the Organic Administration Act of June 4, 1897, as amended (16 U.S.C. 473, 474–482, 551), and under Title III of the Bankhead-Jones Farm Tenant Act of 1937, as amended (7 U.S.C. 1010–1012); removal of materials under the Materials Act of 1947 (30 U.S.C. 601–603) and objects of antiquity under the Antiquities Act of 1906 (16 U.S.C. 432, 433); construction and utilization of national forest roads under the Roads and Trails System Act of 1964 (16 U.S.C. 532–536); and system activities requiring coordination and approval under general authorities of the National Forest Management Act of 1976 (16 U.S.C. 1600 *et seq.*); the Multiple Use-Sustained-Yield Act of 1960 (16 U.S.C. 528–531); the Forest and Rangelands Renewable Resources Planning Act of 1974 (16 U.S.C. 1601–1610); the National Trails System Act, as amended (16 U.S.C. 1241–1249); the Wilderness Act, as amended (16 U.S.C. 1131–1136); the Wild and Scenic Rivers Act, as amended (16 U.S.C. 1271–1287); the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 460 *et seq.*); the Federal Water Pollution Control Act of 1972 (33 U.S.C. 1151 *et seq.*); the Fish and Wildlife Coordination Act and Fish and Game Sanctuaries Act (16 U.S.C. 661 *et seq.* and 694, 694a–b, respectively); the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470–470f); an Act to Provide for the Preservation of Historical and Archeological Data, as amended (16 U.S.C. 469–469c); the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*); the Watershed Protection and Flood Prevention Act, as amended (16 U.S.C. 1001 *et seq.*); the Soil and Water Conservation Act of 1977 (16 U.S.C. 2001 *et seq.*); and the Act of April 27, 1935 (prevention of soil erosion) (16 U.S.C. 590a–f);

(g) Such enforcement functions of the Secretary or other appropriate officer or entity in the Department of the Treasury related to compliance with permits for interstate transport of explosives and compliance with regulations for the storage of explosives, Title XI of the Organized Crime Control Act of 1970 (18 U.S.C. 841–848);

(h) (1) The enforcement functions authorized by, and supplemental enforcement authority created by the Act (15 U.S.C. 719 *et seq.*);

(2) All functions assigned to the person or board to be appointed by the President under Section 7(a)(5) of the Act (15 U.S.C. 719e); and

(3) Pursuant to Section 7(a)(6) of the Act (15 U.S.C. 719e), enforcement of the terms and conditions described in Section 5 of the *Decision and Report to the Congress on the Alaska Natural Gas Transportation System,* as approved by the Congress pursuant to Public Law 95–158 (91 Stat. 1268), November 2, 1977, (hereinafter the "*Decision*").

Part II. Other Provisions

Section 201. *Executive Policy Board*

The Executive Policy Board for the Alaska Natural Gas Transportation System, hereinafter the "Executive Policy Board", which shall be established by executive order, shall advise the Federal Inspector on the performance of the Inspector's functions. All other functions assigned, or which could be assigned pursuant to the *Decision,* to the Executive Policy Board are hereby transferred to the Federal Inspector.

Section 202. *Federal Inspector and Agency Authorized Officers*

(a) The Agency Authorized Officers shall be detailed to and located within the Office. The Federal Inspector shall delegate to each Agency Authorized Officer the authority to enforce the terms, conditions, and stipulations of each

grant, permit, or other authorization issued by the Federal agency which appointed the Agency Authorized Officer. In the exercise of these enforcement functions, the Agency Authorized Officers shall be subject to the supervision and direction of the Federal Inspector, whose decision on enforcement matters shall constitute "action" for purposes of Section 10 of the Act (15 U.S.C. 719h).

(b) The Federal Inspector shall be responsible for coordinating the expeditious discharge of nonenforcement activities by Federal agencies and coordinating the compliance by all the Federal agencies with Section 9 of the Act (15 U.S.C. 719g). Such coordination shall include requiring submission of scheduling plans for all permits, certificates, grants or other necessary authorizations, and coordinating scheduling of system-related agency activities. Such coordination may include serving as the "one window" point for filing for and issuance of all necessary permits, certificates, grants or other authorizations, and, consistent with law, Federal government requests for data or information related to any application for a permit, certificate, grant or other authorization. Upon agreement between the Federal Inspector and the head of any agency, that agency may delegate to the Federal Inspector any statutory function vested in such agency related to the functions of the Federal Inspector.

(c) The Federal Inspector and Agency Authorized Officers in implementing the enforcement authorities herein transferred shall carry out the enforcement policies and procedures established by the Federal agencies which nominally administer these authorities, except where the Federal Inspector determines that such policies and procedures would require action inconsistent with Section 9 of the Act (15 U.S.C. 719g).

(d) Under the authority of Section 15 of the Act (15 U.S.C. 719m), the Federal Inspector will undertake to obtain appropriations for all aspects of the Federal Inspector's operations. Such undertaking shall include appropriations for all of the functions specified in the Act and in the general terms and conditions of the *Decision* as well as for the enforcement activities of the Federal Inspector. The Federal Inspector will consult with the various Federal agencies as to resource requirements for enforcing their respective permits and other authorizations in preparing a unified budget for the Office. The budget shall be reviewed by the Executive Policy Board.

Section 203. *Subsequent Transfer Provision*

(a) Effective upon the first anniversary of the date of initial operation of the Alaska Natural Gas Transportation System, the functions transferred by Section 102 of this Plan shall be transferred to the agency which performed the functions on the date prior to date the provisions of Section 102 of this Plan were made effective pursuant to Section 205 of this Plan.

(b) Upon the issuance of the final determination order by the Director of the Office of Management and Budget for the transfers provided for by subsection (a) of this section, the Office and the position of Federal Inspector shall, effective on the date of that order, stand abolished.

Section 204. *Incidental Transfers*

So much of the personnel, property, records and unexpended balances of appropriations, allocations and other funds employed, used, held, available, or to be made available in connection with the functions transferred under this Plan, as the Director of the Office of Management and Budget shall determine, shall be transferred to the appropriate agency or component at such time or times as the Director of the Office of Management and Budget shall provide, except that no such unexpended balances transferred shall be used for purposes other than those for which the appropriation was originally made. The Director of the Office of Management and Budget shall provide for the terminating of the affairs of the Office and the Federal Inspector upon their abolition pursuant to this Plan and for such further measures and dispositions as such Director deems necessary to effectuate the purposes of this Plan.

Section 205. *Effective Date*

This Plan shall become effective at such time or times as the President shall specify, but not sooner than the earliest time allowable under Section 906 of Title 5 of the United States Code, except that the provisions of Section 203 shall occur as provided by the terms of that Section.

Vol. 44, No. 114
Tuesday, June 12, 1979

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 526, 531, 545, 563

[No. 79-304]

Federal Home Loan Bank System, Federal Savings and Loan System, Federal Savings and Loan Insurance Corporation; Revised Rates on Savings Accounts

May 30, 1979.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Bank Board has adopted the following amendments which are intended to provide additional returns to savers:

(1) Authorization of a maximum rate on regular (passbook) accounts of 5.5%.

(2) Creation of a new savings account category with a 4-year minimum maturity and a maximum rate of return one percent below the average 4-year rate based on the yield curve for United States Treasury Securities as determined by the U.S. Department of the Treasury.

(3) Elimination of prescribed minimum amounts on all certificate accounts except the money market certificate.

(4) Adoption of a new prescribed penalty for withdrawal prior to maturity applicable to all certificate accounts including money market certificates. On certificate accounts with a maturity of one year or less, the penalty is forfeiture of three months earnings on amounts withdrawn. On accounts with a maturity greater than one year, the penalty is forfeiture of six months earnings on amounts withdrawn.

(5) Adoption of a new Bank Board Policy Statement which would permit member institutions, in certain circumstances, to accept pooled funds.

In addition, the Bank Board has adopted a Policy Statement reaffirming that member institutions are prohibited from offering repurchase-type agreements to consumers.

EFFECTIVE DATE: July 1, 1979.

FOR FURTHER INFORMATION CONTACT: John R. Hall, Attorney, or Kathleen E. Topelius, Attorney, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552, (202-377-6445 or 202-377-6414).

SUPPLEMENTARY INFORMATION: The Federal Home Loan Bank Board, by Resolution No. 79-223, dated April 3, 1979, proposed alternative amendments to Part 526 of the Regulations for the Federal Home Loan Bank System (12 CFR Part 526) to provide incentives to savers. The proposed alternatives were published in the Federal Register on April 7, 1979 (44 FR 21027-21029) with an invitation for public comment until May 4, 1979. In addition, the Bank Board by Resolution No. 79-237, published in the Federal Register on April 16, 1979, (44 FR 24299-24300), proposed to hold an informal public hearing on the proposed alternatives. Based on comments and testimony received, and on all other information available to it, and after consultation with the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the Comptroller of the Currency, the National Credit Union Administration, and the Department of the Treasury, the Bank Board has determined to adopt two of the proposed alternatives, with certain modifications, and to make certain other amendments consistent with the purposes of the proposal.

The four alternatives originally proposed are summarized as follows:

(1) Creation of a new savings account category (a variable ceiling account) with a $500 minimum amount and a 5-year maturity. Member institutions would be authorized to pay interest on this account up to a maximum rate of one percent below the average 5-year rate based on the yield curve for United States Treasury securities as determined by the U.S. Department of the Treasury. The penalty required to be imposed upon withdrawal of funds from this account prior to maturity would be forfeiture of six months interest on the amount withdrawn.

(2) Authorizing member institutions to pay a lump sum interest bonus of up to one-half of one percent on the minimum balance on deposit in a regular (passbook) account during a designated 12-month period.

(3) Elimination of the minimum amount requirements currently imposed on savings certificates with maturities under 4 years and reduction of the minimum amount for other certificate accounts to $500. No change was proposed to the $10,000 minimum requirement on the 26-week (182 day) account tied to the U.S. Treasury Bill auction average on a discount basis (money market certificate).

(4) Creation of a new $500 minimum, 8-year rising rate certificate account with an increasing rate of interest during the period the account remains outstanding.

The Bank Board has determined to adopt proposed alternatives (1) and (3) with the following modifications:

Alternative 1: The variable ceiling account

The variable ceiling account has a minimum maturity of 4 years rather than 5 years, as proposed, and no minimum rather than the $500 minimum proposed. Beginning the first day of every month, a member institution will be permitted to pay interest at a ceiling rate of one per cent below the average 4-year yield as announced by the U.S. Treasury Department.

This ceiling rate will remain in effect until the first day of the next month, when a new ceiling rate will go into effect. The rate of return established at the time of issue will not change during the term of the account. The average 4-year yield will be announced three business days prior to the first day of the month and will represent an average of the 4-year yields for the preceding five business days. Thus, the ceiling rate that will be in effect beginning July 2 will be announced by the Treasury on June 27, based on the average daily yields on 4-year Treasury securities for June 20 through June 26.

The required penalty for early withdrawal on this certificate is, as proposed, forfeiture of six months earnings on amounts withdrawn prior to maturity.

Alternative 3: Elimination of minimums

Minimum amount requirements are eliminated for all certificate accounts, except the 10,000 minimum on the 26-week (182 day) account tied to the U.S. Treasury Bill auction average on a discount basis (money market certificates).

Additional revisions:

Early withdrawal penalties

As part of the Bank Board's proposal, comment was solicited regarding revision to existing penalty provisions. Based on comments received, the Bank Board has determined to modify the interest forfeiture penalty as follows:

(a) The minimum penalty for early withdrawal on accounts with a maturity of one year or less issued, renewed, or extended after July 1 is forfeiture of three months earnings on amounts withdrawn prior to maturity. If the amount withdrawn has remained on deposit for 3 months or less, all earnings shall be forfeited.

(b) The minimum penalty for early withdrawal on accounts with a maturity of greater than one year issued, renewed, or extended after July 1 is forfeiture of six months earnings on amounts withdrawn prior to maturity. If the amount withdrawn has remained on deposit for 6 months or less, all earnings shall be forfeited.

The Bank Board believes these penalty provisions will be simple and equitable, and will provide sufficient incentive for savers to maintain accounts until maturity.

Increase in passbook rate

In lieu of the proposed bonus on regular (passbook) accounts, the Bank Board has determined to raise the maximum authorized rate on passbook accounts to 5.5%. The Bank Board believes that adoption of this amendment will benefit savers without imposing additional administrative burdens on member institutions.

The ceiling rate on NOW accounts in New England and New York will remain at 5 percent.

New policy on pooling of accounts

The Bank Board has also determined to adopt a new Statement of Policy regarding pooled savings. Under that policy, member institutions may accept funds that have been pooled for the purpose of taking advantage of higher rates on large accounts. However, a member institution may not pool savers' funds or solicit pooled funds.

Reaffirmation of Bank Board policy regarding transfer and repurchase of government securities

The use of repurchase-type agreements is not intended to provide member institutions with a method of offering small denomination accounts to consumers, in avoidance of existing interest rate ceiling restrictions.

Therefore, the Bank Board has adopted a policy statement reaffirming that member institutions are prohibited from offering repurchase-type agreements to consumers, by requiring a $100,000 minimum on such agreements unless purchased by an insured financial institution or by a broker or dealer registered with the Securities and Exchange Commission.

The Bank Board has determined not to adopt the proposed 8-year rising rate account.

Comment Summary

The final amendments are based on the Bank Board's careful consideration of the various concerns expressed in the more than 1400 comments received on the proposed alternatives and on the testimony of 45 participants in the "small savers" hearing, May 1, 1979. A complete summary of comments and testimony is included under appropriate subheadings below. The Bank Board believes the final amendments will provide additional savings incentives to savers without necessitating a significant increase in mortgage rates.

General Comments

The two most frequent comments regarding the proposal as a whole were that the alternatives would be too confusing or too expensive. Commenters believe that, because of the large number of account alternatives currently offered, additional account types would lead to extreme customer confusion. They stated that additional alternatives would require extensive and costly training of savings institution personnel and that, even with such training, mistakes would increase, along with customer dissatisfaction. Commenters stated that the proposals would increase savings institutions' costs significantly and that such increases could have serious consequences. Commenters emphasized that simplicity should be a prime consideration.

Commenters noted that increased costs and expenses would come from either institution earnings or increased home mortgage rates. Because the cost of money market certificates has already reduced the spread between institutions' lending and savings rates, commenters contended that additional costs and erosion of profit may push some institutions into insolvency. They note that this problem would be particularly acute in states with usury ceilings which prohibit lending rate increases sufficient to offset rising savings costs.

In states in which mortgage rates are permitted to rise, borrowers would subsidize the increased earnings of savers, many commenters contended. One commenter noted that small savers tend to be large borrowers and that an increase in return on savings may produce a net loss for saver-borrowers.

Response. Because only one additional account classification is adopted, the Bank Board believes customer education and personnel training can be accomplished with a reasonable expenditure of resources. Furthermore, because most commenters assumed that all four alternatives would be adopted, their estimates for implementation expenses and increased average cost of funds exceed the anticipated cost of implementing the final amendments.

Many commenters argued that if savings rates are increased, the increase should be accompanied by national legislation to relieve institutions from state usury restrictions. Furthermore, others contended, institutions must be given additional authority to improve the asset side of their business. A large number of respondents favored nationwide authority for alternative mortgage instruments, particularly VRM's. Some commenters advocated a roll-over type mortgage, particularly as a means to offset the proposed variable ceiling savings account. Others stated that such changes in asset structure must come well before savings rate changes, because of institutions' present long term mortgage structure. However, other commenters opposed any expansion of VRM authority on the ground that risk of rising interest rates shifts to the borrower if the mortgage rate is allowed to fluctuate.

Response. The Bank Board believes the suggestions regarding changes in the asset structure of thrift institutions encompass issues that are beyond the scope of these amendments.

Several commenters recommended that changes be limited to providing a higher rate of return for longer term deposits because rates should be in reverse proportion to liquidity of savers' funds.

Response. The new 4-year account provides incentive for long term saving.

Most individual consumers commenting indicated that anything

done to increase the return to small savers would be beneficial. Some commenters favored the proposed alternatives on the basis that they would represent a step toward either (a) even greater return on small accounts or (b) total deregulation of savings account rates.

Response. The Bank Board believes the final amendments, as adopted, will provide greater opportunities for savers to receive an equitable return on their savings.

For the following reasons, many commenters argued that the proposed alternatives would have little effect on the income of small savers. First, they noted that small savers' primary need is liquidity and that any plan involving long term deposits will be of little benefit. If early withdrawal penalties apply, small savers, with greater account activity, may actually receive less earnings than from passbook accounts. Second, most passbook savings deposits could be earning a greater rate under the present account structure, but savers have chosen availability over return. Commenters noted that not all small accounts are held by small savers, and that the concept of the small saver is elusive. Third, the amount of earnings increase is minimal on small accounts. Increased rates would provide windfall earnings for large savers, while small savers could expect increased earnings of only a few dollars a year. The larger the account, the greater would be the benefit from the proposed alternatives.

Response. The Bank Board believes the amendments will be particularly beneficial to small savers because they provide for a greater return on small savings accounts with a liberalized provision for early withdrawal.

Among comments most frequently repeated were the following: (1) Implementation of any new accounts should be delayed, and if several are adopted, they should be authorized over a period of time sufficient to permit computer programming, training of personnel, printing of new information material, and advertising to the public; (2) the one-fourth of one percent differential should be maintained for any new account, and, (3) compounding should be retained and left to the discretion of the institution.

Response. (1) Because the scope of the final amendments is more limited than the proposal, the Bank Board does not believe institutions will have difficulty implementing them; (2) the differential has been maintained; (3) the final amendments do not change institutions' authority regarding compounding.

Reduction of Minimum Amount Requirements

The proposed alternative most uniformly approved was the reduction of minimum amount requirements for currently approved certificate accounts. Commenters differed on the amount of reduction, but even many commenters who strongly opposed all of the proposed new certificate classifications found reduced minimums desirable or unobjectionable. They believe that this alternative would be simple and marketable, that it would be easiest and least expensive to initiate, and that it would have the least effect on cost of savings. Commenters most often recommended a $100 minimum deposit on all certificate accounts. Some recommended $500 as a minimum, or simply that the minimum amounts be uniform. Others recommended different amounts for different terms. Suggestions included minimums of $500 for certificates with terms 4 years or over and $100 for certificates with terms under 4 years; minimums of $1000 for terms of 4 years and over, and $500 for terms under 4 years; and as proposed, a $500 minimum for terms 4 years and over and no minimum for terms under 4 years. Other commenters recommended total elimination of minimum amount requirements.

Many commenters, however, objected to any reduction in account minimums. They found the present requirements reasonable and argued that any amount less than $1000 does not belong in a certificate account. They noted that with a small amount in a certificate, the penalty for early withdrawal is an insufficient deterrent to withdrawal, and churning of certificates is encouraged. This, they contended, is particularly true for account holders with low reserves who are likely to require their funds before the term expires. Others argued that because small savers' primary requirement is liquidity, reduction in minimum amounts would have little effect. Commenters who considered the cost to institutions generally recognized that small accounts are less economical to maintain than larger accounts, but they did not suggest a definite minimum. Some of the commenters who recommended that passbook rates be increased found that such action would be a less expensive alternative than reduction of minimums on certificate accounts.

Most commenters who favored reduction of minimum certificate amounts specifically excluded money market certificates and strongly objected to any action regarding those certificates.

Response. The Bank Board believes that no minimum amounts, other than for money market certificates, should be prescribed by regulations. With no prescribed minimums, all savers will have an equal opportunity to choose from a full range of certificate accounts. While some institutions may find it prudent, based on their operating costs, to prescribe minimum amounts, the Bank Board believes that such determination should be left to individual institutions.

Five Year Variable Ceiling Account

Of the two proposed new accounts, the five year fixed rate, variable ceiling account was more often favored by commenters who expressed any preference. Often the preference was expressed in terms of "the least objectionable account."

Some argued that the account could reduce disintermediation in times of high interest rates with greater stability than money market certificates. Approval of the certificate was sometimes tied to authority for variable rate mortgages or elimination of fixed rate certificates—possibly replacing present certificates with a series of variable ceiling accounts with various maturities. Some commenters recommended this certificate as a replacement for the money market certificate. Many commenters observed that the account would be attractive to the consumer only in times of high interest rates. When interest rates are lower, consumers would receive an equal or better return on currently authorized certificates. Therefore, the account would create a floor for institutions' savings costs no lower than present certificate rates. Commenters argued that adoption of this certificate would raise the average cost of savings as much as 30–50 basis points depending on assumptions used in the calculation. Many found the cost increase unacceptable and stated that mortgage interest rates would rise to a similar extent.

Opponents of this account cited the increased cost of funds, administrative difficulties and expenses, the complexity of the rate setting mechanism, and merchandising problems, as grounds for disapproval. Commenters noted that as many as 60 rates could be outstanding on such accounts at any given time, causing extreme computer problems. Furthermore, it was argued, the esoteric nature of the rate setting mechanism would require extensive personnel training costs and increased time spent

explaining deposit options to savers. Commenters stated that a changing rate might be confusing for less sophisticated savers who might become angry if rates increase soon after they have committed for a five year term. Many commenters argued that the account would be difficult to sell to the public. Because of the 100 basis point differential, savers would prefer the Treasury instruments to which the rate would be tied. If compounding were permitted, the differential would be partially offset, but the lack of state tax on Treasury instruments would weigh against the proposed account. For less sophisticated savers, marketing efforts would serve to educate the consumer to alternative investments and encourage disintermediation. Some commenters suggested that if the account is adopted the rate should be the same as the Treasury instrument rate to which it is tied. Others objected to the entire concept of indexed rates. They argued that indexing would be inflationary, and that institutions would be unable to predict future costs of savings which are necessary to effective financial planning. Some commenters saw this certificate as a step toward elimination of rate control. Commenters were divided on the issue of whether a floating rate account would be a workable alternative. It was recognized that floating savings rates would necessarily be tied to similarly indexed floating rate mortgages.

While most commenters objected to this account generally, they commented as follows on specific aspects:

(a) Establishment of a rate monthly was generally found preferable to weekly or quarterly. Weekly was considered administratively difficult, while quarterly would permit too much interest rate shopping while institutions' rates are set and market rates fluctuate. Commenters preferred the ease of administration of establishing rates less often.

(b) The $500 minimum was generally acceptable, although higher and lower minimums were also suggested.

(c) A five-year term was generally considered acceptable but one-year and three-year terms were also suggested. Many commenters believe that small savers cannot commit funds for a five-year period. Allowing the institution to set the term was also suggested.

(d) The proposed index was found satisfactory, although indexing to one-year Treasury instruments, or to mortgage interest rates, was also suggested.

(e) Most commenters favored the rate of 1% below the index, but because of marketing problems discussed above, some commenters suggested a rate of ½% below the index. Others found the rate higher than necessary to attract savings.

(f) Commenters divided on whether compounding should be permitted on such accounts. Some believe that without compounding the rate would not be competitive, while others believe the rate would be high enough without compounding. As mentioned above, some commenters object to compounding on any account.

(g) The anticipated effect on savings flows varied, with more commenters anticipating little long-term effect.

Response. The Bank Board believes that this account will provide a means for the saver to receive a reasonable return on savings during periods of high interest rates. Although a term of 5 years was proposed for this account, the Bank Board believes a 4 year term will better serve the needs of small savers, who typically are unable to tie up their funds for extremely long periods. Present 4, 6, and 8 year certificate accounts continue to be authorized because the Bank Board believes these accounts will be attractive to savers during periods when the yield on the variable ceiling account declines.

While recognizing that institutions' average cost of savings may be increased by issuing such accounts in periods of high interest rates, the Bank Board believes that institutions will benefit from the stability of 4-year deposits attracted and retained during such periods.

Early Withdrawal Penalty

Commenters were divided approximately equally regarding the six month early withdrawal penalty proposed for the five year variable ceiling account. However, a large majority favored the simplicity of a single penalty provision for all accounts. Those favoring a six month penalty for early withdrawal from a variable ceiling account generally favored that penalty for all accounts. They believe that such a penalty would provide sufficient disincentive to early withdrawal, while providing relief from the hardship of the standard penalty during the late stages of the account term. Those favoring the present standard penalty noted that: (1) customers are already familiar with the present penalty, and (2) it has worked well in preventing early withdrawals. They also point out that the severity of the present penalty is somewhat mitigated by the saver's option to take a low interest share loan for the remaining period to maturity.

Commenters looking primarily for simplicity recommended that a 3 month penalty with no reversion to the passbook rate, as proposed for the 8-year rising rate certificate, be made applicable to all accounts. Those most concerned with strong disincentive to early withdrawal favored a penalty stronger than the present standard penalty—even a 100 percent penalty. They argued that lenient penalties encourage disintermediation in times of high interest rates. This would be a particular problem with respect to the 8-year rising rate account, as discussed below. Many commenters stressed that all certificate accounts should have early withdrawal penalties. To provide relief for withdrawals made late in the certificate term, some commenters recommended a penalty which would decrease over the term of the certificate. Another suggestion was to pay a rate equal to the rate the account would have received if it had been for a term expiring at the time of withdrawal. Other suggestions included: (1) leave the penalty provision to the institution's discretion; (2) have a penalty equal to a percentage of all accrued earnings; (3) have a 3-month penalty for certificates of 4 years or under, and a 6-month penalty for certificates over 4 years; and, (4) exempt elderly savers from withdrawal penalties in emergency situations.

Response. The Bank Board believes the new penalty for early withdrawal adopted by these amendments (1) is more easily understood and applied; (2) effectively inhibits disintermediation; and, (3) is fairer to savers who must make withdrawals during the final months of the certificate term. Furthermore, uniform application of the exemption from penalty for withdrawals made upon the death of the owner of the account is particularly beneficial to elderly savers who might otherwise be unwilling to commit funds for an extended term to achieve a higher return.

Eight Year Rising Rate Certificate

Most commenters objected to the proposed rising rate certificate (RRC) because of the administrative problems it would create and because of its lack of an early withdrawal penalty after the first year. Commenters stated that, due to the certificate's complexity, it would be difficult to explain to savers and to advertise. Furthermore, the account would require extensive computer changes.

Commenters did not view the RRC as advantageous to small savers. They noted that, except for the lenient penalty

provision, the certificate has no advantage over currently authorized certificate accounts. However, because of the lack of penalty, it would be an ideal repository for large sums presently held in passbook accounts for purposes of liquidity. A saver, with a large passbook account balance, could open an RRC with the minimum amount and maintain that amount for nearly a year. At the end of the year, the saver could take advantage of the provision for unlimited additions during the first year to greatly increase the amount. The account would then be, in effect, a high rate passbook account. If interest rates rise, the saver has the option of withdrawal and reinvestment in a high-rate, short-term certificate or other investment. Commenters anticipated that funds for RRC's would come primarily from existing accounts. One commenter estimated a 37 basis point rise in average cost of savings, with a ¾%–1½% rise in mortgage rates, based on projected transfers from passbooks to RRC's. Commenters generally believe adoption of this account would cause mortgage rates to rise.

Commenters who viewed this certificate favorably generally recommended that some early withdrawal penalty be applicable throughout the term of the certificate, or at least during the first five years while the rate is rising. They also offered other suggestions as follows:

(a) Allow no additions to the account, for the reason discussed above. However, it was noted that such a restriction is bad for small savers because many tend to accumulate small amounts of capital over an extended period of time;

(b) Simplify the structure to have a uniform rise in rate on an annual basis;

(c) Have rates rise on regular distribution dates;

(d) Permit withdrawal without penalty only for limited periods at each anniversary of the account;

(e) Do not end the term at 8 years. Allow the rate to continue at the maximum or to continue to rise, rather than reverting to the initial low rate;

(f) Have a rate based on a rising percentage of Treasury bill yields;

(g) To discourage disintermeditation, make the rise retroactive only after each year expires;

(h) Allow a "year" to be extended to the end of the month or quarter; and,

(i) If this certificate is adopted without a penalty provision, eliminate other long term certificates because they would be of little further use.

The eight year maturity was generally found acceptable, but longer and shorter terms were also suggested. Several commenters found the proposed term too long to be advantageous to small savers.

Bonus

Most commenters found the proposed ½% bonus provision too difficult to administer and without sufficient benefit to the saver. They argued that the bonus would be very difficult to program, that errors would be numerous, and the bonus would be difficult to explain to savers. One commenter predicted that it would take a year to implement the proposed bonus plan, at a cost of $500,000. Once implemented, the institution would have to make daily account reviews. Many commenters noted that the account would provide no greater return to the saver than the present 90 day notice account and that the notice account is not widely accepted by savers. They argue that, particularly with this account, the benefits to the large saver would be much greater than to the small saver.

Commenters noted that most passbook savings would be eligible for a bonus and the institution's cost would rise without any action or commitment by the saver. The account would have to be treated as withdrawable and would be, effectively, a 5.75% passbook. Estimates of increased cost ranged between 7 and 32 basis points, with 10 basis points as a typical figure. One commenter anticipated a 10 basis point rise in average cost of savings for the bonus account, compared with a 12–15 basis point rise for a 5.75% passbook.

Another problem anticipated by commenters was a proliferation of accounts. Because the bonus would be payable on the minimum amount for the year, there would be no incentive to add to a bonus account. Savers might open a series of small accounts and, rather than withdraw funds and lose the bonus, take share loans on the accounts. It was suggested that the rate on share loans be based on the bonus rate rather than the base account rate.

Institutions noted that they would be unable to accurately predict their liabilities until the end of the year. Several institutions believe that limiting the bonus to individuals and nonprofit organizations would be an unnecessary problem. They stated that, while commercial banks are so limited regarding certain accounts, the limitation is largely ignored.

Commenters made the following recommendations concerning adoption of this alternative.

(a) Set dates in the regulation which will determine the year, and pay the bonus on funds held for a year from those dates, e.g., quarterly, on January 1, on regular distribution dates, or on tax reporting dates;

(b) Pay the bonus yearly (a minority favored more frequent payment);

(c) Do not increase the bonus rate on funds held more than a year (a minority favored such an increase); and,

(d) Pay a bonus on the actual interest earned for the year.

Commenters divided approximately evenly on whether a bonus should be paid on an account eligible for other services, transfers, etc. Commenters did not believe adoption of the proposed bonus would have significant effect on savings flows.

Response. After considering the comments on the proposed 8-year rising rate certificate and on the proposed bonus plan, and in view of the anticipated complexity and cost of these plans, the Bank Board has determined that the benefits of these alternatives are not sufficient to justify their adoption. As stated above, the Bank Board believes that the increased rate on passbook accounts provides a simpler means to increase the return to savers than the proposed bonus.

Suggested Alternatives

The most frequently recommended alternative to the proposals was a tax incentive for saving. That concept was favored by both industry and consumer commenters. Exclusion of various amounts of savings was suggested, as well as limiting exclusion to certain types of accounts or classes of individuals.

Another frequent suggestion was to increase the passbook rate. Many commenters considered this a simple means to most directly increase the return to small savers. Suggested passbook rates ranged from 6.5% to 7.5%, with most suggestions falling between 5.5% and 6%. Some commenters recommended eliminating some of the currently approved certificates and raising rates on those remaining. Others recommended that institutions be permitted greater flexibility in setting rates within prescribed limits. Commenters suggested shorter terms for present certificates or $100 additions to accounts without extension of maturity. Another recommendation was payment of 6% only on funds withdrawn on quarterly distribution dates. Indexing with quarterly adjustment of the passbook rate was also suggested.

While many commenters recommended elimination of money market certificates, it was also suggested that the money market

certificate rate be based on the amount of the deposit or the term of the certificate, i.e., a greater amount or a longer term would receive a larger percentage of the Treasury Bill rate.

Another alternative often recommended was payment of higher rates to systematic savers. Commenters argued that such a plan is particularly beneficial for wage earners who are able to accumulate savings over an extended period of time.

Commenters recommended various ways to make funds available to pay earnings on savings accounts. They recommended revision of the liquidity, FIR, and net worth requirements. National VRM's and NOW accounts were suggested. A more lenient view toward due-on-sale clauses was also recommended.

Other recommendations were as follows:

(a) Prescribe methods of computation and compounding;

(b) Place a $1,000 maximum rate on money market certificates;

(c) Permit early withdrawal of 20% of a certificate account without penalty; and,

(d) Authorize a step-increase bonus account.

Response. The recommendation that the passbook account rate be increased is adopted. The Bank Board believes that the amendments that are being adopted represent alternatives which will provide a reasonable return to savers without necessitating a significant increase in mortgage rates.

Accordingly, the Bank Board hereby amends Parts 526 and 531 of the Regulations for the Federal Home Loan Bank System, Part 545 of the Rules and Regulations for the Federal Savings and Loan System, and Part 563 of the Rules and Regulations for Insurance of Accounts, as follows:

1. Amend § 526.2(b)(2) to read as follows:

§ 526.2 Maximum rate of return.

* * * * *

(b) *Exceptions.* Notwithstanding any reduction in such maximum prescribed rates, a member may pay a return on any savings account outstanding on the date of such reduction, as follows:

* * * * *

(2) *Certificate account.* At the rate specified in the certificate, for such period, including any renewal period, as the account remains outstanding (except that six month (26 weeks) certificate accounts may not be renewed at any rate in excess of the applicable maximum rate provided for under § 526.3(a)(6) and four year variable rate accounts may not be renewed at a rate in excess of the applicable maximum rate provided for under § 526.3(a)(5)(ii)).

* * * * *

2. Amend § 526.3(a) by revising paragraphs (1) and (5) thereof, to read as follows:

§ 526.3 Maximum rates of return payable by members on savings accounts.

(a) Except as provided in § 526.3–1 for certificate accounts of $100,000 or more, no member may pay an annual rate of return on a savings account exceeding the applicable maximum percentage, as follows:

(1) 5.50%—regular accounts.

* * * * *

(5)(i) 7.50%—certificate accounts with a term or qualifying period of 4 years or more

(ii) 1% below the average four year rate based on the yield curve for United States Treasury securities as determined by the U.S. Department of the Treasury immediately prior to the first day of the month—certificate accounts with a term or qualifying period of 4 years or more issued on or after the first day of the month

* * * * *

3. Further amend § 526.3(a) by deleting from each of paragraphs (3), (4), (6), and (7) the phrase "of $1,000 or more."

4. Amend § 526.3 (b) and (c), to read as follows:

§ 526.3 Maximum rates of return payable by members on savings accounts.

* * * * *

(b) A member may pay a rate of return as permitted by paragraph (a) of this section on certificate accounts issued under a plan providing for payment of a bonus if the account holder makes at least 12 regular monthly payments.

(c) *Exceptions as to terms or qualifying periods.* A member may pay a rate of return not exceeding the highest rate permitted under paragraph (a) of this section on (1) a public unit account which is a certificate account with a maturity of 30 days or more or a notice account, or (2) a certificate account which qualifies as a retirement account under subsections 401(d) or 408(a) of the Internal Revenue Code of 1954 and has a term of 3 years; *provided,* that such accounts under subdivision (a)(5)(ii) of this section must meet the maturity requirement, and accounts under subparagraph (a)(8) of this section must meet the minimum amount and maturity requirements, prescribed in those provisions.

5. Revise § 526.7(a) to read as follows:

§ 526.7 Penalty for early withdrawal.

(a) For any certificate account issued, extended, or renewed after June 30, 1979, a member shall impose (except as paragraph (b) of this section provides) the following conditions on any withdrawal before the end of the term or qualifying period:

(1) if the term or qualifying period is one year or less, the account holder shall pay a penalty on the amount withdrawn of at least 90 days (3 months) interest or dividends on the account. If the amount withdrawn has remained on deposit for 3 months or less, all interest or dividends shall be forfeited.

(2) if the term or qualifying period is more than one year, the account holder shall pay a penalty on the amount withdrawn of at least 180 days (6 months) interest or dividends on the account. If the amount withdrawn has remained on deposit for 6 months or less, all interest or dividends shall be forfeited.

* * * * *

6. Amend Part 531 by adding new §§ 531.11 and 531.12, to read as follows:

§ 531.11 Accepting pooled accounts.

A member institution may not pool or participate in pooling funds, or solicit, or promote pooled accounts. However, a member institution is authorized to accept pooled funds from existing or potential account holders who have pooled their funds in order to meet any prescribed minimum amount under this Part or to aggregate $100,000 or more.

§ 531.12 Transfer and repurchase of government securities.

A member institution may not issue obligations in denominations under $100,000 evidencing an indebtedness arising from a transfer of direct obligations of, or obligations that are fully guaranteed as to principal and interest by, the United States or any agency thereof that a member institution is obligated to repurchase, unless such obligations are issued to financial institutions the accounts of which are insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation or to a broker or dealer registered with the Securities and Exchange Commission.

7. Revise § 545.1–4(f)(1) and subdivisions (i) and (ii) thereof, to read as follows:

§ 545.1–4 Other savings accounts.

* * * * *

(f) *Withdrawal prior to expiration of term.*

(1) For any certificate account issued, extended, or renewed after June 30, 1979, a member shall impose (except as subparagraph (f)(4) of this section provides) the following conditions on any withdrawal before the end of the term or qualifying period:

(i) if the term or qualifying period is one year or less, the account holder shall pay a penalty on the amount withdrawn of at least 90 days (3 months) interest on the account. If the amount withdrawn has remained on deposit for 3 months or less, all interest shall be forfeited.

(ii) if the term or qualifying period is more than one year, the account holder shall pay a penalty on the amount withdrawn of at least 180 days (6 months) interest on the account. If the amount withdrawn has remained on deposit for 6 months or less, all interest shall be forfeited.

* * * * *

§ 545.3 [Amended]

8. Amend § 545.3(b) by deleting the words "such minimum amount, not less than $1,000."

9. Revise §545.3(b)(4) to read as follows:

§ 545.3 Bonus on monthly-payment and fixed-balance accounts.

* * * * *

(b) *Fixed balance accounts.*

* * * * *

(4) For any such bonus account issued, extended, or renewed after June 30, 1979, a member shall impose the following conditions on any withdrawal before the end of the term or qualifying period:

(i) if the term or qualifying period is one year or less, the account holder shall pay a penalty on the amount withdrawn of at least 90 days (3 months) earnings on the account. If the amount withdrawn has remained on deposit for 3 months or less, all earnings shall be forfeited.

(ii) if the term or qualifying period is more than one year, the account holder shall pay a penalty on the amount withdrawn of at least 180 days (6 months) earnings on the account. If the amount withdrawn has remained on deposit for 6 months or less, all earnings shall be forfeited.

(iii) if any earnings have been distributed to the account holder prior to such withdrawal, a deduction shall be made from the amount withdrawn to adjust for the penalty applicable to such earnings.

* * * * *

10. Revise § 545.3–1(c)(3), and subdivisions (i) and (ii) thereof, to read as follows:

§ 545.3–1 Distribution of earnings at variable rates.

* * * * *

(c) *Form of certificate.*

* * * * *

(3) For any certificate account issued, extended, or renewed after June 30, 1979, a member shall impose (except as subparagraph (c)(6) of this section provides), the following conditions on any withdrawal before the end of the term or qualifying period:

(i) if the term or qualifying period is one year or less, the account holder shall pay a penalty on the amount withdrawn of at least 90 days (3 months) earnings on the account. If the amount withdrawn has remained on deposit for 3 months or less, all earnings shall be forfeited.

(ii) if the term or qualifying period is more than one year, the account holder shall pay a penalty on the amount withdrawn of at least 180 days (6 months) earnings on the account. If the amount withdrawn has remained on deposit for 6 months or less, all earnings shall be forfeited.

* * * * *

11. Amend § 563.3–1(d)(1) and subdivisions (i) and (ii) thereof, to read as follows:

§ 563.3–1 Fixed-rate, fixed-term accounts.

* * * * *

(d) *Withdrawal prior to expiration of term.*

(1) Each certificate issued, extended, or renewed by an insured institution, other than an insured institution whose principal office is located on Guam, for a fixed-rate, fixed-term account shall provide that, in the event of withdrawal of all or any portion of such account prior to the expiration of its term, the following minimum penalty shall apply:

(i) if the term or qualifying period is one year or less, the account holder shall pay a penalty on the amount withdrawn of at least 90 days (3 months) interest on the account. If the amount withdrawn has remained on deposit for 3 months or less, all interest shall be forfeited.

(ii) if the term or qualifying period is more than one year, the account holder shall pay a penalty on the amount withdrawn of at least 180 days (6 months) interest on the account. If the amount withdrawn has remained on deposit for 6 months or less, all interest shall be forfeited.

* * * * *

12. Amend § 563.3–2(d)(1), and subdivisions (i) and (ii) thereof, to read as follows:

§ 563.3–2 Certificates evidencing other accounts.

* * * * *

(d) *Provisions relating to early withdrawal.*

(1) Each certificate issued by an insured institution, other than an insured institution whose principal office is located on Guam, for a certificate account shall provide that, in the event of withdrawal of all or any portion of such account prior to completion of its time eligibility period, the following minimum penalty shall apply:

(i) if the term or qualifying period is one year or less, the account holder shall pay a penalty on the amount withdrawn of at least 90 days (3 months) earnings on the account. If the amount withdrawn has remained on deposit for 3 months or less, all earnings shall be forfeited.

(ii) if the term or qualifying period is more than one year, the account holder shall pay a penalty on the amount withdrawn of at least 180 days (6 months) earnings on the account. If the amount withdrawn has remained on deposit for 6 months or less, all earnings shall be forfeited.

* * * * *

BILLING CODE 6720-01-M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Parts 700 through 760

Final Rule; Terminology Change; Substitution of the "Board" for the "Administrator" and General Organization

AGENCY: National Credit Union Administration ("NCUA").

ACTION: Final Rules.

SUMMARY: In accordance with the restructuring of the agency by Pub. L. 95–630, NCUA amends Title 12, Chapter VII as follows:

(1) Parts 700–760 are amended to provide that the term "Board" be substituted for the term "Administrator" wherever the term Administrator is used to refer to the Administrator of NCUA and the term Board is to be used to refer to the newly created National Credit Union Administration Board;

(2) Section 720.2(a) is amended to delete references to the abolished National Credit Union Board; and

(3) Part 722 is repealed and reserved for future use.

EFFECTIVE DATE: Effective June 12, 1979.

ADDRESS: National Credit Union Administration, 2025 M Street, NW., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT: Beatrix D. Fields, Staff Attorney, Office of General Counsel, at the above address or telephone (202) 632–4870.

SUPPLEMENTAL INFORMATION: Effective March 10, 1979, pursuant to Title V of the Financial Institutions Regulatory and Interest Rate Control Act of 1978, Pub. L. 95–630, the Federal Credit Union Act (12 U.S.C. 1751 et al., the "FCU Act") was amended to provide for the restructuring of NCUA from management by a single Administrator to management by a three member Board. The members of the newly created National Credit Union Administration Board (the "Board") must be appointed by the President and confirmed by the Senate before taking office. Until the new Board members have taken office, Section 509 of Pub. L. 95–630 provides that the present Administrator shall continue to perform the functions of the Administrator as set forth in the FCU Act prior to the effectiveness of Pub. L. 95–630.

Consistent with the restructuring amendment to the FCU Act, the NCUA Rules and Regulations must be changed to reflect this amendment. Throughout the Rules and Regulations, the term "Administrator" shall be struck and the term "Board" inserted in lieu thereof. Additionally, the personal pronouns referring to the Administrator as "he," "him," and "his" shall be struck and "it," "them," and "its" inserted in their place when referring to the Board. NCUA will not reprint its publication of NCUA Rules and Regulations (NCUA Publication No. 8006) to reflect these terminology changes. Rather, these and other terminology changes resulting from Pub. L. 95–630 will be reflected in each affected regulation as it is updated or revised.

Previously, Section 102 of the FCU Act (12 U.S.C. 1752a) established an advisory board to the Administrator, i.e. the National Credit Union Board. Part 722 of the NCUA Rules and Regulations has implemented that provision. Section 501 of Pub. L. 95–630 amended Section 102 of the FCU Act by, among other things, eliminating the statutory authority for the advisory board. Accordingly, Part 722 is being repealed. In addition, § 720.2(a) which describes the general organization of the agency is being amended to eliminate references to the abolished advisory board and to distinguish the new three member Board from the former advisory board. After the new Board has taken office, it is anticipated that other amendments will be made to Part 720 to reflect changes in the central organization of the agency as a result of the restructuring of the agency.

These procedural amendments to the regulations are being made effective upon publication. Since these changes are merely technical in nature, reflecting amendments to the FCU Act presently in effect, and only affect agency organization and procedure in a non-substantive manner, NCUA hereby finds that the public notice and the delayed effective date requirements of 5 U.S.C. 553 are impracticable and unnecessary. Similarly, the procedures set forth in NCUA's Final Report "In Response to E.O. 12044: Improving Government Regulations" are not applicable. The official responsible for the decision to waive the Final Report procedures is Robert M. Fenner, Assistant General Counsel.

Lawrence Connell,
Administrator.
June 6, 1979.

(Sec. 120, 73 Stat. 635 (12 U.S.C. 1766), sec. 209, 84 Stat. 1014 (12 U.S.C. 1789), and secs. 501 and 502, 92 Stat. 3681, Pub. L. 95–630.)

PARTS 700–760 [Amended]

1. 12 CFR Parts 700 to 760 are amended as follows:

In each provision, the term "Administrator" is changed to the term "Board," and the personal pronouns, "he," "him," or "his," when referring to the Administrator of NCUA, are changed to "it," "them," and "its" respectively when referring to the National Credit Union Administration Board.

2. 12 CFR 720.2(a) is amended to read as follows:

§ 720.2(a) General organization.

The National Credit Union Administration (hereinafter referred to as the "Administration") is composed of the National Credit Union Administration Board (hereinafter referred to as the "Board"), with a central office in Washington, D.C. and six regional offices. The Board consists of three Members appointed by the President, with the advice and consent of the Senate, for six year terms except for two of the initial Members who will serve staggered two and four year terms. One Board member is designated by the President to be Chairman of the Board.

PART 722—[Reserved]

3. 12 CFR Part 722 is hereby repealed and reserved for future use.

BILLING CODE 7535-01-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR 140

Delegation of Authority to the Secretary of the Commission

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commission is announcing that it has determined to delegate to the Secretary of the Commission, or the Secretary's designee, the ministerial duty of signing on behalf of the Commission documents embodying Commission decisions or other actions, including, but not limited to, rules, regulations and orders.

EFFECTIVE DATE: June 7, 1979.

FOR FURTHER INFORMATION CONTACT: Mark N. Rae, Office of General Counsel, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581, telephone (202) 254–7285.

SUPPLEMENTARY INFORMATION: After the Commission has formally reached a decision or taken other action on a matter, including agreement upon the language of a document which embodies the Commission decision or other action, and directed that the document be issued, the Secretary of the Commission, or a person designated in writing by the Secretary, shall, under this delegation, sign the document on the Commission's behalf. The Commission declares that signature by the Secretary shall be a ministerial function and shall not be discretionary.

Delegation to the Secretary of the authority to sign documents on behalf of the Commission will not affect any other delegations which the Commission has already made, or may yet make, that authorize other officers or employees of the Commission to take action and to sign documents on the Commission's

behalf.[1] The Commission has also reserved to itself the authority to provide for signature on its behalf by the Chairman or any other member of the Commission in particular circumstances.

The foregoing rule shall become effective immediately. The Commission finds that this rule relates solely to agency practice and procedure and that compliance with the pre-adoption notice and public participation procedures, and the post-adoption publication prior to effective date requirement, of the Administrative Procedure Act, as codified, 5 U.S.C. § 553, are not, therefore, required.

In consideration of the foregoing, the Commission, pursuant to the authority contained in Section 2(a)(11) of the Commodity Exchange Act, 7 U.S.C. § 4a(j) (1976), hereby amends Part 140 of Chapter I of Title 17 of the Code of Federal Regulations by adding a new § 140.14 as follows:

§ 140.14 Delegation of authority to the Secretary of the Commission.

After the Commission has formally reached a decision or taken other action on a matter, has agreed upon the language of the document which embodies the Commission decision or other action, including, but not limited to, a rule, regulation or order, and has directed that the document be issued, the Secretary of the Commission (or a person designated in writing by the Secretary) shall sign the document on behalf of the Commission. Signature by the Secretary shall be a ministerial function and shall not be discretionary. The delegation to the Secretary of the authority to sign documents on the Commission's behalf shall not affect any other delegation which the Commission has made, or may make, which authorizes any other officer or employee of the Commission to take action and to sign documents on the Commission's behalf. In addition, the Commission reserves the authority to provide for signature on its behalf by the Chairman or any other member of the Commission in particular circumstances.

Issued in Washington, D.C., on June 7, 1979, by the Commission.

James M. Stone,

Chairman, Commodity Futures Trading Commission.

Federal Energy Regulatory Commission

18 CFR Part 276

[Docket RM79-30]

Order Amending Final Regulations and Promulgating FERC Forms 122, 123, and 124 and Accompanying Affidavits and Instructions; Correction

AGENCY: Federal Energy Regulatory Commission.

ACTION: Errata Notice.

SUMMARY: This notice contains a correction to the preamble to the Commission's order issued March 23, 1979 (44 FR 18647, March 29, 1979). References to § 271.101 and § 271.101(b) in the sixth line of the first full paragraph on page 18650 shall be corrected to read § 276.101 and § 276.101(b) respectively.

FOR FURTHER INFORMATION CONTACT: Scott E. Kovas, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, D.C. 20426, (202) 275-4806.

SUPPLEMENTARY INFORMATION: Please note that the following correction should be made to the preamble to the Commission's order issued March 23, 1979 in Docket No. RM79-30 (44 FR 18647, March 29, 1979): in the sixth line of the first full paragraph on page 18650 "§ 271.101" and "§ 271.101(b)" should be changed to read "§ 276.101" and "§ 276.101(b)" respectively, so that the paragraph reads as follows:

We also received several comments via the Commission's "Hotline" that expressed confusion as to the interrelationship between the exceptions created in paragraphs (b)(1) and (b)(2) in § 276.101. We have revised § 276.101(b) to make it clear that the exception in paragraph (b)(1) only applies in the case of a sale to someone other than a pipeline.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

21 CFR Parts 314 and 430

[Docket No. 78N-0379]

New Drug Applications and Antibiotic Drugs—General; Separation of Functions in Evaluating Requests for Hearing

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) amends the drug regulations to eliminate the requirement of separation of functions before issuance of a notice of hearing in cases in which a bureau recommends granting a request for hearing on the proposed denial or withdrawal of drug product marketing approval. The rule permits the Bureau of Drugs and the Office of the Commissioner to communicate regarding issues on which a hearing is requested and thus expedites the agency's response to hearing requests.

EFFECTIVE DATE: July 12, 1979.

FOR FURTHER INFORMATION CONTACT: Thomas Scarlett, Office of the General Counsel (GCF-1), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1345.

SUPPLEMENTARY INFORMATION: In the Federal Register of December 19, 1978 (43 FR 59095), FDA proposed to revise the separation of functions requirements that apply when a bureau evaluates a request for hearing on a proposed denial or withdrawal of drug marketing approval. The reason for the proposed change was to expedite the handling of hearing requests in cases where the bureau intends to recommend that a hearing be granted. Under the regulations as then written, separation of functions commenced with the receipt of a request for hearing and did not terminate until the matter was finally disposed of, either by an evidentiary hearing or by an order denying a request for hearing. Maintaining separation of functions before a notice of hearing is published serves a useful purpose if the bureau is considering denying a request for hearing. Denial of a hearing request is final agency action, and it is therefor appropriate for the Office of the Commissioner to evaluate the bureau's reasons for recommending that action from an independent point of view.

When, however, the bureau's recommendation is that the hearing request be granted, the next step is not final agency action, but an evidentiary hearing, during which the record for decision by the Office of the Commissioner is developed. The Office of the Commissioner then reviews the record without consulting the bureau involved in the hearing.

Thus, when a hearing is to be held, the reasons for maintaining separation of functions during the time period preceding the hearing are greatly diminished. In fact, there is often a need for consultation between the bureau and the Office of the Commissioner about the content and wording of the notice of hearing. Elimination of the separation of functions requirement in the period before a notice of hearing is issued will permit necessary communication between the parts of the agency responsible for initiating the hearing.

One comment was received in response to the proposal. The comment, which is unclearly written, apparently takes the position that the purpose of permitting the Office of the Commissioner to consult with the bureau before a notice of hearing is published is to avoid situations in which a hearing is held despite the absence of a substantial issue of fact. The comment asks FDA to make a comparison between the time involved in evaluating bureau recommendations and the time involved in holding hearings that are later found to be unnecessary because they involve no substantial issue of fact.

Without a more comprehensible explanation of the concerns addressed in the comment, the agency is unable to respond to the specific questions raised. In any case, the premise of the comment, that the purpose of eliminating separation of functions is to reduce the number of hearings that are held in the mistaken belief that there is an issue of fact, is wrong. The purpose of eliminating separation of functions before publishing a notice of hearing is to expedite the handling of hearing requests and notices of hearing. Accordingly, the final regulation is published as proposed, except that the following technical changes are incorporated in the text of the regulation:

1. A sentence is added to clarify that, when a bureau has recommended that a hearing be granted, the Commissioner may change the text of the issues proposed by the bureau but may not deny a hearing on those issues. This restriction was discussed in the preamble to the proposed regulation. See 43 FR 59097, column 1.

2. The regulation is revised to clarify that when a bureau recommends that a hearing be granted as to some issues and denied as to others, the Commissioner will not evaluate or rule upon the bureau's recommendation that a hearing be denied. The preamble to the proposed regulation discussed this point. See 43 FR 59097, column 1.

3. The regulation is revised to clarify that the presiding officer's ruling on whether to include in a hearing an issue with respect to which the bureau recommended that a hearing be denied is subject to interlocutory review by the Commissioner in accordance with the procedure that applies to all decisions by a presiding officer to add or delete an issue.

4. Minor editorial changes have been made in the text of the regulation.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 506, 507, 701(a), 52 Stat. 1052–1053 as amended, 1055, 59 Stat. 463 as amended (21 U.S.C. 355, 357, 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Parts 314 and 430 are amended as follows:

1. Part 314 is amended in § 314.200 by revising paragraph (f) to read as follows:

§ 314.200 Notice of opportunity for hearing; notice of participation and request for hearing; grant or denial of hearing.

* * * * *

(f) Separation of functions commences upon receipt of a request for hearing. The Director of the Bureau of Drugs will prepare an analysis of the request and a proposed order ruling on the matter. The analysis and proposed order, the request for hearing, and any proposed order denying a hearing and response under paragraph (g) (2) or (3) of this section will be submitted to the Office of the Commissioner for review and decision. When the Bureau recommends denial of a hearing on all issues on which a hearing is requested, no representative of the Bureau will participate or advise in the review and decision by the Commissioner. When the Bureau recommends that a hearing be granted on one or more issues on which a hearing is requested, separation of functions terminates as to those issues, and representatives of the Bureau may participate or advise in the review and decision by the Commissioner on those issues. The Commissioner may modify the text of the issues, but may not deny a hearing on those issues. Separation of functions continues with respect to issues on which the Bureau has recommended denial of a hearing. The Bureau's recommendation on such issues will not be evaluated or ruled on by the Commissioner, and such issues will not be included in the notice of hearing. Participants in the hearing may make a motion to the presiding officer for the inclusion of any such issue in the hearing. The ruling on such a motion is subject to review in accordance with § 12.35(b) of this chapter. Failure to so move constitutes a waiver of the right to a hearing on such an issue. Separation of functions on all issues resumes upon issuance of a notice of hearing. The Office of the General Counsel will observe the same separation of functions.

* * * * *

2. Part 430 is amended in § 430.20 by revising paragraph (b)(7) to read as follows:

§ 430.20 Procedure for the issuance, amendment, or repeal of regulations.

* * * * *

(b) * * *

(7) Separation of functions commences upon receipt of a request for hearing. The Director of the Bureau of Drugs will prepare an analysis of the request and a proposed order ruling on the matter. The analysis and proposed order, the request for hearing, and any proposed order denying a hearing and response under paragraph (b)(8) (ii) or (iii) of this section will be submitted to the Office of the Commissioner for review and decision. When the Bureau recommends denial of a hearing on all issues on which a hearing is requested, no representative of the Bureau will participate or advise in the review and decision by the Commissioner. When the Bureau recommends that a hearing be granted on one or more issues on which a hearing is requested, separation of functions terminates as to those issues, and representatives of the Bureau may participate or advise in the review and decision by the Commissioner on those issues. The Commissioner may modify the text of the issues, but may not deny a hearing on those issues. Separation of functions continues with respect to issues on which the Bureau has recommended denial of a hearing. The Bureau's recommendation on such issues will not be evaluated or ruled on by the Commissioner, and such issues will not be included in the notice of hearing. Participants in the hearing may make a motion to the presiding officer for the inclusion of any such issue in the hearing. The ruling on such a motion is subject to review in accordance with § 12.35(b) of this chapter. Failure to so move constitutes a waiver of the right to a hearing on such an issue. Separation of functions on all issues resumes upon

issuance of a notice of hearing. The Office of the General Counsel will observe the same separation of functions.

Effective date. This regulation is effective July 12, 1979.

(Secs. 505, 507, 701(a), 52 Stat. 1062–1063 as amended, 1055, 59 Stat. 463 as amended (21 U.S.C. 355, 357, 371(a)))

Dated: June 5, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 79-17888 Filed 6-11-79; 8:45 am]

BILLING CODE 4110-03-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 445

[Docket No. R-79-691]

Application of Payments on (Section 312) Rehabilitation Housing Loans

AGENCY: Department of Housing and Urban Development (HUD).

ACTION: Final rule.

SUMMARY: This rule amends 24 CFR Part 445 to require that payments on 312 loans serviced by HUD shall be applied first to accrued interest and then to the outstanding principal. This rule is necessary because the current practice reduces the effective rate below an acceptable three percent (3%) and results in a lower effective interest rate for borrowers who default, than for borrowers who remain current in payment.

EFFECTIVE DATE: July 12, 1979.

FOR FURTHER INFORMATION CONTACT: John L. Brady, Director, Title I Insured and 312 Loan Servicing Division, Room 9172, 451 7th Street, SW., Washington, D.C. 20410, (202) 755-6681. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: On December 27, 1978, the Department published a Notice of Proposed Rulemaking (at 43 FR 60301) to amend 24 CFR Part 445. Part 445 now requires that all receipts on 312 accounts serviced by HUD be applied first to the reduction of the principal. Interest is not computed until the principal has been paid in full. This reduces the effective rate below an acceptable three percent (3%) level to as low as two and one-fifth percent (2⅕%). This practice is contrary to customary commercial practice and, in effect, gives more favored treatment to borrowers who default than to borrowers who maintain payment on a current basis. This amended rule will eliminate the disparate treatment and remove any incentives for defaulting which may exist. Comments on the proposed rule were invited until January 28, 1978. Only one comment was received. It supported the amendment; therefore, no changes are being made to the proposed rule.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this Finding is available for public inspection during regular working hours at the Office of the Rules Docket Clerk, Office of the General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410.

Accordingly, the Department is amending Title 24, CFR Part 445 by revising § 445.1 as follows:

§ 445.1 Application of payments.

When a debt is paid in installments and interest is collected for a Section 312 loan, the installment payments will first be applied to the payment of accrued interest and then to principal as prescribed in Section 102.10 of the Joint Regulations of the General Accounting Office and the Department of Justice. (4 CFR 102.10)

(Sec. 7(d), Department of HUD Act; (42 U.S.C. 3535(d)). (38 FR 27218 October 1, 1973.) Sec. 312 of the Housing Act of 1964, (42 U.S.C. 1452b).)

Issued at Washington, D.C., June 5, 1979.

Lawrence B. Simons,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 199

Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Clarification of CHAMPUS Last Pay Status

AGENCY: Office of the Secretary.

ACTION: Addendum to rule.

SUMMARY: The purpose of this addendum to 32 CFR Part 199 is to clarify DoD's position of "last pay" on CHAMPUS benefits when certain beneficiaries are entitled to duplicate coverage, in whole or in part, by insurance, medical service, health and medical plan, or other Government program available through employment, law, membership in an organization or as a student. Specifically, this addendum clarifies a provision contained in the DoD Regulation 6010.8-R (32 CFR 199) that indicated lack of understanding when considered at the public rulemaking hearings on September 7 and 8, 1977, and also at a specific case review which discussed DoD intent regarding the double coverage provisions.

EFFECTIVE DATE: January 10, 1977.

FOR FURTHER INFORMATION CONTACT: LTC L. Rowlette, Special Assistant for CHAMPUS, Office of the Deputy Assistant Secretary of Defense (Health Resources & Programs), OASD(HA), Washington, D.C. 20301, telephone 202-695-6281

SUPPLEMENTARY INFORMATION: In FR Doc. 77-7834, appearing in the Federal Register on April 4, 1977 (42 FR 17972) the Department of Defense published its regulation, DoD 6010.8-R, "Civilian Health and Medical Program of the Uniformed Services (CHAMPUS)." In FR Doc. 79-9566, appearing in the Federal Register on March 28, 1979 (44 FR 18661) the Office of the Secretary of Defense published the regulation's first amendment. The following clarifies certain aspects of this regulation and responds to public comment.

CHAMPUS Beneficiary Population

Statutes pertaining to the CHAMPUS are contained in Chapter 55 of Title 10, United States Code. Section 1086 of that chapter as added by the Military Medical Benefits Amendments of 1966, Pub. L. 89-614, expanded the CHAMPUS beneficiary population to include retirees, spouses, and children of retirees, and spouses and children of deceased active duty members or retirees of the uniformed services, subject to certain conditions and exceptions. One such condition set forth in subsection 1086(d) denies payment for CHAMPUS benefits when the beneficiary is entitled to other insurance, medical service, or health plan provided by law or through employment.

Exclusionary Clause in Insurance Contracts

Following enactment of Pub. L. 89-614, an anomalous situation arose. That is, some beneficiaries whose CHAMPUS entitlement was newly established under the law could not receive

payment of medical care costs either from the CHAMPUS or from their insurance, medical service or health plan provided by law or through employment. This resulted from the position taken by certain insurance carriers that exclusionary clauses in health insurance contracts relieved them from medical expenses of the beneficiaries who happened to be covered by such contracts prior to the 1966 CHAMPUS Amendments. An exclusionary clause in insurance contracts is one which, generally, excludes from coverage expenses for services and supplies to the extent they are provided under any governmental plan or law under which the insured is or could be covered. The contention of the insurance carriers was that Section 1086(d) should not be construed as having retroactive application, thereby impairing their preexisting contractual rights.

To ease transitional implementation of the 1966 Amendments to the law governing the CHAMPUS, the so-called "October 1, 1966 Rule" was incorporated into the joint Uniformed Services regulation implementing the CHAMPUS. Under that rule, the CHAMPUS assumed the status of primary health care coverage ("primary payor") for beneficiaries entitled to CHAMPUS benefits under the 1966 Amendments if the beneficiary has been continuously covered since October 1, 1966 (the effective date of the 1966 Amendments) by an insurance, medical service, or health plan provided by law of through employment which has continuously contained an exclusionary clause.

Joint Uniformed Services Regulation

The joint Uniformed Services regulation implementing the CHAMPUS was codified at 32 CFR 577.80 *et seq.* It was effective until various portions thereof were affected by implementation of Department of Defense Instruction 6010.8 and 6010.8–R (32 CFR 199, January 10, 1977). The "October 1, 1966 Rule" as incorporated into the CHAMPUS Regulation 6010.8–R, is set forth in Section D, Chapter VIII (32 CFR 199.14(d) and 42 FR 18020, April 4, 1977) as follows:

Title 32, § 199.14:

* * * * *

(d) *Retirees; Dependents of Retirees; and Dependents of Deceased Active Duty Members or Retirees.* Chapter 55 of Title 10, United States Code, is clear that the CHAMPUS Program is designed as an interim, secondary coverage for retirees, dependents of retirees and dependents of deceased active duty members or retirees. Therefore, CHAMPUS claims submitted for otherwise covered services and/or supplies provided these beneficiary classes, and which involve double coverage, shall be adjudicated as follows:

(1) *CHAMPUS Always "Last Pay".* In any double coverage situations, CHAMPUS benefits shall be "last pay."

(2) *Exclusionary Clause: October 1, 1966 Rule.* Generally if a double coverage plan has an exclusionary clause which precludes payment of benefits as "primary payor" if the insured is covered under a Federal health and medical benefits program, it is not recognized by CHAMPUS (refer to paragraph (h)(2) of this section). However, if the double coverage plan had an exclusionary clause that was in effect prior to October 1, 1966, CHAMPUS becomes primary payor: *Provided,* The following requirements are met:

(i) *Continuously in Effect.* The specific double coverage plan containing such exclusionary clause has been continuously in effect since October 1, 1966, or prior, and

(ii) *Other than FEHBP Plan.* The double coverage plan is other than one of the plans authorized under the Federal Employees Health Benefits Law (FEHBP) Chapter 89, Title 5, United States Code, as administered by the United States Civil Service Commission.

The intent of the above language is to limit application of an "exclusionary clause" to those limited number of transitional situations under the 1966 Amendments where (a) the exclusionary clause in the double coverage plan was in effect on or before October 1, 1966; (b) the exclusionary clause has been continuously in effect from October 1, 1966; (c) the double coverage plan has not changed, either in carriers or benefits (rate changes are not considered), nor changed from an insured plan to a self-insured plan nor from a self-insured plan to an insured plan;

(d) the beneficiary has been continuously enrolled in the double coverage plan with the "exclusionary clause" since on or before October 1, 1966; and (e) the beneficiary's eligibility for CHAMPUS was effective October 1, 1966. In all other cases, the CHAMPUS is "last pay" as required by law.

H. E. Lofdahl,
Director, Correspondence & Directives, Washington Headquarters Services, Department of Defense
June 7, 1979.

40 CFR Part 52

[FRL 1244-6]

Alabama: Approval of Plan Revisions; Correction

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final rule; correction.

SUMMARY: In the rulemaking notices of March 7 (44 FR 12420) and April 4 (44 FR 20074), 1979, approving revisions in the Alabama implementation plan, the numbering of the revisions in § 52.50, identification of plan, was incorrect. The xylene oxidation revision should have been listed as paragraph (c)(19) of 40 CFR 52.50, and coke oven revision, as paragraph (c)(18). Also, it has been noted that paragraph (c)(17) of 40 CFR 52.50, added on September 2, 1977 (42 FR 44234), contains no submittal date. With the appropriate editorial corrections, 40 CFR 52.50(c)(17) through (19) reads as set forth below.

EFFECTIVE DATE: June 12, 1979.

FOR FURTHER INFORMATION CONTACT: Walter Bishop of the Region IV Air Programs Branch, (404) 881–2864, FTS 257–2864.

Subpart B—Alabama

§ 52.50 Identification of plan.

[FRL 1238-1]

Approval of Revisions of the Pennsylvania State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Notice of Final Rulemaking.

SUMMARY: The Pennsylvania Department of Environmental Resources has submitted amendments to Article XVIII, Rules and Regulations of the Allegheny County Health Department. The revisions amend the Air Pollution Emergency Episode Regulations of Article XVIII. The revisions are designed to provide flexibility to deal with localized air pollution episodes. The amendments make provisions for declaring localized incidents where persistent winds cause high pollution levels and set forth specific actions, including ordering source curtailments, to be taken by the Bureau of Air Pollution Control. Other changes include authorizing the Director of the Allegheny County Health Department, rather than the County Commissioners, to declare Third Stage Alerts and adding provisions designed to make the regulations more consistent with Federal guidelines.

The Administrator, by this notice, announces his approval of the revision.

EFFECTIVE DATE: July 12, 1979.

ADDRESSES: Copies of the revision and accompanying support material are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Air Programs Branch (3AH10), Curtis Building, 6th & Walnut Streets, Philadelphia, Pennsylvania 19106, Attn: Ms. Patricia Sheridan.

Bureau of Air Quality Control, Department of Environmental Resources, Commonwealth of Pennsylvania, 200 North 3rd Street, Harrisburg, Pennsylvania 17120.

Allegheny County Health Department, Bureau of Air Pollution Control, 301 39th Street, Pittsburgh, Pennsylvania 15201.

Public Information Reference Unit, Room 2922—EPA Library, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Mr. William Belanger (3AH13), Air Programs Branch, U.S. Environmental Protection Agency, Region III, Curtis Building, 6th & Walnut Streets, Philadelphia, Pennsylvania 19106.

SUPPLEMENTARY INFORMATION: On May 15, 1978, the Pennsylvania Department of Environmental Resources submitted to the Regional Administrator, EPA Region III, amendments to Article XVIII, Rules and Regulations of the Allegheny Health Department, and requested that they be reviewed and processed as a revision of the Pennsylvania State Implementation Plan (SIP) applicable to Allegheny County.

The proposed amendments affect Section 1800 (Definitions) and Section 1813 (Air Pollution Emergency Episode Regulations) of Article XVIII.

In November, 1975 a localized emergency episode occurred in the Liberty Borough—Clairton area of Allegheny County. Existing regulations required extensive county-wide actions even though emergency conditions occurred in only a small portion of the County. The amended regulations will provide the flexibility to declare localized Third Stage Alerts and for instituting curtailment actions in the exact area(s) affected. The amendments also provide for declaring localized incidents where persistent winds cause high pollution levels, and also provide guidance on specific actions to be taken in the case of wind-induced pollution incidents.

A public hearing on the proposed amendments was held on February 17, 1978 at the Bureau of Air Pollution Control, 301 39th St., Pittsburgh, Pennsylvania 15201.

On November 30, 1978 (43 FR 56060), the Regional Administrator announced receipt of these amendments, proposed them as a revision of the Pennsylvania SIP, and provided for a 30-day public comment period following publication in the Federal Register. During this public comment period, no comments were received.

The Environmental Protection Agency has evaluated the Allegheny County Episode Plan and concurs with the County's rationale in revising its plan to provide the ability to deal with a localized situation on less than a county-wide basis, and to deal with wind-induced incidents in an appropriate manner.

In view of the above evaluation and the fact that the amendments to Article XVIII of the Allegheny County regulations for the Control and Abatement of Air Pollution conform to the requirements of Section 110(a)(2) of the Clean Air Act and 40 CFR Part 51, the Administrator approves them as a revision of the Pennsylvania State Implementation Plan, effective (30 days from date of publication of this notice). Concurrently, 40 CFR 52.2020 (Identification of Plan) is amended to incorporate these amendments into the Federally-approved Pennsylvania SIP.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized." I have reviewed this regulation and determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Authority: 42 U.S.C. 7401–7642 et seq.

Dated: June 1, 1979.

Douglas Costle,

Administrator.

Part 52 of Title 40 of the Code of Federal Regulations is amended as follows:

Subpart NN—Pennsylvania

1. In Section 52.2020, paragraph (c)(17) is amended to read as follows:

§ 52.2020 Identification of Plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified***

(17) Amendment to Article XVIII, Rules and Regulations of the Allegheny County Health Department, Sections 1800 (Definitions) and 1813 (Air Pollution Emergency Episode Regulations). These amendments were submitted on May 15, 1978 by the Department of Environmental Resources.

40 CFR Part 65

[FRL 1240-4]

Delayed Compliance Order of Blanchester Foundry Co.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: By this rule, the Administrator of U.S. EPA approves a Delayed Compliance Order to Blanchester Foundry Company. The Order requires the Company to bring air emissions from its grey iron cupola at

Blanchester, Ohio, into compliance with certain regulations contained in the federally approved Ohio State Implementation Plan (SIP). Blanchester Foundry Company's compliance with the Order will preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act (Act) for violations of the SIP regulations covered in the Order.

DATES: This rule takes effect June 12, 1979.

FOR FURTHER INFORMATION CONTACT: Cynthia Colantoni, United States Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, Telephone (312) 353–2082.

SUPPLEMENTARY INFORMATION: On March 23, 1979, the Regional Administrator of U.S. EPA's Region V Office published in the Federal Register (44 FR 17758) a notice setting out the provisions of a proposed State Delayed Compliance Order for Blanchester Foundry Company. The notice asked for public comments and offered the opportunity to request a public hearing on the proposed Order.

No public comments and no request for a public hearing were received in response to the notice.

Therefore, a Delayed Compliance Order effective this date is approved to Blanchester Foundry Company by the Administrator of U.S. EPA pursuant to the authority of Section 113(d)(2) of the Act, 42 U.S.C. 7413(d)(2). The Order places Blanchester Foundry Company on a schedule to bring its grey iron cupola at Blanchester, Ohio, into compliance as expeditiously as practicable with Regulations OAC–3745–17–07 and OAC–3745–17–11, a part of the federally approved Ohio State Implementation Plan. Blanchester Foundry Company is unable to immediately comply with these regulations. The Order also imposes interim requirements which meet Section 113(d)(1)(C) and 113(d)(7) of the Act, and emission monitoring and reporting requirements. If the conditions of the Order are met, it will permit Blanchester Foundry Company to delay compliance with the SIP regulations covered by the Order until July 1, 1979.

Compliance with the Order by Blanchester Foundry Company will preclude Federal enforcement action under Section 113 of the Act for violations of the SIP regulations covered by the Order. Citizen suits under Section 304 of the Act to enforce against the source are similarly precluded. Enforcement may be initiated, however, for violations of the terms of the Order, and for violations of the regulations covered by the Order which occurred before the Order was issued by U.S. EPA or after the Order is terminated. If the Administrator determines that Blanchester Foundry Company is in violation of a requirement contained in the Order, one or more of the actions required by Section 113(d)(9) of the Act will be initiated. Publication of this notice of final rulemaking constitutes final Agency action for the purposes of judicial review under Section 307(b) of the Act.

U.S. EPA has determined that the Order shall be effective upon publication of this notice because of the need to immediately place Blanchester Foundry Company on a schedule for compliance with the Ohio State Implementation Plan.

Authority: 42 U.S.C. 7413(d), 7601.

Dated: June 1, 1979.

Douglas Costle,
Administrator.

In consideration of the foregoing, Chapter I of Title 40 of the Code of Federal Regulations is amended as follows:

PART 65—DELAYED COMPLIANCE ORDERS

By adding the following entry to the table in Section 65.401:

Blanchester Foundry Company.	Blanchester, Ohio	None	Jan. 26, 1979	OAC–3745–17–07 OAC–3745–17–11.	July 1, 1979

[FR Doc. 79-18270 Filed 6-11-79; 8:45 am]

BILLING CODE 6560-01-M

40 CFR Part 65

[FRL 1225–2]

Approval of Delayed Compliance Order Issued by the Connecticut Department of Environmental Protection to Ross and Roberts, Inc.

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Administrator of EPA hereby approves a Delayed Compliance Order issued by the Connecticut Department of Environmental Protection to Ross and Roberts, Inc. The Order requires the company to bring air emissions from its coating lines at Stratford, Connecticut into compliance with certain regulations contained in the federally-approved Connecticut State Implementation Plan (SIP). Because of the Administrator's approval, Ross and Roberts, Inc. compliance with the Order will preclude suits under the federal enforcement and citizen suit provisions of the Clean Air Act for violation(s) of the SIP regulations covered by the Order during the period the Order is in effect.

DATES: This rule takes effect on June 12, 1979.

FOR FURTHER INFORMATION CONTACT: Michael Gurchin at (617) 223–5661 or engineer Steven Fradkoff at (617) 223–5610, both at the following address:

U.S. Environmental Protection Agency, J. F. K. Federal Building, Room 2103, Boston, MA 02203.

ADDRESS: A copy of the Delayed Compliance Order, any supporting material, and any comments received in response to prior Federal Register notice proposing approval of the Order are available for public inspection and copying during normal business hours at the address indicated above.

SUPPLEMENTARY INFORMATION: On February 14, 1979, the Regional Administrator of EPA's Region I Office published in the Federal Register, 44 FR 9603, a notice proposing approval of a delayed compliance order issued by the Connecticut Department of Environmental Protection to Ross and Roberts, Inc. The notice asked for public comments by March 16, 1979 on EPA's

proposed approval of the Order. No public comments were received in response to the proposal notice.

Therefore, the delayed compliance order issued to Ross and Roberts, Inc., is approved by the Administrator of EPA pursuant to the authority of Section 113(d)(2) of the Clean Air Act, 42 U.S.C. 7414(d)(2). The Order places Ross and Roberts, Inc. on a schedule to bring its coating lines at Stratford, Connecticut into compliance as expeditiously as practicable with Section 19-508-18(a)(1)(i) and 19-508-23(a)(1) of the Connecticut Regulations for the Abatement of Air Pollution, a part of the federally-approved Connecticut State Implementation Plan. The Order also imposes interim requirements which meet Sections 113(d)(1)(C) and 113(d)(7) of the Act, and reporting requirements. The Order does not include emission monitoring requirements because their inclusion in the Order would be unreasonable. If the conditions of the Order are met, it will permit Ross and Roberts, Inc. to delay compliance with the SIP regulations covered by the Order until March 15, 1979. The company is unable to immediately comply with these regulations.

Because the Order has been approved by EPA, compliance with its terms will preclude federal enforcement action under Section 113 of the Act for violations of the SIP regulations covered by the Order during the period the Order is in effect. Citizen suits under Section 304 of the Act are similarly precluded. If the Administrator determines that Ross and Roberts, Inc. is in violation of a requirement contained in the Order, one or more of the actions required by Section 113(d)(9) of the Act will be initiated. Publication of this notice of final rulemaking constitutes final Agency action for the purposes of judicial review under Section 307(b) of the Act.

EPA has determined that its approval of the Order shall be effective upon publication of this notice because of the need to immediately place Ross and Roberts, Inc., on a schedule which is effective under the Clean Air Act for compliance with the applicable requirement(s) of the Connecticut State Implementation Plan.

Authority: 42 U.S.C. 7413(d), 7601.

Dated: June 1, 1979.

Douglas Costle,

Administrator.

In consideration of the foregoing, Chapter 1 of Title 40 of the Code of Federal Regulations is amended as follows:

Delayed Compliance Order for the Defense Logistics Agency, Defense Electronics Supply Center

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: By this rule, the Administrator of U.S. EPA issues a Delayed Compliance Order to the Defense Logistics Agency, Defense Electronics Supply Center (DESC). The Order requires the facility to bring air emissions from its four boilers in Building 17 at Dayton, Ohio into compliance with certain regulations contained in the federally promulgated Ohio State Implementation Plan (SIP). DESC's compliance with the Order will preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act (Act) for violations of the SIP regulations covered in the Order.

DATES: This rule takes effect June 12, 1979.

FOR FURTHER INFORMATION CONTACT: Louise C. Gross, Attorney, United States Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, Telephone (312) 353-2082.

SUPPLEMENTARY INFORMATION: On February 1, 1979, the Regional Administrator of the U.S. EPA's Region V Office published in the Federal Register (44 FR 6468) a notice setting out the provisions of a proposed Federal Delayed Compliance Order for DESC. The notice asked for public comments and offered the opportunity to request a public hearing on the proposed Order. No public comments and no request for a public hearing were received in response to the notice.

Therefore, a Delayed Compliance Order effective this date is issued to DESC by the Administrator of U.S. EPA pursuant to the authority of Section 113(d)(1) of the Act, 42 U.S.C. 7413(d)(1). The Order places DESC on a schedule to bring its four boilers in Building 17 at Dayton, Ohio, into compliance as expeditiously as practicable with 40 CFR 52.1881(b)(46)(vii), a part of the federally promulgated Ohio State Implementation Plan. DESC is unable to immediately comply with this regulation. The Order also imposes interim requirements which meet Sections 113(d)(1)(C) and 113(d)(7) of the Act, and emissions monitoring and reporting requirements. If the conditions of the Order are met, it will permit DESC to delay compliance with the SIP regulation covered by the Order until June 30, 1979.

Compliance with the Order by DESC will preclude Federal enforcement action under Section 113 of the Act for violations of the SIP regulation covered by the Order. Citizen suits under Section 304 of the Act to enforce against the source are similarly precluded. Enforcement may be initiated, however, for violations of the terms of the Order, and for violations of the regulation covered by the Order which occurred before the Order was issued by U.S. EPA or after the Order is terminated. If the Administrator determines that DESC is in violation of a requirement contained in the Order, one or more of the actions required by Section 113(d)(9) of the Act will be initiated. Publication of this notice of final rulemaking constitutes final Agency action for the purposes of judicial review under Section 307(b) of the Act.

U.S. EPA has determined that the Order shall be effective upon publication of this notice because of the need to immediately place DESC on a schedule for compliance with the Ohio State Implementation Plan.

Authority: 42 U.S.C. 7413(d), 7601.

Dated: June 1, 1979.

Douglas Costle,
Administrator.

In consideration of the foregoing, Chapter I of Title 40 of the Code of Federal Regulations is amended as follows:

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1041, 1047, 1062

[No. MC-C-3437]

Motor Transportation of Property Incidental to Transportation by Aircraft

AGENCY: Interstate Commerce Commission.

ACTION: Notice of extension of effective date.

SUMMARY: The Interstate Commerce Commission has extended the effective date of the regulations adopted in this proceeding (44 FR 3295, January 16, 1979) from May 16, 1979, to June 26, 1979, in order to provide adequate time to dispose of certain petitions for reconsideration.

DATE: Effective June 22, 1979.

FOR FURTHER INFORMATION CONTACT: Donald J. Shaw, Jr., (202) 275-7292.

SUPPLEMENTARY INFORMATION: By decision of December 11, 1978 (*Motor Transp. of Property Incidental to Air*, 131 M.C.C. 67 (1978)), served January 11, 1979, the Commission adopted appropriate regulations which define and generally expand those areas (air terminal areas) within which the motor carrier transportation of property incidental to transportation by aircraft is exempt from economic regulation. The regulations were to become effective May 16, 1979.

Petitions for reconsideration have been filed, but a decision thereon could not be served prior to May 16, 1979. Also, certain of the petitioners have filed a petition for stay pending judicial review which cannot be disposed of until after the petitions for reconsideration have been acted upon. Accordingly, in order to provide time for the pending pleadings to be considered, the effective date of the decision served January 11, 1979 was extended to 20 days after the service date of the decision disposing of the petitions for reconsideration. The decision disposing of the petitions for reconsideration was served June 6, 1979.

Issued in Washington, D.C.

Dated: May 30, 1979.

By the Commission, Chairman O'Neal, Vice Chairman Brown, Commissioners Stafford, Gresham, Clapp and Christian.

H. G. Homme, Jr.,
Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 371

Fraser River Sockeye and Pink Salmon Fishery; Final Regulations

AGENCY: National Oceanic and Atmospheric Administration/ Commerce.

ACTION: Final regulations.

SUMMARY: These regulations for 1979 are similar to regulations adopted in previous years that implemented the Convention for Protection, Preservation, and Extension of the Sockeye Salmon and Pink Salmon Fisheries of the Fraser River System (Convention) between the United States and Canada. The regulations are amended by changing

the schedules of fishing by gillnets, purse seines and reef nets to 1979 calendar dates. The 1978 regulations provided for eight weeks of two-days-per-week fishing for sockeye salmon (pink salmon are available only in odd-numbered years); however, in-season emergency changes in fishing schedules by the International Pacific Salmon Fisheries Commission (Commission), in response to developing information on abundance and timing of the spawning races of Fraser River sockeye salmon, resulted in only three weeks of two-days fishing, two weeks of one-day fishing, one week of three days of fishing, and two weeks during which no fishing was permitted. The regulations for the ten-week season in 1979 for both sockeye and pink salmon fishing provide for six weeks of 2-days-a-week fishing and 4 weeks of one day of fishing each week. This schedule may be adjusted during the season to meet the objectives of the management program as prescribed in the Convention, as efforts to attain these objectives are affected by the abundance and timing of the salmon runs through U.S. Convention Waters. Another change in the 1979 regulations is the closure to commercial trolling during the period June 15 through June 30 in territorial waters of the State of Washington north of 48° N. latitude and U.S. Convention Waters westward of the line between the Tatoosh Island Lighthouse in Washington State and Bonilla Point on Vancouver Island, B. C.

These rules do not apply to treaty Indians exercising treaty-secured fishing rights at the tribes' usual and accustomed fishing places in accordance with regulations promulgated by the Department of Interior (25 CFR Part 256).

EFFECTIVE DATE: 1201 a.m. on June 15, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Donald R. Johnson, Regional Director, 1700 Westlake Avenue North, Seattle, Washington 98109, Telephone: (206) 442-7575.

SUPPLEMENTARY INFORMATION: On March 12, 1979, the Commission forwarded the proposed regulations for the 1979 commercial fishing season for sockeye and pink salmon in Convention Waters to the Government of the United States for approval, as required by Article VI of the Convention. The United States has provisionally approved those regulations, except that the regulations would not apply to treaty Indians exercising treaty-secured fishing rights at the tribes' usual and accustomed fishing places. These fisheries are regulated by 25 CFR Part 256, published by the Department of the Interior.

U.S. territorial waters of the State of Washington north of 48° N. latitude and U.S. Convention waters will be closed to commercial fishing with trolling gear from June 15 to June 30, both dates inclusive.

These regulations will become effective on June 15, 1979, in High Seas Convention Waters, and on June 24, 1979 in Convention Waters inside the Bontilla Point-Tatoosh Island line. These regulations are necessary to achieve the objectives of the Convention (e.g. assure adequate escapement of salmon within each spawning unit, and assure an equitable division of catch between U.S. and Canadian fishermen) and provide for a rational fishery by U.S. fishermen.

These regulations are being issued with respect to a foreign affairs function of the U.S. and, therefore, are exempt from the requirements of Executive Order 12044, pursuant to Section 6(b)(2) of that Order and the advance notice, public comment and delayed effectiveness procedures of 5 U.S.C., Section 553, pursuant to Section (a)(1) of that Act.

Signed at Washington, D.C. this 7th day of June, 1979.

Jack W. Gehringer,

Deputy Assistant Administrator, National Oceanic and Atmospheric Administration.

Accordingly, 50 CFR Part 371 is revised to read as follows:

PART 371—FRASER RIVER SOCKEYE AND PINK SALMON REGULATIONS

Subpart A—General Provisions

Sec.

371.1 Purpose of regulations.
371.2 Scope of regulations.
371.3 Definition of terms.
371.4 Other laws and regulations.
371.5 Reporting requirements.
371.6 Notice of change in regulations.
371.7 Unlawful possession.
371.8 Forcible assault of enforcement officer.
371.9 Commission regulations.

Appendix A—International Pacific Salmon Fisheries Commission Regulations.

Authority: Sockeye Salmon or Pink Salmon Fishing Act of 1947, 16 U.S.C. 776–776f.

§ 371.1 Purpose of regulations.

The regulations in this Subpart A implement the convention between the United States and Canada for the protection of the sockeye and pink salmon fisheries of the Fraser River System, and the Sockeye Salmon or Pink Salmon Fishing Act of 1947.

§ 371.2 Scope of regulations.

This Part 371 applies to all commercial fishing for sockeye salmon and pink salmon and related activities conducted in U.S. Convention Waters during the time the Commission exercises jurisdiction over the sockeye salmon and pink salmon fisheries, except that these Regulations and Appendix A do not govern fishing by treaty Indians exercising treaty-secured fishing rights at the tribes' usual and accustomed fishing places.

§ 371.3 Definition of terms.

When used in this Subchapter C:

(a) *Act* means: The Sockeye Salmon and Pink Salmon Fishing Act of 1947, 16 U.S.C. 776–776f.

(b) *Commission* means: The International Pacific Salmon Fisheries Commission provided for by Article II of the Convention.

(c) *Convention* means: The convention between the United States of America and Canada for the protection, preservation, and extension of the sockeye salmon fisheries of the Fraser River system, signed at Washington on the 26th day of May, 1930, as amended by the protocol to the convention to include pink salmon, signed at Ottawa on the 28th day of December 1956.

(d) *Convention waters* means: Those waters described in Article I of the convention.

(e) *Enforcement Officer* means: (1) Any enforcement agent of the National Marine Fisheries Service.

(2) Any commissioned, warrant, or petty officer of the Coast Guard;

(3) Any Coast Guard personnel accompanying and acting under the direction of any person described in Paragraph (e)(2) of this Section.

(4) Any other person authorized by the Regional Director, Northwest Region, National Marine Fisheries Service to enforce the provisions of the convention, the Commission's regulations, the Act and this part 371.

(f) *Fish, Fishing* means: The fishing for, catching, or taking, or the attempted fishing for, catching, or taking, of any sockeye salmon or pink salmon in convention waters.

(g) *Fishing gear* means: Any net, trap, hook, or other device, appurtenance or equipment, of whatever kind or description, used or capable of being used, for the purpose or capturing fish or an aid in capturing fish.

(h) *Gillnet* means: Gillnet as defined in Washington Administrative Code, Chapter 220-16, and lawful gillnet as defined in Washington Administrative Code, Chapter 220-47.

(i) *Person* includes: The word "person" includes individuals, partnerships, associations, and corporations.

(j) *Pink salmon* means: That species of salmon known by the scientific name *Oncorhynchus gorbuscha.*

(k) *Purse seine* means: Purse seine as defined in Washington Administrative Code, Chapter 220–16 and lawful purse seine as defined in Washington Administrative Code, Chapter 220–47.

(l) *Reef net* means: Reef net as defined in Washington Administrative Code, Chapter 220–16 and lawful reef net as defined in Washington Administrative Code, Chapter 220–47.

(m) *Salmon preserves* means: Salmon preserves defined in Washington Administrative Code, Chapter 220–47.

(n) *Sockeye salmon* means: That species of salmon known by the scientific name *Oncorhynchus nerka.*

(o) *State areas* means: Fishing areas defined as Puget Sound Salmon Management and Catch Reporting Areas in Washington Administrative Code, Chapter 220–22.

(p) *Troll line* means: Troll line as defined in Washington Administrative Code, Chapter 220–16 and lawful troll line as defined in Washington Administrative Code, Chapter 220–47.

§ 371.4 Other laws and regulations.

Nothing in Part 371 shall be construed to relieve a person from any other requirements imposed by a statute or regulation of the United States or of the State of Washington.

§ 371.5 Reporting requirements.

(a) Any person receiving or purchasing fish caught by any person fishing under § 371.9 Commission Regulations (Appendix A) of this Part 371 shall comply with Washington Administrative Code, Chapter 220–69.

(b) Any person fishing under Section 371.9, Commission Regulations (Appendix A) of this Part 371 selling these fish directly to the consumer, restaurant, boathouse or any other retail outlet shall comply with Washington Administrative Code, Chapter 220–69.

(c) No person receiving or purchasing sockeye or pink salmon caught in U.S. Convention Waters during the time the Commission exercises control over fishing for sockeye salmon or pink salmon in U.S. waters shall fail to permit enforcement officers to inspect records or reports required by Washington Administrative Code, Chapter 220–69 or to inspect fish landing, holding or storage areas under the control of this person.

§ 371.6 Notice of change in regulations.

The regulations of the Commission regarding the times permissible to fish are subject to frequent change by emergency order. Emergency orders are published by news releases to radio stations and newspapers in the fishing area. In addition, these orders will be available by calling the National Marine Fisheries Service toll-free telephone Hotline 1–800–562–2870. The emergency orders will be effective from the time of publication or as stated in the order.

§ 371.7 Unlawful possession.

No person subject to this Part 371 shall possess or retain on board a fishing vessel a sockeye or pink salmon while engaged in a fishery for other species in U.S. Convention Waters during times these waters are closed by the Commission, except that this provision shall not prohibit the direct transport of legally-caught fish to off-loading areas.

§ 371.8 Forcible assault of enforcement officer.

No person shall forcibly assault, resist, oppose, impede, intimidate or interfere with an enforcement officer engaged in enforcing the convention, the Commission's regulations, the Act or this Part 371.

§ 371.9 Commission regulations.

Appendix A sets forth regulations and fishing schedules of the Commission for the 1979 fishing season. These regulations, as may be modified from time to time by emergency orders of the Commission and disseminated pursuant to Section 371.6 of this Part 371, are the "Regulations of the Commission," violation of which is unlawful under the Act.

Appendix A—International Pacific Salmon Fisheries Commission Regulations

1. No person shall fish for sockeye or pink salmon by commercial trolling gear in that portion of Convention Waters westerly of a straight line drawn from the Tatoosh Island Lighthouse in the State of Washington to Bonilla Point in the Province of British Columbia comprising the Territorial Waters of the United States and those High Seas waters contained in the U.S. Fishery Conservation Zone, from the 15th day of June, 1979 to the 30th day of June, 1979, both dates inclusive.

2. No person shall fish for sockeye or pink salmon with nets in Convention Waters of the United States from the 24th day of June, 1979 to the 14th day of July, 1979, both dates inclusive.

3. (1) No person shall fish for sockeye or pink salmon with purse seines in the Convention Waters of the United States lying westerly of a straight line drawn from Angeles Point in the State of Washington across Race Rocks to William Head in the Province of British Columbia (Puget Sound Salmon Management and Catch-reporting Areas 4B, 5 and 6C):

(a) From the 15th day of July, 1979 to the 4th day of August, 1979, both dates inclusive, except from 3:00 AM to 9:30 PM on Monday and Tuesday of each week; and

(b) From the 5th day of August, 1979 to the 18th day of August, 1979, both dates inclusive, except from 3:00 AM to 9:30 PM on Monday of each week.

(c) From the 19th day of August, 1979 to the 8th day of September, 1979, both dates inclusive, except from 3:00 AM to 9:00 PM on Monday and Tuesday of each week.

(d) From the 9th day of September, 1979 to the 15th day of September, 1979, both dates inclusive, except from 3:00 AM to 9:00 PM on Monday of each week.

(2) No person shall fish for sockeye or pink salmon with gillnets in the waters described in subsection (1) of this section:

(a) From the 15th day of July, 1979 to the 21st day of July, 1979, and from the 29th day of July, 1979 to the 4th day of August, 1979, all dates inclusive, except from 7:00 PM on Sunday to 9:30 AM on Monday and from 7:00 PM Monday to 9:30 AM on Tuesday of each week; and

(b) From the 22nd day of July, 1979 to the 28th day of July 1979, both dates inclusive, except from 7:00 PM on Monday to 9:30 AM on Tuesday and from 7:00 PM on Tuesday to 9:30 AM on Wednesday; and

(c) From the 5th day of August, 1979 to the 11th day of August, 1979, both dates inclusive, except from 7:00 PM on Monday to 9:30 AM on Tuesday; and

(d) From the 12th day of August, 1979 to the 18th day of August, 1979, both dates inclusive, except from 7:00 PM on Sunday to 9:30 AM Monday; and

(e) From the 19th day of August, 1979 to the 25th day of August, 1979, and from the 2nd day of September, 1979 to the 8th day of September, 1979, both dates inclusive, except from 6:00 PM on Monday to 9:00 AM on Tuesday, and from 6:00 PM on Tuesday to 9:00 AM on Wednesday of each week; and

(f) From the 29th day of August 1979, to the 1st day of September, 1979, both dates inclusive, except from 6:00 PM on Sunday to 9:00 AM on Monday, and from 6:00 PM on Monday to 9:00 AM on Tuesday; and

(g) From the 9th day of September, 1979 to the 15th day of September, 1979, both dates inclusive, except from 6:00 PM on Sunday to 9:00 AM on Monday.

(3) No person shall fish for sockeye or pink salmon with commercial trolling gear in the waters described in subsection (1) of this section from the 15th day of July, 1979 to the 15th day of September, 1979, both dates inclusive, except from Monday through Friday of each week on those days when purse seine fishing is permitted within that area.

4. (1) No person shall fish for sockeye or pink salmon with purse seines in the Convention Waters of the United States lying easterly of a straight line drawn from Angeles Point in the State of Washington across Race Rocks to William Head in the Province of British Columbia (Puget Sound Salmon Management and Catch-reporting Areas 6, 6A, 7, and 7A):

(a) From the 15th day of July, 1979 to the 4th day of August, 1979, both dates inclusive,

except from 5:00 AM to 9:30 PM on Monday and Tuesday of each week; and

(b) From the 5th day of August, 1979 to the 18th day of August, 1979, both dates inclusive, except from 5:00 AM to 9:30 PM on Monday of each week; and

(c) From the 19th day of August, 1979 to the 8th day of September, 1979, both dates inclusive, except from 5:00 AM to 9:00 PM on Monday and Tuesday of each week; and

(d) From the 9th day of September, 1979 to the 22nd day of September, 1979, both dates inclusive, except from 5:00 AM to 9:00 PM on Monday of each week.

(2) No person shall fish for sockeye or pink salmon with reef nets in the waters described in subsection (1) of this section:

(a) From the 15th day of July, 1979 to the 21st day of July, 1979, and from the 29th day of July, 1979 to the 4th day of August, 1979, both dates inclusive, except from 6:30 AM to 9:30 PM on Sunday and from 5:00 AM to 9:30 PM on Monday of each week; and

(b) From the 22nd day of July, 1979 to the 28th day of July, 1979, both dates inclusive except from 7:00 AM to 7:30 PM on Sunday, and from 5:00 AM to 7:30 PM on Monday; and

(c) From the 5th day of August, 1979 to the 11th day of August, 1979, both dates inclusive, except from 7:00 AM to 7:30 PM on Sunday; and

(d) From the 12th day of August, 1979 to the 18th day of August, 1979, both dates inclusive, except from 6:30 AM to 9:30 PM on Sunday; and

(e) From the 19th day of August, 1979 to the 25th of August, 1979 and from the 2nd day of September, 1979 to the 8th day of September, 1979, all dates inclusive, except from 7:00 AM to 7:30 PM on Sunday and from 5:00 AM to 7:30 PM on Monday of each week; and

(f) From the 26th day of August, 1979 to the 1st day of September, 1979, both dates inclusive, except from 6:30 AM to 9:30 PM on Sunday, and from 5:00 AM to 9:00 PM on Monday; and

(g) From the 9th day of September, 1979 to the 15th day of September, 1979, both dates inclusive, except from 6:30 AM to 9:30 PM on Sunday; and

(h) From the 16th day of September, 1979 to the 22nd day of September, 1979, both dates inclusive, except from 7:00 AM to 7:30 PM on Sunday.

(3) No person shall fish for sockeye or pink salmon with gillnets in the waters described in subsection (1) of this section:

(a) From the 15th day of July, 1979 to the 21st day of July, 1979, and from the 29th day of July, 1979 to the 4th day of August, 1979, all dates inclusive, except from 7:00 PM on Sunday to 9:30 AM on Monday and from 7:00 PM on Monday to 9:30 AM on Tuesday of each week; and

(b) From the 22nd day of July, 1979 to the 28th day of July 1979, both dates inclusive, except from 7:00 PM on Monday to 9:30 AM on Tuesday and from 7:00 PM on Tuesday to 9:30 AM on Wednesday; and

(c) From the 5th day of August, 1979 to the 11th day of August, 1979, both dates inclusive, except from 7:00 PM on Monday to 9:30 AM on Tuesday; and

(d) From the 12th day of August, 1979 to the 18th day of August, 1979, both dates inclusive, except from 7:00 PM on Sunday to 9:30 AM on Monday; and

(e) From the 19th day of August, 1979 to the 25th day of August, 1979, and from the 2nd day of September, 1979 to the 8th day of September, 1979, all dates inclusive, except from 6:00 PM on Monday to 9:00 AM on Tuesday and from 6:00 PM on Tuesday to 9:00 AM on Wednesday of each week; and

(f) From the 26th day of August, 1979 to the 1st day of September, 1979, both dates inclusive, except from 6:00 PM on Sunday to 9:00 AM on Monday, and from 6:00 PM on Monday to 9:00 AM on Tuesday; and

(g) From the 9th day of September, 1979 to the 15th day of September, 1979, both dates inclusive, except from 6:00 PM on Sunday to 9:00 AM on Monday; and

(h) From the 16th day of September, 1979 to the 22nd day of September, 1979, both dates inclusive, except from 6:00 PM on Monday to 9:00 AM on Tuesday.

5. (1) No person shall fish for sockeye or pink salmon with nets in that portion of the waters described in subsection (1) of section 4 lying northerly and westerly of a straight line drawn from Tsawwassen Dock on Point Roberts in the State of Washington to Georgina Point Light at the entrance to Active Pass in the Province of British Columbia from the 26th day of August, 1979 to the 1st day of September, 1979, and from the 23rd day of September, 1979 to the 6th day of October, 1979, all dates inclusive.

(2) No person shall fish for sockeye or pink salmon with nets in that portion of the waters described in subsection (1) of section 4 lying westerly of a straight line drawn from the low water range marker in Boundary Bay on the International Boundary, across the east tip of Point Roberts to the East Point Light on Saturna Island, from the 2nd day of September, 1979 to the 22nd day of September, 1979, both dates inclusive.

6. The foregoing recommended regulations shall not apply to the following United States Convention Waters:

(1) Puget Sound Salmon Management and Catch-reporting Areas as follows: 6B, 7B, and 7C.

(2) Preserves previously established by the Director of Fisheries of the State of Washington for the protection of other species of food fish.

All times hereinbefore mentioned shall be Pacific Daylight Saving Time.

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 44, No. 114
Tuesday, June 12, 1979

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

[5 CFR Parts 831, 870, 871, and 890]

Retention of Benefits Upon Employment by Indian Tribal Organization

AGENCY: Office of Personnel Management.

ACTION: Proposed rulemaking.

SUMMARY: The Office of Personnel Management proposes rules to implement section 105(e)–(h) of Pub. L. 93–638, the Indian Self-Determination and Educational Assistance Act, which authorizes the retention of retirement, life insurance, and health benefits coverages by Federal employees who become employed by an Indian tribal organization without a break in service on or before December 31, 1985, in connection with activities which are or have been performed by employees in or for Indian communities.

DATE: Comments must be received on or before August 13, 1979.

ADDRESS: Comments should be directed to Craig B. Pettibone, Office of Policy Development and Technical Services (Retirement and Insurance), Office of Personnel Management, 1900 E Street, N.W., Washington, D.C. 20415.

FOR FURTHER INFORMATION CONTACT: Gay Gardner, Office of Policy Development and Technical Services, Retirement and Insurance, Room 4351, 1900 E Street, N.W., Washington, D.C. 20415. 202–632–4634.

(1) It is proposed to add a new Subpart P to 5 CFR 831, as set out below:

PART 831—RETIREMENT

Subpart P—Employment of Federal Employees by Indian Tribal Organizations

Sec.
831.1601 Basic records.
831.1602 Counseling employees.
831.1603 Credit for service.
831.1604 Basic pay.
831.1605 Sick leave.
831.1606 Employment of annuitants.

Authority: 5 U.S.C. 8347; E.O. 11899, 41 FR 3459, Jan. 23, 1976.

Subpart P—Employment of Federal Employees by Indian Tribal Organizations

§ 831.1601 Basic records.

Every Indian tribal organization as defined in section 4(c) of the Indian Self-Determination Act (88 Stat. 2204) having employees subject to subchapter III of chapter 83 of title 5, United States Code, shall initiate and maintain individual retirement accounts for those employees as prescribed in Federal Personnel Manual Supplement 831–1 (5 U.S.C. 8334). Each tribal organization shall (a) verify the correctness of deductions withheld from employees' pay, as well as agency contributions; (b) transmit these withholdings and contributions to the Office of Personnel Management, Retirement and Insurance Division, for deposit; and (c) maintain retirement control accounts and prepare retirement accounting reports.

§ 831.1602 Counseling employees.

(a) Tribal organizations shall obtain from the Government Printing Office pertinent portions of the Federal Personnel Manual and other instructional materials needed to effectively administer this subpart.

(b) Tribal organization questions on retirement matters may be referred to the Retirement and Insurance Division of the Office of Personnel Management.

§ 831.1603 Credit for service.

(a) Employment with an Indian tribal organization as defined in Public Law 93–638 is not, of itself, creditable service. However, an employee serving under an appointment not limited to one year or less who, on or before December 31, 1985, leaves Federal employment which is subject to subchapter III of chapter 83 of title 5, United States Code, to be employed without a break in service (or after a separation from service of three days or less) by an Indian tribal organization in a function which is or has been performed by Federal employees in or for Indian communities is entitled to full retirement credit for such service provided that (1) prior to employment by the Indian tribal organization, the employee and the organization elect in writing, on a form prescribed by the Office of Personnel Management, to retain retirement coverage, and (2) the necessary employee deductions and agency contributions for the period of the employment with the tribal organization are currently deposited into the Civil Service Retirement and Disability Fund.

(b) The Office of Personnel Management shall determine whether an Indian tribal organization function is one which is or has been performed by an employee in or for Indian communities and shall consult with the Departments of Interior and Health, Education, and Welfare when necessary in making such determinations.

(c) An employee who elects to retain retirement coverage may decide to terminate such coverage at any time during his/her employment with a tribal organization. Coverage so terminated may not attach again during such employment.

§ 831.1604 Basic pay.

Subject to pay limitations in sections 5308 and 8331(3) of title 5, United States Code, salary received during tribal organization employment will be considered basic pay for annuity computation purposes.

§ 831.1605 Sick leave.

If retirement coverage is retained, days of unused sick leave to the credit of an employee under a formal leave system remain to the employee's credit for annuity computation purposes while employed by a tribal organization.

§ 831.1606 Employment of annuitants.

An annuitant under subchapter III of chapter 83 of title 5, United States Code, who becomes employed by an Indian tribal organization, shall not be considered a reemployed annuitant.

(2) It is proposed to add a new Subpart H to 5 CFR 870 as set out below:

PART 870—REGULAR LIFE INSURANCE

Subpart H—Employment of Federal Employees by Indian Tribal Organizations

Sec.
870.801 Counseling employees.
870.802 Continuance of coverage.
870.803 Annual rate of pay.
870.804 Waiver of coverage.
870.805 Employment of annuitants.

Authority: 5 U.S.C. 8716, E.O. 11999, 41 FR 3459, Jan. 23, 1976.

Subpart H—Employment of Federal Employees by Indian Tribal Organizations

§ 870.801 Counseling employees.

(a) Tribal organizations shall obtain from the Government Printing Office pertinent portions of the Federal Personnel Manual and other instructional materials needed to effectively administer this subpart.

(b) Tribal organization questions on life insurance matters may be referred to the Retirement and Insurance Division of the Office of Personnel Management.

§ 870.802 Continuance of coverage.

(a) Employment with an Indian tribal organization as defined in section 4(e) of the Indian Self-Determination Act (88 Stat. 2206) is not, of itself, federal service and life insurance under this part cannot be acquired during such employment. However, an insured employee serving under an appointment not limited to one year or less who, on or before December 31, 1965, leaves Federal employment which is subject to subchapter III of chapter 83 of title 5, United States Code, to be employed without a break in service (or after a separation from service of three days or less) by an Indian tribal organization in a function which is or has been performed by Federal employees in or for Indian communities is entitled to continue life insurance coverage provided that (1) prior to employment by the Indian tribal organization, the employee and the organization elect in writing, on a form prescribed by the Office of Personnel Management, to retain life insurance coverage, and (2) the necessary employee deductions and agency contributions for the period of employment with the tribal organization are currently deposited into the Employees' Life Insurance Fund as prescribed in Federal Personnel Manual Supplement 870-1.

(b) The Office of Personnel Management shall determine whether an Indian tribal organization function is one which is or has been performed by an employee in or for Indian communities and shall consult with the Departments of Interior and Health, Education, and Welfare when necessary in making such determinations.

(c) An employee who elects to retain coverage under this part may decide to terminate such coverage at any time during his/her employment with a tribal organization.

§ 870.803 Annual rate of pay.

An individual's annual basic pay rate during employment with a tribal organization shall serve as the basis for determining the amount of insurance.

§ 870.804 Waiver of coverage.

An employee who elects not to retain life insurance coverage or who waives such coverage during employment with an Indian tribal organization may not cancel the waiver until reemployed in a Federal position in which the employee is not excluded from life insurance coverage.

§ 870.805 Employment of annuitants.

An annuitant under subchapter III of chapter 83 of title 5, United States Code, who becomes employed by an Indian organization, shall not be eligible as an employee for regular life insurance coverage under this part.

(3) It is proposed to add a new Subpart G to 5 CFR 871, as set out below:

PART 871—OPTIONAL LIFE INSURANCE

Subpart G—Employment of Federal Employees by Indian Tribal Organizations

Sec.
871.701 Counseling employees.
871.702 Continuance of coverage.
871.703 Cancellation of coverage.
871.704 Employment of annuitants.

Authority: 5 U.S.C. 8716, E.O. 11809, 41 FR 3450, Jan. 23, 1976.

Subpart G—Employment of Federal Employees by Indian Tribal Organizations

§ 870.701 Counseling employees.

(a) Tribal organization questions on optional insurance may be referred to the Retirement and Insurance Division of the Office of Personnel Management.

§ 871.702 Continuance of coverage.

(a) An insured employee serving under an appointment not limited to one year or less who, on or before December 31, 1965, leaves Federal employment which is subject to subchapter III of chapter 83 of title 5, United States Code, to be employed without a break in service (or after a separation from service of three days or less) by an Indian tribal organization in a function which is or has been performed by Federal employees in or for Indian communities is entitled to continue optional life insurance coverage provided that (1) prior to employment by the Indian tribal organization, the employee and the organization elect in writing, on a form prescribed by the Office of Personnel Management, to retain both regular and optional life insurance coverage, and (2) the necessary employee deductions for the period of employment with the tribal organization are currently paid into the Employees' Life Insurance Fund as prescribed in Federal Personnel Manual Supplement 870-1.

(b) The Office of Personnel Management shall determine whether an Indian tribal organization function is one which is or has been performed by an employee in or for Indian communities and shall consult with the Departments of Interior and Health, Education, and Welfare when necessary in making such determinations.

(c) An employee who elects to retain coverage under this part may decide to terminate such coverage at any time during his/her employment with a tribal organization.

§ 871.703 Cancellation of coverage.

(a) An employee who elects not to retain optional life insurance coverage or who cancels such coverage during employment with an Indian tribal organization may not reelect coverage until reemployed in a Federal position in which the employee is not excluded from optional life insurance coverage.

(b) Periods of non-coverage during Indian tribal organization employment must be considered as time during which the employee elected not to retain coverage in determining eligibility for optional life insurance coverage.

§ 871.704 Employment of annuitants.

An annuitant under subchapter III of chapter 83 of title 5, United States Code, who becomes employed by an Indian tribal organization, shall not be eligible as an employee for optional life insurance coverage under this part.

(4) It is proposed to add a new Subpart G to 5 CFR 890, as set out below:

PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS

Subpart G—Health Benefits Coverage During Employment With Indian Tribal Organizations Under Pub. L. 93-638

Sec.
890.701 Counseling employees.
890.702 Continuance of coverage.
890.703 Cancellation of enrollment.
890.704 Loss of coverage under another's enrollment.
890.705 Employment of annuitants.

Authority: 5 U.S.C. 8913, E.O. 11880, 41 FR 3450, Jan. 23, 1976.

Subpart G—Health Benefits Coverage During Employment With Indian Tribal Organizations Under Pub. L. 93-638

§ 890.701 Counseling employees.

(a) Tribal organizations shall obtain from the Government Printing Office

pertinent portions of the Federal Personnel Manual and other instructional materials needed to effectively administer this subpart.

(b) Tribal organization questions on health benefits matters may be referred to the retirement and Insurance Division of the Office of Personnel Management.

§ 890.702 Continuance of coverage.

(a) Employment with an Indian tribal organization as defined in section 4(c) of the Indian Self-Determination Act (88 Stat. 2204) is not, of itself, Federal service and health benefits under this part cannot be acquired during such employment. However, an enrolled employee serving under an appointment not limited to one year or less who, on or before December 31, 1965, leaves Federal employment which is subject to subchapter III of chapter 83 of title 5, United States Code, to be employed without a break in service (or after a separation from service of three days or less) by an Indian tribal organization in a function which is or has been performed by Federal employees in or for Indian communities is entitled to continue health benefits coverage provided that (1) prior to employment by the Indian tribal organization, the employee and the organization elect in writing, on a form prescribed by the Office of Personnel Management, to retain health benefits coverage, and (2) the necessary employee deductions and agency contributions for the period of employment with the tribal organization are currently paid into the Employees Health Benefits Fund as prescribed in Federal Personnel Manual Supplement 890–1.

(b) The Office of Personnel Management shall determine whether an Indian tribal organization function is one which is or has been performed by an employee in or for Indian communities and will consult with the Departments of Interior and Health, Education, and Welfare when necessary in making such determinations.

(c) An employee who elects to retain coverage under this part may decide to terminate such coverage at any time during his/her employment with a tribal organization.

§ 890.703 Cancellation of enrollment.

(a) An employee who elects not to retain health benefits coverage or who cancels such coverage during employment with an Indian tribal organization may not reenroll until reemployed in a Federal position in which the employee is not excluded from health benefits coverage.

(b) Periods of non-coverage during Indian tribal organization employment must be considered as time during which the employee elected not to retain coverage in determining eligibility for health benefits coverage as an annuitant.

§ 890.704 Loss of coverage under another's enrollment.

An employee who is not enrolled but is covered by the enrollment of another under this part, may register to be enrolled 31 days after termination of his/her coverage under the other's enrollment, other than because of death or cancellation, and within 60 days after termination, because of death, of the other's enrollment, provided the employee and the tribal organization agree to such election and the necessary employee deductions and agency contributions are currently paid into the Federal Employees Health Benefits Fund.

§ 890.705 Employment of annuitants.

An annuitant under subchapter III of chapter 83 of title 5, United States Code, who becomes employed by an Indian tribal organization, shall not be eligible as an employee for health benefits coverage under this part.

Office of Personnel Management.

BILLING CODE 6325-01-M

FEDERAL HOME LOAN BANK BOARD

[12 CFR Parts 526, 545, 563]

[79-305]

Federal Home Loan Bank System, Federal Savings and Loan System, Federal Savings and Loan Insurance Corp.; Exemption from Early Withdrawal Penalty Upon Death of Account Owner

May 30, 1979.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rulemaking.

SUMMARY: The Bank Board's present regulations allow member institutions to exempt savings accounts from the early withdrawal penalty in the event of death of an account owner. The Bank Board believes that this exemption is in the public interest, and by this proposal would make it mandatory.

DATE: Comments must be received by July 9, 1979.

ADDRESS: Office of the Secretary, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552.

FOR FURTHER INFORMATION, CONTACT: Kathleen E. Topelius, Attorney, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552 (202–377–6444).

SUPPLEMENTARY INFORMATION: The Bank Board's regulations, set out at 12 CFR 526.7(b), 545.1–4(f)(4), 545.3–1(c)(6), 536.3–1(d)(4), and 563.3–2(d)(3), currently provide that upon the death of any account holder, a member institution, if it chooses, may allow withdrawal of deposits from the account prior to maturity without imposing the normally required early withdrawal penalty. The Bank Board proposes to amend each of these provisions to require member institutions to allow withdrawal of deposits from accounts prior to maturity without penalty upon the death of any account holder when requested to do so by an authorized representative or any other owner of the account. The Bank Board believes that the proposed amendments will more fully effectuate the intent of this exception to the early withdrawal penalty rule, which is to facilitate administration of estates as well as to ease the financial burdens occasioned by the death of an account holder. Public comment is specifically requested on whether the proposed amendment, if adopted, should apply to all existing accounts or only to accounts issued after the date of any final regulation.

Accordingly, the Bank Board hereby proposes to amend Part 526 of the Regulations for the Federal Home Bank Board System, Part 545 of the Rules and Regulations for the Federal Savings and Loan System, and Part 563 of the Rules and Regulations for Insurance of Accounts, to read as set forth below.

1. Amend § 526.7(b) to read as follows:

§ 526.7 Penalty for early withdrawal.

* * * * *

(b)(1) Such penalty shall not be applied if withdrawal is made after death of the owner of the account; the "owner" is an individual who at death had full legal and beneficial title to all or part of the account and full power of disposition or alienation with respect thereto, including but not limited to power of revocation with respect to any trust, regardless of whether such owner was a trustee, of which such account comprises all or part of the trust assets; and

(2) Such penalty need not be applied if the account qualified as a retirement

account under subsection 401(d) or 408(a) of the Internal Revenue Code of 1954, and withdrawal is made to distribute the funds in the account following disability or after the participant becomes 59½ years of age.

2. Amend § 545.1–4(f)(4) to read as follows:

§ 545.1–4 Other savings deposits.

* * * * *

(f) *Withdrawal prior to expiration of term.*

* * * * *

(4)(i) A federal association shall not penalize withdrawal of all or any portion of a fixed-term savings deposit prior to expiration of its term if withdrawal is made after death of the owner of the account; the "owner" is an individual who at death had full legal and beneficial title to all or part of the account and full power of disposition or alienation with respect thereto, including but not limited to power of revocation with respect to any trust, regardless of whether such owner was a trustee, of which such account comprises all or part of the trust assets; and

(ii) A Federal association need not penalize withdrawal of all or any portion of a fixed term savings deposit prior to expiration of its term if the account qualifies as a retirement account under subsection 401(d) or 408(a) of the Internal Revenue Code of 1954, and withdrawal is made to distribute the funds in the account following disability or after the participant becomes 59½ years of age.

3. Amend § 545.3–1(c)(6) to read as follows:

§ 545.3–1 Distribution of earnings at variable rates.

* * * * *

(c) *Form of certificate.*

* * * * *

(6)(i) A Federal association shall not penalize withdrawal of all or any portion of a certificate account issued pursuant to subparagraph (b)(3) of this section prior to completion of its time eligibility period if withdrawal is made after death of the owner of the account; the "owner" is an individual who at death had full legal and beneficial title to all or part of the account and full power of disposition or alienation with respect thereto, including but not limited to power of revocation with respect to any trust, regardless of whether such owner was a trustee, of which such account comprises all or part of the trust assets; and

(ii) A Federal association need not penalize withdrawal of all or any portion of a certificate account issued pursuant to subparagraph (b)(3) of this section prior to completion of its time eligibility period if the account qualified as a retirement account under subsection 401(d) or 408(a) of the Internal Revenue Code of 1954, and withdrawal is made to distribute the funds in the account following disability or after the participant becomes 59½ years of age.

* * * * *

4. Amend § 563.9–1(d)(4) to read as follows:

§ 563.9–1 Fixed-rate, fixed-term accounts.

* * * * *

(d) *Withdrawal prior to expiration of term.*

* * * * *

(4)(i) An insured institution shall not penalize withdrawal of all or any portion of a fixed-rate, fixed-term account prior to expiration of its term if withdrawal is made after death of the owner of the account; the "owner" is an individual who at death had full legal and beneficial title to all or part of the account and full power of disposition or alienation with respect thereto, including but not limited to power of revocation with respect to any trust, regardless of whether such owner was a trustee, of which such account comprises all of part of the trust assets; and

(ii) An insured institution need not penalize withdrawal of all or any portion of a fixed-rate, fixed-term account prior to expiration of its term if the account qualifies as a retirement account under subsection 401(d) or 408(a) of the Internal Revenue Code of 1954, and withdrawal is made to distribute the funds in the account following disability or after the participant becomes 59½ yers of age.

5. Amend § 563.3–2(d)(3) to read as follows:

§ 563.3–2 Certificates evidencing other accounts.

* * * * *

(d) *Provisions relating to early withdrawal.*

* * * * *

(3)(i) An insured institution shall not penalize withdrawal of all or any portion of a certificate account prior to completion of its time eligibility period if withdrawal is made after death of the owner of the account; the "owner" is an individual who at death had full legal and beneficial title to all or part of the account and full power of disposition or alienation with respect thereto, including but not limited to power of revocation with respect to any trust, regardless of whether such owner was a trust, of which such account comprises all or part of the trust assets; and

(ii) An insured institution need not penalize withdrawal of all or any portion of a certificate account prior to completion of its time eligibility period if the account qualifies as a retirement account under subsection 401(d) or 408(a) of the Internal Revenue Code of 1954, and withdrawal is made to distribute the funds of the account following disability or after the participant becomes 59½ years of age.

(Sec. 4, 80 Stat. 824 (12 U.S.C. § 1425b); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071; Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. § 1464, Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1947 Supp.; Secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended; 12 U.S.C. 1725, 1726, 1730)

BILLING CODE 6720-01-M

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[Docket No. 9122]

Lone Star Industries, Inc., Et Al.; Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, accepted subject to final Commission approval, would require a Greenwich, Conn. manufacturer of Portland cement and masonry cement, and the Keystone Portland Cement Co., an Allentown, Pa. competitor, among other things, to provide the Commission with evidence that their acquisition agreement has been terminated, and all non-public documents exchanged during negotiations returned. The firms would also be required to provide the Commission with 60 days' advance notice and liberal discovery rights, should merger plans be resumed before December 31, 1981.

DATE: Comments must be received on or before August 10, 1979.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th Street and Pennsylvania Ave., N.W., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:
FTC/C, Alfred F. Dougherty, Jr., Washington, D.C. 20580. (202)523-3601.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6 (f) of the Federal Trade Commission Act. 38 Stat. 721, 15 U.S.C. 46 and § 3.25(f) of the Commission's rules of practice (16 CFR 3.25(f)), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

Lone Star Industries, Inc.; Keystone Portland Cement Co.,

[Docket No. 9122]

The agreement herein, by and between Lone Star Industries, Inc., a corporation, by its duly authorized officer, and Keystone Portland Cement Co., a corporation, by its duly authorized officer, hereinafter sometimes referred to as respondents, and their attorneys, and counsel for the Federal Trade Commission, is entered into in accordance with the Commission's rules governing consent order procedures. In accordance therewith the parties hereby agree that:

1. Respondent Lone Star Industries, Inc. is a corporation organized, existing and doing business under and by virtue of the laws of the State of Delaware, with its office and principal place of business located at One Greenwich Plaza, in the City of Greenwich, State of Connecticut.

2. Respondent Keystone Portland Cement Co. is a corporation organized, existing and doing business under and by virtue of the laws of the State of Pennsylvania, with its office and principal place of business located at 2200 Hamilton Street, in the City of Allentown, State of Pennsylvania.

3. Respondents have been served with a copy of the complaint issued by the Federal Trade Commission charging them with violations of Section 7 of the Clayton Act, as amended, 15 U.S.C. Section 18, and Section 5 of the Federal Trade Commission Act, as amended, 15 U.S.C. Section 45.

4. Respondents admit all the jurisdictional facts set forth in the Commission's complaint in this proceeding.

5. Respondents waive:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

6. This agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with related materials pursuant to Rule 3.25(f), will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the respondents, in which event it will take such action as it may consider appropriate, or issue and serve its decision, in disposition of the proceeding.

7. This agreement is for settlement purposes only and does not constitute an admission by respondents that the law has been violated as alleged in the said copy of the complaint issued by the Commission.

8. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 3.25(f) of the Commission's rules, the Commission may without further notice to respondents, (1) issue its decision containing the following order in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the decision containing the agreed-to order to respondents' address as stated in this agreement shall constitute service. Respondents wave any right they might have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or in the agreement may be used to vary or to contradict the terms of the order.

9. Respondents have read the complaint and the order contemplated hereby. They understand that once the order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the order. Respondents further understand that they may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I.

It is ordered, That Lone Star Industries, Inc. ("Lone Star") and Keystone Portland Cement Company ("Keystone") shall forthwith provide evidence that the acquisition agreement between them has been and is terminated and further, that any and all non-public documents provided by either Lone Star or Keystone to the other in connection with the acquisition agreement be returned. This paragraph shall not relieve any party from any obligation of confidentiality imposed by agreement between them or by operation of law.

II.

It is further ordered, That until December 31, 1981 neither Lone Star nor Keystone shall acquire, directly or indirectly, all or any part of the assets (except in the ordinary course of business), or securities of the other until sixty (60) days following the receipt by the Director of the Bureau of Competition of the Federal Trade Commission of written notice of the proposed acquisition, which notice shall specifically refer to this order. If during the first thirty (30) days of the aforesaid sixty (60) day period, the Commission staff has issued any discovery request (including requests for the production of documents or witnesses) to either Lone Star or Keystone to which a complete response has not been made on or before the fiftieth (50th) day of the aforesaid sixty (60) day period, then the proposed acquisition shall not be consummated until ten (10) days after a complete response to such discovery request has been made. Neither the aforesaid sixty (60) day period nor the discovery provisions of this paragraph are in derogation of any of the rights conferred upon the Commission by statute or rule, and shall not be construed as supplanting any of these rights.

III.

It is further ordered, That Lone Star and Keystone each shall notify the Commission at least thirty (30) days prior to any proposed corporate change such as dissolution, assignment, or sale

resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change, which may affect compliance obligations arising out of this order.

IV.

It is further ordered, That Lone Star and Keystone each shall, within sixty (60) days after service upon it of this order file with the Commission a written report setting forth in detail the manner and form in which it has complied with this order.

Analysis of Proposed Consent Order to Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Lone Star Industries, Inc. and Keystone Portland Cement Company.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed orders.

The complaint alleged that the acquisition of Keystone Portland Cement Company by Lone Star Industries, Inc. would violate Section 7 of the Clayton act and Section 5 of the Federal Trade Commission Act. Immediately after the complaint was issued the respondents abandoned their plans to merge and agreed to enter into a consent order with the Federal Trade Commission.

The proposed consent order requires that formal notice be given that the merger has been terminated; it requires the return of all non-public documents which may have been exchanged; and it also ensures, in the event that respondents resume their merger plans before December 31, 1981, that the Commission will be given sixty (60) days' advance notice and afforded liberal discovery rights.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Carol M. Thomas,

Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Parts 173 and 189]

[Docket No. 78N-0208]

Hydrazine; Proposed Removal from Food Additive Use

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This is a proposal to amend the food additive regulations by deleting provisions for use of hydrazine in the preparation of steam intended to contact food and listing it as a substance prohibited from use in human food.

DATES: Comments by August 13, 1979. Final regulations based on this proposal will issue no later than October 10, 1979, and shall be effective upon publication.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St., SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Section 173.310 provides for zero hydrazine in steam when used as a boiler water additive in the preparation of steam that will contact food. This limitation was established by considering the boiling point of hydrazine (100.7° C), its high reactivity with oxygen and organic matter, and its low use level (0.1 ppm in feedwater).

The petitioner for this regulation, Olin Corp., formerly Olin Mathieson Chemical Corp., has recently notified the Food and Drug Administration (FDA) that analytical data, based on improved methodology, indicate that hydrazine is present in steam when the feedwater contains hydrazine in the range of 0.05 to 0.10 ppm. It was recognized, however, that the method used by Olin Corp. to generate the latest information was not specific for hydrazine but rather measured most primary and secondary amine species. Subsequently, analyses of hydrazine treated boiler water and its steam condensate were conducted in FDA laboratories using a method more specific for hydrazine. These analyses have confirmed the presence of hydrazine in hydrazine treated boiler water and in its steam condensate.

The safety of hydrazine has been reviewed by international experts and discussed in a monograph published by the International Agency for Research on Cancer (IARC) in "IARC Monographs on the Evaluation of the Carcinogenic Risk of Chemicals to Man," volume 4, pages 127-136. The IARC evaluation, which is based on several studies, reports that oral administration of hydrazine in mice has caused a high incidence of multiple pulmonary adenomas and adenocarcinomas as well as the development of hepatomas, hepatocarcinomas, and lung tumors. Studies using newborn mice, rats, and hamsters are also discussed. The IARC report concludes that "hydrazine salts have been shown to be carcinogenic in

mice after oral and intraperitoneal administration and in rats following oral administration." A copy of IARC's report has been placed on public display at the office of the Hearing Clerk (address above).

Having evaluated the available data, the agency concludes: (1) the IARC report demonstrates that hydrazine is a carcinogen in test animals; (2) recent analyses demonstrate the presence of hydrazine in hydrazine treated boiler water and in its steam condensate; and (3) there is a reasonable expectation that hydrazine would be present in food as a result of the use of hydrazine as an additive in the preparation of steam that will contact food, and it has not been shown that hydrazine would be absent in food when used as a boiler water additive in the preparation of steam that will contact food. Accordingly, under the provisions of section 409(c)(3)(A) of the Federal Food, Drug, and Cosmetic Act, and the proviso thereto known as the Delaney clause (21 U.S.C. 348(c)(3)(A)), its use as a food additive may no longer be approved, and this document proposes to amend the food additive regulations to delete provisions for use of hydrazine as a boiler water additive and to list hydrazine as a substance prohibited from use in human food. The agency expects to issue the final regulation prohibiting the use of hydrazine as a food additive no later than October 10, 1979, which shall be effective upon publication under section 409(e) of the act (21 U.S.C. 348(e)). Elsewhere in this issue of the Federal Register, the Commissioner is proposing to declare that any human drug containing hydrazine or hydrazine salts is a new drug and deemed to be misbranded within the meaning of sections 201(p) and 502 of the act (21 U.S.C. 321(p) and 352).

The FDA has not received any direct evidence to show that hydrazine is a human carcinogen. Additionally, only small amounts of hydrazine would be expected to be in boiler water from its permitted use and only a very small amount of hydrazine could be expected to migrate into food. Therefore, it appears that the potential risk to the public health is not sufficient to require removal from the market of food containing hydrazine or the issuance of a public warning against the use of these products. Consequently, the agency concludes that the public health would be adequately served by permitting the use of existing stocks of products containing hydrozine that were processed before the effective date of the final regulation but prohibiting any future use of hydrazine as a food additive.

The Commissioner has carefully considered the environmental effects of the proposed regulation and, because the proposed action will not significantly affect the quality of the human environment, has concluded that an environmental impact statement is not required. A copy of the environmental impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 402, 409, 701, 52 Stat. 1046–1047 as amended, 1055–1056 as amended, 72 Stat 1784–1788 as amended (21 U.S.C. 321(s), 342, 348, 371)) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Parts 173 and 189 of Chapter I of Title 21 of the Code of Federal Regulations be amended as follows:

173.310 [Amended]

1. In Part 173, § 173.310 *Boiler water additives* is amended by deleting the item "Hydrazine" from the substances listed in paragraph (d).

2. In part 189, Subpart C, by adding a new section to read as follows:

189.150 Hydrazine.

(a) Hydrazine is the chemical N_2H_4 [Chemical Abstracts Registry Service No. 302–01–2]. It is characterized as a colorless, fuming, corrosive, hygroscopic liquid, and it is not found in natural products at levels detectable by the offical methodology. It has been used as a boiler water additive.

(b) Food containing any added or detectable level of hydrazine is deemed to be adulterated in violation of the act based upon an order published in the Federal Register of August 13, 1979.

Interested persons may, on or before August 13, 1979, submit to the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rule making does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food Drug Administration.

Dated: June 5, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

[21 CFR Part 250]

[Docket No. 79-0384]

Hydrazine in Human Drug Products; Declaration of New Drug Status

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: This proposal would amend regulations to ensure that hydrazine or hydrazine salts are not present in human drug products. A monograph published by the International Agency for Research on Cancer indicates that hydrazine poses a risk of cancer in humans.

DATES: Comments by August 13, 1979.

ADDRESS: Written comments to the office of the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Howard P. Muller, Jr., Bureau of Drugs (HFD–30), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301–443–5220.

SUPPLEMENTARY INFORMATION: The Food and Drug Administration (FDA) is proposing to declare that any human drug product containing hydrazine or hydrazine salts (as active or inactive ingredients, or in residual amounts) is a new drug and deemed to be misbranded withing the meaning of sections 201(p) and 502 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(p) and 352).

The safety of hydrazine has been reviewed by international experts and discussed in a monograph published by the International Agency for Research on Cancer (IARC) in "IARC Monographs on the Evaluation of the Carcinogenic Risk of Chemicals to Man," volume 4, pages 127–136. The IARC evaluation, which is based on several studies, concludes that "hydrazine or hydrazine salts have been shown to be carcinogenic in mice after oral and intraperitoneal administration and in rats following oral administration." A

copy of IARC's report has been placed on public display at the office of the Hearing Clerk (address above).

The FDA has reviewed the IARC report and other available data. Although it does not contain direct evidence that hydrazine induces cancer in humans, the IARC report of positive findings of cancer in test animals indicates hydrazine poses a risk of cancer for humans. Experience has indicated that, with one or two possible exceptions, compounds that are carcinogenic in humans are also carcinogenic in one or more experimental animal bioassay systems. In addition, several compounds first detected as a carcinogen in experimental animals have later been found to cause human cancer. The clear demonstration that a compound is carcinogenic in experimental animals must, therefore, be taken as evidence that it has the potential for carcinogenesis in humans unless there is strong evidence to the contrary. The agency believes that the risk to humans of exposure to a substance in human drugs that has been shown to be an animal carcinogen is contrary to the public health unless the benefit of such exposure clearly outweighs the risk.

The FDA is not aware of any currently marketed human drug that contains hydrazine or hydrazine salts as an active or inactive ingredient. Hydrazine is, however, used as a boiler water additive in high-pressure boilers to prevent hydrogen hardening of boiler tubes. Any benefits attributed to the use of hydrazine as a boiler water additive are outweighed by the risk of cancer in humans, and it is in the interest of the public health to ensure that hydrazine is not present in human drug products. The agency is therefore proposing to determine that hydrazine in human drug products may cause such products to be injurious to health and is unwarranted.

Elsewhere in this issue of the Federal Register, the Commissioner is proposing to amend the food additive regulations to delete provisions for use of hydrazine as a boiler water additive in the preparation of steam that will contact food, and to list hydrazine as a substance prohibited from use in human food. The FDA is not aware of the extent to which hydrazine or its salts may be present in human drug products in residual amounts from its use during manufacture or as a byproduct from the synthesis of an ingredient in a human drug product. Also, the FDA is not aware of any drug manufacturers who use high-pressue boilers to generate steam that would contact drug products or drug product contact surfaces. If any drug manufacturers are using hydrazine in a manner that may result in the presence of residual amounts of hydrazine in human drug products, they are urged to comment on such use. Comments should provide the following data and information:

1. The feasibility of developing and implementing viable substitutes for hydrazine;

2. The levels of residual hydrazine found in human drug products and drug product contact surfaces; and

3. The results of efforts to decrease to the least possible level, or to eliminate completely, residual hydrazine by using alternative manufacturing techniques.

The agency will consider the need for further action if evidence is submitted that the risk of a minimum level of hydrazine cannot be avoided and the benefits of a particular drug outweigh the risk.

The FDA is currently reviewing those drug products that contain hydrazine derivatives to determine whether any action should be proposed regarding them.

The Commissioner has determined that this document does not contain an agency action covered by § 25.1(b), and therefore consideration by the agency of the need for preparing an environmental impact statement is not required.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 301, 502, 505, 701(a), 52 Stat. 1042–1043, 1050–1055, as amended (21 U.S.C. 331, 352, 355, 371(a)) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Part 250 be amended in Subpart B by adding new § 250.112, to read as follows:

§ 250.112 Hydrazine, use in drug products.

(a) Studies evaluated by the International Agency for Research on Cancer have demonstrated that hydrazine causes cancer in mice after oral and intraperitoneal administration and in rats after oral administration.

(b) Any drug product containing hydrazine or hydrazine salts as active or inactive ingredients, or in residual amounts, is a new drug within the meaning of section 201(p) of the act and is misbranded and subject to regulatory action under sections 301, 502, and 505 of the act.

Interested persons may, on or before August 13, 1979, submit to the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m., Monday through Friday.

In accordance with Executive Order 12044, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: June 5, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[21 CFR Part 1312]

Proposed Limitations on Imports of Narcotic Raw Materials

June 6, 1979.

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Advanced Notice of Proposed Rulemaking on Narcotic Importation Policy.

SUMMARY: This advance notice of proposed rulemaking requests public comment on how the United States should implement a United Nations resolution urging importing countries to limit importation of narcotic raw materials to the traditional supply countries.

DATES: Written comments should be received on or before July 12, 1979.

ADDRESS: Send comments to: Administrator, Drug Enforcement Administration, U.S. Department of Justice, 1405 I Street, NW., Washington, D.C. 20537, Attention: DEA Federal Register Representative.

FOR FURTHER INFORMATION CONTACT: Donald E. Miller, Chief Counsel, Drug Enforcement Administration, telephone (202) 633–1276.

SUPPLEMENTARY INFORMATION: Presently, there exists a worldwide surplus of narcotic raw materials. Predictions by the United Nations International Narcotics Control Board

indicate that unless substantial changes are made, by 1982 morphine manufacturing capacity will be approximately 50% in excess of morphine demand. In the face of present as well as projected future oversupply of narcotic raw materials, there is a disturbing trend toward the proliferation of nations that produce narcotic raw materials for export.

During its February 1979 session, the United Nations Commission on Narcotic Drugs (CND), recognized these problems and adopted Resolution 471 as follows:

Title—Maintenance of a world-wide balance between the supply of narcotic drugs and the legitimate demand for those drugs for medical and scientific purposes

The Economic and Social Council:

Recalling the relevant provisions of the Single Convention on Narcotic Drugs, 1961, to limit the cultivation, production, manufacture and use of narcotic drugs to an amount required for medical and scientific purposes,

Noting that in recent years there has been considerable stepping up of morphine producing capacity for export, leading to a situation of substantial overproduction of opiates,

Having considered the report of the International Narcotics Control Board for 1978 on the world requirements and supply of narcotic drugs for medical use,

Noting with serious concern the Board's assessment that unless there is a large and unforeseen increase in demand between 1978 and 1982, morphine manufacturing capacity will be, on average, fifty percent greater than requirements,

Recognizing that it is essential to bring about a proper balance between the global supply and demand,

Taking note of the continued reliance placed by world community on countries constituting the traditional sources of supply for its medical needs of opiate raw materials and the positive response of these countries in meeting the world requirements and their contribution in the maintenance of effective control systems;

Bearing in mind that the treaties which establish this system are based on the concept that the number of producers of narcotic materials for export should be limited in order to facilitate effective control;

1. Calls upon importing countries, insofar as their constitutions and legal authority permit, to support the traditional supply countries and give all practical assistance they can to avoid the proliferation of producing/manufacturing sources for export;

2. Urges the governments of major producing countries which have set up additional capacities in recent years to take effective measures to restrict their production programmes so as to restore a lasting balance between supply and demand and to prevent any diversion to illicit channels;

3. Requests the International Narcotics Control Board to continue its efforts to make realistic projections of supply and demand in opiates and continue its dialogue with the concerned governments to ensure that the provisions of the relevant conventions are strictly adhered to by manufacturing, producing, exporting and importing countries;

4. Requests the Secretary-General to transmit the text of the present resolution to all governments for their consideration and appropriate action.

The CND resolution was confirmed by the United Nations Economic and Social Council on April 19, 1979.

The reasons behind this resolution stem from a trend firmly established by the world producers of narcotic raw materials toward bypassing the opium gum stage and extracting alkaloids directly through the poppy straw process. Only India remains a commercial exporter of opium gum to the morphine manufacturing nations. As a supplement to imports of opium from India, many morphine manufacturing nations have increasingly relied on importation of poppy straw and its extract concentrate of poppy straw (CPS). This is a matter of concern since present international regulatory framework under the *Single Convention on Narcotic Drugs, 1961*, 18 UST 1407 (Single Convention), is based upon strict control over the production of opium poppies to produce opium and on the exportation of opium (Art. 21 bis, Art. 24). However, these stringent controls do not apply to the production of opium poppies to produce CPS and do not limit to specified countries the exportation of poppy straw and CPS. The CND recognized this dilemma and urged importing countries, "to support the traditional supply countries and give all practical assistance they can to avoid the proliferation of producing/manufacturing sources for export; * * *"

The United States is a significant importer of narcotic raw materials. Its manufacturers account for one-third of the world morphine manufacturing capacity most of which is consumed within the United States in the form of codeine. The worldwide over-production of narcotic raw materials and the CND resolution make it necessary for the United States to re-evaluate past and present narcotic policies.

Historically, the United States has relied exclusively upon imports of opium gum to manufacture our narcotic medical supplies instead of cultivating opium poppies in the United States. The rationale behind this 57 year old policy, which foregoes U.S. self-sufficiency was to set an example to the world community to refrain from overproduction and to limit the number of opium-producing nations to a minimum. However, with only India remaining an exporter of opium to morphine manufacturing nations, it is not feasible for the United States to rely solely upon opium to satisfy its increasing demand for narcotic alkaloids.

As a supplement to imports of opium from India, the United States has authorized since 1975 the importation of poppy straw and CPS on an emergency basis. Although the importation of poppy straw has not yet proven to be a viable alternative, the importation of CPS now accounts for about one-half of the morphine manufactured in the United States.

The United States has become an attractive CPS import market for exporting nations, some of which cultivate their own poppies for the production of CPS. This development has significantly altered prior U.S. policy of importing only from traditional sources that produce opium for export, a limitation which has proven to be effective over the years. Through support of the CND resolution which requests importing countries to support traditional supply countries, the United States can contribute substantially to reducing the proliferation of countries that produce narcotic raw materials for export. Therefore, in coordination with the Department of State, and other concerned offices, the Drug Enforcement Administration is considering the following four point policy to implement the CND resolution:

U.S. Importation of Narcotic Raw Materials

1. Authorize imports of *Papaver somniferum* gum opium only from a country that during ten years immediately prior to January 1, 1961, exported opium which it produced, and has instituted and maintained adequate control systems for narcotic raw materials as required under the Single Convention.

2. Authorize imports of *Papaver somniferum* poppy straw only from a country that qualifies as a producer of opium for export in point 1, and has

instituted and maintained adequate control systems for narcotic raw materials as required under the Single Convention.

3. Authorize imports of *Papaver somniferum* concentrate of poppy straw (CPS) only if the CPS is produced from *Papaver somniferum* poppy straw grown in a country qualifying as a producer of opium for export under point 1, and only if that country has instituted and maintained adequate control systems for narcotic raw materials as required under the Single Convention.

4. Authorize exceptions to the above provisions as necessary in order to honor contracts of U.S. companies signed prior to January 1, 1979, or in order to ensure importation of sufficient supplies of narcotic raw materials at reasonable prices.

Until final resolution of United States policy in this matter, the Drug Enforcement Administration will hold in abeyance any application for a permit to import narcotic raw materials from any country that has not supplied commerical quantities of such materials to the United States in the past.

Peter B. Bensinger,

Administrator, Drug Enforcement Administration.

[FR Doc. 79-18139 Filed 6-11-79; 8:45 am]

BILLING CODE 4410-09-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[24 CFR Part 2205]

[Docket No. R-79-676]

General Insurance Requirements

AGENCY: Department of Housing and Urban Development.

ACTION: Notice of Transmittal of Proposed Rule to Congress under Section 7(o) of the Department of HUD Act.

SUMMARY: Recently enacted legislation authorizes Congress to review certain HUD rules for fifteen (15) calendar days of continuous session of Congress prior to each such rule's publication in the Federal Register. This Notice lists and summarizes for public information a rule which the Secretary is submitting to Congress for such review.

FOR FURTHER INFORMATION CONTACT: Burton Bloomberg, Director, Office of Regulations, Office of General Counsel, 451 7th Street, SW., Washington, D.C. 20410, (202) 755-6207.

SUPPLEMENTARY INFORMATION: Concurrently with issuance of this Notice, the Secretary is forwarding to the Chairmen and Ranking Minority Members of both the Senate Banking, Housing and Urban Affairs Committee and the House Banking, Finance and Urban Affairs Committee the rulemaking document described below:

24 CFR Part 2205—Subpart J—General Insurance Requirements

This proposed rule would amend 24 CFR Part 2205 by redesignating existing Subpart F as new Subpart J; clarifying FDAA policy relating to treatment of delinquent insurance policies and requirements for treatment of delinquent insurance policies and requirements for flood insurance on buildings located outside of the base floodplain; adding provisions to permit the Regional Director to make determinations as to insurance requirements under certain conditions; and basing insurance requirements on eligible restorative work rather than on full insurable value.

(Sec. 7(o), Department of HUD Act (42 U.S.C. 3535(o)), sec. 328 of the Housing and Community Development Amendments of 1978).

Issued at Washington, D.C., June 5, 1979.

Jay Janis,

Acting Secretary, Department of Housing and Urban Development.

[FR Doc. 79-18138 Filed 6-11-79; 8:45 am]

BILLING CODE 4210-01-M

DEPARTMENT OF LABOR

[29 CFR Part 92]

Redwood Employee Protection Program

AGENCY: Department of Labor.

ACTION: Proposed Regulations.

SUMMARY: The Department of Labor, through the Labor-Management Services Administration (LMSA), is proposing regulations to implement the Redwood Employee Protection Program established by Title II of the Redwood National Park Expansion Act of 1978 (Pub. L. 95-250). Under the proposed regulations, LMSA has responsibility for all provisions concerning affected employee benefits, including benefit amounts, determining eligibility for benefits, extent of relocation, reemployment and training assistance and job preference for certain employment. The citations included refer the reader to the appropriate statutory provision.

DATE: Written comments on these regulations must be received by the Department on or before August 16, 1979.

ADDRESS: All written comments (six copies) should be submitted to: Redwood Employee Protection Program, Division of Employee Protections, Room N-5646, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Mr. Paul F. Pothin of the department at (202) 523-6495. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On October 2, 1968, Congress established a 58,000 acre Redwood National Park in the State of California. Over the ensuing decade a considerable controversy developed over whether the Park's size was adequate to assure that certain key areas of the Park were protected from possible damage by upstream timbering. This debate was resolved on March 27, 1978, with the passage of Pub. L. 95-250, which provided for an addition of 48,000 acres to the Park. Under Title I of the Act, employees whose jobs were lost as a result of this Park expansion were designated to receive preference in hiring for both Federal civilian jobs and jobs with certain private employers. In addition, under Title II of the Act, these employees were provided with a program of income and benefit maintenance, and with retraining, job search, and job relocation allowances.

The Department of Labor proposes these regulations to describe (1) the eligibility requirements an individual must meet in order to qualify for benefits; (2) the level of benefits; (3) the procedures an individual must follow to claim benefits; (4) the rights of an individual to appeal a decision on an application for benefits; and (5) certain other basic information concerning individual responsibilities and program requirements.

Accordingly, it is proposed to add a new Part 92, as set forth below. (Secretary of Labor Order No. 6-78, May 15, 1978.)

Signed at Washington, D.C., this 6th day of June 1979.

R. C. DeMarco,

Acting Assistant Secretary for Labor-Management Relations.

PART 92—REDWOOD EMPLOYEE PROTECTION PROGRAM

Subpart A—General

Sec.

92.1 Purpose and scope.
92.2 Terms relating to administration.
92.3 Terms relating to employees.

Special Classes of Employees

Sec.
92.4 Short-service employee.
92.5 Seasonal employee.
92.6 Retired employee.
92.7 Contract employee.
92.8 Terms relating to employers.
92.9 Terms relating to employment.

Subpart B—Application for Benefits

92.10 Who may apply.
92.11 When to apply.
92.12 How to apply.
92.13 Certified lists of employers.
92.14 Processing applications.

Subpart C—Types of Benefits

92.20 General.
92.21 Weekly layoff benefits.
92.22 Vacation replacement benefits.
92.23 Health and Welfare benefits; pension rights and credits.
92.24 Severance payment.
92.25 Retraining.
92.26 Job search allowance.
92.27 Job relocation allowance.

Subpart D—Amounts and Calculations of Benefits

92.30 Weekly layoff/vacation replacement benefit, and/or severance payment.
92.31 Job search allowance.
92.32 Job relocation allowance.
92.33 Overpayment—general.
92.34 Recovery of overpayment.
92.35 Final decision.

Subpart E—Preferential Hiring

92.40 Full consideration obligation.
92.41 Employee full consideration obligation.
92.42 EDD full consideration responsibility.
92.43 Violations of full consideration obligations.
92.44 Judicial review.
92.45 Preexisting rights.
92.46 Period of preferential hiring.

Subpart F—Appeal Procedure

92.50 Administration.

Authority Sections 202 and 213(c)(2), PL 95–250, dated March 27, 1978.

Subpart A—General

§ 92.1 Purpose and scope.

(a) *Implementation.* The regulations contained in this chapter are designed to implement Section 103(d) through (i) of Title I, and Title II of the Redwood National Park Act of 1968, as amended by Pub. L. 95–250 enacted March 27, 1978.

(b) *Application for benefits.* These regulations pertain to applications by individuals for Redwood Employee Protection Program (REPP) benefits such as: weekly layoff benefits, severance payments, vacation replacement benefits, retraining, job search allowances, and job relocation allowances. Applications for such benefits will be administered by the California Employment Development Department (EDD) with the assistance and cooperation of other State employment security agencies (SESAs). Applications by individuals for continuing entitlement to health and welfare benefits and accrual of pension rights and credits will be administered by the Labor-Management Services Administration (LMSA) of the United States Department of Labor.

Special Considerations

(c) *Conclusive presumption.* The total or partial layoff of a covered employee employed by an affected employer during the period beginning May 31, 1977 and ending September 30, 1980, is conclusively presumed to be attributable to the expansion of the Redwood National Park (Section 203, Pub. L. 95–250, 92 Stat. 175). No such presumption exists, however, if such employee has been laid off or terminated for a cause that would disqualify him/her for unemployment compensation with certain limited exceptions. The exceptions are listed in § 92.20(b)(5) (i) through (viii) herein.

(d) *Interpretation of Title II.* In implementing and interpreting Title II of the Act, the Secretary shall avoid inequities adverse to employees. In all cases where two or more interpretations of Title II of the Act would be reasonable, the Secretary shall adopt and apply that interpretation which is most favorable to employees (Section 213(f), Pub. L. 95–250, 92 Stat. 182).

§ 92.2 Terms relating to administration.

"Act" means the Redwood National Park Act of 1968 as amended by Pub. L. 95–250.

"ALJ" means an Administrative Law Judge of the California Unemployment Insurance Appeals Board.

"Applicant" means an individual who has made an application for REPP benefits under the Act.

"Assistant Secretary" means the Assistant Secretary of Labor for Labor-Management Relations, unless otherwise indicated.

"Benefits" means weekly layoff benefits, severance payments, vacation replacement payments for seasonal employees, retraining, job search allowances, job relocation allowances, and continuing entitlement to health and welfare benefits and accrual of pension rights and credits.

"CUIAB" means the California Unemployment Insurance Appeals Board.

"Days" means calendar days.

"EDD" means the California Employment Development Department.

"ETA" means the Employment and Training Administration of the U.S. Department of Labor.

"LMSA" means the Labor-Management Services Administration of the U.S. Department of Labor.

"REPP" means the Redwood Employee Protection Program.

"Referee" means an administrative law judge or any other designee who is empowered to act as the first level appellate authority for the EDD.

"SESA" means a State employment security agency.

"Secretary" means the Secretary of Labor.

"Severance payment" means a lump sum payment in lieu of other benefits to an affected employee or a retired employee (Section 206, Pub. L. 95–250, 92 Stat. 179).

"Vacation replacement benefit" means a payment to a seasonal employee which is equivalent to the payment the seasonal employee would have received for vacation pay had the individual remained employed in his/her seasonal occupation (Section 207(c)(3), Pub. L. 95–250, 92 Stat. 178).

"Weekly layoff benefit" means a weekly payment to an affected employee (other than a short-service employee) which is an amount equivalent to the level of weekly earnings he/she would be receiving if still working for his/her last affected employer (Section 207(a), Pub. L. 95–250, 92 Stat. 178).

§ 92.3 Terms relating to employees.

(a) *Employee.* "Employee" means any person employed by an affected employer with the exception of those persons who are engaged in managerial functions or functions directly auxiliary to management as described in Section 13(a)(1) of the Fair Labor Standards Act (Section 201(3), Pub. L. 95–250, 92 Stat. 172).

(b) *Covered employee* means an employee who:

(1) Had seniority under a collective bargaining agreement with an affected employer as of May 31, 1977, has at least twelve months of creditable service as of March 27, 1978, and has performed work (as defined in Section 201(17) of the Act) for one or more affected employers on or after January 1, 1977, or

(2) Has performed work for one or more affected employers for at least 1,000 hours from January 1, 1977 through March 27, 1978 and had a continuing employment relationship with an affected employer as of March 27, 1978, or if laid off on or after May 31, 1977 but before March 27, 1978 had such a relationship as of the date of layoff

(Section 201(10), Pub. L. 95–250, 92 Stat. 173).

(c) *Affected employee* means a covered employee who: (1) has been either totally or partially laid off by an affected employer within a time period beginning on or after May 31, 1977 and ending September 30, 1980, unless extended by the Secretary; or (2) has been specifically designated by a the Secretary; or (2) has been specifically designated by the Secretary as an individual adversely affected by the expansion of the Redwood National Park (Section 201(11), Pub. L. 95–250, 92 Stat. 173).

Special Classes of Employees

§ 92.4 Short-service employee.

(a) *Definition.* "Short-service employee" means an affected employee who:

(1) Will not reach age sixty before October 1, 1984; and

(2) As of the date of becoming an affected employee, has less than five full years of service credit under a pension plan contributed to by industry employers or has less than five full years of creditable service (Section 209, Pub. L. 95–250, 92 Stat. 180).

(b) *Weekly layoff and vacation replacement benefit.* A short-service employee shall not be eligible to receive weekly layoff or vacation replacement benefits.

(c) *Severance payment.* A short-service employee shall be eligible to receive a severance payment provided he/she meets the eligiblity requirements set forth in § 92.23 (b) or (c).

(d) *Retraining, job search and relocation allowances.* A short-service employee shall be eligible for retraining, job search allowances, and job relocation allowance, beginning on the date of his/her total layoff and extending through a period equal to the length of his/her creditable service. While in good faith engaged in training a short-service employee shall be paid the same stipends and allowances as are applicable to other individuals engaged in such training programs who are not covered by this Act.

(e) *Health and Welfare and pension benefits.* A short-service employee shall not have continuing entitlement to health and welfare benefits or accrual of pension rights and credits.

§ 92.5 Seasonal employee.

(a) *Definition.* "Seasonal employee" means an affected employee (including a short-service employee) whose highest paid job held, other than by temporary assignment, with one or more affected employers during the period from January 1, 1977 through March 27, 1978, ws in an occupation in which the average annual number of weeks during which work was actually performed by all covered employees employed in such occupation during the five calendar years preceding March 27, 1978 was forty or less weeks (Section 207(c), Pub. L. 95–250, 92 Stat. 178).

A seasonal employee (other than a short-service employee) shall be eligible to receive weekly layoff and vacation replacement benefits during his/her usual season. A seasonal employee may elect to receive a severance payment in lieu of weekly layoff and vacation replacement benefits. In addition, he/she shall be eligible for retraining, job search allowances, and a job relocation allowance, during his/her period of protection, and for continuing entitlement to health and welfare benefits and to accrual of pension rights and credits.

§ 92.6 Retired employee.

(a) *Definition.* "Retired employee" means an employee who retired from employment with an affected employer, for reasons other than disability, on or after May 31, 1977 but not later than September 30, 1984 (Section 204(b)(1), Pub. L. 95–250, 92 Stat. 176). In order to be eligible for REPP benefits such employee must:

(1) be receiving pension benefits under a plan financed by an industry employer; and

(2) be at least 62 but less than 65 at the time of retirement; and

(3) not be eligible for benefits under Title XVIII of the Social Security Act (Medicare).

(b) *Weekly layoff and vacation replacement benefits.* A retired employee shall not be eligible to receive a weekly layoff or vacation benefit.

(c) *Severance payment.* An employee retiring early (between age 62 and age 65) who meets the other criteria set forth in § 92.6(a) shall be eligible to receive a severance payment upon presentation of evidence that he/she is retired on a plan financed by an industry employer (Section 204(b)(1)(2)(3), Pub. L. 95–250, 92 Stat. 176).

(d) *Retraining, job search and relocation allowances.* A retired employee shall not be eligible for retraining, job search allowances, and a job relocation allowance.

(e) Health and welfare benefits. A retired employee shall have continuing entitlement to health and welfare benefits (other than group life insurance and additional death, dismemberment and loss of sight benefits) if the employee lost entitlement to such benefits upon retirement.

§ 92.7 Contract employee.

(a) *Definition.* "contract employee" means an employee performing work pursuant to a contract or agreement for services within or directly related to the expansion area between an affected contract employer and an affected woods employer (Section 201(4), Pub. L. 95–250, 92 Stat. 172).

(b) *Limited number.* The number of contract employees who may be eligible for REPP benefits is limited. The determination by LMSA as to how many contract employees may become eligible for REPP benefits is calculated as follows: First determine what percent of the affected contract employer's employee hours were worked within or directly related to the expansion area in 1977. Then apply (multiply) that percent times the total of all employees on the contract employer's 1977 payroll. The product of this calculation becomes the number of that contract employer's employees who may receive REPP benefits. In order to assure benefits will be allocated to employees based upon priority of submission of claim, the date and time of application shall be recorded when such employees make application. For example, 40% of an employer's employee hours in 1977 were worked in expansion area. The employer had 175 total contract employees on the company's payroll in 1977. 175 multiplied by .40 equals 70; 70 employees would thereby be eligible for benefits.

§ 92.8 Terms relating to employers.

(a) *Industry employer.* "Industry employer" means a corporation, partnership, joint venture, person, or other form of business entity (including a predecessor or successor by purchase, merger, or other form of acquisition), of which a working portion or division is an affected employer (Section 201(5), Pub. L. 95–250, 92 Stat. 172).

(b) *Affected employer.* "Affected employer" means a corporation, partnership, joint venture, person, or other form of business entity (including a predecessor or a successor by purchase, merger, or other form of acquisition), or a working portion or division thereof, which is engaged in the harvest of timber or in related sawmill, plywood, or other wood processing operations, and which meets the qualifications set forth in the definition of affected woods employer, affected mill employer, or affected contract employer. For purposes of this Act, the Assistant Secretary shall detemine an

employer's status and shall provide a list of employers who qualify as affected employers (Section 201(6), Pub. L. 95–250, 92 Stat. 172).

(c) *Affected woods employer.* "Affected woods employer" means an affected employer engaged in the harvest of redwood timber who owns at least 3 per cantum of the number of acres authorized to be included within the expansion area on January 1, 1977 and on March 27, 1978; provided, that an affected woods employer shall be only that major portion or divison of the industry employer directly responsible for such harvesting operations (Section 201(7), Pub. L. 95–250, 92 Stat. 172).

(d) *Affected mill employer.* "Affected mill employer" means an affected employer engaged in sawmill, plywood, or other wood processing operations in Humboldt or Del Norte Counties in the State of California who has either (1) obtained 15 per centum or more of its raw wood materials directly from affected woods employers during calendar year 1977, or (2) is a wholly owned mill of an affected woods employer; provided, that an affected mill employer shall be only that major portion or division of the industry employer directly responsible for such wood processing operations (Section 201(8), Pub. L. 95–250, 92 Stat. 173).

(e) *Affected contract employer.* "Affected contract employer" means an affected employer providing services pursuant to contract with an affected woods employer, if at least 15 per centum of said employer's employee-hours worked during calendar year 1977 were within or directly related to the expansion area pursuant to such contract or contracts (Section 201(9), Pub. L. 95–250, 92 Stat. 173).

(f) *Last affected employer.* "Last affected employer" means the affected employer by whom an affected employee was first laid off (totally or partially), terminated, or downgraded on or after May 31, 1977 but not later than September 30, 1980 (Section 206(b)(1), Pub. L. 95–250, 92 Stat. 179).

(g) *Performed work.* "Performed work" shall include any time during which an employee worked for an affected employer or with respect to which an employee received pay from such an employer for time not worked, and shall also include any time during which an employee would have been at work for such an employer if not for service in the armed forces, for a leave (approved by the employer) for work with an employee organization, or for a disability for which said employee received workers' compensation, disability compensation benefits provided under California law, or social security disability pension benefits: *Provided,* That contract employees shall be deemed to have performed work during the period of such service or disability only if—

(i) the employee worked within or directly related to the expansion area immediately prior to the occurrence of such service or disability and

(ii) the employee returned or sought to return to work for an affected contract employer immediately after the end of the service or disability if that was prior to the date of enactment.

The term "work performed", when used in relation to a period of time, shall also be deemed to include any period during which an employee is deemed to have performed work (Section 201(17), Pub. L. 95–250, 92 Stat. 174).

§ 92.9 Terms relating to employment.

(a) *Commuting area.* "Commuting area" means an area, for purposes of suitable work, within the commuting distance of an individual's place of residence. It is determined in accordance with policy established under California State law. However, for the purposes of a job relocation allowance, commuting area shall mean a work location which is within 30 or less normal highway miles of an affected employee's place of residence.

(b) *Continuing employment relationship.* "Continuing employment relationship" means that an employee has worked for an affected employer on a regular basis. Authorized absences are not considered a break in a continuing employment relationship. Summer or vacation relief employees or other temporary employee replacements are not considered to have a continuing employment relationship.

(c) *Continuous service.* "Continuous service" with respect to employees not having seniority under a collective-bargaining agreement with an affected employer or an industry employer shall mean a period of time measured in months equal to the sum of all hours during which the employee performed work for said employer plus all hours for which the employee received pay for time not worked divided by one hundred and seventy-three (Section 201(16), Pub. L. 95–250, 92 Stat. 174).

For example, an employee worked 1,367 hours in 1976, 1,824 hours in 1977, and 2,172 hours in 1978. The employee is then laid off. Add: 1,367 + 1,824 + 2,172 for a sum of 5,363; divide this sum (5,363) by 173; the result is then 31 months of continuous service.

(d) *Creditable service.* "Creditable service" means an affected employee's total length of service working for affected or industry employers. Creditable service when used to determine an employee's period of protection shall be computed as follows:

(1) A period equal to the length of an employee's seniority (or continuous service), with the employee's last affected employer at the time said employee is eligible to receive a weekly layoff benefit or vacation replacement benefit; plus

(2) a period equal to the sum of all prior periods during which the employee had seniority (or continuous service) with the same affected employer and with other industry employers. However, if such seniority (or continuous service) was broken for more than three consecutive years, and periods of seniority (or continuous service) prior to the break shall be disregarded and shall not be counted as creditable service. Creditable service shall not be considered as broken if the cause for the break in service was one of the following:

(i) Employment with other affected employers or industry employers; or

(ii) Service in the Armed Forces; or

(iii) Disabilities for which the employee received any workers' compensation benefits; unemployment compensation disability benefits; or disability benefits under the Social Security Act.

Creditable service shall include only those periods of employment with his/her last affected employer and other industry employers (Section 200, Pub. L. 95–250, 92 Stat. 177). If necessary EDD will request the appropriate authorization to examine an applicant's social security wage record in order to establish an applicant's creditable service.

(e) *In the industry.* "In the industry" means employment with affected employers or, in general, with any employer whose Standard Industrial Classification (SIC) number is in the four digit Group No. 2411 (Logging Camps and Logging Contractors), 2421 (Sawmills and Planning Mills, General), 2435 and 2436 (Hardwood and Softwood, Veneer and Plywood), 2492 (Particle Board) or 2611 (Pulp Mills), or with an employer engaged in related types of activities that are "sawmill", "plywood", or other "wood processing operations" within the meaning of Title II.

(f) *Partial layoff.* "Partial layoff" or downgrading means a calendar week for which all pay received by a covered employee from affected employers is at least 10 per centum less than the weekly layoff benefit or vacation replacement

benefit that would have been payable for that week had the employee suffered a total layoff (Section 201(12), Pub. L. 95–250, 92 Stat. 173).

(g) *Period of protection.* "Period of protection" means a period of time equal to the length of an affected employee's creditable service during which period an affected employee is entitled to weekly layoff benefits or vacation replacement benefits and to continuation of health and welfare benefits and accrual of pension rights and credits. An employee's period of protection shall start with the beginning of the first week for which the employee is eligible to receive a weekly layoff benefit or vacation replacement benefit and shall continue until the earliest of:

(1) The date the employee accepts a severance payment;

(2) A period equal to the length of the employee's creditable service is exhausted; or

(3) The employee's sixty-fifth birthday.

In no event shall an employee's period of protection extend beyond September 30, 1984, except for an employee who reaches age 60 on or before September 30, 1984, in which case the employee's period of protection shall be extended until his/her 65th birthday (Section 206(a), Pub. L. 95–250, 92 Stat. 177).

(h) *Seniority.* "Seniority" with respect to an employee covered by a collective-bargaining agreement with an affected employer, shall be determined as provided in such agreement and shall be deemed to refer to company seniority, if the agreement provides for such seniority and, otherwise, to plant seniority (Section 201(15), Pub. L. 95–250, 92 Stat. 174).

(i) *Sixty-fifth birthday.* "Sixty-fifth birthday" means the last day of the month in which the sixty-fifth birthday occurs (Section 202, Pub. L. 95–250, 92 Stat. 175).

(j) *State job service.* "State job service" means that agency of the state government which performs the employment service functions.

(k) *Suitable work.* "Suitable work" means:

(1) Work defined as suitable in the California Unemployment Insurance Code; and

(2) With respect to an employee who has completed retraining paid for by the Secretary, a job paying no less than the prevailing wage rate in the area for the occupation for which said employee was retrained; or

(3) A job comparable with that which said employee would be required to accept pursuant to the seniority provisions of the applicable collective-bargaining agreement (or, if not covered by such an agreement, in accordance with the usual practice of the affected employer) (Section 201 (14), Pub. L. 95–250, 92 Stat. 173).

(l) *Total layoff.* "Total layoff" means a calendar week during which an affected employer has made no work available to a covered employee and has made no payment to a covered employee for the time not worked (Section 201(12), Pub. L. 95–250, 92 Stat. 173).

(m) *Usual season.* "Usual season" means those weeks commencing in each calendar year during which a seasonal employee is usually employed by an affected employer.

In the event of ambiguity of definition or meaning the express terms of the statute shall prevail.

Subpart B—Application for Benefits

§ 92.10 Who may apply.

(a) *Application.* An application for REPP benefits may be filed by a covered employee or a retired employee.

§ 92.10 When to apply.

(a) *Filing after layoff.* An initial application for REPP benefits by a covered employee may be filed with respect to a total or partial layoff by an affected employer which occurred on or after May 31, 1977 but not later than September 30, 1980, unless this date is extended by the Secretary.

(b) *Filing after retirement.* An initial application for REPP benefits by a retired employee may be filed with respect to the employee's retirement from employment with an affected employer on or after May 31, 1977, but not later than September 30, 1984.

§ 92.12 How to apply.

(a) *Application for unemployment compensation.* An application for unemployment compensation filed by a covered employee with the Employment Development Department or State Employment Security Agency (SESA) on or after April 3, 1978 shall be deemed an application for REPP benefits (Section 205(a), Pub. L. 95–250, 92 Stat. 176).

(b) *Eureka, Crescent City, and Redding field offices.* An initial application for REPP benefits may be filed directly in either the Eureka, Crescent City, or Redding, California field offices of the EDD.

(c) *Other EDD field offices.* An initial application for REPP benefits may also be filed at any other field office of the EDD.

(d) *SESA.* Persons residing outside of California may file an initial application for REPP benefits at their nearest local office of the SESA under special interstate procedures.

§ 92.13 Certified lists of employers.

(a) *Names of employers.* The Assistant Secretary shall publish and make available to the EDD Central Office and SESA offices certified lists containing the names of:

(1) industry employers;

(2) affected employers;

(3) affected contract employers (including the maximum number of contract employees who can become eligible for REPP benefits); and

(4) those local employers who have been determined not to qualify as affected employers.

(b) *Updating.* These lists were established originally based upon early survey information. Since all of the eligible affected employers may not have been identified, these lists are subject to challenge at any time to review the eligibility of any given employer.

§ 92.14 Processing applications.

EDD determinations. The EDD shall process all applications to determine whether an applicant is entitled to REPP benefits and the types and amounts of such benefits pursuant to policies, criteria, and standards set forth in these regulations.

Subpart C—Types of Benefits

§ 92.20 General.

This section discusses the types of benefits available under REPP. The amount of such benefits is discussed in Subpart D.

§ 92.21 Weekly layoff benefits.

(a) *EDD determination of entitlement.* The EDD shall determine the applicant's entitlement to weekly layoff benefits based upon the applicant's statement and other pertinent records.

(b) *Applicant eligibility.* To be eligible with respect to any week an applicant must:

(1) Have been determined to be an affected employee other than a short-service employee;

(2) Not be a retired employee;

(3) Not be receiving a Social Security retirement or disability benefit or a pension under a plan contributed to by an affected employer;

(4) Be registered with the State Job Service of the EDD or other SESA (unless the applicant is fully employed);

(5) Not have accepted a severance payment;

(6) Not have exhausted his/her period of protection; and

(7) Be eligible for unemployment compensation benefits under the California Unemployment Insurance Code; provided, however, he/she shall be eligible for weekly layoff benefits if the sole reason for ineligibility under the code is one or more of the following:

(i) Insufficient base period earnings; or

(ii) Exhaustion of benefit rights; or

(iii) Earnings in excess of the amount which would entitle the employee to a partial benefit for the week; or

(iv) The waiting week requirement; or

(v) Unavailability for work because of jury duty, National Guard duty, authorized retraining, or because of similar reason as determined by the Secretary pursuant to Section 201(14) of the Act; or

(vi) Refusal of work which is not "suitable work"; or

(vii) Receipt of workers' compensation or other benefit for partial disability which the employee would be entitled to receive while working; or

(viii) Any other cause of ineligibility with respect to which the Secretary determines that, under the circumstances, it would be unreasonable or otherwise contrary to the purpose of this Act to deny said employee a benefit provided for in the Act.

§ 92.22 Vacation replacement benefits.

(a) *EDD determination of entitlement.* The EDD shall determine the applicant's entitlement to vacation replacement benefits based upon the applicant's statement and other pertinent records.

(b) *Applicant eligibility.* Only seasonal employees will be eligible for a vacation replacement benefit. To be eligible the employee must meet the same eligibility criteria required for weekly layoff benefits.

§ 92.23 Health and welfare benefits; pension rights and credits.

(a) *Continuing entitlement.* Affected employees, other than short-service employees, have continuing entitlement to health and welfare benefits and accrual of pension rights and credits. The Assistant Secretary shall seek to enter into agreements with affected employees, affected employers, plan trustees, labor organizations, and/or others to maintain these benefits and rights.

(b) *Methods of continuation.* Continuation of coverage may be provided by:

(1) An employee's existing plan with his/her last affected employer; or

(2) An arrangement between the Assistant Secretary and others to provide equivalent coverage to the maximum extent feasible.

(c) *Selection of method.* The Assistant Secretary shall have the sole authority to select the appropriate method for benefit plan continuation.

(d) *Exemption from ERISA liability.* No person shall be subject to liability under the Employee Retirement Income Security Act of 1974, Section 302 of the Labor-Management Relations Act of 1947, or any other law, solely by reason of the receipt of payments from the Secretary or the payment of benefits to affected employees in accordance with this Section. Receipt of such payments and the payment of such benefits are deemed to be consistent with any relevant plan documents. None of these actions shall place the Secretary in the position of an employer or a party in interest (including a fiduciary) for purposes of the Employees' Retirement Income Security Act of 1974 (Section 204(d), Pub. L. 95–250, 92 Stat. 176).

(e) *Level of coverage.* If the last affected employer's health and welfare or pension benefit levels change during an employee's period of protection, the employee's benefits shall be changed so as to provide a level of benefit comparable to that which he/she would otherwise have received except for his/her current status as an affected employee.

(f) *Responsibility of affected and retired employees.* Affected and retired employees must retain medical records in order to substantiate claims for reimbursement.

(g) *Retired employee's entitlement.* A retired employee's continuing entitlement is contained in § 92.6(e).

§ 92.24 Severance payment.

(a) *EDD determination of entitlement.* The EDD shall determine the applicant's entitlement to a severance payment based upon the applicant's statement and other pertinent records.

(b) *Applicant eligibility.* To be eligible an applicant must meet the basic eligibility requirements of an affected employee or retired employee and must:

(1) (i) Have been on continuous layoff from employment with the employee's last affected employer for a period of at least 20 weeks subsequent to December 31, 1977; provided, that for a short-service seasonal employee the period of continuous layoff will not be considered broken by the employee's off season although off season weeks will not count toward the 20 weeks of layoff; and

(ii) Have no definite recall date for work with the affected employer by whom the employee was laid off and no offer of suitable work by any affected employer; and

(iii) Apply for severance payment during a week with respect to which the employee has not performed work for an affected employer; *or*

(2) If not (b)(1) (i) (ii) and (iii) of this section, then, have been permanently separated from employment with an affected employer during the period beginning May 31, 1977 and ending March 27, 1978, as a result of the closure of the mill or plant in which said employee was employed and, since said separation, have not been employed by an affected employer (Section 208(a) (1) (2) (3) (4), Pub. L. 95–250, 92 Stat. 179).

(c) *Disabled employee's eligibility.* An employee shall not be denied a severance payment for failure to comply with the requirements of paragraph (b)(1)(iii) of this section if the employee is otherwise eligible but is totally and permanently disabled as defined in the Social Security Act (Section 208(a)(3), Pub. L. 95–250, 92 Stat. 179).

(d) *Repayment agreement requirement.* An affected employee (other than a short-service employee) or a retired employee must, as a condition of receiving a severance payment, sign a repayment agreement pledging to return a severance payment if said affected employee or retired employee resumes employment with an affected employer or resumes employment in the industry within Humboldt, Del Norte, Trinity, Mendicino, or Siskiyou Counties in California prior to October 1, 1980, or such later date as established by the Secretary (Section 208(e), Pub. L. 95–250, 92 Stat. 180).

(e) *Repayment agreement liability.* An affected employee or a retired employee who signs a repayment agreement shall be liable for repayment of a severance payment if the individual returns to work in the industry prior to September 30, 1980 (or such later date as the Secretary determines but in no case later than September 30, 1984). All earnings received by an individual who has returned to the industry prior to September 30, 1980 (or as extended) shall be subject to a repayment deduction.

(f) *Arrangements for repayment.* The repayment agreement shall include the employee's agreement to arrange with his/her employer for the withholding of the applicable amounts from the employee's pay and/or shall further include authorization for the Secretary to make such arrangements with the employer.

(g) *Repayment amounts.* Repayment amounts shall be in weekly installments equal to a specified percentage of the

employee's earnings in the industry which shall not exceed the amounts specified in the Consumer Credit Protection Act, as amended. Repayment shall continue until the full amount of overpayment is recovered.

§ 92.25 Retraining (Section 210, Public Law 95-250, 92 Stat. 181).

(a) *EDD approval.* The EDD shall approve technical and professional and other types of training for an affected employee (including a short-service employee) until September 30, 1984, provided:

(1) There is no suitable work available within a reasonable commuting area. For the purpose of this section, suitable work shall include any full consideration job vacancy (see Section 92.42(b)) which EDD determines the applicant can be trained for; and

(2) There is substantial reason to believe that successful completion of training will enhance the affected employee's employment prospects; and

(3) The affected employee makes application and can complete the training during the employee's period of protection. However, a short-service employee must make application during the period which begins on the date of his/her total layoff and extends for that period of time which is equal to the length of his/her creditable service. In no instance shall authorized training for any employee extend beyond September 30, 1984.

(b) *Training criteria.* The EDD shall determine the applicant's ability to successfully complete such training, the appropriateness of the length of training, the hours of attendance, and whether the training facility and the trainee are engaged in training in good faith. Training costs as well as the weekly layoff benefits or vacation replacement benefits which the trainee would otherwise be eligible to receive, will be paid for the duration of approved training as long as the EDD determines good faith is being observed. If good faith is not observed, the EDD shall take appropriate corrective action. The criteria for determining good faith are adherence to scheduled hours of attendance and satisfactory progress as normally measured for the type of training being received. The criteria to be used in determining suitable length and hours of training are:

(1) The training is of suitable duration to achieve the desired skill or knowledge level; and

(2) The scheduled hours of attendance are in accordance with the prevailing practices of other like training available in the commuting area.

(c) *No cost training and purchased training.* In determining whether training to be secured for an affected employee shall be no cost training or purchased training, the EDD shall consider, as the primary objective, increasing the affected employee's employability so as to enhance the opportunities for the affected employee to return to full employment.

(1) The EDD shall, as far as possible, refer an affected employee to retraining which is provided at no cost. This training may be provided under the Comprehensive Employment and Training Act of 1973, as amended, as offered by a prime sponsor or under any other Federal or State law.

(2) The EDD may purchase training to assist the affected employee's return to full employment. This training may be institutional training or on-the-job training. If institutional, vocational, or professional training is purchased, the training institution must be approved as meeting applicable standards by the appropriate State educational agency, or by a recognized accreditation association.

§ 92.26 Job search allowance (Section 211, Public Law 95-250, 92 Stat. 181).

(a) *EDD approval.* The EDD shall approve a job search allowance for an eligible affected employee (including a short-service employee) to assist the employee to obtain a job within the United States. To be eligible, an affected employee must:

(1) Be totally laid off from employment with an affected employer;

(2) File an application for a job search allowance during the employee's period of protection, or, for a short-service employee, an application must be filed during the period which begins on the date of his/her total layoff and extends for that period of time which is equal to the length of his/her creditable service, but in no case less than one year.

(3) Be registered with the State Job Service in the area in which the affected employee is residing;

(4) Have no reasonable expectation of obtaining suitable work in the commuting area;

(5) Have received a good faith referral to suitable work or have been referred by a State Job Service to suitable work outside the commuting area or have a reasonable expectation of obtaining suitable work of a long term duration in the area where the job search will be conducted; and

(6) Complete the job search within a reasonable period not exceeding 30 calendar days, after the day on which the job search began.

(b) *Job search completion.* A job search shall be deemed complete when the individual has either secured employment or has contacted each employer to whom referred by the State Job Service in connection with a job search.

(c) *Verification of employer contacts.* The Job Service in the State in which the affected employee resides shall verify employer contacts certified by the affected employee.

(d) *Entitlement to reimbursement.* An affected employee who has incurred expenses as a result of any job search undertaken from the period beginning May 31, 1977 and ending June 30, 1979 shall be entitled to reimbursement of authorized expenses, provided the employee furnishes adequate evidence to support his/her claims for expenses and provided further, that the employee furnishes adequate evidence to the EDD that the job search was undertaken as required by paragraphs (a)(4) and (a)(5) of this section and has completed the job search as required by paragraph (a)(6) of this section.

§ 92.27 Job relocation allowance (Section 212, Public Law 95-250, 92 Stat. 181).

(a) *EDD approval.* The EDD shall approve a job relocation allowance for an eligible affected employee (including a short-service employee) who obtains employment outside the commuting area, to meet the reasonable and necessary travel expenses incurred in obtaining a residence and in transporting self, family, household, and personal effects to the new residence in the area of relocation. A job relocation allowance shall not be paid for more than one relocation nor shall it be paid to more than one member of a family in the same household for the same relocation.

(b) *Relocation on or prior to June 30, 1979.* For an affected employee (including a short-service employee) who relocated on or before June 30, 1979 to be eligible, the employee must:

(1) File an application for a job relocation allowance during the employee's period of protection; provided, that a short-service employee must file an application during the period which begins on the date of his/her total layoff, and extends to the end of that period of time which is equal to the length of his/her creditable service;

(2) Have relocated during the period beginning May 31, 1977 and ending June 30, 1979, to accept employment requiring a change in residence to a location outside the commuting area in which the employee resided immediately prior to becoming an affected employee.

(c) *Relocation after June 30, 1979.* For an affected employee (including a short-service employee) who relocated after June 30, 1979 to be eligible, the employee must:

(1) File an application as described in paragraph (b)(1) above;

(2) Be registered with the State Job Service in the area in which the affected employee is residing;

(3) Have no reasonable expectation of obtaining suitable work in the commuting area;

(4) Have obtained suitable work affording reasonable expectation of long-term duration, or a bona fide offer of such work, in the area in which the affected employee wishes to relocate.

(d) *Reimbursable expenses.* An affected employee shall be eligible to reimbursement for:

(1) Expenses incurred in moving household and personal effects;

(2) Traveling and living expenses in moving self and any family members from the same household, not to exceed 10 working days;

(3) Traveling and living expenses for self and spouse not to exceed 10 days which need not be consecutive days to obtain a residence;

(4) Any loss or cost incurred by the affected employee in the sale of a home for less than the fair market value or any loss or cost in securing the cancellation of an unexpired lease on a dwelling occupied by the affected employee as a home.

Subpart D—Amount and Calculations of Benefits

§ 92.30 Weekly layoff benefit, vacation replacement benefit, and/or severance payment.

The EDD shall determine the amount of an affected employee's weekly layoff benefit, vacation replacement benefit, and/or severance payment in accordance with the methods for calculation set forth in Sections 207, 208, and 209 of the Act and in the procedures and guidelines issued by the Assistant Secretaries for Labor-Management Relations and Employment and Training.

§ 92.31 Job search allowance (19 U.S.C. 2297).

(a) *Travel by commercial carrier.* For travel by commercial carrier, an affected employee shall receive 80% of the cost of transportation by the most economical and practical public transportation from the employee's regular place of residence to the area in which the job search will be conducted and return.

(b) *Travel by privately owned car.* For travel by privately owned automobile, an affected employee shall receive a travel allowance of 9.6 cents per mile, for the mileage of the usually traveled route from and to the affected employee's regular place of residence to the area in which the job search will be conducted, and for the mileage covered during the actual job search activities within the designated area.

(c) *Lodging costs.* In connection with an authorized job search, an affected employee shall receive 80% of the costs of lodging, not exceeding $12.00 per night, and 80% of the costs of meals, not exceeding $5.00 per day. Lodging costs must be verified by receipt.

(d) *Maximum amount.* The maximum amount of job search allowance payable to an affected employee in connection with an application shall not exceed $500.

(e) *Advance payment.* The EDD shall advance upon request by an affected employee within 5 days prior to commencement of a job search, 60% of the estimated job search allowance, but not exceeding $300. Such advance shall be deducted from any payments made under this part.

(f) *Overpayment.* If it is found that an affected employee failed without good cause to complete a job search, any job search allowance paid or advanced to the affected employee under this Section shall constitute an overpayment. Any overpayment shall be recovered from the affected employee by repayment in cash or by deduction from benefits due the affected employee under the Act as provided in § 92.34.

§ 92.32 Job relocation allowance (Public Law 93-236).

(a) *Travel allowance.* Travel expenses, for a period not to exceed 10 days (which need not be consecutive days), for an affected employee and spouse but not dependent children or other family members shall be reimbursed for a round trip to obtain a residence at the new work location. Travel expenses for an affected employee, spouse, and dependent children shall be reimbursed for a one-way trip in connection with moving.

(1) Reimbursement shall be made for travel by commercial carrier, provided that the most economical public transportation means available is used in view of the circumstances.

(2) Reimbursement shall be made for travel by each privately owned automobile at the rate of 15 cents per mile for the usually traveled route, for necessary bridge and highway tolls, and for parking fees.

(3) If for good cause a member or members of an affected employee's family must travel separately, the affected employee shall be reimbursed for the travel of such family member(s) in accordance with paragraphs (a) (1) and (2) of this section and lodging and living expenses in accordance with paragraphs (b) (1) and (2) of this section.

(b) *Lodging and living expenses.* An affected employee and family members shall be reimbursed for lodging and living expenses incurred while in transit from the old residence to the new residence, including the day of departure and the day of arrival, not to exceed 10 days, except that if the new residence is not ready for occupancy upon arrival, additional living expenses may be reimbursed up to 10 days. Living expenses for an affected employee and spouse shall be reimbursed, for a period not to exceed 10 days which need not be consecutive days, for a round trip to obtain a residence at the new work location.

(1) Lodging shall be reimbursed at actual cost. Rooms must be occupied when feasible so that double room rates will apply. Moderately priced hotels and motels shall be used.

(2) Meals and related gratuities shall be reimbursed at actual cost to a maximum of $16.00 per person per day for the affected employee, spouse, and children. Gratuities for meals must be included in the cost of the meals.

(c) *Moving allowance.* The cost of transporting household effects and other personal effects of the affected employee and family members shall be reimbursed when transported by licensed commercial carrier and/or by use of rental truck or trailer.

(1) Reimbursement shall be made for packing, insuring, shipping, and unpacking of standard household items and personal effects. Insurance shall be provided for a valuation of $1.50 per pound; additional insurance for exceptionally valuable items may be obtained by the employee; however, the cost of such additional insurance shall not be reimbursed. Reasonable expenses for storage of household effects and personal property at the new location shall be paid when necessary because the residence at the new location is not ready for occupancy upon arrival.

(2) For each affected employee, reimbursement shall be made for transporting as many as two automobiles, by commercial carrier, provided that the low blue book value of each automobile exceeds the cost of shipment. Automobiles eligible to be shipped must be owned by the employee, the employee's spouse, or a dependent child of the employee.

Insurance up to the low blue book value of the automobile shipped shall be reimbursed.

(3) Expenses for the shipment, including insurance, of other personal non-business property such as boats, trailers, camping equipment, and mobile homes shall be reimbursed provided that the property shipped was owned by the employee or the employee's spouse prior to the offer of employment at the new location and provided further that shipping costs, including insurance, do not exceed the fair market value of the property shipped. Storage charges for such property shall not be reimbursed.

(4) Reasonable expenses for disconnecting at the former residence and reconnecting at the new residence shall be reimbursed for the following items, provided they are owned by the affected employee or spouse prior to the offer of employment at the new location: mobile home and major appliances (such as ranges, washers, dryers, dishwashers, refrigerators, freezers, television sets, and television antennae). Expenses for installation of a 220 volt power line at the new location shall not be reimbursed.

(5) Reasonable service charges by utility companies, including installation charges for telephone service, shall be reimbursed. Refundable deposits or advance billing for telephone service shall not be reimbursed.

(6) Reasonable expenses for the common carrier transportation of pets, including feeding, shall be reimbursed when such transportation is necessary.

(7) Reimbursement shall be made for actual rental fee, mileage charges, and gas for rental truck or trailer used to move the household and personal effects subject to following conditions:

(i) the time limit allowable for rental fees for a truck or trailer may not exceed 10 days; and

(ii) expenses detailed in paragraph (c)(1), (c)(3), (c)(4), and (c)(5) of this section shall be reimbursed, where applicable.

(d) *Advance payment.* Advances shall be granted for moving expenses, living expenses, and travel expenses based on estimates the affected employee obtains from common carriers or from a truck leasing agency. The amount advanced may not exceed 80% of the estimated total cost.

(e) *Relocation on or prior to June 30, 1979.* An affected employee who relocated during the period beginning May 31, 1977 and ending on June 30, 1979, shall furnish to the EDD within 90 days following June 30, 1979 the appropriate documentation supporting a claim for a job relocation allowance and a notarized affidavit that the listed expenses and amounts claimed are correct to the best of his/her knowledge.

(f) *Relocation after June 30, 1979.* An affected employee who relocates after June 30, 1979 must submit receipts or invoices and mileage costs to the EDD within 90 days after completion of the relocation.

(g) *Reimbursement for losses or cost.* In connection with a job relocation, if an affected employee relocates after June 30, 1979, and incurs costs or a loss in the sale of a home or the cancellation of an unexpired lease, a statement describing same and requesting reimbursement shall be submitted to the EDD field office where the request for the job relocation was originally filed within 90 days after completion of the relocation. If an affected employee relocated during the period beginning May 31, 1977 and ending on June 30, 1979, the statement must be submitted to the appropriate EDD field office within 90 days following June 30, 1979. To obtain reimbursement for a loss on the sale of a home, an affected employee must:

(1) Offer the home for sale in the customary manner, at or near the fair market value for a reasonable period of time, and

(2) Furnish EDD with the following information and documents on the residence sold:

(i) Location, including street address, city or town, county, and state;

(ii) Name of the owner or owners;

(iii) Date of sale;

(iv) Copy of the closing statement, verifying the selling price;

(v) Fair market value of the house one year before the date of sale based on the average of two appraisals by licensed residential real estate appraisers (three if the appraisals vary by more than five percent);

(vi) Copies of appraisals and receipts or cancelled checks in payment; and

(vii) Amount to be reimbursed (loss on the sale plus the cost of the appraisals).

(3) A protected employee may elect to waive the reimbursement of loss on sale of home and to receive, in lieu thereof, an amount equal to his closing costs which are ordinarily paid for and assumed by a seller of real estate in the jurisdiction in which the residence is located. Such costs shall include a real estate commission paid to a licensed realtor (not to exceed $3,000 or 6 per centum of sale price, whichever is less), and any prepayment penalty required by the institution holding the mortgage; such costs shall not include the payment of any "points" by the seller.

(4) To obtain reimbursement for costs incurred in cancelling a lease of an apartment or a principal residence, an affected employee must submit the following information and documents:

(i) Location, including street address, city or town, and state;

(ii) Date leased premises were vacated;

(iii) Name, address, and telephone number of the party who was advised that the leased premises would be vacated and whether the party advised was the owner or the leasing agent;

(iv) The cancelled check or receipt for payment of a cancellation charge;

(v) The landlord's statement discharging the affected employee from the obligations of a tenant under the lease; and

(vi) The affected employee's lease.

(h) *Challenge on claims for loss or costs.* Should the EDD challenge the value of the home, the costs or loss sustained in its sale, the costs or loss under a contract for purchase, loss or cost in securing termination of a lease, or any other question in connection with these matters, it shall be decided through joint conference between the employee or his representative, and the LMSA Regional Office. In the event they are unable to agree, the dispute or controversy may be referred by either party to a board of competent real estate appraisers, selected in the following manner: One to be selected by the employee or his representative and one by the LMSA Regional Office and these two, if unable to agree upon a valuation within 30 days, shall endeavor by agreement within 10 days thereafter to select a third appraiser, or to agree to a method by which a third appraiser shall be selected, and failing such agreement, either party may request the National Mediation Board to designate within 10 days a third qualified real estate appraiser whose designation will be binding upon the parties. A decision of the majority of the appraisers shall be required and said decision shall be final and conclusive. The salary and expenses of the third or neutral appraiser, including the expenses of the appraisal board, shall be borne equally by the parties to the proceedings. All other expenses shall be paid by the party incurring them, including the compensation of the appraiser selected by such party.

(i) The EDD will be guided in its decision to challenge a loss by the following considerations:

(i) Length of time the home was offered for sale at or near the fair market value;

(ii) Length of time homes of reasonably comparable value and type were on the market prior to sale; and

(iii) The total amount of the loss claimed relative to other claims for loss submitted to the EDD.

(2) The EDD will honor a reimbursement claim for up to three monthly mortgage payments which an affected employee made while trying to sell his/her home at or near the fair market value.

(i) *Overpayment.* If it is found that an affected employee failed without good cause to complete a job relocation, any amount of relocation allowance paid or advanced to the affected employee under this section shall constitute an overpayment. Any overpayment recovered from the affected employee shall be by repayment in cash or by deduction from benefits due the affected employee under the Act or by any other authorized legal action.

§ 92.33 Overpayment—general.

If the EDD, a referee, the Assistant Secretary, or a court of competent jurisdiction finds that an individual has received benefits to which the individual was not entitled under the Act then the individual shall be liable to repay the total sum to which the individual was not entitled. However, in certain cases where the recovery of the overpayment would be against equity and good conscience, recovery may be waived.

§ 92.34 Recovery of overpayments.

(a) The EDD shall take all reasonable measures under State or Federal law to recover for the account of the United States the sum of the payment to which the individual was not entitled in accordance with the provisions of § 92.33.

(b) When recovery is undertaken the EDD shall recover, insofar as is possible, the amount of any overpayment which is not repaid by the individual, by deductions from any benefits or allowances payable to the individual under the Act from any compensation payable to the individual under any Federal unemployment compensation law administered by the EDD, or under any other federal law administered by the SESA of any other state, or, by the EDD which provides for the payment of any assistance or allowance with respect to any week of unemployment. The amount of this deduction shall not exceed the amount which might be withheld if the Consumer Credit Protection Act were applicable.

§ 92.35 Final decision.

Recovery of any overpayment of benefits shall not be required or enforced until the determination establishing the overpayment has been approved by the Assistant Secretary.

Subpart E—Preferential Hiring

(Section 103, Pub. L. 95–250, 92 Stat. 167)

§ 92.40 Full consideration obligation.

(a) *Types of jobs.* Any employer specified in § 92.40(b) who is filling a job vacancy located primarily in Humboldt, Del Norte or an adjoining California county must give full consideration for employment in that job vacancy to affected employees if:

(1) The job involves skills and training that could reasonably be expected to have been gained by individuals who have been employed as logging and related woods employees or sawmill, plywood, and wood processing employees, or office employees, or that can reasonably be expected to be gained while so employed; or

(2) The applicant has the ability, or can reasonably be expected to have the ability after appropriate training of reasonable duration to perform the duties of the job.

(b) *Types of employers.* It shall be an obligation of any employer designated in this section to give full consideration to affected employee applicants for a job vacancy as described in (a) above if the employer is:

(1) A federal agency;

(2) A private employer designated by a federal agency as receiving federal funding assistance in any form or receiving the right after March 27, 1978 to use federal property in the conduct of harvesting and related activities, or replanting and land rehabilitation, or the conduct of wood processing and related activities or the conduct of highway construction and related activities;

(3) An affected or industry employer who has entered into an agreement with the EDD or other State Job Services to give full consideration to affected employees; or

(4) The State of California government, or a county and local govement within Humboldt and Del Norte Counties in California which has agreed to cooperate with the EDD in giving full consideration to affected employees when filling government job vacancies.

(c) *Selection.* An employer specified in § 92.40(b) shall have met the obligation to provide full consideration to affected employee applicants if the employer has used its normal employment standards to evaluate the applicant's qualifications for the position to be filled, and

(1) Selected a qualified affected employee applicant over non-affected employee applicants,

(2) Selected from among qualified affected employee applicants the applicant with the greatest creditable service where the qualifications of the applicants are approximately equal, or

(3) Held the full consideration job vacancy open for a non-qualified affected employee applicant who can be expected to qualify for the job after undergoing training approved by EDD.

(d) *Listing.* Any employer specified in § 92.40(b) who is filling a job described in § 92.40(a) shall provide notice of such job vacancy and the job requirements through the offices of the EDD in Humboldt and Del Norte Counties, California.

§ 92.41 Employee full consideration obligation.

(a) *Employee application requirements.* Any affected employee desiring to apply for a full consideration job vacancy must:

(1) Advise an EDD office of the full consideration position for which he/she wishes to be considered, and

(2) Demonstrate that the full consideration job vacancy involves skills and training which he/she could reasonably be expected to have gained in his/her affected employment, or

(3) If not already in possession of the requisite skill, demonstrate that he/she can reasonably be expected to have the ability to perform the job after appropriate training of reasonable duration.

§ 92.42 EDD full consideration responsibility.

(a) *Lists.* The EDD shall maintain lists of full consideration job vacancies as reported by Federal agencies; affected industry and other private employers; and the State of California, and its county and local governments in Humboldt, Del Norte and adjacent California counties.

(b) *Training.* The EDD shall determine whether an applicant for a full consideration job vacancy can reasonably be expected to have the ability to perform the job after appropriate training, and whether the period of work following training is commensurate with the time and funds required to provide the necessary training. Full consideration of an applicant shall not be required when the EDD has determined that the period of work following training is not commensurate with the training time and funds.

(c) *Referral.* Where two or more affected employee applicants for a full consideration job vacancy have approximately equal qualifications the EDD shall give preference in referral and listing to the applicant with the greatest creditable service.

§ 92.43 Violations of full consideration obligations.

(a) *Right of appeal.* Any employee who alleges that his/her rights to full consideration have been disregarded may file a complaint with the Eureka office of the EDD which shall forward the complaint to the Eureka office of the LMSA for processing. Where noncompliance with the full consideration obligation is determined, the Department shall take appropriate corrective action.

§ 92.44 Judicial review.

Determinations under this section shall be subject to Judicial Review under the same conditions as provided in § 92.50(t).

§ 92.45 Preexisting rights.

Nothing in this Subpart shall be construed to affect any additional or alternative rights under law, contract or regulation in effect as of March 27, 1978.

§ 92.46 Period of preferential hiring.

The requirement for full consideration as contained in this Subpart, shall remain in effect from March 27, 1978 through September 30, 1984.

Subpart F—Appeal Procedure

(Section 213(d)(2), Public Law 95–250, 92 Stat. 182)

§ 92.50 Administration.

(a) *Parties.* The parties to a proceeding on an application for benefits are:

(1) The applicant;

(2) The EDD;

(3) Other SESA's if involved; and, in addition,

(4) Any other individual or organization who is or may be adversely affected by grant or denial of an application for benefits may request leave to participate as an intervening party with respect to the application for REPP benefits in proceedings before a referee or before the Assistant Secretary. Leave to intervene shall be granted on such terms and conditions as are deemed appropriate.

(b) *Parties may appeal.* Any party to a proceeding on an application for benefits may appeal the determination or redetermination.

(c) *Reconsideration of determination.* The EDD may reconsider a determination on an application for benefits under the same conditions and subject to the same time limits as apply to reconsideration or determinations of entitlement to unemployment insurance under the California Unemployment Insurance Code and California Unemployment Insurance Appeals board regulations under Title 22 of the California Administrative Code.

(d) *Notice of determination.* Each party to a proceeding on an application for benefits shall be given written notice of the determination or reconsidered determination by EDD.

(e) *Notice of appeal rights.* All parties shall receive notice of each determination, reconsidered determination, or decision on an application for benefits. The notice shall advise each applicant of his/her right to appeal or to request reconsideration of the determination or decision. Such notice shall include the manner in which the appeal or request for reconsideration should be made, and the time period for making such appeal or request for reconsideration.

(f) *Appeal from determination.* A party aggrieved by or dissatisfied with a determination or reconsidered determination on an application for REPP benefits may appeal to an Administrative Law Judge (ALJ) of the California Unemployment Insurance Appeals Board.

(g) *Contents of appeal to ALJ.* An appeal to an ALJ under paragraph (f) of this Section must:

(1) Be mailed to or filed at the EDD field office where the application was initially filed within 20 days after notice of such determination or reconsidered determination was mailed or personally served on the party;

(2) Be in writing;

(3) Identify or include a copy of the determination or reconsidered determination;

(4) State that the party desires to appeal to a referee;

(5) Contain a statement of the reason(s) why the appealing party believes that an error has occurred; and

(6) Be signed by the appealing party or an authorized representative.

Notwithstanding the requirements in (g)(5) of this section, any written document indicating that a party is aggrieved by or dissatisfied with a determination or reconsidered determination on an application for REPP benefits which is received by the EDD field office where the application was initially filed within 20 days after notice of such determination was personally served or mailed to the party shall be accepted as a valid notice of appeal; provided, that the ALJ may require the appealing party, prior to the hearing on his/her appeal, to submit a written statement of the reason(s) why the appealing party believes that an error has occurred.

(h) *Notice of hearing before ALJ.* Upon the filing of an appeal, a hearing shall be promptly scheduled and a notice of the hearing shall be mailed to each party.

(i) *Rules of evidence.* (1) The technical rules of evidence shall not apply. Any evidence may be received at any stage of the appeal; a referee or the Assistant Secretary may exclude any evidence or offer of proof which is immaterial, irrelevant, unduly repetitious, or customarily privileged.

(2) A party shall have the right to present its case by oral and documentary evidence and to submit rebuttal evidence.

(j) *Hearing before an ALJ.* The ALJ shall have jurisdiction to decide all relevant issues with respect to an applicant's entitlement to REPP benefits without regard to whether such issues were set out in the appeal. The ALJ may issue subpoenas to obtain the appearance of witnesses or the presentation of documents and exhibits on the same terms and conditions as apply with respect to the issuance of subpoenas in unemployment insurance benefit appeal hearings under the California Unemployment Insurance Code.

(k) *Notice of an ALJ's decision.* Notice of an ALJ's decision on an appeal of an application for REPP benefits shall be sent to each party. In addition, a copy shall be sent to both the LMSA local office in Eureka and to the LMSA national office. Each party shall be notified of his/her right of appeal and shall be informed that the Assistant Secretary has 30 days to review the case on his/her own motion.

(l) *Appeal from an ALJ's decision.* A party aggrieved by or dissatisfied with an ALJ's decision on an application for REPP benefits may appeal such decision to the Assistant Secretary.

(m) *Appeal to Assistant Secretary.* An appeal to the Assistant Secretary must:

(1) Be addressed to the Assistant Secretary of Labor for Labor-Management Relations; U.S. Department of Labor; 200 Constitution Avenue, NW; Washington, D.C., 20210; and delivered or mailed to the Assistant Secretary within 20 days after the day on which notice of the ALJ's decision was handed or mailed to such party;

(2) Be in writing;

(3) Identify or include a copy of the referee's decision appealed from;

(4) State that the party desires to appeal from the referee's decision;

(5) Contain a statement of the reason(s) why the appealing party believes that an error has occurred; and

(6) Be signed by the appealing party or an authorized representative.

Notwithstanding the requirement in (m)(5) of this section, the Assistant Secretary shall accept as a valid appeal any written document indicating that a party is aggrieved by or dissatisfied with a referee's decision on an application for REPP benefits if such document is received by the Assistant Secretary within 20 days after notice of such referee's decision was handed or mailed to such party; provided, that the Assistant Secretary may rerquire the appealing party to submit a written statement of the reason(s) why the appealing party believes that an error has occurred.

(n) *Briefs.* Briefs are not required unless specifically requested by the Assistant Secretary. However, they are welcome and will be considered carefully. Any party may file a brief or written argument in response to a brief or other written argument filed by another party not later than 30 days after such brief or written argument is filed. Briefs or written arguments can not exceed 25 pages unless permission to file a lengthier document is obtained form the Assistant Secretary.

(o) *Service.* A party filing a brief is required to furnish each party with a copy. For purposes of service to the EDD, a copy of the brief must be sent to:

Legal Office, MIC 53, California Employment Development Department, 800 Capital Mall, Sacramento, California 95814.

(p) *Delegation of authority.* The Assistant Secretary may delegate to any employee of the United States Department of Labor the function of reviewing an appeal and preparing a recommended decision with respect thereto, but no employee of the United States Department of Labor who personally participated in any way in any proceedings with respect to an application for benefits will be assigned to prepare a recommended decision on such application for benefits.

(q) *Transmittal of record and transcript.* On receipt of a notice from the Assistant Secretary or his/her designee that an appeal from a referee's decision with respect to an application for REPP benefits has been filed, or the Assistant Secretary has decided to review the decision, the CUIAB shall promptly transmit to the Assistant Secretary or his/her designee a complete record of the proceedings before the referee, including all exhibits and documents received or tendered in such proceedings, and a complete copy of the administrative file as to the application for benefits. Upon request from the Assistant Secretary, the CUIAB shall promptly transmit an official transcript of the proceedings to the Assistant Secretary.

(r) *Processing of appeal.* The Assistant Secretary shall review the file with respect to the application for REPP benefits in issue to ascertain whether substantial error adversely affecting the rights of a party has occurred, regardless of whether such error is alleged by an appealing party.

(s) *Decision of Assistant Secretary.* The Assistant Secretary may affirm, reverse, or modify in whole or in part the decision of an ALJ as to an application for REPP benefits, or may remand the case to an ALJ for further proceedings.

(t) *Judicial review.* A party aggrieved by or dissatisfied with a decision of the Assistant Secretary has 60 days after notice of such decision to file for judicial review in the same manner and under the same conditions as provided by Section 250 of the Trade Act of 1974 which provides:

(1) A worker, group of workers, certified or recognized union, or an authorized representative of such worker or group aggrieved by a final determination by the Secretary may, within 60 days after notice of such determination, file a petition for review of such determination with the United States court of appeals for the circuit in which such worker or group is located or in the United States Court of Appeals for the District of Columbia Circuit. The clerk of such court shall send a copy of such petition to the Secretary. Upon receiving such petition, the Secretary shall promptly certify and file in such court the record on which he based such determination.

(2) The findings of fact by the Secretary, if supported by substantial evidence, shall be conclusive; but the court, for good cause shown, may remand the case to the Secretary to take further evidence, and the Secretary may thereupon make new or modified findings of fact and may modify his previous action, and shall certify to the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive if supported by substantial evidence.

(3) The court shall have jurisdiction to affirm the action of the Secretary or to set it aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court of the United States upon certiorari or certification as provided in Section 1254 of Title 28, United States Code.

(u) *Late appeals.* An appeal to an ALJ under paragraph (f) of this Section or an appeal to the Assistant Secretary under paragraph (1) of this Section which is not filed within the time for appeal stated in those paragraphs will be dismissed as untimely unless the ALJ or the Assistant Secretary finds that the appealing party has shown good cause for failure to file the appeal within the proper time. The party who fails to appear at a hearing on an appeal may apply to the ALJ within 20 days of said hearing (or longer if the ALJ determines this delay in applying is for good cause) to have the hearing reopened. Such application will be granted if the ALJ finds that the party had good cause for failure to appear.

(w) *Payment of benefits in case of appeal.* (1) Weekly layoff benefits and vacation replacement benefits awarded by a determination, reconsidered determination, or referee's decision shall be promptly paid for each week of total or partial unemployment occurring after the date on which the applicant's initial application for benefits was filed, notwithstanding the non-expiration of the period for appeal, or the pendency of an appeal, from such determination, reconsidered determination, or decision. Weekly layoff benefits and vacation replacement benefits, or other benefits awarded by a determination, reconsidered determination, or a referee's decision for a week or weeks of total or partial unemployment occurring prior to the date on which the applicant's initial application for benefits was filed, shall not be paid until the determination, reconsidered determination, or referee's decision awarding them becomes final.

(2) In all cases, a severance payment awarded by a decision of a referee or the Assistant Secretary shall not be paid until the decision awarding such payment becomes final.

BILLING CODE 4510-28-M

Pension and Welfare Benefit Programs

[29 CFR Part 2520]

Exemption From Reporting and Disclosure Requirements With Regard to Apprenticeship and Other Training Plans

AGENCY: Department of Labor.

ACTION: Proposed rulemaking.

SUMMARY: This document sets forth proposed revisions to existing regulations that would provide a limited exemption from the reporting and disclosure requirements of the Employee Retirement Income Security Act of 1974 (hereinafter the Act) with respect to employee welfare benefit plans that provide exclusively: (1) apprenticeship training benefits, (2) other training benefits, or (3) apprenticeship and other training benefits. The proposed revisions are designed to avoid unnecessary reporting and disclosure requirements.

DATES: Written comments concerning the proposed revisions must be submitted on or before August 21, 1979.

ADDRESSES: Interested persons are invited to submit written data, views or arguments concerning the proposed revisions to "Reporting and Disclosure Exemption for Apprenticeship and Other Training Plans," Room N–4661, Office of Reporting and Plan Standards, Pension and Welfare Benefit Programs, U.S. Department of Labor, Washington, D.C. 20016, on or before the date indicated above. All such submissions will be open to public inspection in the Public Documents Room, Pension and Welfare Benefit Programs, Room N–4677, 200 Constitution Avenue, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Barry Barbash, Esq., Office of the Solicitor, U.S. Department of Labor, (202) 523–8296. (This is not a toll free number).

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Department of Labor (the Department) has under consideration certain proposed amendments to 29 CFR 2520.104–22. Regulation § 2520.104–22, which was adopted in August, 1975, grants a limited exemption from certain of the reporting and disclosure requirements of the Act with respect to plans that provide solely apprenticeship training benefits. Specifically, under the regulation, administrators of these plans are exempted from all the provisions of Part 1 of the Act,[1] except the requirements to file a short form plan description (applicable only to plans subject to Part 1 on or before January 31, 1976), an initial plan description and an annual report. As will be explained in detail below, the Department is proposing to expand the class of plans for which exemption is available under § 2520.104–22 and to change the reporting and disclosure requirements applicable to such expanded class of plans.[2]

Amended Exemption for Plans Providing Solely Apprenticeship Training. On June 1, 1978, (44 FR 31640) the Department published final regulations, 29 CFR 2520.102–1 and 104a–2, which eliminate for most plans the requirement to file a Form EBS–1 plan description. Following the publishing of proposed §§ 2520.102–1 and 104a–2 for public comment, a question was raised about the effect of these regulations on the reporting requirements of plans providing solely apprenticeship benefits. To avoid the possibility that § 2520.102–1 and 104a–2 taken together with § 2520.104–22 might be read to require plans providing solely apprenticeship training to file a summary plan description, the Department adopted §§ 2520.102–1(b) and 104a–2(b)(2), which state that those apprenticeship plans, exempt under § 2520.104–22 from the requirement to file a summary plan description, shall continue to satisfy the statutory obligation to file a plan description by filing a Form EBS–1.

In adopting 29 CFR 2520.102–1 and 104a–2, the Department noted that retaining the Form EBS–1 for plans providing solely apprenticeship training was an interim measure. The Department is proposing in this notice to rescind §§ 2520.102–1(b) and 104a–2(b)(2) and to adopt with respect to such plans the regulation described below. As noted previously by the Department,[3] plans providing only apprenticeship training differ from most other welfare plans. Frequently, apprenticeship training plans are established by the terms of collective bargaining agreements under which employers are required to make contributions to those plans based, generally, on the number of hours worked or on the compensation earned by their employees. However, only few, if any, of those employees in respect to whose services or earnings contributions are made, receive any training or other direct benefits from the apprenticeship plan. The individuals who do receive direct benefits from an apprenticeship plan are individuals who may not even be employed by contributing employers when beginning their apprenticeship training. Thus, unlike the participants or beneficiaries of a typical welfare plan, the participants or beneficiaries within the meaning of §§ 3(7) and 3(8) of the Act of an apprenticeship plan are not those individuals with respect to whose service contributions have been made to the plan.

Because employees of employers contributing to apprenticeship plans appear to have a more indirect interest in the benefits provided by such plans than employees of employer-sponsors generally have in the benefits provided under other welfare plans, the Department believes that to require administrators of apprenticeship plans to file with the Department, and to furnish those employees, all information required by Part 1 of the Act would be unnecessarily burdensome and costly. The Department also believes that administrators of apprenticeship plans would have significant difficulty in furnishing apprentices with all information required by Part 1 of the Act, since the group of apprentices receiving training from a particular plan may change frequently as new apprentices begin training and as other apprentices either drop out of the apprenticeship program or graduate and become journeymen.

For these reasons, the Department is proposing to revise 29 CFR 2520.104–22 to exempt a plan that provides solely apprenticeship training from all the reporting and disclosure provisions of Part 1 of the Act, so long as the administrator of such plan files with the Department a notice containing certain information.[4] The required notice would include the name of the plan, the name of the plan administrator, the name and address of an office or person from whom an interested individual can obtain pertinent information about the courses or apprenticeship program and a description of the procedure by which to

[1] Under the reporting and disclosure provisions contained in Part 1 of Title 1 of the Act, administrators of employee benefit plans generally must file with the Department a plan description, summary plan description, annual report, and summary of material modifications or changes. Plan administrators must also furnish each plan participant and beneficiary with a summary plan description, a statement of material modifications and changes, and a summary annual report.

[2] With regard to training programs established by employers, the Department notes that, under 29 CFR 2510.3–1(b)(2)(iv), payment of compensation out of an employer's general assets on account of periods of time during which an employee performs little or no productive work while engaged in training (whether or not subsidized in whole or in part by federal, state or local government funds) is a payroll practice not included within the definitions of "employee welfare benefit plan" and "welfare plan" contained in section 3(1) of the Act for purpose of Title I of the Act.

[3] 40 FR 34526, 34528, August 15, 1975.

[4] The amended exemption contained in § 2520.104–22 also requires the plan administrator to: (a) take steps reasonably designed to ensure that the information contained in the notice is disclosed by employers sponsoring or contributing to the plan to those employees eligible to enroll in any courses to study sponsored or established by the plan; and (b) make the notice available to such employees upon request. Presumably, these conditions would not be applicable in practice to jointly sponsored plans providing solely apprenticeship training, since persons eligible to become apprentices would often not be employees of contributing employers.

enroll in the courses or apprenticeship program.

Exemption for Training Plans. Employee welfare benefit plans that provide welfare benefits including training other than, or in addition to, apprenticeship training, are not covered by the existing exemption contained in 29 CFR 2520.104–22.[5] It has been suggested to the Department that § 2520.104–22 is too restrictive and that the exemption contained in that regulation should be available with respect to all plans that provide training or retraining benefits.[6] This suggestion appears to the Department to have merit, at least with respect to plans that provide exclusively training benefits or provide a combination of apprenticeship and training benefits. Like contributions to apprenticeship plans, employer contributions to training plans are often based on the service of a class of employees of which only a relatively small group of employees at any one time would appear to be interested in, or receive a direct benefit from, a training program. Because only a relatively few employees receive direct benefits from plans providing solely training benefits or a combination of apprenticeship and training benefits, the Department believes it may be unnecessarily burdensome and costly to continue to require the administrators of such plans to comply fully with the reporting and disclosure provisions of Part 1 of the Act.

The Department is proposing to revise 29 CFR 2520.104–22 to exempt a plan providing solely training benefits or a combination of apprenticeship and training benefits from all of the reporting and disclosure provisions of Part 1 of the Act, so long as the administrator of such plan files with the Department the notice described in proposed § 2520.104–22(b). In addition, the administrator would be required to make such notice available upon request to employees of employers contributing to the plan who are eligible to enroll in any course or program of study offered under the plan. Finally, the administrator must take steps reasonably designed to ensure that the information contained in the required notice is furnished to such employees. The administrator can satisfy this requirement in a number of ways including arranging to have employers make the required information available to employees by mail or personal delivery or by posting the notice in a conspicuous location at all job sites. In appropriate situations, the administrator could also make arrangements to have the information required to be included in the notice published in publications of general circulation of employee organizations to which participants in the plan belong.

The revisions proposed herein do not meet the criteria for significant regulations set forth in the Department's guidelines [7] issued to implement Executive Order 12044.[8]

Statutory Authority: The proposed revisions set forth below are issued under the authority of sections 104, 109 and 505 of the Act (29 USC 1024, 1029, and 1135).

In consideration of the matters discussed above, it is proposed to amend Part 2520 of Chapter XXV of Title 29 of the Code of Federal Regulations as follows:

1. Rescind §§ 2520.102–1(b) and 2520.104a–2(b)(2).

2. Amend § 2520.102–1 to read as follows:

§ 2520.102–1 Plan description.

The plan description required by section 102 of the Act shall consist of a summary plan description as described in section 102(b) of the Act and § 2520.102–2 and 2520.102–3 thereunder.

3. Amend § 2520.104a–2 by deleting paragraph (b)(2) and revising (b) to read as follows:

§ 2520.014a–2 Plan Description reporting requirements.

* * * * *

(b) Fulfilling the filing obligation. The administrator of an employee benefit plan shall satisfy the requirements of section 104(a)(1)(B) of the Act and paragraph (a) of this section by filing with the Secretary a summary plan description and an updated summary plan description in accordance with section 104(a)(1)(C) of the Act and regulations issued thereunder.

* * * * *

4. Amend § 2520.104–22 to read as follows:

§ 2520.105–22 Exemption from reporting and disclosure requirements with regard to apprenticeship and other training plans.

(a) An employee welfare benefit plan that provides exclusively apprenticeship training benefits or other training benefits or that provides exclusively apprenticeship and training benefits shall not be required to meet any requirements of Part 1 of the Act, provided that the administrator of such plan: (1) files with the Secretary the notice described in paragraph (b) of this section; (2) takes steps reasonably designed to ensure that the information required to be contained in such notice is disclosed to employees of employers contributing to the plan who may be eligible to enroll in any course of study sponsored or established by the plan; and (3) makes such notice available to such employees upon request.

(b) The notice referred to in paragraph (a) of this section shall contain: (1) the name of the plan; (2) the name of the plan administrator; (3) the name and location of an office or person from whom an interested individual can obtain a description of any existing or anticipated future course of study sponsored or established by the plan, including any prerequisites for enrolling in such course; and, (4) a description of the procedure by which to enroll in such course.

Signed at Washington, D.C., this 8th day of June 1979.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration.

DEPARTMENT OF AGRICULTURE

Forest Service

[36 CFR Chapter II]

Procedures for Involving the Public in the Formulation of Standards, Criteria, and Guidelines That Apply to Forest Service Programs

AGENCY: Forest Service, USDA.

ACTION: Proposed Rule—Extension of Time for Comments.

SUMMARY: Section 14 of the Forest and Rangeland Renewable Resources Planning Act of 1974, added by Section 11 of the National Forest Management Act of 1976, provides for the establishment by regulations of procedures *"to give the Federal, State and local governments, and the public adequate notice and opportunity to comment upon the formulation of standards, criteria, and guidelines applicable to Forest Service programs."* Draft regulations describing a process to accomplish this were published in Federal Register, Vol. 44, No. 75, FR Doc. 79–11890, Tuesday, April 17, 1979, p. 22759. Comments on the draft were to be received on or before June 18, 1979. The due date for comments to be received is hereby extended to July 9, 1979.

DATES: Comments must be received on or before July 9, 1979.

ADDRESS: Send comments to: Chief, Forest Service, P.O. Box 2417, Washington, D.C. 20013. All written comments will be available for public review in Room 3250, South Agriculture Building, 12th and Independence Avenue, S.W., Washington, D.C., 8:00 a.m. to 4:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Wayne R. Nicolls, Office of Information, P.O. Box 2417, Washington, D.C. 20013, 202/447–7013.

John R. McGuire,
Chief, Forest Service.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 1246–6]

Ohio; Approval and Promulgation of Implementation Plans

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: These proposed rules are revisions to the sulfur dioxide emission limitations for Cleveland Electric Illuminating Company's Avon Lake and East Lake power plants in Ohio. The revisions are based on new monitoring information and dispersion modeling analyses and on the installation of new stacks at each of the plants. Comments are being solicited on the revisions.

DATE: Comments must be received by August 13, 1979. A public hearing will be held on the revisions from 9 a.m. to 4 p.m. on July 11, 1979, at The Anthony J. Celebrezze Federal Building, 31st Floor, 1240 East 9th St., Cleveland, Ohio. The record on the revisions (Docket No. 5A–79–1) will be open for thirty days after the hearing to allow the submission of rebuttal or additional information.

ADDRESSES: Written comments and requests to make an oral presentation at the hearing should be submitted to: Chief, Air Programs Branch, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604. The docket for the revision is available for inspection and copying during normal business hours at the above address and at: Public Information Reference Unit, Room 2922, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Steve Rothblat, Air Programs Branch, U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, 312/353–2205.

SUPPLEMENTAL INFORMATION: In 1976 and 1977, the Environmental Protection Agency (EPA) promulgated regulations that established sulfur dioxide emission limitations for sources in Ohio. 40 C.F.R. 52.1881. Following promulgation, the Cleveland Electric Illuminating Company (CEI) requested that the emission limitations for its Avon Lake and East Lake power plants be revised. In support of the revision request, CEI submitted dispersion modeling analyses and monitoring data collected since the original emission limitations were promulgated by EPA. The sumbission takes into account CEI's installation of "Good Engineering Practice" (GEP) stacks at the two plants. The GEP stack heights were not utilized by EPA in the modeling performed to set the original emission limitations. The new stacks will result in lower ground-level emission concentrations near the plants.

The agency has evaluated the information submitted by CEI and has determined that under Section 110(a)(3) of the Clean Air Act a revision of the originally promulgated emission limitations is appropriate. Specifically, based on dispersion modeling analyses of the new stacks and new air quality monitoring data, the agency is proposing to revise the emission limitations to status quo emission limitations for the two plants. The agency has determined that such revisions should not interfere with attainment and maintenance of the national ambient air quality standards. Furthermore, as a condition of approval of the revised emission limitations, the agency is requiring CEI to install and operate an even more extensive monitoring system surrounding the plants than now exists.

The emission limitations originally promulgated for the Avon Lake and East Lake plants were determined through dispersion modeling using the urban version of the RAM model. CEI has consistently maintained that the use of the urban RAM results in overly stringent emission restrictions for the two plants. Until the CEI petition was submitted, there have been no data to support the claim. While the on-site data relied on in the petition are not adequate to give complete ambient air quality coverage of the area impacted by the plants, the data, however, do indicate that the urban RAM is inappropriate for setting emission limitations for the two plants. At the same time, the air quality data collected by CEI indicates that the use of the rural RAM to set emission limitations is also not appropriate. The rural RAM does not account for lake-breeze and fumigation effects on emissions; both effects usually result in greater ground-level concentrations, particularly at locations near the emission source. The use of the rural RAM, therefore, may result in emission limitations tht would not be adequate to attain and maintain the national standards. In the absence of a more appropriate modeling technique, an emission limit based on the status quo emissions represents a reasonable margin of safety (pending collection of further monitoring data) to compensation for the uncertainty associated with the results of the RAM rural model. Current air quality data also does not contradict the agency conclusion that the status quo emissions are adequate to protect the standards.

In short, neither the RAM urban model used by EPA in the original promulgation nor the RAM rural model used by CEI in its request for revision are appropriate for use at the two plants. The air quality data collected by CEI demonstrate that neither model accurately predicts the air quality

impacts of the plants. However, based on the changed dispersion characteristics caused by the new GEP stack heights at the plants which will reduce ground-level concentrations at locations close to the plants where lake-breeze and fumigation effects have their greatest impact, it has been determined that status quo emissions limitations should be proposed for approval at both plants.

The agency is requiring the installation of an expanded monitoring system to further insure that the status quo emission limitations will, in fact, protect the national standards and to develop site-specific information on ground-level concentrations caused by the plants. This information will be used to develop plant-specific dispersion analyses if it should be necessary to revise the emission limitations in the future. The specific details of the expanded monitoring system will be available at the Region V Air Programs Branch within thirty days. Comments on the monitoring system should be submitted by the close of the comment period on the revisions. Final promulgation of the revisions will follow review of all written comments submitted and any public hearing statements.

The Agency has determined that this document is not a significant regulation and does not require preparation of a regulatory analysis under Executive Order 12044.

(Section 110 of the Clean Air Act, as amended 42 U.S.C. 7410)

Dated: June 4, 1979.

Douglas M. Costle,

Administrator.

Section 52.1881 part 52 of Chapter 1, title 40 of the Code of Federal Regulations is proposed to be amended as follows:

Subpart KKK—Ohio

§ 52.1881 Control Strategy: Sulfur oxides (sulfur oxide).

* * * * *

(b) Regulations for the control of sulfur dioxide in the State of Ohio.

* * * * *

(35) In Lake County:

* * * * *

(vi) The Cleveland Electric Illuminating Co. or any subsequent owner or operator of the East Lake Plant in Lake County, Ohio shall not cause or permit the emission of sulfur dioxide at the East Lake Plant in excess of 6.58 pounds of sulfur dioxide per million BTU actual heat input from any stack.

(vii) [Revoked]

* * * * *

(38) In Lorain County:

* * * * *

(iii) The Cleveland Electric Illuminating Co., or any subsequent owner or operator of the Avon Lake Plant in Lorain County, Ohio, shall not cause or permit the emission of sulfur dioxide at Avon Lake Plant in excess of 1.35 pounds of sulfur dioxide per million BTU actual heat input from any stack at units 1 through 4 and 6.09 pounds of sulfur dioxide per million BTU actual heat input from any stack at units 6 through 9.

(iv) [Revoked]

BILLING CODE 6560-01-M

[40 CFR PART 52]

[FRL 1245-2]

Proposed Revision of the Virginia State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Commonwealth of Virginia has submitted a proposed revision of its State Implementation Plan (SIP) consisting of a variance for the E. I. du Pont de Nemours and Company's Spruance, Virginia plant. The variance would exempt one of the company's boilers from the State's emission standard for particulate emissions from fuel burning equipment until December 31, 1980. Sulfur dioxide (SO_2) and opacity emission limitations would not be changed by this variance. Diffusion modeling done by the company indicates that the increase in emissions allowed by the variance would not significantly affect ambient air quality.

DATE: Comments must be submitted on or before July 12, 1979.

ADDRESSES: Copies of the proposed SIP revision and the accompanying support documents are available for inspection during normal business hours at the following offices:

U.S. Environmental Protection Agency, Air Programs Branch, Curtis Building, 6th & Walnut Streets, Philadelphia, PA 19106, Attn: Mark E. Garrison.

State Air Pollution Control Board, Commonwealth of Virginia, Room 1106, Ninth Street Office Building, Richmond, Virginia 23219, Attn: W. R. Meyer.

Public Information Reference Unit, Room 2922, EPA Library, U.S. Environmental Protection Agency, 401 M Street, S.W. (Waterside Mall), Washington, D.C. 20460.

All comments on the proposed revision submitted within 30 days of publication of this notice will be considered and should be directed to:

Mr. Howard Heim, Chief, Air Programs Branch (3AH10), Air & Hazardous Materials Division, U.S. Environmental Protection Agency, Region III, 6th & Walnut Streets, Philadelphia, Pennsylvania 19106, Attn: AH016VA.

FOR FURTHER INFORMATION CONTACT: Mark E. Garrison (3AH13), U.S. Environmental Protection Agency, Region III, 6th & Walnut Streets, Philadelphia, PA 19106, telephone number (215) 597-2745.

SUPPLEMENTARY INFORMATION: On December 13, 1978 the Secretary of Commerce and Resources of the Commonwealth of Virginia submitted for the Governor a proposed revision of the Virginia SIP consisting of a variance for the E. I. du Pont de Nemours and Company's Spruance, Virginia plant. The variance exempts one of the company's boilers from Part IV, Rule EX-3 of Virginia's Regulations for the Control and Abatement of Air Pollution. This regulation deals with emissions standards for particulate emissions from fuel burning equipment. On February 22, 1979 the State submitted additional information regarding the proposed revision, including an addition to the variance specifying an emissions limitation for particulates that the Company's boiler will have to meet while the variance is in effect. The additional information included a certification that the variance was approved in accordance with the public hearing and notice requirements of 40 CFR Part 51.4.

The proposed revision would allow the Company to burn coal in one of its boilers prior to the planned installation of particulate control equipment consisting of electrostatic precipitators (ESPs). The installation of this control equipment will be completed by December 31, 1980 at which time the Company intends to commence burning coal in a total of four of the Spruance plant's boilers. Since the variance expires on December 31, 1980 the Company thereafter will be required to meet the State emission limitation for particulates.

The proposed revision further places the following conditions on the Company:

1. Only one of the boilers numbered 5 through 8 can burn coal at any given time.

2. The maximum ash content of the coal cannot exceed 10%; furthermore, the particulate emission rate from the

boiler burning coal cannot exceed 201 pounds per hour.

3. Monitoring and reporting requirements include notifying the State prior to the first burning of coal and whenever the burning of coal is changed from one boiler to another. In addition, progress reports must be submitted on a quarterly basis.

Diffusion modeling performed by the company indicates that the allowed increase in particulate emissions will not significantly affect ambient air quality. The modeling was done using EPA's CRSTER model with one year's (1964) meteorology. The meteorological data was obtained from the Richmond airport and supplemented by mixing height data from National airport in Washington, D.C.

The variance exempts the boiler in question from Part IV, Rule EX-3, of Virginia's Regulations. This regulation was adopted by the State and submitted to EPA as part of a SIP revision which was proposed by EPA in the Federal Register on February 8, 1977 (42 FR 7969). EPA had not taken final action on that proposed SIP revision as of the effective date of the variance (i.e. December 1, 1978), and thus Virginia's former regulation, § 4.03.01, was still in effect as a matter of Federal law. EPA believes that its decision on the approvability of the variance for DuPont as a SIP revision is independent of the final action with respect to Part IV, Rule EX-3 and that the variance will correctly exempt the boiler in question from section 4.03.01 (for the purposes of Federal enforcement) as well as from Part IV, Rule EX-3 until December 31, 1980 as long as the conditions of the variance are met.

Based on the foregoing, it is the tentative decision of the Administrator to approve the proposed revision of the Virginia State Implementation Plan.

The public is invited to submit to the address stated above, comments on whether the DuPont variance should be approved as a revision of the Virginia State Implementation Plan.

The administrator's decision to approve or disapprove the proposed revision will be based on the comments received and on a determination whether the amendments meet the requirements of Section 110(a)(2) of the Clean Air Act and 40 CFR Part 51, Requirements for Preparation, Adoption, and Submittal of State Implementation Plans.

Under Executive Order 12044 EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized". I have reviewed this regulation and determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

(42 U.S.C. 7401)

Dated: May 22, 1979.

Jack J. Schramm,

Regional Administrator.

40 CFR Part 52

[FRL 1244-3]

Proposed Revision of the Commonwealth of Pennsylvania State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Commonwealth of Pennsylvania has submitted a proposed revision of certain of the provisions contained in the State Implementation Plan. The proposed revisions are to Chapter 121, relating to general provisions, Chapter 123, relating to standards for contaminants, and to Chapter 129, relating to standards for sources. The revisions to these chapters are intended to clarify terms and the intent of the provisions contained in these chapters. The EPA solicits comments on whether to approve or to disapprove these proposed revisions.

DATE: Comments must be received on or before July 12, 1979.

ADDRESSES: Copies of the proposed SIP revision and accompanying support documents are available for public inspection during normal business hours at the following offices:

U.S. Environmental Protection Agency, Air Programs Branch, 6th & Walnut Sts., Philadelphia, Pennsylvania 19106, ATTN: Patricia Sheridan.

Department of Environmental Resources, Bureau of Air Quality Control, 200 North 3rd Street, Harrisburg, Pennsylvania 17120, ATTN: Mr. James Hambright, Director.

Public Information Reference Unit, Room 2922—EPA Library, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

All comments on the proposed revision submitted on or before July 12, 1979, will be considered and should be directed to:

Mr. Howard Heim, Chief, Air Programs Branch (3AH10), U.S. Environmental Protection Agency, Region III, 6th & Walnut Streets, Philadelphia, Pennsylvania 19106, ATTN: AH010PA.

FOR FURTHER INFORMATION CONTACT: Patricia Sheridan (3AH10), U.S. Environmental Protection Agency, Region III, 6th & Walnut Streets, Philadelphia, PA 19106, telephone (215) 597-8176.

SUPPLEMENTARY INFORMATION: On September 20, 1978, the Commonwealth of Pennsylvania submitted to the Regional Administrator, EPA, a revision of the Commonwealth's State Implementation Plan (SIP). The Commonwealth requested approval of amendments which consist of the following:

(1) A detailed definition of "stockpiling" to include as the act of placing or storing material upon and removing material from piles exposed to the outdoor atmosphere.

(2) Clarification of the intent of Section 121.2 that unless explicit reference is made to another section of the regulations, each section shall be construed and enforced according to its own terms.

(3) The establishment of a clear mechanism for evaluating minor fugitive emissions and providing written approval of such emissions as stated in § 123.1(a)(9) and (b) and § 129.15 (c) and (d).

(4) The carrying out of legislative policy mandated by an amendment to § 4.1 of Air Pollution Control Act adopted on December 12, 1976, which indicated that the Department of Environmental Resources should not regulate air contaminants from production of agricultural commodities in their unmanufactured state (Section 123.1(d), 123.31(c), 123.42(4) and 129.14(c)).

The public is invited to submit to the address stated above comments on whether the above listed modifications should be approved as a revision of the Commonwealth of Pensylvania's State Implementation Plan. The Commonwealth of Pennsylvania has certified that public hearings were held on April 5, 7 and 12, 1977 in accordance with the requirements of 40 CFR 51.4.

The Administrator's decision to approve or disapprove this proposed SIP revision will be further based on a final determination as to whether it meets the requirements of Section 110 of the Clean

Air Act and 40 CFR Part 51, Requirements for Preparation, Adoption, and Submittal of Implementation Plans.

Under Executive Order 12044 EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized". I have reviewed this regulation and determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Dated: May 30, 1979.

(42 U.S.C. 7401)

Jack J. Schramm,

Regional Administrator.

Federal Space Management; Extension of Comment Period of Proposed Rulemaking

AGENCY: Public Buildings Service, General Services Administration.

ACTION: Notice of extension of comment period.

SUMMARY: This notice extends the period for comments on the proposed rule, published March 29, 1979 (44 FR 18705), proposing amended regulations for the planning, acquisition, utilization, and management of Federal space facilities. Requests for additional commenting time were received. This notice extends the comment period to July 13, 1979.

DATE: Comments must be received on or before July 13, 1979.

ADDRESS: Comments should be addressed to the General Services Administration (PR), Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Joseph P. Yiakis, Acting Assistant Commissioner for Space Management (202-566-1025).

Dated: June 6, 1979.

BILLING CODE 6820-23-M

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1039]

[Ex Parte No. 364 [1]]

Railroad—Freight Forwarder Contract Rates; General Policy Statement; Proposed Change

AGENCY: Interstate Commerce Commission.

ACTION: Proposed Policy Statement; request for comments.

SUMMARY: The Commission proposes to issue a general policy statement permitting railroads to file in tariff form freight forwarder contract rates. Having concluded that there is nothing inherently unlawful in railroads and shippers voluntarily entering into long-term commitments for the transportation of a specified volume of freight at agreed rates, the Commission believes that similar arrangements between railroads and freight forwarders would also be within the permissible scope of the law. As the acceptance for filing of railroad tariffs containing freight forwarder contract rates represents a change in policy, interested parties will be permitted to file comments before a final policy statement is adopted. All interested parties are invited to comment.

DATE: Comments are due on or before July 12, 1979.

ADDRESS: Comments should be filed with the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Janice M. Rosenak or Harvey Gobetz (202-275-7693).

SUPPLEMENTARY INFORMATION: In Ex Parte No. 358, *Change of Policy Railroad Contract Rates*, 43 Fed. Reg. 58189 (December 13, 1978) the Commission announced a change in policy with respect to contract rates. Railroad contract rates with shippers, once "deemed unlawful *per se*," will, under the policy statement, be examined on an individual basis and, where lawful, be permitted to become effective. However, in the Ex Parte No. 358 policy statement, a decision on whether to permit railroads to publish contract rates for freight forwarders was deferred for the following reason:

It has been suggested that freight forwarders should be allowed to enter into contract rates with railroads. In the past the Commission has found that contract rates between railroads and freight forwarders are prohibited by the Interstate Commerce Act. We are not prepared to re-examine that holding in the context of this policy statement.

Upon further study, we believe it is appropriate to permit a railroad to file contract rates with respect to freight forwarder traffic.

As a consequence of our decision to defer action with respect to freight forwarders, the forwarding industry may have been placed at a competitive disadvantage vis-a-vis shippers' associations, the forwarders' principal competitors.[2] Such a result would be inconsistent with the Commission's finding in Ex Parte No. 266, "that the freight forwarding industry should be given every opportunity to prove its continued usefulness and to demonstrate that it still has a vital role to play on the national transportation scene." As we continue to subscribe to this belief, we believe that additional action is necessary in the area of railroad contract rates.

The correct nexus between the forwarding and railroad industry is crucial for the forwarders' continued survival as common carriers. We recognized in our freight forwarder investigation that the great bulk of freight forwarder shipments move by rail between concentration and break-bulk points and that the use of TOFC service by the forwarding industry was extensive and growing. Generally, we found that motor carrier service tends to be more expensive than rail per ton mile and that as a result most forwarder traffic handled by motor carrier moved under section 10706 contracts [3] in assembly and distribution service.[4] Whereas the motor carrier industry was found to be both competitor to and customer of the freight forwarder industry, the Western Railroads [5] regarded the forwarding industry as their most important ally and their means to retain a share of the small shipment and less-than-carload traffic.

The Commission has long recognized the dual nature of the forwarding industry. On the one hand, forwarders hold themselves out in their own name to provide the public with a transportation service. They publish their own tariffs, issue bills of lading, and assume primary responsibility for

[2] Ex Parte No. 266, *Investigation Into Status of Freight Forwarders* 309 I.C.C. 711 at 782 (1971).

[3] Formerly section 406(a) of the Interstate Commerce Commission Act.

[4] In contrast to collection and delivery service, assembly and distribution service requires movement outside the terminal area with the result that freight forwarders are required to purchase the underlying transportation from common carriers.

[5] 309 I.C.C. at 740 and 785.

the safe transportation of the freight. That they were to be considered common carriers in certain respects was made clear on December 20, 1950, when Congress revised part IV, section 402(a)(5) of the Interstate Commerce Act, 64 Stat. 1113, 1114.[6] The report accompanying the legislation noted that forwarders are clearly common carriers in their relations to the public.[7] On the other hand the Commission and those carriers who perform the actual movement of goods have traditionally looked upon freight forwarders as shippers with regard to their reliance on others for the underlying line-haul and assembly and distribution service. Indeed, in Ex Parte No. 266, shipper associations opposed extending any form of volume rate relief to forwarders. Their principal contention was that if volume economies are to be made available, they should be open to everyone including those shippers capable of tendering consolidated traffic to the railroads under similar transportation conditions. Now that the benefit of contract rates has been extended to shippers, we propose to broaden the extension to freight forwarders as well.

Although there has never been an explicit statutory prohibition against freight forwarders entering into contracts with railroads, the Commission has nevertheless construed its jurisdiction under the Interstate Commerce Act as permitting freight forwarders to enter into only those agreements explicitly authorized by statute.[8] The presumption was that in authorizing some agreements between freight forwarders and other common carriers, Congress meant to prohibit the entry into all other types of arrangements. In turn, this presumption was predicated upon the view that freight forwarders are shippers vis-a-vis the underlying carriage. To permit them to negotiate rates would amount to affording them an illegal favoritism over other shippers utilizing the same carrier facilities.

Recent developments in the law have given us cause to reconsider the scope of our jurisdiction with respect to railroad-freight forwarder contract rates. In *Commonwealth of Pennsylvania* v. *Interstate Commerce Commission*, 561 F.2d 278 (D.C. Cir. 1978),[9] the court affirmed a change in Commission policy established in 1908. The policy change resulted in our prescription of rules requiring the filing of international joint rates and through routes participated in by rail, motor, and water carriers regulated by the ICC and ocean carriers regulated by the Federal Maritime Commission. The prescribed rules required that divisions be broken out, and we limited our substantive regulation to the domestic portion of the rate.

However, prior to the court decision, the Commission in Ex Parte No. 261 (Sub-No. 1), *Joint Rates Through Routes Frt. Forwarders & NVO*, 355 I.C.C. 913 (1977), concluded that it lacked statutory authority to permit freight forwarders to establish and participate in international joint rates and through routes. The forwarders appealed the decision in a proceeding entitled *New York Foreign Freight Forwarders & Brokers Ass'n* v. *Interstate Commerce Commission*, Nos. 75–1867 and 77–1353 (U.S.C.A., D.C. Cir). Their challenge relied upon the portion of the decision in the *Commonwealth of Pennsylvania* case where the petitioners had challenged the Commission's decision to permit domestic water carriers to enter into international joint rates and through routes notwithstanding the lack of explicit statutory authority of the sort provided for rail and motor carriers. The Court of Appeals disagreed with the petitioners stating,

> We find nothing in Part III purporting to prohibit filing voluntarily adopted joint rates in foreign commerce between FMC and ICC-regulated water carriers.
>
> The question is whether Congress, without explicitly stating that domestic and foreign water carriers can voluntarily enter into and file joint rates, intended, *sub silentio*, to preclude the ICC from issuing rules permitting domestic water carriers voluntarily to do so just as their competitors, the rail and motor carriers, do.
>
> We do not think that Part III can be read so narrowly or that Congress' silence on this point can be elevated into such significance as to put Part III carriers in a different posture than their motor and rail carrier competitors. (561 F.2d at 290).

The freight forwarders argued that their position was no different than that of the domestic water carriers, concerning the absence of specific statutory authority with respect to joint rates and through routes.

The Court of Appeals, on review in the *NYFFF&BA* case, disagreed with the freight forwarders' analogy to domestic water carriers. After reviewing the history of the Commission [10] and court interpretations of the status of freight forwarders and the legislative history of the 1950 amendment to the definition of a freight forwarder, as contained in former section 402(a)(5), the court concluded: [11]

> The overall emanation from the 1950 amendment is that while Congress made no immediate change in the law as to joint rates it did not necessarily intend to freeze the development of the law of freight forwarders. The underlying law that was left unchanged was one that recognized a discretionary role for the ICC in adjusting the "common law" of the Interstate Commerce Act to changes in economic realities. The rules that had evolved to prevent overreaching by the freight forwarders, viewed as shippers, were subject to reconsideration if this danger receded and the carrier quality of forwarders advanced. (Slip op. 18–19)

Pointedly the Court of Appeals affirmed our decision in *NYFFF&BA* on a policy basis while disagreeing with our conclusion as to statutory authority. In fact, the Court's opinion "emphasize[d] * * * that the Commission retains flexibility to reconsider its conclusions in the light of future developments."

Although *NYFFF&BA* is concerned with international joint rates and through routes, the Court's interpretation of the effect of the 1950 amendment upon the status of freight forwarders is clearly not so limited. Also noteworthy for its broad application is the court's acceptance of the long-term recognition of the dual qualities of freight forwarders as both shippers and carriers and its conclusion that the legislative history of the 1950 amendment "reflects a continuing recognition of the quality of freight forwarders as shippers."

In view of the court decisions in *Commonwealth of Pennsylvania* and *NYFFF&BA*, and the 1950 amendment, we no longer believe that the absence of express statutory authority is determinative of our jurisdiction with regard to whether we may permit the establishment of railroad-freight forwarder contract rates. In recognition of those qualities freight forwarders share with shippers and the extension of contract rates to shippers in general, we propose to modify the statement of policy appearing in part 1039 to subchapter A of chapter X of title 49 of

---

[6] Recodified at 49 U.S.C. 10102(1) and (6).

[7] H. Rept. 2489 to H.R. 9007, 81st Cong. 2d Sess.

[8] 49 U.S.C. 10725 (formerly sections 407 and 408) authorizes (1) subchapter I, II, and III carriers to establish forwarder assembly and distribution rates lower than those charged shippers who were not similarly situated, and (2) motor carriers to establish reduced forwarder rates for small parcel traffic.

49 U.S.C. 10709(b) authorizes freight forwarders to enter into agreements with motor carriers for transportation at a distance of 450 highway miles or less at rates less than those established in the motor carriers' regular tariffs.

[9] Ex Parte No. 261, *International Joint Rates and Through Routes*, fifth and final decision at 361 I.C.C. 490 (1978).

[10] This included our disclaimers of jurisdiction in both Ex Parte Nos. 266 and 261(1) as to freight forwarder contract rates and joint rates and through routes.

[11] NYFFF&BA, (Slip op. 18).

the Code of Federal Regulations. The following additional sentence will be added after the last sentence to 49 CFR 1039.1, the definitional section:

§ 1039. Definition.

* * * For the purposes of this policy statement the term "shipper" shall also refer to freight forwarders.

As in the case of our general policy statement in railroad contract rates, we do not perceive the need for specific rules at this time. Each individual railroad-freight forwarder contract rate proposal will be evaluated on its own merits. In this evaluation process we propose to consider the same six factors listed in our earlier general policy statement.

Comments by any interested party concerning any matter discussed in this policy statement or relevant thereto are requested.

Dated: May 31, 1979.

By the Commission. Chairman O'Neal, Vice Chairman Brown, Commissioners Stafford, Gresham, Clapp and Christian. Commissioner Christian absent and not participating.

H. G. Homme, Jr.,

Secretary.

BILLING CODE 7035-01-M

[49 CFR Part 1252]

[No. 34364 (Sub-No. 4)]

Public Inspection of Piggyback Traffic Statistics Reports

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proposed rulemaking.

SUMMARY: This Notice proposes to make piggyback traffic statistics reports open to public inspection and to incorporate the reports as part of the carriers' annual report.

DATES: Comments should be filed on or before: June 30, 1979.

ADDRESSES: Send comments with 10 copies, if possible, to: Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Bryan Brown, Jr. (202) 275-7448.

SUPPLEMENTARY INFORMATION: Beginning with the first quarter of 1964, class I railroads, class I intercity motor carriers of property, class A water carriers and class A freight forwarders were required to file quarterly reports of piggyback traffic statistics on forms PTR-R, PTR-M, PTR-W, and PTR-FF, respectively. Effective January 1, 1978, the filing frequency of piggyback data was changed from a quarterly to a semiannual basis (order No. 34364 (Sub-No. 2), served October 21, 1977). Effective January 1, 1979, the filing frequency of piggyback data was changed from a semiannual to an annual basis and filing was extended to class II rail carriers and to class II intercity motor carriers (Order No. 34364 (Sub-No. 3), served October 6, 1978).

In Order No. 34364 (Sub-No. 3), the Commission requested comments from the public concerning the need to continue to keep the piggyback statistical reports confidential. No comments were received on this issue. Now, we propose to open these reports to public inspection and to incorporate these reports with the carriers' annual report forms submitted to the Commission. Data on form PTR-R for class I railroads would be included as a separate schedule in annual report R-1; data on form PTR-R for class II railroads would be included as a separate schedule in annual report R-2; data on form PTR-M for class I and class II intercity motor carriers would be included as a separate schedule in annual report form M; data on form PTR-FF for class A freight forwarders would be included as a separate schedule in annual report form F-1; data on form PTR-W for class A water carriers would be included as a separate schedule in annual report form W-1; and data on form PTR-W for all maritime carriers would be included as a separate schedule in annual report form W-4.

Accordingly, we propose to eliminate Part 1252, sections 1252.1 through 1252.4, of Title 49 of the Code of Federal Regulations and to amend carriers' annual report forms to include piggyback traffic statistics.

This proposed rule does not significantly affect the quality of the human environment.

These rules are proposed under the authority of 49 U.S.C. §§ 10911, 11145, 11142, and 10321.

Decided: May 23, 1979.

By the Commission.

H. G. Homme, Jr.,

Secretary.

Federal Register
Vol. 44, No. 114
Tuesday, June 12, 1979

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Forest Land and Resource Management Plan; Wenatchee National Forest, Chelan, Douglas, Yakima, and Kittitas Counties, Wash.; Intent To Prepare an Environmental Impact Statement

Pursuant to the National Environmental Policy Act of 1969, and the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976, the Forest Service, Department of Agriculture, will prepare an Environmental Impact Statement for a Forest Land and Resource Management Plan for the Wenatchee National Forest.

The Forest Plan will be prepared according to regulations being promulgated by the Secretary of Agriculture. The regulations will implement Section 6 of the National Forest Management Act of 1976.

A Land Management Plan has been prepared and implemented on the Chelan Planning Unit. A Draft Environmental Statement on the Kittitas Land Management Plan was filed with the Environmental Protection Agency (EPA) on July 31, 1978. Public comment to the Kittitas Draft has been analyzed and incorporated into a Final Environmental Statement planned to be filed with the EPA in July 1979. A completed Land Use Plan for the Alpine Lakes Management Unit and subsequent legislation established the Alpine Lakes Wilderness and Intended Wilderness in July 1976. A planning team is now in the process of developing a Wilderness Management Plan for the Alpine Lakes Wilderness and Intended Wilderness and specific management direction for the nonwilderness lands. A Final Environmental Statement is planned to be filed with the EPA in June 1980, with implementation by September 1980. Draft Environmental Statements on the Cougar Lakes Wilderness Study and the Naches-Tieton-White River Land Management Plan were filed with the EPA in August 1977. These Plans will be carried through to completion as part of the Forest Plan.

The Forest Plan will replace all previous Plans and provide direction for all lands on the Wenatchee National Forest plus the Naches and Tieton Ranger Districts of the Mt. Baker-Snoqualmie National Forest which are administered by the Wenatchee National Forest.

The Forest Plan will be coordinated with local, county, State and other Federal agencies. Public involvement will be encouraged and sought throughout the planning process. The following public workshops are scheduled to help the Forest identify issues, opportunities, and concerns:

7 p.m., June 18, Thunderbird Motel Inn, Wenatchee, WA.;
7 p.m., June 19, Davis High School, Yakima, WA.;
7 p.m., June 20, Sherwood Inn, Seattle, WA.;
7 p.m., June 28, Holiday Inn, 3518 Pacific Highway East, Tacoma, WA.

Alternatives will be displayed in an Environmental Impact Statement and will include as a minimum (1) a no-action alternative, (2) one or more alternatives which will result in eliminating all backlogs of needed treatment for the restoration of renewable resources, (3) an alternative which approximates the levels of goods and services assigned by the Regional Plan, and (4) one or more alternatives formulated to resolve the major public issues or concerns.

R. E. Worthington, Regional Forester, Pacific Northwest Region is the responsible official. Robert C. Benson, Wenatchee National Forest will be the Team Leader for the Environmental analysis and Impact Statement.

A Draft Environmental Impact Statement on the Forest Plan is scheduled to be filed by December 1981. The Final Environmental Impact Statement will be filed December 1982.

Comments on this Notice of Intent for the Forest Plan should be sent to John L. Rogers, Forest Supervisor, Wenatchee National Forest, P.O. Box 811, Wenatchee, Washington 98801.

June 1, 1979.

Frank J. Kopecky,
Acting Regional Forester.

CIVIL AERONAUTICS BOARD

[Order 79–6–20; Docket 35745]

Additional Great Lakes—Florida Service Show-Cause Proceeding

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order to Show Cause (79–6–20), *Additional Great Lakes—Florida Service Show-Cause Proceeding, Docket 35745.*

SUMMARY: The Board is proposing to grant nonstop authority in the following markets: Buffalo/Cleveland/Rochester-Ft. Lauderdale/Miami/Tampa; Pittsburgh-Daytona Beach/Orlando/Ft. Lauderdale/Miami/Tampa; and Albany/Detroit/Syracuse-Daytona Beach/Ft. Lauderdale/Miami/Orlando/Ft. Myers/Sarasota/Tampa to American Airlines and any other fit, willing and able applicants whose fitness can be established by officially noticeable data. The complete text of this order is available as noted below.

DATES: Objections: All interested persons having objections to the Board issuing the proposed authority shall file, and serve upon all persons listed below, no later than July 12, 1979, a statement of objections together with a summary of the testimony, statistical data, and other material expected to be relied upon to support the stated objections.

Additional Data: All existing and would-be applicants who have not filed (a) illustrative service proposals, (b) environmental evaluations, and (c) an estimate of fuel to be consumed in the first year are directed to do so no later than June 27, 1979.

ADDRESSES: Objections or Additional Data should be filed in Docket 35745, Docket Section, Civil Aeronautics Board, Washington D.C., 20428.

FOR FURTHER INFORMATION CONTACT: M. Mikolajczyk, Bureau of Domestic Aviation, Civil Aeronautics, Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, (202) 673–5918.

SUPPLEMENTARY INFORMATION: Objections would be served upon the following persons: American Airlines and Eastern Air Lines.

The complete text of Order 79–6–20 is available from our Distribution Section, Room 516, 1825 Connecticut Avenue, N.W., Washington, D.C. Persons outside the metropolitan area may send a postcard request for Order 79–6–20 to the Distribution Section, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: June 5, 1979.

[Order 79–6–34; Docket 34758]

Aerolineas Territoriales de Colombia Ltda.; Foreign Air Carrier Permit

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order to Show Cause: Order 79–6–34.

SUMMARY: The Board proposes to approve the following application: Applicant: AEROLINEAS TERROTORIALES DE COLOMBIA LTDA. "AEROTAL". Application Date: February 14, 1979. Docket 34758. Authority Sought: Foreign air carrier permit to engage in scheduled cargo service between Cali, Colombia and Miami, Florida.

OBJECTIONS: All interested persons having objections to the Board's tentative findings and conclusions that this authority should be granted, as described in the order cited above, shall file a statement of such objections NO LATER THAN July 2, 1979, with the Civil Aeronautics Board (20 copies) and mail copies to the applicant, the Department of Transportation, the

Department of State, and the Ambassador of Colombia in Washington, D.C. A statement of objections must cite the docket number and must include a summary of testimony, statistical data, or other such supporting evidence.

If no objections are filed, the Secretary of the Board will enter an order which will, subject to the disapproval by the President, make final the Board's tentative findings and conclusions and issue the proposed permit or certificate.

ADDRESSES FOR OBJECTIONS:

Docket *34758*, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

Aerolineas Territoriales de Colombia Ltda. "AEROTAL" c/o Arent, Fox, Kintner, Plotkin and Kah, Attn: Robert H. Huey, 1815 "H" Street NW., Washington, D.C. 20006.

To get a copy of the complete order, request it from the C.A.B. Distribution Section, Room 516, 1825 Connecticut Avenue NW., Washington, D.C. 20428. Persons outside the Washington metropolitan area may send a postcard request.

BILLING CODE 6320-01-M

[Order 79-6-47; Agreement CAB 2696, R-41, et al.]

Conditions of Carriage—Cargo; Order Granting Stay

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 5th day of June, 1979.

In the matter of Agreements adopted by the International Air Transport Association regarding Agreement CAB 2696, R-41; Agreement CAB 2699, R-42; Agreement CAB 2700, R-43; Agreement CAB 3119; Agreement CAB 7648, R-107; Agreement CAB 24475, R-4 and R-5, Docket 25280; Agreement CAB 25186, R-12, Docket 27573; Agreement CAB 25954, R-1, R-2 and R-3, Docket 27573; and Agreement CAB 26701, R-9.

On May 15, 1979, The Flying Tiger Line Inc. filed a motion to stay the effectiveness of ordering paragraphs (1) and (6) of Order 78-6-10, August 3, 1978, for a period of six months from date of final Board approval of newly amended conditions of carriage submitted by the International Air Transport Association (IATA) on May 15, 1979. Order 78-6-10 approved (some conditionally) and disapproved provisions in two IATA resolutions (Resolutions 600b and 600j) restating the condition of carriage of cargo to appear on the back and face of cargo air waybills. By Order 78-11-146, November 30, 1978, on motion of IATA, we stayed the effectiveness of paragraphs (1) and (6) of Order 78-6-10 until June 5, 1979,[1] in order to give the carriers lead time to use up their existing stock of air waybills and to print and distribute new air waybills.

In support of its motion, Flying Tiger states that the newly amended conditions of carriage deal with those provisions of the IATA Resolution 600b which were either disapproved or approved conditionally. In order to accomplish this, it was necessary to use the IATA machinery, which involved a Cargo Traffic Procedures Committee meeting recommending the proposed amendments, and then circulation for approval by all IATA member carriers. As a result, the newly amended conditions were filed with the Board on May 15, 1979.

Answers in support of Flying Tiger's motion have been filed by TWA, Pakistan International and CPAir, El Al, LAN, SAS and Varig (jointly). No objections to the motion have been received.

Based on the foregoing, we have decided to grant a stay. No useful purpose would be served in now requiring the carriers to print and distribute new air waybills, and then repeat the process very shortly following our action on the newly amended provisions.[2] We anticipate that no further amendments are presently contemplated. In these circumstances, we shall grant the stay *pendente lite* until we have had an opportunity to act on the new amendments.

Accordingly, we grant a stay of ordering paragraphs (1) and (6) of Order 78-6-10 until further order of the Board.

We will publish this order in the Federal Register.

[1] Paragraphs (1) and (6) of Order 78-6-10 withdrew the approval granted in 1949 of the conditions of carriage now appearing on air waybills.

[2] It is understood that we are not passing on the merits of the newly amended conditions of carriage, a matter with which we expect to deal shortly.

By the Civil Aeronautics Board:[3]

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

[79-6-23; Docket 35746]

Corpus Christi-Houston/San Antonio Show Cause Proceeding; Proposed Grant of Authority to Continental Air Lines

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order to Show Cause (79-6-23), *Corpus Christi-Houston/San Antonio Show Cause Proceeding*, Docket 35746.

SUMMARY: The board is proposing to grant Corpus Christi-Houston/San Antonio authority to Continental Air Lines (Docket 35339) and any other fit, willing and able applicant the fitness of which can be established by officially noticeable material. The complete text of this order is available as noted below.

DATES: All interested persons having objections to the Board issuing an order making final the tentative findings and conclusions shall file, by July 11, 1979, a statement of objections, together with a summary of testimony, statistical data, and other material expected to be relied upon to support the stated objections. Such filings shall be served upon all parties listed below.

ADDRESSES: Objections to the issuance of a final order should be filed in the Dockets Section, Civil Aeronautics Board, Washington, D.C., 20428, in Docket 35746, which we have entitled the *Corpus Christi-Houston/San Antonio Show Cause Proceeding.*

In addition, copies of such filings should be served on Continental Air Lines.

FOR FURTHER INFORMATION CONTACT: Charles Stohr, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C., 20428, (202) 673-5348.

SUPPLEMENTARY INFORMATION: The complete text of Order 79-6-23 is available from the Distribution Section, Room 516, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 79-6-23 to that address.

[3] All Members concurred.

Federal Express Corp.; Application for Pick-up and Delivery Service

June 6, 1979.

In accordance with Part 222 (14 CFR Part 222) of the Board's Economic Regulations (effective June 12, 1964), notice is hereby given that the Civil Aeronautics Board has received an application, Docket 35758, from Federal Express Corporation, Memphis International Airport, AMF Box 30167, Memphis, Tennessee 38130, for authority to provide pick-up and delivery service between sixteen of the airports served by Federal Express to points located from thirty to sixty-eight miles from such airports.

Under the provisions of section 222.3(c) of Part 222, interested persons may file an answer in opposition to or in support of this application on or before June 27, 1979. An executed original and nineteen copies of such answer shall be addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. It shall set forth in detail the reasons for the position taken and include such economic data and facts as are relied upon, and shall be served upon the applicant and state the date of such service.

Supplement to Final Environmental Impact Statement for Energy Expo '82

Notice is hereby given that a Supplement to the Final Environmental Impact Statement (FEIS) on the proposed International Energy Exposition (Energy Expo '82) to be held in Knoxville, Tennessee, in 1982 is now available for public review and comment. This document was prepared pursuant to Section 102(2)(C) of the National Environment Policy Act. The Supplement contains the results and conclusions of the Department of Commerce's analysis of the proposed U.S. Pavilion and the results of its on-going environmental monitoring and research concerning the overall exposition program.

Copies of the Supplement and FEIS can be obtained by submitting a written request for either or both documents to the address set forth below. To be considered, written comments on the Supplement must be received at the same address by July 12, 1979.

Mr. C. C. Pusey, United States Travel Service, Room 1856, U.S. Department of Commerce, Washington, D.C. 20230.

Questions or requests for further information should be directed to Mr. C. C. Pusey at the above address or by calling telephone 202/377-5211.

Lee Wells,

Acting Assistant Secretary for Tourism.

DEPARTMENT OF DEFENSE

Department of the Army

Intent to Prepare a Draft Environmental Impact Statement (DEIS) for the Savannah River Basin Study (Oates Creek Flood Control Study)

June 4, 1979.

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of Intent to prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: 1. Proposed Action: The purpose of the Savannah River Basin Study is to investigate the nature and scope of water resources problems and needs in the Savannah River Basin. The problems and needs addressed by the study include flood control, water supply, navigation, hydropower, and recreation. Seven projects in the watershed were analyzed, and the Oates Creek Flood Control Project was the only project determined to be economically feasible and environmentally sound. The Oates Creek watershed is contained completely within Richmond County, Georgia. Urban development in the Oates Creek watershed has resulted in 283 buildings being located in the 100-year flood plain. Average annual damages resulting from flooding are estimated at $1.6 million. Nine alternatives were evaluated, and the selected plan involves channel modification along Oates Creek from Gordon Highway (U.S. Highway 78) to Olive Road. Sixteen bridges and culverts will also be replaced. Of the 2.33 mile reach to be channelized, about 5,800 feet would be lined with concrete and have vertical sides. The remaining

6,500 feet would be grass-lined with sloping sides.

2. Alternatives: In developing the selected plan, the alternatives of no action, flood warning, floodproofing and evacuation, evacuation only, clearing and snagging, enlargement of bridge and culvert openings, levees, and upstream dam and channel modification were investigated.

3. Scoping Process: Public involvement to date includes a public meeting held on 6 June 1978 and a workshop held on 8 November 1978. Although no formal scoping meeting is planned, the public and concerned government agencies will be able to express their views at a public meeting and workshop scheduled for July, 1979. The main environmental impacts resulting from the channel modification would be associated with the construction work and the altering of the existing channel. Since the area is already heavily developed and the stream suffers from urban pollution, the overall impacts on the environment would be minor. Social impacts would be mainly beneficial resulting from the reduced flooding. Much of the Oates Creek study area is located in an economically depressed part of Augusta, Georgia. Many of the residents affected by flooding suffer financial and personal hardship when flooding occurs. Because of the unique characteristics of the area and social climate, primary consideration was given to relocating as few people as possible. Other significant issues may be identified at the public meeting and workshop.

4. DEIS Preparation: The DEIS should be available to the public in June, 1979.

ADDRESS: Questions about the proposed action and DEIS can be answered by: David Coleman, U.S. Army Engineer District, Savannah, P.O. Box 889, Savannah, GA 31402, Telephone (912) 233-6822, Ext. 371.

Tilford C. Creel,

Colonel, Corps of Engineers, District Engineer.

ENDANGERED SPECIES COMMITTEE

Review Board Consideration of Pittston Company Exemption Applications

AGENCY: Endangered Species Committee; Endangered Species Review Board.

ACTION: Notice.

SUMMARY: Notice is hereby given that endangered species review boards have commenced considering two applications filed by the Pittston Company, to exempt its proposed oil refinery and marine terminal in Eastport, Maine from requirements of section 7(a) of the Endangered Species Act. The review boards must decide by August 3, 1979, whether Pittston's exemption applications met certain threshold requirements before the application qualifies for further consideration by the Endangered Species Committee. This notice announces that the review boards will hold a prehearing conference on June 27, 1979, and may, depending on the outcome of that conference, proceed to hold an oral hearing and decision meeting on threshold determinations concerning Pittston's application.

DATES:

June 18—Deadline for filing a motion to intervene and suggestions for issues to be discussed at prehearing conference.

June 25—Deadline for filing written comments on prehearing issues.

June 27—Prehearing conference.

TENTATIVE DATES:

July 9—Deadline for filing written submissions for the oral hearing by parties and intervenors.

July 16—Oral hearing.

July 24—Deadline for filing briefs by parties and intervenors.

July 30—Review board decision meeting.

ADDRESSES: Please send all written submissions to the Endangered Species Review Board, c/o Office of Policy Analysis, Department of the Interior, 18th & C Streets, N.W., Washington, D.C. 20240.

The prehearing conference will be held at the Federal Communications Commission, Room 252, 1919 M Street, N.W., Washington, D.C. 20554, at 9:00 a.m. on June 27, 1979.

FOR FURTHER INFORMATION CONTACT: Raphaelle Semmes, Office of Policy Analysis, Department of the Interior, 18th & C Streets, N.W., Washington, D.C. 20240. (202) 343-6578.

SUPPLEMENTARY INFORMATION:

The Exemption Process

The Endangered Species Act Amendments of 1978 establish a procedure for obtaining exemptions from section 7(a) of the Endangered Species Act, 16 U.S.C. 1536(a). Section 7(a) requires Federal agencies to insure, in consultation with the Secretary of the Interior or Commerce, that their actions do not jeopardize the continued existence of endangered or threatened species or destroy or adversely modify critical habitats. Applications for exemption from this requirement may be made by a Federal agency, by the Governor of a State in which an agency action would occur, or by a person whose permit or license application has been denied primarily because of section 7(a) considerations. An application is to be directed to the appropriate Secretary, who may, at his discretion, determine if it is timely and otherwise adequate. It is then evaluated by a review board and, if certain criteria are met, decided upon by the Endangered Species Committee.

Background of Pittston's Exemption Application

Pittston's exemption applications concern the Environmental Protection Agency (EPA)'s denial of a National Pollutant Discharge Elimination System (NPDES) permit pursuant to section 402 of the Clean Water Act of 1972. Pittston applied to EPA on September 26, 1975 for this permit for a proposed 250,000 barrel/day oil refinery and marine terminal in the City of Eastport, Maine. EPA published a final environmental impact statement on Pittston's proposed refinery on June 19, 1978, along with its tentative decision to grant Pittston the NPDES permit.

The Fish & Wildlife Service requested EPA on September 1, 1978 to initiate consultation under the Endangered Species Act on the northern bald eagle, a species designated as endangered on February 14, 1978. Following consultation, FWS issued a biological opinion on December 21, 1978 that the refinery is likely to jeopardize the continued existence of the bald eagle.

Renewed consultation between EPA and FWS, with Pittston's participation, terminated on June 4, 1979, and resulted in FWS re-affirming the conclusion of its earlier biological opinion.

NMFS requested EPA to initiate consultation on August 18, 1978 concerning the refinery's effects on endangered species of whales. Following consultation, NMFS concluded in statements of November 20, 1978 and March 8, 1979 that there was insufficient information to make a determination whether or not Pittston's refinery would jeopardize endangered whales, and that granting the permit may therefore violate section 7(a) of the Act.

EPA denied Pittston's application for an NPDES permit in a letter of January 15, 1979 on the basis of the Endangered Species Act and the National Environmental Policy Act; this denial was supplemented by a letter dated April 17, 1979. Pittston has appealed the denial and EPA will hold a formal adjudicatory hearing on the matter pursuant to 40 CFR 125.36. EPA has scheduled a prehearing conference on Pittston's appeal for June 28, 1978 at EPA's regional office in Boston, Mass.

Review Board Considerations and Procedures

Exemption Applications

Pittston has filed exemption applications with both the Secretary of the Interior and the Secretary of Commerce. The application to the Secretary of the Interior was filed on January 26, 1979, but processing of the application was deferred until June 4, 1979 because of the renewed consultation between FWS and EPA on the bald eagle. The application to the Secretary of Commerce was filed on May 4, 1979.

Two review boards have been assembled to consider the applications. The same members have been appointed to each board, however, and it is anticipated that consolidated proceedings on the two applications will be held.

Members

The review board for the Pittston applications consists of Dr. Laurence E. Lynn, Professor of Public Policy, Harvard University; John E. Menario, President of the Greater Portland Chamber of Commerce, Portland, Maine; and Administrative Law Judge Francis L. Young.

Parties

The parties before the review boards are the applicant, the Pittson Company, and the Federal agencies involved in the endangered species consultations: EPA and FWS, consulting agency for the bald eagle, and NMFS, consulting agency for the endangered whales.

Prehearing Conference

The Review Board will hold a prehearing conference in Washington, D.C. on June 27, 1979.

The primary issue to be considered at the prehearing conference will be whether Pittston's exemption application is ripe for adjudication. the Endangered Species Act is ambiguous as to whether a permit applicant such as Pittston must first complete any administrative appeals of its permit denial within the permitting agency, in this case EPA, or whether it may apply for an exemption following the initial denial of its permit. Letters are on file from the Environmental Defense Fund and the National Wildlife Federation, and from the Pittston Company, which address this question. Oral argument will be heard on this issue.

The Review Board will also consider at its prehearing conference what issues should be addressed at its oral hearing in July.

If a party or intervenor applicant feels any other matter should be considered by the review board at the prehearing conference, it should submit a written request to the review board stating the topic and the reasons for its consideration, by June 18, 1979.

In order to participate in the review board proceedings, a person must file a motion to intervene by June 18, 1979. The motion must set forth the petitioner's name and address, the name of any representative, the petitioner's interest in the proceeding, and must show that the petitioner's participation will assist in resolving the issue in question. The review board will act on the motions to intervene at or before the start of the prehearing conference.

The review board must receive all briefs and written submissions of the parties and intervenors by June 25, 1979. Because there are only seven days between when an intervenor must file a motion to intervene and when written submissions are due, all parties and intervenors will receive actual notice around June 18, 1979 of what has been filed and of any additional issues the review board will consider at the June 27 prehearing conference. In addition, all material filed concerning Pittson's exemption application will be available for public inspection at Room 4160, Interior Building, 18th & C Streets, N.W., Washington, D.C.

Oral Hearing And Decision Meeting Tentatively Scheduled

The oral hearing is tentatively scheduled to be in Washington, D.C. on July 16, 1979, and the decision meeting is tentatively scheduled to be in Washington, D.C. on July 30, 1979. These dates and places may change if the prehearing conference demonstrates a new schedule is called for, or if Pittston's application is determined not ripe.

The issues to be addressed at the oral hearing and decision meeting will involve the threshold determinations to be made by the review board:

(1) Whether the Federal agency and permit or license applicant have refrained from making any irreversible or irretrievable commitment of resources which has the effect of foreclosing the formulation or implementation of any reasonable and prudent alternative which would avoid jeopardy to the species or critical habitat;

(2) Whether the Federal Agency and permit or license applicant have carried out consultation responsibilities in good faith and have made a reasonable and responsible effort to develop and fairly consider modifications or reasonable and prudent alternatives to the proposed action which would avoid jeodardy to the species or critical habitat;

(3) Whether there is an irresolvable conflict; and

(4) Whether any required biological assessment was conducted.

Regulations Available

Proposed regulations governing the content of exemption applications are found at 44 Fed. Reg. 7777 (Feb. 1979). Interim final regulations governing the review board and Endangered Species Committee procedures, which shall be in effect for 240 days, are found at 44 Fed. Reg. 33127 (June 8, 1979).

Dated: June 7, 1979.

Francis L. Young,

Administrative Law Judge for the Review Board.

BILLING CODE 4310-10-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Claiborne Gasoline Co.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of action taken and opportunity for comment on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces action taken to execute a Consent Order and provides an opportunity for public comment on the Consent Order and on potential claims against potential refunds that may be deposited in an escrow account established pursuant to the Consent Order.

DATES: Effective date: May 25, 1979. Comments by July 12, 1979.

ADDRESS: Send comments to: Wayne I. Tucker, District Manger of Enforcement, Southwest District Office, P.O. Box 35228, Dallas, Texas 75235.

FOR FURTHER INFORMATION CONTACT: Wayne I. Tucker, District Manager of Enforcement, Southwest District Office, P.O. Box 35228, Dallas, Texas 75235. [phone] 214/749–7626.

SUPPLEMENTARY INFORMATION: On May 25, 1979, the Office of Enforcement of the ERA executed a Consent Order with Claiborne Gasoline Company of Dallas, Texas. Under 10 CFR 205.199J(b), a Consent Order which involves a sum of $500,000 or more in the aggregate, excluding penalties and interest, becomes effective upon its execution only if the DOE expressly finds it to be in the public interest to do so.

Because of the complexity and the quantity of recomputations necessitated by this settlement, as well as the likelihood of only minor refund obligations as a result of the recalculations, the DOE has determined that it is in the public interest to make the Consent Order with the Claiborne Gasoline Company effective as of the date of its execution by the DOE and Claiborne Gasoline Company.

I. The Consent Order

Claiborne Gasoline Company, with its home office located in Dallas, Texas, is a firm engaged in the refining of crude oil and natural gas liquids, and is subject to the Mandatory Petroleum Price and Allocation regulations at 10 CFR, Parts 210, 211, 212. To resolve certain civil actions which could be brought by the Office of Enforcement of the Economic Regulatory Administration as a result of its audit of Claiborne Gasoline Company, the Office of Enforcement, ERA, and Claiborne Gasoline Company entered into a Consent Order, the significant terms of which are as follows:

1. Claiborne Gasoline Company has agreed to recompute its increased cost of crude oil in each month of measurement, for the period of August 1973 through December 1978, to reflect an upward adjustment to its May 1973 crude cost referred to in I. 2 below. Claiborne Gasoline Company's increased crude cost will be reduced by $1,815,506.59 during the aforementioned period.

2. Claiborne Gasoline Company failed to include a $.25 per barrel retroactive price increase for certain crude oil purchases in its computation of May 1973 crude cost.

3. By entering into this Consent Order, Claiborne Gasoline Company is not admitting that it has violated any regulation or overcharged any of its customers.

4. The provisions of 10 CFR 205.199J, including the publication of this notice, are applicable to the Consent Order.

II. Disposition of Potential Overcharges

In this Consent Order, Claiborne Gasoline Company agrees to refund any potential overcharges, in full settlement of any civil liability with respect to actions which might be brought by the Office of Enforcement, ERA, arising out of the recomputations specified in I. 1 above. Any refund obligations arising out of the use of the revised increased crude cost computations will be implemented pursuant to the procedures set forth in 10 CFR Part 205, Subpart V.

The DOE intends to distribute the refund amounts in a just and equitable manner in accordance with applicable laws and regulations. Accordingly, distribution of such refunded overcharges requires that only those "persons" (as defined at 10 CFR 205.2) who actually suffered a loss as a result of the transactions described in the Consent Order receive appropriate refunds. Because of the petroleum industry's complex marketing system, it is likely that overcharges have either been passed through as higher prices to subsequent purchasers or offset through devices such as the Old Oil Allocation (Entitlements) Program, 10 CFR 211.67. In fact, the adverse effects of the overcharges may have become so diffused that it is a practical impossibility to identify specific, adversely affected persons, in which case disposition of the refunds will be made in the general public interest by an appropriate means such as payment to the Treasury of the United States pursuant to 10 CFR 205.199I(a).

III. Submission of Written Comments

A. *Potential Claimants:* Interested persons who believe that they have a claim to all or a portion of the potential refund amount should provide written notification of the claim to the ERA at this time. Proof of claims is not now being required. Written notification to the ERA at this time is requested primarily for the purpose of identifying valid potential claims to the potential refund amount. After potential claims are identified, procedures for the making of proof of claims may be established. Failure by a person to provide written notification of a potential claim within the comment period for this Notice may result in the DOE irrevocably disbursing the funds to other claimants or to the general public interest.

B. *Other Comments:* The ERA invites interested persons to comment on the terms, conditions, or procedural aspects of this Consent Order.

You should send your comments or written notification of a claim to Wayne I. Tucker, District Manager of Enforcement, Southwest District Office, P.O. Box 35228, Dallas, Texas 75235. You may obtain a free copy of this Consent Order by writing to the same address or by calling 214/749–7626.

You should identify your comments or written notification of a claim on the outside of your envelope and on the documents you submit with the designation, "Comments on Claiborne Gasoline Company Consent Order." We will consider all comments we receive by 4:30 pm, local time, on July 12, 1979. You should identify any information or data which, in your opinion, is confidential and submit it in accordance with the procedures in 10 CFR 205.9(f).

Issued in Washington, DC on the 7th day of June, 1979.

Wayne I. Tucker,

District Manager of Enforcement, Southwest District Office, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Fuel Oil Marketing Advisory Committee; Change in Meeting Date and Place

This notice is given to advise of a change in date and place of the meeting of the Fuel Oil Marketing Advisory Committee. The Committee will meet Wednesday, July 18, 1979, from 1:00 p.m. to 6:00 p.m., and Thursday, July 19, 1979, from 8:00 a.m. to 4:00 p.m., in the Savoy Room, Holiday Inn Union Square, 480 Sutter Street, San Francisco, California, rather than Tuesday, June 19, 1979, and Wednesday, June 20, 1979, at the Radisson Hotel, 45 South Seventh Street, Minneapolis, Minnesota, as previously announced. A notice of meeting was

published in the issue of June 1, 1979 (44 FR 31701 and 31702).

Issued at Washington, D.C. on June 7, 1979.

Georgia Hildreth,

Director, Advisory Committee Management.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. RP73-77]

Alabama-Tennessee Natural Gas Co.; Proposed PGA Rate Adjustment

June 5, 1979.

Take notice that on June 1, 1979, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), P.O. Box 918, Florence, Alabama 35630, tendered for filing as part of its FPC Gas Tariff, Third Revised Volume No. 1, the following revised tariff sheet:

Thirtieth Revised Sheet No. 3–A Superseding.

Second Substitute Twenty-Ninth Revised Sheet No. 3–A.

This revised tariff sheet is proposed to become effective as of July 1, 1979.

Alabama-Tennessee states that the purpose of such revised tariff sheet is to reflect the effect of Tennessee Gas Pipeline Company's Twenty-Fifth Revised Sheet No. 12–A, of its FERC Gas Tariff Ninth Revised Volume No. 1, filed with the Commission on May 31, 1979 to be effective July 1, 1979.

The revised sheet to Alabama-Tennessee's tariff provides for the following rates:

Rate schedule		Thirtieth revised sheet No. 3–A
G-1:		
	Demand	$2.07
	Commodity	200.88¢
SG-1:		
	Commodity	216.00¢
I-1:		
	Commodity	207.89¢

Alabama-Tennessee states that the purpose of such revised tariff sheet is to reflect the rate increase of Tennessee Gas Pipeline Company issued May 31, 1979.

Alabama-Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected State regulatory Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 18, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. ER79-396]

Boston Edison Co.; Filing

June 4, 1979.

The filing Company submits the following:

Take notice that on May 29, 1979, Boston Edison Company ("Edison") tendered for filing as a rate schedule a letter agreement between itself and the New England Power Company ("NEP") of Westboro, Massachusetts for the support by NEP of a 115 KV transmission line.

The line, designated Line 201–502, is approximately 2 miles in length and is located in Medway, Massachusetts. The line is owned, operated and maintained by Edison and used exclusively by NEP.

Edison requests that the rate schedule be allowed to become effective on August 1, 1979. Edison has served copies of this filing on NEP and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol St., N.E., Washington, D.C. 20426, in accordance with paragraph 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 22, 1979. Protest will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this Application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. CP70-196 et. al.]

Distrigas Corp.; Further Extension of Time

June 1, 1979.

Docket Nos. CP70–196 and CP74–227, CP73–135 and CP74–137.

On April 11, 1979, Distrigas Corporation filed a motion for stay of Ordering Paragraph (E) of the Commission's order of January 2, 1979, pending judicial review. The motion also asked for an extension of time for compliance with that paragraph pending Commission action on the request for a stay. By order issued June 1, 1979, the Commission denied the motion for stay.

Notice is hereby given that Distrigas shall comply with the refund requirement of Ordering Paragraph (E) on or before June 22, 1979; the report of refunds and interest shall be filed on or before July 2, 1979.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. CP79-308]

Iowa-Illinois Gas and Electric Co.; Application

May 29, 1979.

Take notice that on May 15, 1979, Iowa-Illinois Gas and Electric Company (Applicant), 206 East Second Street, P.O. Box 4350, Davenport, Iowa 52808, filed in Docket No. CP79-308 an application pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to construct and operate approximately 0.17 mile of six-inch replacement pipeline within the City of Iowa City, Iowa and for permission and approval to abandon in place approximately 0.16 mile of four-inch pipeline, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to abandon in place approximately 0.16 mile of four-inch pipeline which is a portion of approximately 1.49 miles of predominantly four-inch pipeline heretofore certificated by the Commission in Docket No. G–308 and

constructed in 1933 to supply Applicant's Benton Street Station located within the boundaries of Iowa City, Iowa. It is stated that the facilities to be abandoned would be mechanically cut from the remaining facilities, purged and capped, meeting the requirements of the U.S. Department of Transportation, Office of Pipeline Safety.

It is indicated that Applicant also proposes to construct approximately 0.17 mile of six-inch replacement pipeline within Iowa City, Iowa. The replacement pipeline would be constructed within the same private and adjacent public street right-of-way as the facilities proposed to be physically abandoned, it is stated. Applicant states that after installation of the replacement pipeline, 15,120 Mcf per day of natural gas would be transported, an increase in capacity of 720 Mcf per day over the 14,400 Mcf per day capability of the existing pipeline. Applicant indicates that the proposal herein is necessitated by residential development along Benton Street which over time has so changed the grade that the facilities may be of a depth insufficient for prudent and reliable service. Increased flow capability and pressure level maintenance at this location would be required to meet future load and to provide adequate and reliable service in this section of Iowa City, it is asserted.

Applicant estimates that the cost of the proposed pipeline is $19,800 which would be financed from funds now on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 20, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

[FR Doc. 79-18161 Filed 6-11-79; 8:45 am]
BILLING CODE 6450-01-M

[Docket No. ER79-283]

The Kansas Power & Light Co.; Order Accepting for Filing and Suspending Proposed Increased Rates, Denying Motion To Reject, Denying Motions for Summary Judgment, Granting Interventions and Establishing Procedures

Issued May 29, 1979.

On March 30, 1979, the Kansas Power and Light Company (KPL) tendered for filing schedules containing proposed rates and charges for wholesale service to supersede those rate provisions of KPL's contracts with 17 wholesale cooperative customers and 41 wholesale municipal customers all located in the State of Kansas.[1] KPL states that the proposed rates would increase annual revenues to the company by $2,657,847 (9.49%), based on the twelve-month test period ending March 31, 1980. The changes in rates contemplate increased capacity charges for cooperative and municipal wholesale services.

KPL requests an effective date of June 1, 1979, for the proposed rates with the exception of four municipal customers whose contracts do not permit unilateral rate filings by KPL.[2] KPL requests that the proposed rates be permitted to become effective for each of the four customers from the date of a final order in this proceeding or upon the expiration, termination or renegotiation of their respective contracts, at which time KPL would file a superseding service agreement for each expired contract. If the proposed rates for all customers are not permitted to become effective without suspension and a hearing is ordered under Section 205, KPL further requests a simultaneous hearing under Section 206 in order to determine prospectively the just and reasonable rates for service to these four municipal customers and that such hearing be consolidated with the Section 205 proceedings.[3]

Public notice of the filing was issued on April 5, 1979. Protests and petitions to intervene were due on or before April 27, 1979.

On April 27, 1979, the cooperative customers (Cooperatives) filed a protest and petition to intervene in the proceeding, a motion to reject and alternatively, a motion for summary disposition, hearing and suspension. In support of their motion to reject KPL's filing, the Cooperatives characterize KPL's increased rates as grossly excessive. They state that KPL's letter of transmittal indicates aggregate rate increases of $2,657,847 to cooperative and municipal customers. However, that figure is based on the revenues that the proposed rates in this filing would produce compared to the rates in ongoing Docket No. ER78-1. A settlement agreement between KPL and the Cooperatives has been recently approved by the Commission in Docket No. ER78-1. Based on settlement rates, Cooperatives assert that the actual increase in this docket amounts to $3,127,959, or 15.8 percent. Cooperatives also move to reject the filing due to deficiencies in workpapers and supporting data. We conclude that this motion should be denied, because KPL's filing substantially complies with our filing regulations.[4] The issues of rate level and cost support should be addressed during the hearing which we shall order.

Cooperatives' reading of the workpapers accompanying KPL's rate filing lead them to conclude that KPL may have capitalized AFUDC on construction work in progress related to pollution control facilities included in rate base under Section 2.16 of our Regulations. If true, this would violate Section 2.16(c) of the Regulations, and

---

[1] See Appendix A for schedule designations of the 17 wholesale cooperative customers and 37 of the wholesale municipal customers.

[2] The four Kansas municipals and their contract expiration dates are: City of Merrill (July 1, 1980); City of Tonuto (April 9, 1980); City of Sussex (November 1, 1982); and City of Waterville (May 1, 1981).

[3] The Commission has previously established this procedure for changing the rates to these four municipal customers prior to termination of their respective contracts. See, Orders issued December 22, 1975 and February 18, 1976 in Docket No. ER76-30; and Order issued December 1, 1977 in Docket No. ER78-1.

[4] *City of Groton, et al. v. F.E.R.C.*, 591 F.2d 1097 (D.C. Cir. 1978); *Municipal Light Boards v. F.P.C.*, 450 F.2d 1341 (D.C. Cir. 1971), cert. den., 405 U.S. 920 (1972).

Cooperatives suggest that summary disposition may be appropriate. However, we cannot reach that conclusion peremptorily on the basis of the pleadings. Cooperatives also allege that KPL has failed to synchronize its interest expenses with debt costs, in that KPL has used an interest expense which is substantially different from the cost of long term debt shown in the capital structure to calculate its Federal income taxes. We conclude that the CWIP and the interest synchronization issues are not ripe for summary disposition and can only be resolved through the hearing process.

Finally, Cooperatives state that a comparison of several KPL retail rates with the wholesale rates proposed in this filing indicate that rate differentials will seriously undermine Cooperatives' ability to compete with KPL for retail loads. We find it appropriate, therefore, to institute the price squeeze procedures set forth in Order No. 563 and Section 2.17 of our Regulations.[5]

On April 27, 1979, the Kansas Municipal Group (Municipals) filed a protest, petition to intervene and motion to reject. Municipals request initiation of price squeeze procedures and a full five month suspension of the proposed changes in rates.

The Municipals' motion to reject is based on KPL's alleged violation of the *Sierra-Mobile* doctrine.[6] As discussed above, this issue was resolved by the Federal Power Commission in earlier KPL proceedings involving these customers; Municipals have presented no reasons for reconsideration of those rulings.[7] KPL will be allowed to litigate the justness and reasonableness of its proposed wholesale rates for service to the four municipal customers whose contracts only "allow the rates to be altered from time to time to reflect changes authorized by this Commission in a manner consistent with Section 206(a). * * *"[8] KPL shall not be required to meet the *Sierra-Mobile* burden of proof, as the FPC previously concluded. The notice requirement of Section 35.3 of our regulations, which would otherwise prevent the filing of rates not to become effective within 120 days, shall be waived.

Our review of KPL's filing indicates that the proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or otherwise unlawful. With the exception of rate applicable to the Cities of Morrill, Toronto, Seneca and Waterville, we shall accept the proposed rates for filing and suspend them until October 30, 1979, when they shall become effective, subject to refund. Rates for service to the four excepted municipals shall become effective only as permitted by their contracts with KPL.

The Commission orders:

(A) The Cooperatives and the Municipals are hereby permitted to intervene in this proceeding subject to the Rules and Regulations of the Commission; *Provided, however,* that the participation of these intervenors shall be limited to matters set forth in their petitions to intervene; and *Provided, further,* that the admission of these intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders by the Commission entered in this proceeding.

(B) The motions of Cooperatives and Municipals to reject the filing are hereby denied.

(C) Cooperatives' motion for summary disposition is hereby denied.

(D) KPL's proposed rates, for service to wholesale customers other than the Cities of Morrill, Toronto, Seneca and Waterville, are hereby accepted for filing and suspended until October 30, 1979, when they shall become effective, subject to refund.

(E) The 120 days notice requirement of Section 35.3(a) of our regulations is hereby waived with regard to the filing of proposed rate schedules applicable to the Cities of Morrill, Toronto, Seneca and Waterville. Any rate change for service to these customers will become effective upon issuance of a final order in this proceeding, or upon the expiration, termination, or renegotiation of their respective contracts and the filing of a superseding service agreement for each contract.

(F) A public evidentiary hearing shall be held concerning the justness and reasonableness of the rates proposed by KPL in this proceeding. KPL's filing shall represent its case-in-chief in the hearing under Section 206(a) of the Federal Power Act which is ordered regarding rates for services to the Cities of Morrill, Toronto, Seneca and Waterville.

(G) Pursuant to Order No. 563 and Section 2.17 of Commission's General Rules, price squeeze procedures are hereby instituted.

(H) The Staff shall prepare and serve top sheets on all parties for settlement purposes on or before July 16, 1979.

(I) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose shall preside at a prehearing conference in this proceeding to be held within ten (10) days after the serving of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 Capitol Street, N.E., Washington, D.C. 20426. Said Judge is authorized to establish procedural dates and to rule upon all motions (except motions to consolidate and sever, and motions to dismiss) as provided for in the Commission's Rules or Practice and Procedure. The Presiding Administrative Law Judge shall convene a prehearing conference within fifteen (15) days of the issuance of this order for the purpose of hearing intervenors' requests for data required to present their case, including *prima facie* showing, on price squeeze issues.

(J) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

By the Commission.

Kenneth F. Plumb,
Secretary.

[5] Cooperatives have raised several other issues which we do not address, that are clearly appropriate for this evidentiary hearing.

[6] *United Gas Pipeline Co.* v. *Mobile Gas Service Corp.*, 350 U.S. 332 (1956) and *F.P.C.* v. *Sierra Pacific Power Co.*, 350 U.S. 348 (1956).

BILLING CODE 6450-01-M

[Docket No. RP79-71]

Natural Gas Pipeline Co. of America; Proposed Changes in FERC Gas Tariff

June 5, 1979.

Take notice that on May 31, 1979, Natural Gas Pipeline Company of America (Natural) tendered for filing proposed changes in its FERC Gas Tariff, Third Revised Volume No. 1 and Second Revised Volume No. 2 to become effective July 1, 1979. (Waiver was requested to make certain tariff sheets effective January 1, 1980.)

Natural states that the proposed rate changes indicate an annual revenue decrease of $24,122,000 when compared with the rates presently effective subject to refund at Docket No. RP78-78. However, Natural states that it is presently drafting a proposed settlement position in the docket No. RP78-78 proceedings which projects rates considerably lower than the rates effective subject to refund that were used, pursuant to the Commission's Regulation, in the calculation of the above stated revenue decrease. A comparison of the revised rates as proposed with rates derived on a proposed Docket No. RP78-78 settlement cost of service, indicate an estimated annual revenue increase of approximately $44.0 million.

Natural further states that the principal reasons for the proposed rate changes are: (1) a proposed increase in overall rate of return to 10.98% which would permit a rate of return to equity of 14.75%; (2) substantial investments in facilities, including offshore facilities, and a 31.03 mile looping of the Gulf Coast system; and (3) increased operation and maintenance expenses, including increased costs incurred for transmission and compression of gas by others from offshore and onshore purchase locations.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C 20426, in accordance with requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 1.10). All such petitions or protests must be filed on or before June 18, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

Northwest Pipeline Corp.; Petition To Amend

June 1, 1979.

Take notice that on May 2, 1979, Northwest Pipeline Corporation (Northwest), 315 East Second South, Salt Lake City, Utah 84111, filed in Docket No. CP78-220 a petition to amend the order issued October 4, 1978, in the instant docket pursuant to Section 7(c) of the Natural Gas Act to authorize the exchange of up to 10,000 Mcf per day of natural gas with Rocky Mountain Natural Gas Company (Rocky Mountain) and RMNG Gathering Company (RMNG), and further to add acreage in the Great Divide area, Colorado pursuant to the Exchange Agreement, as amended, so that any gas produced thereon can be made available to Northwest's system, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Pursuant to a gas gathering and transportation agreement between Northwest and Colorado Interstate Gas Company (CIG), Northwest would purchase 25 percent of the natural gas which CIG has or will have available in the Great Divide area in Colorado and would transport the remaining volumes, for CIG's account, from the wellhead to Northwest's existing point of interconnection with CIG in Sweetwater County, Wyoming, it is indicated in the application.

The authorization of up to 10,000 Mcf per day would enable Northwest [1] to make available to its mainline system the volumes of gas which Northwest intends to purchase from or transport for CIG, it is said.

A purchase contract, dated December 5, 1977, as amended June 5, 1978, between Northwest and Northwest Exploration Company (Exploration) allows additional acreage in the Great Divide area to be subject to the said purchase contract, it is said. Northwest desires to make this additional acreage subject to the exchange agreement so that any gas produced therefrom can be made available to Northwest's system.

Northwest states that with the additional sources of gas to be made subject to the exchange agreement, as amended, it estimates it will deliver, initially, 4,000 Mcf of natural gas per day to Rocky Mountain for exchange under the exchange agreement, as amended. This volume would increase during the coming year as additional wells subject to the exchange agreement, as amended, are connected to Northwest's Great Divide Gathering System, it is asserted.

The transportation rate of 14.3 cents per Mcf of gas which Rocky Mountain is presently authorized to charge Northwest for all volumes redelivered would be applicable to the additional volumes proposed to be exchanged pursuant to the exchange agreement, as amended, it is further asserted.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 25, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[1] Pursuant to an exchange agreement amended June 6, 1978, November 20, 1978, and March 12, 1979.

[Docket No. RR79-72]

Southern Natural Gas Co.; Proposed Rate Increase

June 5, 1979.

Take notice that Southern Natural Gas Company (Southern) on May 31, 1979, tendered for filing proposed changes in its FPC Gas Tariff, Sixth Revised Volume No. 1. The proposed changes are based on the twelve-month period ending July 31, 1978 and, as adjusted, would increase jurisdicitonal revenues by $98,600,000.

Southern states that the rate increase reflects only increases in the cost of purchasing regasified LNG from Southern Energy Company.

Copies of the filing have been served upon Southern's jurisdictional customers

and interested state public service commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 20, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. RR71-11 (PGA 79-2)]

Tennessee Natural Gas Lines, Inc.; PGA Rate Change

June 5, 1979.

Take notice that, on June 1, 1979, Tennessee Natural Gas Lines, Inc. ("TNGL") tendered for filing a rate change, pursuant to the purchased gas cost adjustment ("PGA") provisions of its F.E.R.C. Gas Tariff, consisting of the following tariff sheet:

Thirtieth Revised Sheet No. PGA–1

TNGL states that the purpose of said PGA filing is to reflect in its rates the changed rates of its sole supplier, Tennessee Gas Pipeline Company, a Division of Tenneco, Inc., ("TGP"), which will become effective on July 1, 1979. TNGL requests the same effective date, July 1, 1979, for the tariff sheet filed by it. TNGL further states that such proposed PGA rate change also provides for recoupment of the net balances in its Unrecovered Purchased Gas Cost and LNG Surcharge Accounts.

TNGL states that copies of the filing were served upon its jurisdictional customer and the interested state regulatory commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 18, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket Nos. RP73-114, RP74-24, RP74-73 and RP78-52]

Tennessee Gas Pipeline Co., a Division of Tenneco Inc.; Proposed Rate Change Under Tariff Rate Adjustment Provisions

June 5, 1979.

Take notice that on May 31, 1979, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), tendered for filing Twenty-Fifth Revised Sheet Nos. 12A and 12B to Ninth Revised Volume No. 1 of its FERC Gas Tariff to be effective on July 1, 1979.

Tennessee states that the purposes of the revised tariff sheets is to adjust Tennessee's rates pursuant to Articles XXIII, XXIV, XXV and XXVIII of the General Terms and Conditions of its FERC Gas Tariff, consisting of a PGA rate adjustment, a rate adjustment to reflect curtailment credits, and R. & D. adjustment, and a First Use Tax Rate Adjustment.

Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 20, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further petition. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. CP79-310]

United Gas Pipe Line Co.; Application

May 29, 1979.

Take notice that on May 18, 1979, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP79-310 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 2,000 Mcf of natural gas per day for Transcontinental Gas Pipe Line Corporation (Transco), all as more fully set forth in the application on file with the Commission and open to public inspection.

The application states that Transco individually and as agent for certain working interest owners has acquired the right to purchase up to 2,000 Mcf of natural gas per day produced in Lake Hatch Field, Louisiana, from McMoran Exploration Company, Apache Corporation and Transco Exploration Company. In order to receive this gas into its system, Transco has entered into a transportation agreement dated March 20, 1979, with Applicant. It is indicated that pursuant to the terms of the transportation agreement Transco would deliver or cause to be delivered to Applicant for Transco's account said volumes of gas at an existing authorized point on Applicant's line in the Lake Hatch Field (delivery point) in Terrebonne Parish, Louisiana, and that Applicant would redeliver equivalent volumes of gas to Transco, less 2.3 percent for fuel and unaccounted for gas, at the outlet side of applicant's existing authorized measuring and regulating station at Gibson, Terrebonne Parish (redelivery point).

It is stated that Transco would pay Applicant for gas transported under said transportation agreement an amount per Mcf equal to ⅓ of Applicant's jurisdictional transmission rates in effect from time to time in Applicant's Southern Rate Zone as such may be determined by Applicant based on rate filings made from time to time with the Commission, less any amount included in such jurisdictional transmission rate which is attributable to fuel and unaccounted for gas. The current jurisdictional transmission rate,

exclusive of the cost of gas utilized in Applicant's operation, is 19.4 cents per Mcf in Applicant's Southern Rate Zone, it is stated. Applicant states that ⅓ of its jurisdictional transmission rate in its Southern Rate Zone excluding a component for gas utilized in the operation of Applicant's pipeline system is 9.7 cents per Mcf.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 20, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

Utah; Determination by a Jurisdictional Agency Under the Natural Gas Policy Act of 1978

June 4, 1979.

On June 1, 1979 the Federal Energy Regulatory Commission received notice of a determination pursuant to 18 CFR 274.104 of the Natural Gas Policy Act of 1978 applicable to:

State of Utah, Department of Natural Resources, Division of Oil, Gas and Mining

FERC Control Number: JD79-6615
API Well Number: 43-047-302334
Section: 103
Operator: Belco Petroleums Corporation
Well Name: Chapita Wells Unit 33-16 number 30234
Field: Chapita Wells Field
County: Uintah
Purchaser: Mountain Fuel Supply Co.
Volume:

The application for determination in this matter together with a copy or description of other materials in the record on which such determination was made is available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington D.C. 20426.

Persons objecting to this final determination may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission within fifteen (15) days of the date of publication of this Notice. Please reference the FERC Control Number in any correspondence concerning a determination.

Kenneth F. Plumb,

Secretary.

[FR Doc. 79-18137 Filed 6-11-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. RP74-85 (PGA 79-1 and 79-1a)]

Western Gas Interstate Co.; Revised PGA Rate Adjustment

June 5, 1979.

Take notice that on May 29, 1979, Western Gas Interstate Company ("Western") filed herein Second Substitute Twelfth Revised Sheet No. 3A to its FERC Gas Tariff, Original Volume No. 1, in accordance with the Commission's letter order in Docket No. RP74-85 (PGA 79-1 and 79-1a) dated May 4, 1979. Said tariff sheet is proposed to become effective on May 1, 1979.

Western states that the rates shown on the above described tariff sheet have been determined in accordance with the Commission's letter order and Appendix A therein dated May 4, 1979, which reflect the elimination of gas costs which Western 's producer-suppliers and pipeline-suppliers were not authorized to charge Western on or before May 1, 1979. The effect of this revision reduced Western's substitute filing (PGA79-1a) by .01¢ per Mcf in the Northern Division and 7.33¢ per Mcf in the Southern Division.

Any person desiring to be heard and to make any protest with reference to said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 20, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Western's filing is on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 79-18140 Filed 6-11-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. ER79-150]

Southern California Edison Co.; Order Granting Rehearing and Denying Reconsideration

Issued June 5, 1979.

On April 13, 1979, Southern California Edison Company (Edison) petitioned for rehearing and reconsideration of the Commission's March 15, 1979 order in this proceeding.[1] In its petition, Edison objects to the Commission's suspension of the proposed wholesale rates for five months and summary exclusion of Electric Power Research Institute (EPRI) contributions from its cost of service. For the reasons discussed below, we grant rehearing of the EPRI issue and deny reconsideration of our suspension of Edison's proposed rate increase.

In support of its request for rehearing, Edison states that the Commission has not adequately explained its policy of disallowing EPRI contributions included in cost of service studies. Edison suggests that further analysis of the purpose of EPRI contributions and the mechanism whereby such contributions are made is a necessary predicate to the formulation of a sound regulatory policy on this issue.

[1] *Southern California Edison Company*, Docket No. ER79-150, Order Accepting For Filing and Suspending Proposed Rate Increases, Providing for Hearing, Granting Motion For Summary Judgment In Part, and Establishing Procedures, issued March 15, 1979. On May 14, 1979, the Commission issued a Notice of Intent to Act which tolled 30 day limit on Commission action pursuant to 18 CFR Section 1.34(c).

Summary disposition of EPRI contributions had its genesis in *Connecticut Light & Power Company*, Docket No. ER78-517, Order issued August 31, 1978, where the Commission relied on *Carolina Power & Light Company*, Opinion No. 19, issued August 2, 1978, as a basis for summary exclusion of EPRI contribution. On rehearing of Connecticut Light & Power,[2] the Commission affirmed its summary exclusion of EPRI contributions, stating:

> The Initial Decision in Carolina as affirmed in Opinion No. 19, then disposed of the LMFBR contribution allocation on three grounds: (1) avoidance of "double contribution" by wholesale customers; (2) preservation of the voluntary nature of contributions; and (3) elimination of the deterrence to independent contributions by wholesale customers. Clearly, the latter two arguments apply with equal force whether or not the wholesale customers have yet made contributions. Thus, the summary disposition of the inclusion of EPRI costs in the instant case, was appropriate under Carolina Power & Light, despite the lack of factual evidence of independent wholesale customer contributions. (at p. 3).[3]

In the March 15, 1979 order in this proceeding; we relied on this statement as a basis for summary disposition of the EPRI issue.

We have determined that the proper treatment of EPRI contributions for ratemaking purposes should be considered in a proposed rulemaking, which will be forthcoming. In the meantime, we do not believe that EPRI contributions should be summarily excluded from costs of service and filed rates. Those few utilities, which have already excluded EPRI contributions pursuant to Commission orders in ongoing rate cases, will be informed that they need not make a second refiling to preserve their right to this disputed cost-of-service item. If it is determined in the rulemaking proceeding that EPRI contributions are properly recovered through wholesale rates, these utilities will be allowed to offset allocated EPRI costs against any refund obligation to wholesale customers or, if necessary, devise a surcharge to recover EPRI contributions.

Edison's request for reconsideration of the five-month suspension of its rate increase raises no new substantive issue. There is nothing in the petition which warrants modification of our discretionary finding in this case that Edison's customers are entitled to the protection of the five-month suspension authorized by Section 206(e) of the Federal Power Act. *See Municipal Light Boards of Reading and Wakefield, Mass. v. FPC*, 450 F.2d 1341 (D.C. Cir 1971), *cert. den.*, 405 U.S. 989 (1972). Edison errs in assuming that we failed to consider its supplementary pleading, filed on the date of our deliveration of the suspension order.[4] This document was brought to the attention of the Commission prior to the decision to suspend Edison's proposed rate increase for five months.

The Commission orders: (A) Edison's petition for rehearing of the Commission's summary exclusion of EPRI contributions from its cost of service is hereby granted.

(B) Ordering Paragraph (G) of the Commission's order in this proceeding, dated March 15, 1979, is hereby modified to delete all reference to EPRI contributions, including the requirement that Edison revise its cost of service standing and its proposed rates to reflect the exclusion of EPRI contributions from its cost of service.

(C) The stay of Ordering Paragraph (G) of our order in this proceeding, dated March 15, 1979, which was granted in our Notice of Intent To Act, dated May 14, 1979, is hereby lifted. Edison shall revise its cost of service study and its proposed rates to reflect the treatment of Accumulated Deferred Investment Tax Credit contained in the order of March 15, 1979, and submit such revised rates and cost of service to the Commission within thirty days from the issuance of this order.

(D) Edison's petition for reconsideration of the five-month suspension of its proposed rate increase is hereby denied.

(E) The Secretary shall cause prompt publication of this order to be made in the Federal Register.

By the Commission.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[FRL 1245-8; OPP-180311]

Department of Agriculture; Issuance of Specific Exemption TO Use Acephate TO Control the West Indian Sugarcane Rootstalk Borer Weevil on Citrus in Florida

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Issuance of a specific exemption.

SUMMARY: EPA has granted a specific exemption to the Animal and Plant Health Inspection Service, U.S. Department of Agriculture (hereafter referred to as the "Applicant") to use acephate to control the West Indian Sugarcane Rootstalk Borer Weevil on 5,000 acres of citrus in two counties in Florida. The specific exemption expires on November 1, 1979.

FOR FURTHER INFORMATION CONTACT: Emergency Response Section, Registration Division (TS-767), Office of Pesticide Programs, 401 M Street SW., Room E-124, Washington, D.C. 20460, Telephone: 202/426-2601. It is suggested that interested persons telephone before visiting EPA Headquarters, so that the appropriate files may be made conveniently available for review purposes.

SUPPLEMENTARY INFORMATION: The West Indian Sugarcane Rootstalk Borer was introduced into the United States from Puerto Rico in 1964. The first serious infestation of the pest occurred in 1966 on approximately 2,500 acres of citrus in Orange County. Currently the pest has become established on approximately 5,000 acres in Orange and Seminole Counties. A quarantine has been enacted by the State of Florida under which about 38,000 acres are being regulated.

The adult weevil feeds on foliage of a variety of plants with most damage occurring to tender new growth. It has a wide host range including many commercial crops, two of which are sugarcane and citrus.

Eggs are laid in clusters of 30 to 300 and hatch in seven days. The larvae drop to the ground and burrow into the soil where they find suitable roots to feed on. The larvae have the ability to survive several years in soil and may be found at depths of up to seven feet below the surface. In Florida, the adult is present throughout the year with the major population peaks occuring during May/June and September/October. There is no registered pesticide to control this pest.

Little information is available on the economic losses which would occur to citrus without the use of acephate. According to the Applicant, the potential damage from this pest could be tremendous if it is allowed to spread beyond the approximately 5,000 acres in Florida in which it has become established. The Applicant stated that in initial areas found infested, more than 1,670 citrus trees have shown severe decline symptoms and suffered complete production loss. More than 600 trees were killed outright.

The Applicant proposed to use a total of 13,000 pounds of acephate in Orange and Seminole Counties. Application will be by air, and will be made only after knowledgeable experts have determined the need.

EPA has determined that residues from the proposed use are not likely to exceed 4 parts per million (ppm) of acephate (of which no more than 0.7 ppm is methamidophos, a metabolite) in or on citrus. These residue levels have been deemed adequate to protect the public health. Since foraging mammals and birds may be affected from the proposed use, EPA has imposed a restriction against application in areas where rare or endangered species occur.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of West Indian Sugarcane Rootstalk Borer Weevil has occurred; (b) there are no effective pesticides currently registered and available to control this pest in Florida; (c) there are no alternative means of control taking into account the efficacy and hazard; (d) significant economic problems may result if the West Indian Sugarcane Rootstalk Borer Weevil is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until November 1, 1979, in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. Acephate may be used at a dosage rate of one pound in six to ten gallons of water per acre;

2. A maximum of three applications may be made per acre per season;

3. A 21-day interval between applications shall be observed;

4. A 21-day pre-harvest interval shall be observed;

5. Application is limited to 5,000 acres of citrus located in the counties named above;

6. Acephate may not be applied in areas where rare or endangered species are known or expected to occur;

7. Application is to be made by Plant Protection and Quarantine Programs personnel, and Florida Department of Agriculture and Consumer Services personnel, or State-certified applicators under their supervision;

8. Citrus treated according to the above provisions should not exceed residue levels of acephate in excess of 4 ppm (of which no more than 0.7 ppm is methamidophos). Treated citrus within this residue level may enter interstate commerce. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action; and

9. The Applicant is responsible for assuring that all of the provisions of this specific exemption are met and must submit a report summarizing the results of this program by March 31, 1980.

(Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136))

Dated: June 4, 1979.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

FMC Corp., Approval of Application to Conditionally Register Pesticide Product Containing New Active Ingredient

On March 1, 1978, notice was given (43 FR 8293) that FMC Corp., 2000 Market St., Philadelphia, PA 19103 had filed an application (EPA File Symbol 279-GNRG) with the Environmental Protection Agency (EPA) to register the pesticide product Pounce Technical containing 92.0% of the active ingredient permethrin [(3-phenoxyphenyl) methyl (±) cis-trans-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate] which was not previously registered at the time of submission. Notice of this registration is given in accordance with 40 CFR 162.7(d)(2).

This application was conditionally approved May 7, 1979 and the product has been assigned EPA Registration No. 279-3013. As stated in the March 1, 1978 notice, Pounce Technical is an insecticide for formulating use only. A copy of the approved label and list of data references used to support registration are available for public inspection in the office of the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, Rm. E-401, 401 M St., SW., Washington, DC 20460. The data and other scientific information used to support registration, except for the material specifically protected by Section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136), will be available for public inspection in accordance with section 3(c)(2) of FIFRA within 30 days after the registration date of May 7, 1979. Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A-101), EPA, at the above address. Such requests should: 1) identify the product by name and registration number and 2) specify the data or information desired.

Dated: June 5, 1979.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

Financial Assistance for Resource Recovery Project Development Under The President's Urban Policy; Class Deviation

Under authority of 40 CFR 30.1000, EPA has issued a class deviation from the provisions of 40 CFR 35.716 for the Financial Assistance for Resource Recovery Project Development Under the President's Urban Policy program funded under section 4008(a)(2) of the Resource Conservation and Recovery Act of 1976.

The regulations in 40 CFR Part 30, 40 CFR 35.400 through 35.425, and 40 CFR 35.700 through 35.744 will apply to all assistance awarded under this program. The class deviation waives the provision of 40 CFR 35.716 which specifies that the budget period shall be the Federal fiscal year. The Financial Assistance for Resource Recovery Project Development Under the President's Urban Policy program is project specific and the time required to perform the tasks will vary greatly from the project to project.

Under our policy to publish class deviation in the **Federal Register**, EPA is publishing the deviation as part of this notice.

FOR FURTHER INFORMATION CONTACT:

Mr. Alexander J. Greene, Director, Grants Administration Division (PM-216), Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460 (Tel. No. 202 755-0850).

Dated: June 6, 1979.

C. W. Carter,

Acting Assistant Administrator for Planning and Management.

Dated: May 11, 1979.

Thomas C. Jorling

Assistant Administrator for Water and Waste Management.

BILLING CODE 6560-01-M

[FRL 1245-5; Opp-180312]

Rhode Island Department of Environmental Management; Issuance of Specific Exemption To Use Permethrin to Control Colorado Potato Beetle on Potatoes

AGENCY: Environmental Protection Agency (EPA), Office of Pesticide Programs.

ACTION: Issuance of a specific exemption.

SUMMARY: EPA has granted a specific exemption to the Rhode Island Department of Environmental Management (hereafter referred to as the "Applicant") to use permethrin on 3,700 acres of potatoes for the control of the Colorado potato beetle in Rhode Island. The specific exemption expires on December 31, 1979.

FOR FURTHER INFORMATION CONTACT: Emergency Response Section, Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street, SW., Room: E-124, Washington, D.C. 20460, Telephone: 202/426-2601. It is suggested that interested persons telephone before visiting the EPA Headquarters, sothat the appropriate files may be made conveniently available for review purposes.

SUPPLEMENTARY INFORMATION: The potato beetle is perhaps the best known beetle in the United States. Both the larvae and the adults feed on leaves of potato plants. This feeding may result in defoliation of the vines which prevents development of tubers or greatly reduces yield. Although Guthion, Imidan, methoxychlor, Monitor, parathion, Furadan, Temik, and Thiodan are registered for use on potatoes to control this pest, the Applicant claims tha these pesticides are unsatisfactory for Colorado potato beetle control due to pesticidal resistance. Last year Vydate was registered for control of the beetle on potatoes; however, Vydate is effective against the larvae only, not the adult, and it is not so effective as permethrin. The Applicant estimates a loss of 1.85 million dollars due to the Colorado potato beetle.

The Applicant proposes to use permethrin, manufactured under the trade names Pounce and Ambush, at a rate of 0.1 to 0.2 pound active ingredient (a.i.) per acre per application, using ground or air equipment, observing a 7-day pre-harvest interval.

EPA has determined that residues of permethrin on potatoes would not be expected to exceed 0.1 part per million (ppm) as a result of the proposed use

provided that no more than six applications of either Ambush or Pounce are made and a 7-day pre-harvest interval is observed. This residue level as been judged to be adequate to protect the public health. Since permethrin is highly toxic to bees and aquatic vertebrates and invertebrates, appropriate restrictions have been imposed. This use of permethrin is not expected to pose an unreasonable hazard to the environment.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of Colorado potato beetle has occurred or is about to occur; (b) there is no effective pesticide presently registered and available for use to control the Colorado potato beetle in Rhode Island; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the Colorado potato beetle is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until December 31, 1979, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. The products Ambush, manufactured by ICI Americas, Inc., and Pounce, manufactured by FMC Corporation, may be applied;

2. Permethrin may be applied at a rate of 0.1 to 0.2 pound a.i. per acre;

3. A maximum of three applications may be made with a pre-harvest interval of seven days;

4. A maximum of 3,700 acres may be treated;

5. Applications may be made with air or ground equipment;

6. Spray mixture volumes of 20–100 gallons of water will be applied by gound equipment, 5–10 gallons by aircraft;

7. Applications will be made by State-certified private or commerical applicators or persons under the direct supervision of a State-certified applicator;

8. Ambush and Pounce are toxic to fish, birds, and other wildlife. They must be kept out of any body of water. They may not be applied where run-off is likely to occur. They may not be applied when weather conditions favor drift from treated areas. Care must be taken to prevent contamination of water by cleaning of equipment or disposal of wastes;

9. In order to minimize spray drift, the following restrictions will be observed for applications of permethrin:

a. Aerial applications will not be made when wind speed exceeds five miles per hour;

b. A buffer zone of 200 feet (horizontal distance) between treated areas and aquatic areas will be observed; and

c. Aerial applications should be staggered in time in areas where fish and shellfish are important resources.

10. Permethrin is highly toxic to bees exposed to direct treatment or residues on crops or weeds. It may not be applied or allowed to drift to weeds in bloom on which an economically significant number of bees are actively foraging. Protective information may be obtained from the State Cooperative Agricultural Extension Service;

11. Potatoes treated according to the above provisions will not have residues of permethrin in excess of 0.1 ppm. Potatoes with residues of permethrin which do not exceed this level may enter interstate commerce. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

12. A 60-day crop rotation restriction will be observed;

13. The EPA will be immediately informed of any adverse effects resulting from the use of permethrin in connection with this exemption; and

14. The Applicant is responsible for assuring that all of the provisions of this specific exemption are met and must submit a report summarizing the results of this program by March 31, 1980.

(Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136))

Dated: June 4, 1979.

Pesticide Programs; Approval of Application To Conditionally Register Pesticide Product Containing New Active Ingredient

On March 10, 1978, notice was given (43 FR 9956) that ICI Americas Inc., Concord Pike and New Murphy Road, Wilmington, DE 19897, had filed an application (EPA File Symbol 10182-RT) with the Environmental Protection Agency (EPA) to register the pesticide product Permethrin Technical containing 91.0% of the active ingredient permethrin [(3-phenoxyphenyl)methyl (±)-cis, trans-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate] which was not previously registered at the time of submission. Notice of this registration is given in accordance with 40 CFR 162.7(d)(2).

This application was conditionally approved May 7, 1979 and the product has been assigned EPA Registration No. 10182-17. As stated in the March 10, 1978 notice, Permethrin Technical is an insecticide for formulating use only. A copy of the approved label and list of data references used to support registration are available for public inspection in the office of the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, Rm. E-401, 401 M St., SW, Washington, DC 20460. The data and other scientific information used to support registration, except for the material specifically protected by Section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136), will be available for public inspection in accordance with section 3(c)(2) of FIFRA, within 30 days after the registration date of May 7, 1979. Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A-101), EPA, at the above address. Such requests should: 1) identify the product by name and registration number and 2) specify the data or information desired.

Dated: June 6, 1979.

BILLING CODE 6560-01-M

FEDERAL MARITIME COMMISSION

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for review and approval, if required, pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10423; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico.

Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before June 22, 1979. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Agreement No.: T-3813.

Filing Party: John R. Kuykendall, Vice-President, Matson Navigation Company, 444 North Capitol Street, N.W., Suite 514, Washington, D.C. 20001.

Summary: Agreement No.T-3813, between the State of Hawaii (State) and Matson Terminals, Inc. (Matson) is an agreement for the design, construction and lease of new Sand Island container terminal facilities. The purpose of the agreement is to provide for the transfer of Matson's container operations from its Diamond Head Terminal to its Sand Island Terminal, thus consolidating all of its Honolulu container terminal operations at Sand Island for the purpose of achieving a more effective and efficient operation, and effectuate the State's desire to have Matson remove its container operations from the Diamond Head Terminal in order that the land area there can be made available for other purposes beneficial to the State. Pursuant to the agreement, the State and Matson will develop and coordinate design and construction schedules for enlarging the Sand Island container terminal complex to include Berths 52 and 53, with the necessary support area and facilities, to effectuate this transfer in an orderly manner as soon as it is practical to do so. The agreement further provides that the proponents will negotiate and execute a lease for the new facilities.

By order of the Federal Maritime Commission.

Francis C. Hurney,

Secretary.

Dated: June 7, 1979.

BILLING CODE 6730-01-M

FEDERAL TRADE COMMISSION

Octane Certification and Posting; Grant of Exemption to Sun Mark Industries

AGENCY: Federal Trade Commission.

ACTION: Partial Exemption from Commission Rule.

SUMMARY: The Commission has responded to the petition of Sun Oil Company requesting permission to post octane labels in a manner that differs from certain provisions of the Commission's Octane Certification and Posting Rule. The Commission has granted the partial exemption with respect to Sun Oil Company's multi-blend gasoline dispensers.

EFFECTIVE DATE: May 22, 1979.

FOR FURTHER INFORMATION CONTACT: James Mills, Federal Trade Commission, PE-S-7317, Washington, D.C. 20580, (202) 724-1867.

SUPPLEMENTARY INFORMATION: On March 30, 1979, the Commission published the Octane Certification and Posting Rule in the Federal Register (44 FR 19160). The rule established procedures for determining, certifying and posting, by means of a label on the fuel dispenser, the octane rating of automotive gasoline intended for sale to consumers.

Section 306.9 of the rule provides that retailers must post at least one octane rating label on each face of each gasoline dispenser. Retailers (like Sun) who sell two or more kinds of gasoline with different octane ratings from a single dispenser must post separate octane rating labels for each kind of gasoline on each face of the dispenser. Labels must be placed conspicuously on the dispenser so as to be in full view of consumers and as near as reasonably practical to the price per gallon of the gasoline. A provision is included to the effect that retailers may petition the Commission for an exemption from the placement requirements.

Section 306.11 of the rule details specifications for the labels themselves. Labels must be 2½ by 3 inches, and Helvetica type must be used for all text except the octane rating number, which must be in Franklin Gothic type. The size for the text and numbers is specified, and the type and border must be process black on a process yellow background. The line "MINIMUM OCTANE RATING" must be in 12 point Helvetica bold, all capitals, with letter space set at 12½ points. The line "(R+M)/2 METHOD" must be in 10 point Helvetica bold, all capitals, with letter space set at 10½ points. The octane number must be in 96 point Franklin Gothic condensed, with ⅛ inch spacing between the numbers.

By letter dated April 3, 1979, Sun Mark Industries, a division of Sun Oil Company of Pennsylvania, requested permission to post octane ratings, with respect to certain gasolines they blend and sell through multi-blend dispensers at retail, in a manner that differs from the requirements of Sections 306.9 and 306.11 of the Commission's Rule.

Sun Oil Company proposed the following labeling system for its multi-blend dispensers: A strip of 1¾ inch wide by 1⅜₁₆ inch high labels on which the octane number would be displayed in Franklin Gothic type. On each strip, the words "MINIMUM OCTANE RATING/(R+M)/2 METHOD" would appear twice—once on each end of the strip—in 2⅜₁₆ inches long by 1⅜₁₆ inches high boxes forming arrows that point in the direction of the octane numbers. An octane number, as described above, would be displayed for each grade of gasoline dispensed by the Sun Company's multi-blend dispensing pumps.

The Commission has decided that the above described labeling is adequate to meet the posting objective and therefore has decided to grant Sun Oil Company permission to use its proposed labeling system on the multi-blend dispensers, providing that Sun Oil Company will also conform to the final rule's print and color requirements in all other respects.

By direction of the Commission.

Carol M. Thomas,

Secretary.

BILLING CODE 6750-01-M

P Shirt Acquiring Corp.; Early Termination of Waiting Period of the Premerger Notification Rules

AGENCY: Federal Trade Commission.

ACTION: Granting of request for early termination of the 30-day waiting period of the premerger notification rules.

SUMMARY: P Shirt Acquiring Corp. is granted early termination of the 30-day waiting period provided by law and the premerger notification rules with respect to its proposed acquisition of the assets of Publix Shirt Corporation. The grant was made by the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice in response to a request for early termination submitted by both parties. Neither agency intends to take any

action with respect to this acquisition during the waiting period.

EFFECTIVE DATE: June 1, 1979.

FOR FURTHER INFORMATION CONTACT: Malcolm R. Pfunder, Assistant Director for Evaluation, Bureau of Competition, Room 394, Federal Trade Commission, Washington, D.C. 20580, (202–523–3404).

SUPPLEMENTARY INFORMATION: Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by sections 201 and 202 of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Commission and Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act and § 803.11 of the rules implementing the Act permit the agencies, in individual cases, to terminate this waiting period prior to its expiration and to publish notice of this action in the Federal Register.

By direction of the Commission.

Carol M. Thomas,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. 79M-0102]

Syntex Ophthalmics, Inc., Premarket Approval of Polycon Contact Lens

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug administration (FDA) announces approval of the application for premarket approval under the Medical Device Amendments of 1976 of the Polycon (silafocon A) Contact Lens sponsored by Syntex Ophtalmics, Inc., Palo Alto, CA. After reviewing the Ophtalmology Device Classification Panel's recommendation, FDA notified the sponsor that the application was approved because the device has been shown to be safe and effective for use as recommended in the submitted labeling.

DATE: Petitions for administrative review by July 12, 1979.

ADDRESS: Requests for copies of the summary of safety and effectiveness data and petitions for administrative review may be addressed to the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Keith Lusted, Bureau of Medical Devices (HFK–402), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7550.

SUPPLEMENTARY INFORMATION: The sponsor, Syntex Ophtalmics, Inc., Palo Alto, CA 94304, submitted an application for premarket approval of the Polycon (silafocon A) Contact Lens to FDA on January 20, 1978. The application was reviewed by the Ophthalmology Device Classification Panel, an FDA advisory committee, which recommended approval of the application. On January 19, 1979, FDA approved the application by a letter to the sponsor from the Director of the Bureau of Medical Devices.

Before enactment of the Medical Device Amendments of 1976 (Pub. L. 94–295; 90 Stat. 539–583) (the amendments), soft contact lenses and solutions were regulated as new drugs. Because the amendments broadened the definition of the term "device" in section 201(h) of the Federal Food, Drug, and Cosmetic (FFDC) Act (21 U.S.C. 321(h)) (the act), soft contact lenses and solutions are now regulated as class III devices (premarket approval). As FDA explained in a notice published in the Federal Register of December 16, 1977 (42 FR 63472), the amendments provide transitional provisions to insure continuation of premarket approval requirements for class III devices formerly considered new drugs.

Furthermore, FDA requires, as a condition to approval, that sponsors of applications for premarket approval of soft contact lenses or solutions comply with the records and reports provisions of 21 CFR Part 310, Subpart D, until these provisions are replaced by similar requirements under the amendments.

A summary of the information on which the FDA's approval is based is available upon request from the Hearing Clerk (address above). Requests should be identified with the name of the device and the Hearing Clerk docket number found in brackets in the heading of this document.

The laveling of the Polycon Contact Lens, like that of other approved soft contact lenses, states that the lens is to be used only with certain solutions for disinfection and other purposes. Such restrictive labeling helps to inform new lens users that they must avoid purchasing inappropriate products, e.g., solutions for use with hard contact lenses. Such restrictive labeling, however, needs to be updated periodically to refer to new solutions that FDA approves for use with an approved lens. A sponsor who does not update such restrictive labeling may violate the misbranding provisions of section 502 of the FFDC Act (21 U.S.C. 352) as well as the Federal Trade Commission Act (15 U.S.C. 41–58), as amended by the Magnuson-Moss Warranty-Federal Trade Commission Improvement Act (Pub. L. 93–637). Furthermore, failure to update such restrictive labeling to refer to new solutions that may be used with an approved lens may be grounds for withdrawing approval of the application for the lens under section 515(e)(1)(F) of the FFDC Act (21 U.S.C. 360e(e)(1)(F)). Accordingly, whenever FDA publishes a notice in the Federal Register of the agency's approval of a new solution for use with an approval lens, the sponsor of the lens shall correct its labeling to refer to the new solution at the next printing or at such other time as FDA prescribes by letter to the sponsor. FDA is considering alternatives to the current restrictive labeling requirements for soft contact lenses and solutions.

Opportunity for Administrative Review

Section 515(g) of the FFDC Act (21 U.S.C. 360e(g)) authorizes any interested person to petition for administrative review of the FDA decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of the FDA administrative practices and procedures regulations or a review of the application and the agency's action by an independent advisory committee of experts. A petition must be in the form of a petition for reconsideration of FDA action under § 10.33(b) (21 CFR 10.33(b)). A petition must designate the form of review that the petitioner requests (hearing or independent advisory committee) and must be accompanied by supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing any petition, FDA will decide whether to grant or deny the petition by a notice published in the Federal Register. If FDA grants the petition, the notice will state the issues to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may at any time on or before July 12, 1979, file with the Hearing Clerk (HFA–305), Food and Drug Administration, Rm. 4065, 5600 Fishers Lane, Rockville, MD 20857, four

copies of each petition and supporting data and information, identified with the name of the device and the Hearing Clerk docket number found in brackets in the heading of this document. Received petitions may be seen in the above office from 9 a.m. to 4 p.m., Monday through Friday.

Dated: June 6, 1979.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Alaska Native Claims Settlement Act

Correction

In FR Doc. 79-13858 appearing on page 25945 in the issue of Thursday, May 3, 1979, add the following under Kateel River Meridian, Alaska (Unsurveyed) (first column, page 25946): "Secs. 3 to 10, inclusive, all;".

BILLING CODE 1505-01-M

[F-20517]

Alaska Native Claims Selection

On January 3, 1917, Executive Order 2506, reserved and set aside certain lands in the Norton Bay area for use of the United States Bureau of Education and Alaska Natives, as amended by Executive Order 2525 on February 6, 1917 and Executive Order 5207 on October 12, 1929.

Section 19(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 710; 43 U.S.C. 1601, 1618 (1976)), revoked, subject to any valid existing rights of non-Natives, the various reserves set aside for Native use or administration of Native affairs. Public Land Order 5156, dated February 10, 1972, withdrew, subject to valid existing rights, the lands set aside for Native use or for administration of Native affairs in furtherance of the right of any Native village corporation or corporations to acquire title to the surface and subsurface estates in the reservations pursuant to Sec. 19(b) of the Alaska Native Claims Settlement Act.

On November 13, 1973, the Board of Directors for Elim Native Corporation certified that their stockholders had elected to acquire title to the surface and subsurface estates of the reserve as provided by Sec. 19(b) of the Alaska Native Claims Settlement Act (ANCSA). Under 43 CFR 2654.2(a), submission of such certifications constituted application to acquire reserve lands.

The State of Alaska filed general purposes grant selection application F-44562 on November 14, 1978, as amended, for all unpatented lands within Tps. 13 S., Rs. 20 and 21 W., Kateel River Meridian, pursuant to Sec. 6(b) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 340; 48 U.S.C. Ch. 2, Sec. 6(b) (1976)). The Elim Native Corporation (Norton Bay Reservation) properly elected to acquire all of U.S. Survey No. 2548 on November 13, 1973. Section 6(b) of the Alaska Statehood Act of July 7, 1958 provides that the State may select *vacant, unappropriated* and *unreserved* public lands in Alaska.

Therefore, in view of the above, State selection F-44562 is hereby rejected as to that portion of T. 13 S., R. 20 W., Kateel River Meridian lying within U.S. Survey No. 2548.

As to the lands described below, the application is properly filed and meets the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface and subsurface estates of the following described lands, containing 297,982 acres, are considered proper for acquisition by Elim Native Corporation and are hereby approved for conveyance pursuant to Sec. 19(b) of the Alaska Native Claims Settlement Act:

U.S. Survey No. 2548, Alaska, comprising the Norton Bay Reservation. Containing 297,982 acres.

The conveyance issued for the surface and subsurface estates of the lands described above shall contain the following reservation to the United States:

Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 708; 43 U.S.C. 1601, 1616(b) (1976)), the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F-20517-EE, are reserved to the United States. All easements are subject to applicable Federal, State or municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles and small all-terrain vehicles (less than 3,000 lbs Gross Vehicle Weight (GVW)).

One Acre Site—The uses allowed for a site easement are: vehicle parking (e.g., aircraft, boats, ATV's snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading or unloading shall be limited to 24 hours.

a. (EIN 1 C3, D1, 0) An easement for an existing access trail twenty-five (25) feet in width from Moses Point in Sec.

23, T. 9 S., R. 17 W., Kateel River Meridian, northwesterly to Sec. 18, T. 8 S., R. 17 W., Kateel River Meridian. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

b. (EIN 2 C1, C3, D1, D9, 0) An easement for an existing access trail twenty-five (25) feet in width from Sec. 15, T. 11 S., R. 20 W., Kateel River Meridian, northeasterly through the selection to Sec. 18, T. 8 S., R. 14 W., Kateel River Meridian. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement. The season of use will be limited to winter.

c. (EIN 8 C3) An easement for a proposed access trail twenty-five (25) feet in width from trail easement EIN 1 C3, D1, 0 in Sec. 18, T. 8 S., R. 17 W., Kateel River Meridian, northerly to public lands in Sec. 28, T. 7 S., R. 17 W., Kateel River Meridian. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

d. (EIN 13 D9) A one (1) acre site easement upland of the ordinary high-water mark in Sec. 22, T. 9 S., R. 17 W., Kateel River Meridian, on the right bank of Kwiniuk River. The uses allowed are those listed above for a one (1) acre site.

The grant of lands shall be subject to:

1. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 341; 48 U.S.C. Ch. 2, Sec. 6(g) (1976))), contract, permit, right-of-way or easement, and the right of the lessee, contractee, permittee or grantee to the complete enjoyment of all rights, privileges and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of ANCSA, any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law;

2. The following third-party interests, in valid, created and identified by the Bureau of Indian Affairs as provided by Sec. 14(g) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 704; 43 U.S.C. 1601, 1613(g) (1976)):

a. Use Permit, to Alaska Village Electric Cooperative, Inc., Anchorage, Alaska, for use and occupancy of approximately 20,000 square feet of land located within protracted Sec. 15 T. 10 S., R. 18 W., Kateel River Meridian.

b. Use Permit, to United States Department of the Army, Alaska National Guard, Elim, Alaska for use and occupancy of approximately 1.01 acres of land located within protracted Sec. 15, T. 10 S., R. 18 W., Kateel River Meridian.

There are no inland water bodies considered to be navigable within the land described.

In accordance with Departmental regulations 43 CFR 2650.7(d), notice of this decision is being published once in the Federal Register and once a week, for four (4) consecutive weeks, in the NOME NUGGETT. Any party claiming a property interest in lands affected by this decision may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510, with a copy served upon both the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513 and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501; also:

1. Any party receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate, and any parties who failed or refused to sign the return receipt shall have until July 12, 1979 to file and appeal.

3. Any party known or unknown who may claim a property interest which is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is to be taken, the adverse party to be served with a copy of the notice of appeal is:

Elim Native Corporation, Elim, Alaska 99739.
State of Alaska, Division of Lands, 323 East Fourth Avenue, Anchorage, Alaska 99501

BILLING CODE 4310-84-M

[2800, U-41544 (U-942)]

Utah; Application

June 4, 1979.

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Northwest Pipeline Corporation has applied for a 6⅝ inch buried natural gas pipeline right-of-way across the following lands:

Salt Lake Meridian, Utah

T. 17 S., R. 23 E.,
Secs. 1 and 3.

The needed right-of-way is a portion of applicant's gas gathering system located in Grand County, Utah.

The purpose of this notice is to inform the public that the Bureau will be proceeding with the preparation of environmental and other analyses necessary for determining whether the application should be approved, and if so, under what terms and conditions.

Interested persons should express their interest and views to the Moab District Manager, Bureau of Land Management, P.O. Box 970, Moab, Utah 84532.

Dell T. Waddoups,

Chief, Branch of Lands and Minerals Operations.

National Register of Historic Places; Notification of Pending Nominations

Nominations for the following properties being considered for listing in the National Register were received by the Heritage Conservation and Recreation Service before June 1, 1979. Pursuant to section 60.13(a) of 36 CFR Part 60, published in final form on January 9, 1976, written comments concerning the significance of these properties under the National Register criteria for evaluation may be forwarded to the Keeper of the National Register, Office of Archeology and Historic Preservation, U.S. Department of the Interior, Washington, DC 20240. Written comments or a request for additional time to prepare comments should be submitted by June 22, 1979.

Charles A. Flemington,
Acting Keeper of the National Register.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 79-10

David H. Blanck and Co., Philadelphia, Pennsylvania; Hearing

Notice is hereby given that on March 21, 1979, the Drug Enforcement Administration, Department of Justice, issued to David H. Blanck and Company, Philadelphia, Pennsylvania, an Order To Show Cause as to why the Drug Enforcement Administration should not deny Respondent's application for registration, executed June 19, 1978, under Section 303 of the Controlled Substances Act (21 U.S.C. 823).

Thirty days having elapsed since the said Order To Show Cause was received by Respondent, and written request for a hearing having been filed with the Drug Enforcement Administration, notice is hereby given that a hearing in this matter will be held commencing at 10:00 a.m. on Tuesday, June 19, 1979, in the Hearing Room, Room 1210, Drug Enforcement Administration, 1405 I Street, N.W., Washington, D.C.

Dated: June 5, 1979.

Peter B. Bensinger,
Administrator, Drug Enforcement Administration.

DEPARTMENT OF LABOR

Employment and Training Administration

Youth Community and Conservation Projects (YCCIP) and Youth Employment and Training Programs (YETP) for Youth Who are Members of Migrant and Other Seasonally Employed Farmworkers

AGENCY: Employment and Training Administration.

ACTION: Announcement of Potential Sponsors.

SUMMARY: The following are the applicants selected as potential sponsors to operate programs for youth who are members of migrant and other seasonally employed farmworker families—for program year 1979. Each applicant so designated shall be notified in writing of the amount of funds, target areas to be served, items to be negotiated and the time and place of negotiations. These sponsors are designated under section 423(b) of CETA; a total of $12.1 million for YETP and $2.1 million for YCCIP.

EFFECTIVE DATE: July 1, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Lindsay L. Campbell, Acting Director, Office of Farmworker Programs, U.S. Department of Labor, 601 D Street, N.W., Room 6306 Patrick Henry Building, Washington, D.C. 20213. Telephone: (202) 376-6128.

BILLING CODE 4510-28-M

Migrant and Seasonal Farmworker Programs; Acceptance of Preapplications Beyond Deadline Dates

AGENCY: Employment and Training Administration, Labor.

ACTION: . Notice.

SUMMARY: A Notice in the Federal Register of April 13, 1979, stated that Preapplication forms for Fiscal Year 1980 Section 303 funding must be postmarked no later than June 1. Applicants are hereby informed that the Department will accept Preapplication forms which are postmarked June 1 through June 25.

FOR FURTHER INFORMATION CONTACT: Lindsay L. Campbell, Acting Director, Office of Farmworker Programs, 601 D Street NW., Room 6306, Washington, D.C. 20213, Phone 202-376-6128.

SUPPLEMENTARY INFORMATION: The Notice of April 13, 1979, stated that all states and Puerto Rico are open for competition in Fiscal Year 1980 and that Preapplications and Funding Requests had to be postmarked June 1 and July 15 respectively. The Department is hereby notifying all interested organizations that it will continue to accept Preapplications until but not later than June 25, 1979. The deadline for Funding Requests remains July 15, 1979. This action results from the delay in the publication of the CETA, Title III, Section 303 regulations, which were published in the Federal Register of May 25, 1979.

Preapplications are to be sent to the address above. The Department would greatly appreciate it if Preapplications are submitted as quickly as possible in order to arrange for the workload associated with this grant funding process. Preapplications submitted prior to June 1 will naturally be maintained by the Office of Farmworker Programs as the Official Notice of Intent to apply. Applicants are cautioned that Preapplications must also be sent to all appropriate state and area clearinghouses. Addresses of area clearinghouses can be obtained from state clearinghouses. It is the responsibility of the applicant to assure that all clearinghouses with responsibility for reviewing applications for the area involved are sent Preapplication forms. Three copies of the Funding Request must be sent by registered mail to the address above. At the same time two copies must also be sent to the Department's Regional Office and one copy to each of the following:

(a) the state and/or area clearinghouse(s); and

(b) all eligible applicants which request an opportunity for review and comment as provided in Section 689.205 of the Section 303 regulations. Applicants must specify the action taken to comply with these requirements in an attachment to the copy of the Form 424 which is included in their Funding Request.

Applicants which have not previously received Section 303 funds are invited to attend a training conference in Washington, D.C., June 13, 1979, to be held in the multi-purpose room in the Patrick Henry Building, 601 D Street NW.

Signed at Washington, D.C., this 4th day of June, 1979.

Lamond Godwin,

Administrator, Office of National Programs.

BILLING CODE 4510-28-M

Mine Safety and Health Administration

[Docket No. M-79-27-C]

Action Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Action Coal Company, P.O. Box 835, Elkhorn City, Kentucky 41522, has filed a petition to modify the application of 30 CFR 75.1710 (canopies), to its No. 1 Mine, located in Pike County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Public Law 95-164.

The substance of the petition follows:

1. The petition concerns the use canopies on electric face equipment in the petitioner's mine.

2. The petitioner is mining in coal seam heights ranging from 44 to 50 inches and is constantly encountering undulations in the coal bed.

3. If canopies were installed low enough to prevent possible destruction of roof support, only 23 inches of vertical space would exist in the equipment operator's compartment.

4. This restricted space would limit the vision of the equipment operator, creating hazards for the operator and other miners in the area.

5. For these reasons, the petitioner believes that the application of the standard to its mine would result in a diminution of safety to its miners.

Request for Comments

Persons interested in this petition may furnish written comments on or before July 12, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: June 4, 1979.

Robert B. Lagather,

Assistant Secretary for Mine Safety and Health.

[FR Doc. 79-18213 Filed 6-11-79; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-79-18-M]

Climax Molybdenum Co.; Petition for Modification of Application of Mandatory Safety Standard

Climax Molybdenum Company, 13949 West Colfax Avenue, Golden, Colorado 80401, has filed a petition to modify the application of 30 CFR 57.9-22 (berms) to its Climax Mill located in Climax, Colorado. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

The substance of the petition follows:

1. The petition concerns the installation of berms along a 3,900 foot stretch of roadway on the petitioner's property.

2. The roadway averages 30 feet in width, measuring 20 feet at its narrowest point.

3. The petitioner states that the installation of berms or guards on the outer banks of the roadway would create the following hazards:

(a) The roadway would become so narrow that safe passage could not be guaranteed for the movement of traffic.

(b) Approximately 256 inches of snow falls annually in the area. Berms or guards would prevent effective and efficient removal of snow and ice.

(c) Run-off water would be channeled down the roadway into a parking lot where freezing would occur, creating slippage hazards.

4. As an alternative, the petitioner proposes the following:

(a) Warning signs consisting of 15 foot lengths of pipe covered with fluorescent paint will be installed at regular intervals along the outer edge of the roadway so that men and equipment do not proceed over the edge. During the months when snow is not present, these pieces of pipe will be connected by a cable positioned three feet above the roadway (when snow is present, a cable would hamper snow removal).

(b) Traffic flow control signs as outlined in the petition will be installed at appropriate locations along the roadway.

5. The petitioner believes that this alternative will achieve no less protection than that provided by the standard.

Request for Comments

Persons interested in this petition may furnish written comments on or before July 12, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: June 4, 1979.

Robert B. Lagather,

Assistant Secretary for Mine Safety and Health.

BILLING CODE 4510-43-M

[Docket No. M-79-15-C]

Kentucky Heritage Coal, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Kentucky Heritage Coal, Inc., Box 102, Matewan, West Virginia 25678 has filed a petition to modify the application of 30 CFR 75.1710 (canopies) to its Nos. 2 and 3 Mines, located in Pike County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Pub. L. 95-164.

The substance of the petition follows:

1. The petition concerns the use of cabs or canopies on battery-powered tractors in the petitioner's mines.

2. The petitioner states that cabs or canopies would restrict the vision of its tractor operators.

3. For this reason, the petitioner believes that the application of the standard to its tractors would result in a reduction of safety for its miners.

Request for Comments

Persons interested in this petition may furnish written comments on or before July 12, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

Dated: June 4, 1979.

Robert B. Lagather,

Assistant Secretary for Mine Safety and Health.

BILLING CODE 4510-43-M

[Docket No. M-79-25-C, et al.]

Wyomac Coal Company, Inc.; Petitions for Modification of Application of Mandatory Safety Standard

Wyomac Coal Company, Inc., Post Office Drawer G, Welch, West Virginia 24801 has filed separate petitions to modify the application of 30 CFR 75.1710 (canopies), to its following mines: Virginia Crews #2 (M-79-68-C), Virginia Crews #4 (M-79-69-C), Twin Branch (M-79-73-C), Banacek (M-79-74-C), Missy (M-79-75-C), Cannon (M-79-76-C) and Leslie (M-79-77-C) located in McDowell County, West Virginia; and Lynco #2 (M-79-71-C) and Carol (M-79-72-C) located in Wyoming County, West Virginia. These petitions are filed under section 101(c) of the Federal Mine Safety and Health Act of 1977, Public Law 95-164.

The substance of the petitions follows:

1. The petitioner believes that the use of cabs or canopies on electric face equipment in its mines would reduce the safety of its miners for the following reasons:

(a) Cabs or canopies do not allow the operator sufficient visibility for safe equipment operation while remaining under the cab or canopy.

(b) Cabs or canopies collide with the roof in areas of uneven tops or bottoms.

(c) A cab or canopy does not allow an equipment operator to rapidly escape from its confines in the event of an emergency.

2. To avoid these safety problems, the petitioner proposes the following alternate method:

(a) The petitioner will replace its present electrical face equipment as it wears out with lower profile equipment. Cabs or canopies will be installed on this equipment to the extent feasible to avoid the safety problems listed above.

(b) If the petitioner's engineers and safety specialist find a workable design for cabs or canopies, the design will be used under actual working conditions on an experimental basis for evaluation by the petitioner, union personnel and MSHA. If the design proves successful, the petitioner will retrofit its equipment with cabs or canopies so designed.

(c) In addition to complying with the roof control plan in effect at each of its mines, the petitioner will reinstruct all its face workers, section supervisors and inspection personnel in roof and rib fall recognition and prevention techniques, as well as safe equipment operation.

Request for Comments

Persons interested in these petitions may furnish written comments on or before July 12, 1979. Comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petitions are available for inspection at that address.

Dated: June 5, 1979.

Robert B. Lagather,

Assistant Secretary for Mine Safety and Health.

BILLING CODE 4510-43-M

Summary of Decisions Granting in Whole or in Part Petitions for Modification

AGENCY: Mine Safety and Health Administration (MSHA), Department of Labor.

ACTION: Notice of affirmative decisions issued by the Administrators for Coal Mine Safety and Health and Metal and Nonmetal Safety and Health on petitions for modification of the application of mandatory safety standards.

SUMMARY: Under section 101(c) of the Federal Mine Safety and Health Act of 1977, the Secretary of Labor may modify the application of a mandatory safety standard to a mine if the Secretary determines either or both of the following: that an alternative method exists at the petitioner's mine that will guarantee no less protection for the miners affected than that provided by the standard, or that the application of the standard to the petitioner's mine will result in a diminution of safety to the affected miners.

Summaries of petitioners received by the Secretary appear periodically in the Federal Register. Final decisions on these petitions are based upon the petitioner's statement, comments and information submitted by interested persons and a field investigation of the conditions at the petitioner's mine. The Secretary has granted or partially granted the requests for modification submitted by the petitioners listed below. In some instances the decisions are conditioned upon the petitioner's compliance with stipulations stated in the decision.

FOR FURTHER INFORMATION: The petitions and copies of the final decisions are available for examination by the public in the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, 4015 Wilson Boulevard, Arlington, Virginia 22203.

Dated: June 6, 1979.

Robert B. Lagather,

Assistant Secretary for Mine Safety and Health.

Affirmative Decisions on Petitions for Modification

Docket No.	FR notice	Petitioner	Regulation affected	Summary of findings
M-78-30	40 FR 58672	Rochester & Pittsburgh Coal Co	30 CFR 75.1101-8	Use of a single branch line of sprinklers on belt conveyors considered acceptable alternative method of fire control. Granted with conditions.
M-78-87	40 FR 5326	Maple Meadow Mining Company	30 CFR 75.326	Due to a high rate of methane liberation and conditions preventing the development of additional airways, the use of belt entries as intake airways considered acceptable alternative method of ventilation. Granted with conditions.
M-78-160	41 FR 41937	McClure River Coal Company	30 CFR 75.1710	Use of cabs or canopies on petitioner's scoops would result in diminution of safety in current low mining heights. Granted in part with conditions.
M-78-366	41 FR 34802	L & M Coal Company	30 CFR 75.1710	Use of cabs or canopies on petitioner's continuous miner would result in diminution of safety in current low mining heights. Granted in part with conditions.
M-78-430	41 FR 22267	Mullins Coal Co., of Virginia	30 CFR 75.1710	Use of cabs or canopies on petitioner's continuous miner, shuttle cars, roof bolting machine and scoop would result in diminution of safety in current low mining heights. Granted with conditions.
M-78-496	41 FR 48148	Rita Coal Company	30 CFR 75.1710	Use of cabs or canopies on petitioner's shuttle cars and scoop would result in a diminution of safety in prescribed areas. Granted in part with conditions.
M-78-508	41 FR 39001	McCoy Elkhorn Coal Corp	30 CFR 75.1710	Use of cabs or canopies on petitioner's loading machine would result in a diminution of safety in current low mining heights. Granted in part with conditions.
M-78-582	41 FR 46586	E & C Coal Co., Inc	30 CFR 75.1710	Use of cabs or canopies on petitioner's continuous miner and shuttle cars would result in diminution of safety in current low mining heights. Granted in part with conditions.
M-78-664	41 FR 46806	South East Coal Co	30 CFR 75.1710	Use of cabs or canopies on petitioner's shuttle car would result in a diminution of safety in current low mining heights in prescribed area of petitioner's mine. Granted in part with conditions.
M-78-678	41 FR 47529	Harper Valley Coal Co., Inc	30 CFR 75.1710	Use of cabs or canopies on petitioner's shuttle cars would result in diminution of safety in current low mining heights. Granted in part with conditions.
M-78-689	41 FR 52910	V.P. No. 5 Mining Co	30 CFR 75.326	Due to a high rate of methane liberation and conditions limiting the development of additional airways, double split face ventilation involving belt entries considered acceptable alternative method of ventilation. Granted with conditions.
M-78-691	41 FR 52920	V.P. No. 5 Mining Co	30 CFR 75.1103	Use of a carbon monoxide detection system considered acceptable alternative automatic fire warning device. Granted with conditions.
M-78-695	41 FR 50462	Meggard Coal Co., Inc	30 CFR 75.1710	Use of cabs or canopies on petitioner's continuous mining machine and roof bolting machine would result in diminution of safety in current low mining heights. Granted with conditions.
M-77-119	41 FR 14758	Electromet Fuel	30 CFR 75.1710	Use of cabs or canopies on petitioner's roof bolting machine and shuttle cars would result in diminution of safety in current low mining heights. Granted with conditions.
M-77-120	41 FR 14758	J & J Mining Co., Inc	30 CFR 75.1710	Use of cabs or canopies on petitioner's roof bolting machine and shuttle cars would result in diminution of safety in current low mining heights. Granted with conditions.
M-77-186	41 FR 21331	Alrosha Coal Co., Inc	30 CFR 77.1605(k)	Proposed maintenance procedures, traffic control system and safeguards for petitioner's elevated roadway considered acceptable alternative to berms for road control. Granted with conditions.

Affirmative Decisions on Petitions for Modification—Continued

Docket No.	FR notice	Petitioner	Regulation affected	Summary of findings
M-77-189	41 FR 31669	United States Steel Corp	30 CFR 75.305	Due to poor roof conditions, weekly inspections of specified return airways would result in a diminution of safety. Petitioner's proposal to establish air measurement checkpoints considered acceptable alternative of ventilation inspection. Granted in part with conditions.
M-77-191	41 FR 43697	Ranger Fuel Corp	30 CFR 75.326	Due to a high rate of methane liberation and conditions limiting the development of additional airways, proposed split face ventilation involving belt entries considered acceptable alternative method of ventilation. Granted with conditions.
M-77-225	41 FR 40469	McCoy Elkhorn Coal Corp	30 CFR 75.1710	Use of cabs or canopies on petitioner's continuous mining machine and scoops would result in diminution of safety in current low mining heights. Granted in part with conditions.
M-77-235	41 FR 40469	McElkhorn Coal Corp	30 CFR 75.1710	Use of cab or canopy on petitioner's roof bolting machine would result in diminution of safety in current low mining heights. Granted with conditions.
M-77-254	41 FR 47669	Mill Branch Mining Co., Inc	30 CFR 75.1710	Use of cabs or canopies on petitioner's loading machine, coal drill, scoops, shuttle cars and roof bolting machines would result in a diminution of safety in current low mining heights. Granted with conditions.
M-77-260	41 FR 1014	Imperial Coals Inc	30 CFR 77.1605(k)	Berms or guards on the outer bank of the petitioner's elevated roadway would limit usable driving area, impair drainage and hamper snow removal, resulting in a diminution of safety. Granted with conditions.
M-78-4	41 FR 57662	Spring Ridge Coal Company	30 CFR 75.1710	Use of cabs or canopies on petitioner's scoops and cutting machines would result in a diminution of safety in current low mining heights. Granted with conditions.
M-78-13	43 FR 62217	Kentucky Carbon Corp	30 CFR 75.300	Forced mechanical ventilation in petitioner's refuse belt entry would cause roof deterioration and result in a diminution of safety. Natural ventilation considered acceptable alternative method of ventilation. Granted with conditions.
M-78-17	43 FR 62217	Peerless Eagles Coal Co	30 CFR 75.1710	Use of cabs or canopies on petitioner's cutting machine and roof drills would result in a diminution of safety in current low mining heights. Granted in part with conditions.
M-78-20	42 FR 64445	Lovilia Coal Company	30 CFR 75.1710	Use of cabs or canopies on petitioner's shuttle cars, loading machines, cutting machines and roof bolters would result in a diminution of safety in current low mining heights. Granted in part with conditions.
M-78-22	43 FR 1013	D. C. Coal Company, Inc	30 CFR 77.1605(k)	Berms on petitioner's elevated roadway would limit usable driving area and interfere with drainage, resulting in a diminution of safety. Proposed maintenance procedures and supervised traffic system considered acceptable alternative method of road control. Granted.
M-78-25	43 FR 1015	Sewell Coal Company	30 CFR 75.1105	Proposed fire prevention procedures and fire fighting equipment for petitioner's locomotive repair station considered acceptable alternative to coursing air used to ventilate the station directly to a return airway. Granted with conditions.
M-78-31	43 FR 8163	United States Steel Corp	30 CFR 77.1914	Proposed safeguard procedures for use of nonpermissible transformer to power blind shaft borer considered acceptable alternative to use of only permissible transformers below collar of shaft. Granted with conditions.
M-78-42	43 FR 46664	M.S.W. Coal Company	30 CFR 75.301	Proposed airflow reduction in petitioner's anthracite mine, which would maintain a safe and healthful atmosphere, considered acceptable alternative method of ventilation. Granted with conditions.
M-78-78-C	43 FR 30821	Pralley Coal Company	30 CFR 75.301	Proposed airflow reduction in petitioner's anthracite mine, which would maintain a safe and healthful atmosphere, considered acceptable alternative method of ventilation. Granted with conditions.
M-78-78-C	43 FR 34650	Solar Fuel Company	30 CFR 75.1100	Due to wet conditions, proposed use of dry chemical-type fire extinguishers instead of rock dust considered acceptable alternative method of fire protection. Granted.
M-78-81-C	43 FR 35799	U.M.W.A. Local Union No. 1599	30 CFR 75.1710	Use of cabs or canopies on petitioner's continuous miners and shuttle cars would result in diminution of safety in current low mining heights. Granted in part with conditions.
M-78-86-C	43 FR 46562	K.L.M. Coal Company	30 CFR 75.301	Proposed airflow reduction in petitioner's anthracite mine, which would maintain a safe and healthful atmosphere, considered acceptable alternative method of ventilation. Granted with conditions.
M-78-88-C	43 FR 46564	United States Steel Corp	30 CFR 75.1700	Proposed plan to plug and mine through abandoned oil and gas wells considered acceptable alternative to leaving coal barriers around the wells. Granted with conditions.
M-78-92-C	43 FR 46059	Consolidation Coal Company	30 CFR 75.1101-8	Use of a single branch line of automatic sprinklers on belt conveyors considered acceptable alternative method of fire control. Granted with conditions.
M-78-96-C	43 FR 46564	Westmoreland Coal Company	30 CFR 75.1710	Use of roof bolting in specified areas would result in a diminution of safety in current low mining heights. Granted in part with conditions.
M-78-98-C	43 FR 46563	Shelly Coal Company	30 CFR 75.301	Proposed airflow reduction in petitioner's anthracite mine, which would maintain a safe and healthful atmosphere, considered acceptable alternative method of ventilation. Granted with conditions.

Affirmative Decisions on Petitions for Modification—Continued

Docket No.	FR notice	Petitioner	Regulation affected	Summary of findings
M-78-99-C	43 FR 50273	Valley Camp Coal Company	30 CFR 75.1403-8	Due to adverse rib and roof conditions, petitioner's proposal to construct shelter holes at intervals greater than 105 feet and to implement safeguard procedures in these areas considered acceptable alternative method of shelter hole construction. Granted with conditions.
M-78-103-C	43 FR 55478	United Pocahontas Coal Company	30 CFR 75.305	Due to poor roof conditions, petitioner's proposal to establish air measurement checkpoints on specified return airways considered acceptable alternative to making weekly inspections of the airways. Granted with conditions.
M-78-104-C	43 FR 54305	Consolidation Coal Company	30 CFR 75.1100	Due to freezing conditions in winter, use of dry-pipe fire suppression system instead of a charged waterline system considered acceptable alternative method of fire protection. Granted with conditions.
M-78-105-C	43 FR 49581	Gateway Coal Company	30 CFR 75.1105	Proposed dry-chemical deluge fire suppression system for petitioner's transformer stations considered acceptable alternative to coursing air passing through the stations directly to return airways. Granted with conditions.
M-78-115-C	43 FR 56951	Garden Creek Pocahontas Co	30 CFR 77.214	Proposal to cover three abandoned mine openings and an auger-mined coal seam outcrop with compact, non-combustible soil and then to construct refuse piles over these areas considered acceptable alternative method of refuse pile placement. Granted with conditions.
M-78-116-C	43 FR 55475	Marrowbone Development Co	30 CFR 75.1700	Proposed plan to plug and mine through abandoned oil and gas wells considered acceptable alternative method to leaving coal barriers around the wells. Granted with conditions.
M-78-117-C	43 FR 55473	Bethlehem Mines	30 CFR 75.305	Due to poor roof conditions, petitioner's proposal to establish air measurement checkpoints on specified return airways considered acceptable alternative to making weekly inspections of the airways. Granted with conditions.
M-78-118-C	43 FR 55474	Consolidation Coal Co	30 CFR 75.305	Due to poor roof conditions, petitioner's proposal to establish air measurement checkpoints on specified return airways considered acceptable alternative to making weekly inspections of the airways. Granted with conditions.
M-78-31-M	43 FR 29042	Rio Blanco Oil Shale Co	30 CFR 57.4-66	Proposed procedures relating to use of fire in underground shale oil production retorts considered acceptable alternative method of fire protection. Granted with conditions.
M-78-33-M	43 FR 47795	Idarado Mining Company	30 CFR 57.19-83	Operation of petitioner's electric hoist without a motor drive torque device but with an overtravel warning horn considered acceptable alternative method of hoist control. Granted with conditions.
M-78-39-M	43 FR 49562	Hitchcock Corporation	30 CFR 57.11-50	Due to geological conditions in the vicinity of the petitioner's mine, a single shaft escapeway and proper maintenance of conditions within the mine considered acceptable alternative to presence of two separate escapeways. Granted with conditions.
M-78-40-M	43 FR 47795	Jessie S. Morie & Son, Inc	30 CFR 56.16-14	Operation of petitioner's overhead crane without an up-travel switch on the clam bucket considered acceptable method of crane operation. Granted with conditions.
M-78-43-M	43 FR 54305	Demar Boren	30 CFR 57.19-3	Operation of petitioner's man-hoist with multiple V-belt drive considered acceptable alternative method of man-hoisting. Granted with conditions.
M-78-44-M	43 FR 51469	United States Steel Corp	30 CFR 56.12-16	Use of numbered locks on power switches by maintenance personnel in addition to operation locks considered acceptable alternative to signed warning notices on the switches. Granted.
M-78-45-M	43 FR 47795	New Jersey Zinc Company	30 CFR 57.19-11	Due to structural configuration of petitioner's hoist, extension of the hoist's drum flanges would result in a diminution of safety. Granted with conditions.
M-78-49-M	43 FR 54304	American Gilsonite Co	30 CFR 57.19-3	Operation of petitioner's man-hoist multiple V-belt drive considered acceptable alternative method of man-hoisting. Granted with conditions.
M-78-50-M	43 FR 49560	Cities Service Company	30 CFR 57.19-18	Use of two independent upper limit switches on hoist, in addition to a manually-operated overtravel by-pass switch, considered acceptable alternative method of overtravel control on hoist. Granted.
M-78-57-M	43 FR 54304	Demar Boren	30 CFR 57.19.3	Operation of petitioner's man-hoist with multiple V-belt drive considered acceptable alternative method of man-hoisting. Granted with conditions.
M-78-54-M	43 FR 58134	Climax Molybdenum Company	30 CFR 57.19-22	Petitioner's proposed procedures for attaching wire rope to hoist drum considered acceptable alternative method of wire rope attachment. Granted with conditions.

BILLING CODE 4510-43-M

Occupational Safety and Health Administration

Puerto Rico State Standards; Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State Plan which has been approved in accordance with section 18 (c) of the Act and 29 CFR Part 1902. On August 30, 1977, notice was published in the Federal Register (42 FR 43628) of the approval of the Puerto Rico plan and the adoption of Subpart FF to Part 1952 containing the decision.

The Puerto Rico plan provides for the adoption of Federal standards as State standards by reference. Section 1953.20 of 29 CFR provides that "where any alteration in the Federal program could have an adverse impact on the 'at least as effective as' status of the State program, a program change supplement to a State plan shall be required."

In response to a Federal standard change, the State has submitted by letter dated March 28, 1979, from Assistant Secretary John Cinque to Assistant Regional Administrator Richard Andree, and incorporated as part of the plan, a State standard comparable to the Occupational Safety and Health Administration Permanent Standard for Arcylonitrile 29 CFR 1910.1045, as published in the Federal Register (43 FR 45762) dated October 3, 1978. This standard which is contained in the Purato Rico Regulations, Number Four (equivalent to 29 CFR Part 1910) was promulgated by resolution adopted by the Puerto Rico Department of Labor and Human Resources on July 20, 1978, pursuant to the Puerto Rico Act Number 16 and Chapter 43 of the Puerto Rico Rules and Regulations Act of 1958.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standard it has been determined that the State standard is identical to the Federal standard and accordingly is hereby approved.

3. *Location of supplement for inspection and copying.* A copy of the standard supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 3445, 1515 Broadway, New York, New York 10036; Puerto Rico Department of Labor and Human Resources, 414 Barbosa Avenue, Hato Rey, Puerto Rico 00917; and the Technical Data Center, Room N2439R, 200 Constitution Avenue, NW, Washington, D.C. 20210.

4. *Public Participation.* Under 29 CFR 1953.2 (c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws: The Assistant Secretary finds that good cause exists for not publishing the supplement to the Puerto Rico State plan as a proposed change and making the Assistant Regional Director's approval effective upon publication for the following reasons:

1. The standards are identical to the Federal standards which were promulgated in accordance with Federal law meeting requirements for public participation.

2. The standards were adopted in accordance with the procedural requirement of State law and further paticipation would be unnecessary.

The decision is effective June 12, 1979.

(Sec. 18 Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667)).

Signed at New York City, New York, this seventh day of May 1979.

Alfred Barden,

Regional Administrator.

[FR Doc. 79-18287 Filed 6-11-79; 8:45 am]

BILLING CODE 4510-26-M

Virginia State Standards; Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On September 28, 1978, notice was published in the Federal Register (41 FR 42655) of the adoption of Subpart EE to Part 1952 containing the decision.

The Virginia plan provides for the adoption of Federal standards as State standards after public hearing. Section 1952.373 of Subpart EE sets forth the State's schedule for the adoption of Federal standards. By letter dated November 11, 1978, from Robert F. Beard, Jr., Commissioner, Virginia Department of Labor and Industry to David H. Rhone, Regional Administrator and incorporated as part of the plan, the State submitted State standards comparable to 29 CFR Part 1928 for Agriculture as published in the Federal Register (41 FR 10196, 22297) dated March 9, 1976, and June 2, 1976 respectively.

These standards were promulgated after hearings held on November 15, 1978 by the Virginia Occupational Safety and Health Codes Commission, pursuant to the Administrative Process Act, Chapter 1.1:1 of Title 9 of the Code of Virginia.

2. *Decision.* Having reviewed the State submission in comparision with the Federal standards it has been determined that the State standards are identical to the Federal standards and accordingly should be approved.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Suite 2100, 3535 Market Street, Philadelphia, PA 19104; the Office of the Commissioner, 205 North Fourth Street, Richmond, Virginia 23241; and the Technical Data Center, Room N2439R, Third and Constitution Avenues, NW., Washington, DC 20210.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Virginia State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards are identical to the Federal standards which were promulgated in accordance with Federal law including meeting requirements for public participation.

2. The standards were adopted in accordance with the procedural

requirements of State law and further participation would be unnecessary.

This decision is effective June 12, 1979.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667)).

Signed at Philadelphia, PA this 19th of December, 1978.

David H. Rhone,

Regional Administrator.

[FR Doc. 79-18208 Filed 6-11-79; 8:45 am]

BILLING CODE 4510-26-M

Virginia State Standards; Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a state plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On September 28, 1976, notice was published in the Federal Register (41 FR 42655) of the approval of the Virginia plan and the adoption of Subpart EE to Part 1952 containing the decision.

The Virginia plan provides for the adoption of Federal standards as State standards after Public Hearing. Section 1952.373 of Subpart EE sets forth the State's schedule for the adoption of Federal standards. By letter dated November 14, 1978, from Robert F. Beard, Jr., Commissioner, Virginia Department of Labor and Industry to David H. Rhone, Regional Administrator and incorporated as part of the plan, the State submitted State standards comparable to 29 CFR Part 1910, Subpart T for Commercial Diving Operations, as published in the Federal Register (42 FR 37668) dated July 22, 1977.

These standards were promulgated after hearings held on November 1, 1977 by the Virginia Occupational Safety and Health Codes Commission, pursuant to the Administration Process Act, Chapter 1.1:1 of Title 9 of the Code of Virginia.

2. *Decisions.* Having reviewed the State submission in comparison with the Federal standards it has been determined that the State standards are identical to the Federal standards and accordingly should be approved.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Suite 2100, 3535 Market Street, Philadelphia, PA 19104; the Office of the Commissioner, 205 North Fourth Street, Richmond, Virginia 23241; and the Technical Data Center, Room N2439R, Third and Constitution Avenue, NW, Washington, DC 20210.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Virginia State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards are identical to the Federal standards which were promulgated in accordance with Federal law including meeting requirements for public participation.

2. The standards were adopted in accordance with the procedural requirements of State law and further participation would be unnecessary.

This decision is effective June 12, 1979.

(Sec. 18, Pub. L. 91-596, 84 stat. 1608 (29 U.S.C. 667)).

Signed at Philadelphia, PA this 19th of December, 1978.

BILLING CODE 4510-26-M

Virginia State Standards; Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator), under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4), will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On September 28, 1976, notice was published in the Federal Register (41 FR 42655) of the approval of the Virginia State plan and the adoption of Subpart EE to Part 1952 containing the decision.

The Virginia State plan provides for the adoption of Federal standards as State standards after public hearing. Section 1952.373 of Subpart EE sets forth the State's schedule for the adoption of Federal Standards. By letter dated March 7, 1979, from Commissioner Robert F. Beard, Jr., Virginia Department of Labor and Industry, to David H. Rhone, Regional Administrator, and incorporated as part of the plan, the State submitted State standards comparable to (1) 29 CFR 1910.19(e), 1910.1018, and amendment to 29 CFR 1910.1000 (Title Z-1) pertaining to Inorganic Arsenic, as published in the Federal Register (43 FR 19624) dated May 5, 1978; (2) 29 CFR 1910.20, pertaining to Preservation of Records, as published in the Federal Register (43 FR 31309) dated July 19, 1978, and republished in the Federal Register (43 FR 31329) dated July 21, 1978; (3) 29 CFR 1910.1044 pertaining to 1,2-dibromo-3-chloropropane, as published in the Federal Register (42 FR 45544) dated September 9, 1977; and (4) amendment to 29 CFR 1926.605, pertaining to Commercial Diving Operations under Marine operations and equipment, as published in the Federal Register (42 FR 37674) dated July 22, 1977.

These standards, which are contained in the Virginia Safety and Health Codes, were promulgated after public hearings held on January 4, 1978, pursuant to the Code of Virginia, Title 40.1, Section 40.1-22.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are identical to the Federal standards and, accordingly, should be approved.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, 3535 Market Street, Suite 2100, Philadelphia, PA 19104; Office of the Commissioner of Labor and Industry, 205 North Fourth Street, Richmond, VA 23241; and the Technical Data Center, Room N2439R, Third and Constitution Avenue, NW, Washington, DC 20210.

4. *Public participation.* Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Virginia State plan as a proposed change and making the Regional

Administrator's approval effective upon publication for the following reasons.

1. The standards are identical to the Federal standards which were promulgated in accordance with Federal law including meeting requirements for public participation.

2. The standards were adopted in accordance with the procedural requirements of State law and further participation would be unnecessary.

This decision is effective June 12, 1979.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667)).

Signed at Philadelphia, PA this 15th day of March, 1979.

David H. Rhems,
Regional Administrator.

Office of the Solicitor

Privacy Act; Notice of Systems of Records

AGENCY: Office of the Secretary, Department of Labor.

ACTION: Notice of Systems of Records.

SUMMARY: Pursuant to 5 U.S.C. 552a(e)(4) and (11), sections of the Privacy Act, the Department of Labor hereby publishes for comment the establishment of systems of records DOL/LMSA-20, "Redwood Employee Protection Program Application File". Consistent with Title II of Pub. L. 95-250, dated March 27, 1978, the Department of Labor has assumed full responsibility for all Redwood Employee Protection Program activities. Pursuant to Section 213(d)(2) of Pub. L. 95-250 the Secretary has delegated to LMSA responsibility for administration of the Program. To facilitate application for benefits a program office has been set up in Eureka, California. This office will maintain records subject to the Privacy Act of 1974 and be responsible for accepting and forwarding requests from members of the public under that Act.

EFFECTIVE DATE: July 12, 1979, unless otherwise published. Comments may be submitted to:

Redwood Employee Protection Program, Division of Employee Protections, Room N-5639, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20216.

FOR FURTHER INFORMATION CONTACT: Mr. Paul F. Pothin of the department at (202) 523-6495. (This is not a toll-free number.)

Dated: June 8, 1979.
Ray Marshall,
Secretary of Labor.

DOL/LMSA-20

SYSTEM NAME:

LMSA, Division of Employee Protections.

SYSTEM LOCATION:

Redwood Program Office, Federal Office Building, Room 101, 5th & H Streets, Eureka, California 95501.

CATEGORY OF INDIVIDUALS (COVERED BY THE SYSTEM)

Redwood Employee Protection Program Applicants.

CATEGORY OF RECORDS IN THE SYSTEM:

Financial, medical, and personal information concerning applicant.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Pub. L. 95-250.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Not disclosed to public. Used as supporting and background information in eligibility determinations for Program benefits. Information can be shared with the following agencies:

California Economic Development Department.
All participating Health & Welfare Trusts, Administrators, and Pension Insurance Carriers.
Prospective employers of affected employees.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

3 x 5 index cards; letter size folders.

RETRIEVABILITY:

Filed alphabetically, manually, and by Social Security Number.

SAFEGUARDS:

Maintained in Eureka branch office of LMSA, accessible to Program personel only.

RETENTION AND DISPOSAL:

September 30, 1980.

SYSTEMS MANAGER(S) AND ADDRESS:

Mr. Michael Venuto, Program Officer, Redwood Program Office, Federal Office Building, Room 101, 5th & H Streets, Eureka, California 95501.

NOTIFICATION PROCEDURE:

Address as above.

RECORD ACCESS PROCEDURE:

Written requests should be submitted to: Ms. Beatrice Burgoon, Disclosure Officer; Room N-5653; U.S. Department of Labor; 200 Constitution Avenue NW., Washington, D.C. 20216.

CONTESTING RECORD PROCEDURE:

See "Record access procedures."

RECORD SOURCE CATEGORIES:

Individual applicants, employer health and welfare trusts, California Economic Development Department.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 79-61]

NASA Advisory Council (NAC), Aeronautics Advisory Committee (AAC); Meeting

The NAC Aeronautics Advisory Committee will meet June 27-29, 1979 in the Auditorium of Building #3, Goddard Space Flight Center, Greenbelt, MD. The meeting will be open to the public.

The Committee was established to advise NASA senior management through the NAC in the area of aeronautical research and technology. The Chairperson is Dr. Robert G. Loewy. There are currently 49 members on the Committee. Following is the approved agenda for the meeting:

Agenda

June 27, 1979

8:30 a.m.—Registration
8:30 a.m.—Introductory Remarks
9:10 a.m.—Subcommittee Chairperson's Reports
1:45 p.m.—NASA Aeronautical Research and Technology FY 1981-86 5-Year Plan Review
5:00 p.m.—Adjourn

June 28, 1979

8:30 a.m.—Group Review and Discussion of NASA Aeronautical FY 1981-86 5-Year Plan Elements
5:00 p.m.—Adjourn

June 29, 1979

8:30 a.m.—Reports by Group Leaders of Recommendations and Comments on the NASA Aeronautical FY 1981-86 5-Year Plan
12:00 NOON—Adjourn

For further information contact Mr. C. Robert Nysmith, Executive Secretary of the Committee, Code RP-4, NASA

Headquarters, Washington, DC 20546. Telephone 202/755-3252.

June 6, 1979.

Russell Ritchie,

Acting Associate Administrator for External Relations.

BILLING CODE 7510-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Radiological Effects and Site Evaluation; Meeting

The ACRS Subcommittee on Radiological Effects and Site Evaluation will hold an open meeting on June 27, 1979 in Room 1046, 1717 H St., N.W., Washington, D.C. 20555 to discuss changes in the NRC research program budget and several other matters in the areas of radiological effects and site evaluation. Notice of this meeting was published on May 24, 1979 (44 FR 30177).

In accordance with the procedures outlined in the Federal Register on October 4, 1978 (43 FR 45926), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows:

Wednesday, June 27, 1979

8:30 a.m. until conclusion of business.

The Subcommittee may meet in Executive Session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full Committee.

At the conclusion of the Executive Session, the Subcommittee will hear presentations by and hold discussions pertinent to this review with representatives of the NRC Staff and invited speakers from outside NRC.

The Subcommittee may then caucus to determine whether the matters identified in the initial session have been adequately covered and whether the project is ready for review by the full Committee.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefore can be obtained by a prepaid telephone call to the Designated Federal Employee for this meeting, Mr. Ragnwald Muller, (telephone 202/634-1413) between 8:15 a.m. and 5:00 p.m., EDT.

Dated: June 5, 1979.

John C. Hoyle,

Advisory Committee, Management Officer.

[FR Doc. 79-17830 Filed 6-11-79; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on the Floating Nuclear Plant; Meeting

The ACRS Subcommittee on the Floating Nuclear Plant will hold a meeting on June 27, 1979, in Room 1167, 1717 H Street, N.W., Washington, DC 20555 to continue its review of the Offshore Power Systems' application for a manufacturing license for the Floating Nuclear Plant. The specific topic of this meeting will be the review of the proposed core ladle design using magnesium oxide bricks. Notice of this meeting was published on May 24, 1979 (44 FR 30177).

In accordance with the procedures outlined in the Federal Register on October 4, 1978, (43 FR 45926), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The agenda for subject meeting shall be as follows:

Wednesday, June 27, 1979

8:30 a.m. until the conclusion of business.

The Subcommittee may meet in Executive Session, with any of its consultants who may be present, to explore and exchange their preliminary opinions regarding matters which should be considered during the meeting and to formulate a report and recommendations to the full committee.

At the conclusion of the Executive Session, the Subcommittee will hear presentations by and hold discussions with representatives of the NRC Staff, Offshore Power Systems, et al., and their consultants, pertinent to this review.

The Subcommittee may then caucus to determine whether the matters identified in the initial session have been adequately covered.

In addition, it may be necessary for the Subcommittee to hold one or more closed sessions for the purpose of exploring matters involving proprietary information. I have determined, in accordance with Subsection 10(d) of Public Law 92-463, that, should such sessions be required, it is necessary to close these sessions to protect proprietary information (5 U.S.C. 552b(c)(4)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefore can be obtained by a prepaid telephone call to the Designated Federal Employee for this meeting, Mr. Gary R. Quittschreiber, (telephone 202/634-3267) between 8:15 a.m. and 5:00 p.m., EDT.

Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the NRC Public Document Room, 1717 H Street, N.W., Washington, DC 20555 and at the Jacksonville Public Library, 122 North Ocean St., Jacksonville, FL 32204, the Business and Science Division, New Orleans Public Library, 219 Loyola Ave., New Orleans, LA 70140, and the Stockton State College Library, Pomona, NJ 08240.)

Dated: June 6, 1979.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

POSTAL RATE COMMISSION

[Docket No. MC79-3]

Red-Tag Proceeding, 1978; Deferring Procedural Deadlines

June 5, 1979.

As directed in the Order Denying Motion to Postpone Proceeding issued on April 24, 1979, the United States Postal Service submitted a testimonial filing in this docket on May 31, 1979. A preliminary examination of the Service's filing reveals that it contains technically

detailed information concerning the volumes and market characteristics of red-tag mail matter. In the letter transmitting its filing, however, the Postal Service states that it is not thereby filing, nor will it file, a case-in-chief.

According to the schedule establishing in the Commission's Order of January 4, 1979, instituting this proceeding, discovery directed to the Postal Service was to be completed by June 1, 1979, the cases-in-chief of the Officer of the Commission and of the intervenors were to be due on June 15, 1979, and hearings were to commence on June 25, 1979. In light of the detailed volume and market information contained in the Postal Service's filing, the absence of cost information from the Service's filing, and interrogatories directed to the Service that have not yet been answered, we believe that all these deadlines should be deferred. In order to give parties other than the Postal Service an ample opportunity to complete their discovery upon the Service and to prepare cases-in-chief treating all pertinent issues, the Commission will extend the deadline for filing cases-in-chief to June 29, 1979, and extend the deadline for discovery directed to the Service to July 13, 1979. An order specifying the date on which hearings will begin in this docket shall issue hereafter; at present, we anticipate that hearings will begin during September, 1979.

In the interest of expediting this proceeding, all parties are encouraged to utilize technical conferences and other forms of informal discovery in order to reduce the volume of written and oral cross-examination.

The Commission Orders

(A) The deadline for the filing of cases-in-chief by the Officer of the Commission and by the intervenors in this proceeding is hereby deferred to June 29, 1979.

(B) The deadline for the completion of discovery directed to the Postal Service is hereby deferred to July 13, 1979.

(C) The currently scheduled date of June 25, 1979, for the commencement of hearings in this docket is hereby deferred indefinitely, pending issuance of a subsequent order rescheduling hearings in this docket.

By the Commission.

David F. Harris,

Secretary.

DEPARTMENT OF STATE

Bureau of Oceans and International Environmental and Scientific Affairs

[Public Notice 577]

Convention on Migratory Species of Wild Animals; Availability of Draft Environmental Impact Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the U.S. Department of State has prepared a Draft Environmental Impact Statement on the Convention on the Conservation of Migratory Species of Wild Animals, dated May 25, 1979. The Draft EIS considers the potential environmental effects of a proposed international convention for the conservation of migratory species of wild animals, which will be the subject of international negotiations on June 11–23, 1979.

Copies of the Draft EIS may be obtained by contacting William H. Mansfield, Office of Environmental Affairs, Department of State, Room 7820, Washington, D.C. 20520 (tel: 202/632-2416).

The Department of State will receive written and oral comments on the Draft EIS in a public meeting on June 1, 1979 at 10 a.m. in Room 1107 at the Department of State, 2201 C Street, N.W., Washington, D.C. The Department will receive additional written comments through July 13, 1979.

May 25, 1979.

William Alston Hayne,

Deputy Assistant Secretary for Environmental Affairs.

BILLING CODE 4710-09-M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[FRA Emergency Order No. 11—Notice 7]

Louisville and Nashville Railroad Co.; Emergency Order Limiting Movement of Hazardous Materials; Partial Removal of Order

On February 7, 1979, the Federal Railroad Administration (FRA) issued FRA Emergency Order No. 11 (44 FR 8402), which placed certain restrictions on the movement of railroad freight cars containing materials required to be placarded in accordance with Department of Transportation regulations, 49 CFR Parts 170–189, over track owned or leased by the Louisville and Nashville Railroad Company (L&N). That Order provided, in part, that FRA would consider gradual removal of its restrictions dependent upon the L&N's progress in rectifying its safety deficiencies. On April 6, 1979, FRA rescinded the Order with respect to the 204 miles of the L&N's system between Flomaton, Alabama, and Chattahoochee, Florida. (44 FR 21725.)

As discussed at length in the Order, FRA found substantial evidence that the L&N had inadequately dealt with a number of factors that had led, or contributed, to train derailments on its system during the 37 months preceding issuance of that Order. Consequently, one of the purposes of the Order was to call the L&N's attention to the safety hazards created by its actions and omissions with the expectation that the L&N would take appropriate remedial action to improve the safety of operations over its system.

On March 1, March 23, March 28, April 20, and May 7, 1979, the L&N made separate requests that, taken together, requested that the Order be modified to exclude coverage of its mainline between the following locations: Nashville, Tennessee-Memphis, Tennessee; Nashville-Atlanta, Georgia; Nashville-New Orleans, Louisiana; and Corbin, Kentucky-Cartersville, Georgia. These track segments total approximately 1,330 miles. In support of those requests, L&N stated that such segments were in full compliance with the FRA's Track Safety Standards (49 CFR Part 213).

Following the earliest L&N request, which covered its track between Nashville and Montgomery, Alabama, FRA performed a thorough investigation of all aspects of railroad operations over that segment that bear on safety, including the condition of track and equipment, adequacy of training and testing of L&N operating personnel, L&N compliance with Federal safety regulations and its own rules, accident history, and the volume and character of hazardous materials moved. The FRA investigation was designed to accomplish two objectives; first, to ascertain whether the L&N had identified all significant safety problems with respect to that segment and had instituted the remedial action necessary to abate the emergency situation that existed at the time the Order was issued; and second, to determine whether the L&N had taken appropriate steps to ensure that another emergency situation would not develop on that segment in the future. The focus of the FRA investigation was on whether hazardous materials operations over that segment, absent the restrictions of the Order, would still create and

emergency condition. The FRA investigation indicates that, as a result of extensive corrective action taken by the L&N following issuance of the Order, an emergency condition no longer exists with respect to hazardous materials operations over L&N's track between Nashville and Montgomery, with the exception of an 11 mile segment (milepost 386 to milepost 397) in Birmingham, Alabama, that still requires extensive maintenance.

FRA has not yet completed similar investigations of the remaining segments referenced above. However, FRA track inspectors have concluded examinations of the condition of the track involved, and have discussed the L&N's planned and completed remedial action with local L&N track maintenance personnel. Those examinations indicated, in general, that a substantial number of major track problems had been identified through L&N and FRA track inspections, including the double inspections and walking inspection mandated by paragraphs 3 and 4 of the Order, and that the L&N had either completed or commenced appropriate remedial action. Consequently, the objective of paragraphs 3 and 4, namely to remedy L&N's past failures to identify many major track problems on its system, had been achieved with respect to those segments.

Based on the results of the FRA investigation of railroad operations over L&N's Nashville-Mongomery segment, I hereby order that, effective 12:01 p.m., June [date of publication of this notice in the **Federal Register**], 1979, the requirements of FRA Emergency Order No. 11, with the exception of paragraph 6 of that Order, are rescinded with respect to the L&N's mainline between Nashville, Tennessee and Birmingham, Alabama (milepost 197 to milepost 386), and between Birmingham and Montgomery, Alabama, (milepost 397 to milepost 485). Paragraph 6 of the Order, which requires the L&N to investigate, and prepare a report to FRA on, each railroad accident on L&N trackage involving a train transporating a placarded hazardous materials car, is being retained for the present time to facilitate FRA's continued monitoring of the safety of hazardous materials movements over the L&N.

Based on the results of the FRA track examinations discussed above, I further order that, efective 12:01 p.m., June [date of publication of this notice in the **Federal Register**], 1979, the requirements of paragraph 3 of the Order are rescinded with respect to the following L&N track segments; Corbin, Kentucky, Cartersville, Georgia (milepost 176 to milepost 423); Nashville, Tennessee-Memphis, Tennessee (milepost 0 to milepost F-370); Nashville, Tennessee-Chattanooga, Tennessee (milepost 7 to milepost 132); Montgomery, Alabama-New Orleans, Louisiana (milepost 485 to milepost 800.4); and Birmingham, Alabama (milepost 386 to milepost 397).

Issued in Washington, D.C. on June 8, 1979.

John M. Sullivan,

Administrator.

BILLING CODE 4910-06-M

Federal Railroad Administration

[FRA Waiver Petition Docket HS-79-9]

Magna Arizona Railroad Co.; Petition for Exemption From the Hours of Service Act

In accordance with 49 CFR 211.41 and 211.9, notice is hereby given that the Magna Arizona Railroad (MAA) has petitioned the Federal Railroad Administration (FRA) for an exemption from the Hours of Service Act (83 Stat. 464, Pub. L. 91-169, 45 U.S.C. 64a(e)). That petition requests that the MAA be granted authority to permit certain employees to continuously remain on duty for in excess of twelve hours.

The Hours of Service Act currently makes it unlawful for a railroad to require or permit specified employees to continuously remain on duty for a period in excess of twelve hours. However, the Hours of Service Act contains a provision that permits a railroad, which employs no more than fifteen employees who are subject to the statute, to seek an exemption from this twelve hour limitation.

The MAA seeks this exemption so that it can permit certain employees to remain continuously on duty for periods not to exceed sixteen hours. The petitioner indicates that granting this exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs no more than fifteen employees and has demonstrated good cause for granting this exemption.

Interested persons are invited to participate in this proceeding by submitting written views or comments. FRA has not scheduled an opportunity for oral comment since the facts do not appear to warrant it. Communications concerning this proceeding should identify the Docket Number, Docket Number HS-79-9, and must be submitted in triplicate to the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, Trans Point Building, 2100 Second Street, SW., Washington, D.C. 20590. Communications received before July 23, 1979, will be considered by the FRA before final action is taken. Comments received after that date will be considered as far as practicable. All comments received will be available for examination both before and after the closing date for comments, during regular business hours in Room 4406, Trans Point Building, 2100 Second Street, SW., Washington, D.C. 20590.

Authority: Section 5 of the Hours of Service Act of 1969 (45 U.S.C. 64a), 1.49(d) of the regulations of the Office of the Secretary, 49 CFR 1.49(d).

Issued in Washington, D.C. on June 5, 1979.

R. H. Wright,

Acting Chairman, Railroad Safety Board.

BILLING CODE 4910-06-M

[FRA Waiver Petition Docket HS-79-10]

San Manuel Arizona Railroad Co.; Petition for Exemption From the Hours of Service Act

In accordance with 49 CFR 211.41 and 211.9, notice is hereby given that the San Manuel Arizona Railroad (SMA) has petitioned the Federal Railroad Administration (FRA) for an exemption from the Hours of Service Act (83 Stat. 464, Pub. L. 91-169, 45 U.S.C. 64a(e)). That petition requests that the SMA be granted authority to permit certain employees to continuously remain on duty for in excess of twelve hours.

The Hours of Service Act currently makes it unlawful for a railroad to require or permit specified employees to continuously remain on duty for a period in excess of twelve hours. However, the Hours of Service Act contains a provision that permits a railroad, which employs no more than fifteen employees who are subject to the statute, to seek an exemption from this twelve hour limitation.

The SMA seeks this exemption so that it can permit certain employees to remain continuously on duty for periods not to exceed sixteen hours. The petitioner indicates that granting this exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs no more than fifteen employees and has demonstrated good cause for granting this exemption.

Interested persons are invited to participate in this proceeding by submitting written views or comments.

FRA has not scheduled an opportunity for oral comment since the facts do not appear to warrant it. Communications concerning this proceeding should identify the Docket Number, Docket Number HS-79-10, and must be submitted in triplicate to the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, Trans Point Building, 2100 Second Street, SW., Washington, D.C. 20590. Communications received before July 23, 1979, will be considered by the FRA before final action is taken. Comments received after that date will be considered as far as practicable. All comments received will be available for examination both before and after the closing date for comments, during regular business hours in Room 4406, Trans Point Building, 2100 Second Street, SW., Washington, D.C. 20590.

Authority: Section 5 of the Hours of Service Act of 1969 (45 U.S.C. 64a), 1.49(d) of the regulations of the Office of the Secretary, 49 CFR 1.49(d).

Issued in Washington, D.C. on June 5, 1979.

Office of the Secretary

[Notice 79-11]

Bicycle Transportation for Energy Conservation Study

AGENCY: Department of the Transportation, Office of the Secretary.

ACTION: Request for public comments.

SUMMARY: Section 862 of the National Energy Conservation Policy Act of 1978 requires the Department of Transportation to conduct a study of Bicycle Transportation for Energy Conservation, and report the results to the President and the Congress. The purpose of this notice is to advise the public of this study and to invite comments from interested parties.

DATE: Written comments and recommendations should be submitted on or before August 1, 1979.

ADDRESS: Responses should refer to the Bicycle Transportation for Energy Conservation Study and be submitted in writing to the Director, Office of Environment and Safety, P-20, U.S. Department of Transportation, Washington, D.C. 20590. Comments received will be available for public inspection during normal working hours in Rm. 9422, U.S. Department of Transportation, 400 Seventh Street, S.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: William C. Wilkinson III, Office of Environment and Safety, P-20, Room 9422, U.S. Department of Transportation, 400 Seventh Street, S.W., Washington, D.C. 20590, (202) 426-4414.

SUPPLEMENTARY INFORMATION: A Bicycle Transportation for Energy Conservation Study is required to be submitted to the President and to the Congress by Section 862 of the National Energy Conservation Policy Act of 1978, which reads as follows:

"(a) FINDINGS.—The Congress recognizes that bicycles are the most efficient means of transportation, represent a viable commuting alternative to many people, offer mobility at speeds as fast as that of cars in urban areas, provide health benefit through daily exercise, reduce noise and air pollution, are relatively inexpensive, and deserve consideration in a comprehensive national energy plan."

"(b) STUDY.—Not more than one year after the date of the enactment of this Act, the Secretary of Transportation shall complete a study of the energy conservation of potential bicycle transportation, determine institutional, legal, physical, and personal obstacles to increased bicycle use, establish a target for bicycle use in commuting, and develop a comprehensive program to meet these goals. In developing the program, consideration should be given to educational programs, Federal demonstrations, planning grants, and construction grants. The Secretary of Transportation shall submit a report to the President and to the Congress containing the results of the report to the President and to the Congress containing the results of such a study."

The Report of the Ad Hoc Committee on Energy of the U.S. House of Representatives dated July 27, 1977 includes the following additional comment on Section 862:

"The study is designed to determine the steps necessary to implement a comprehensive and effective program which would increase the use of bicycles as an integral mode of transportation."

This notice invites public comment to assist the Department in conducting the study. Specifically, interested parties are invited to identify and describe:

(a) data or studies related to current bicycle use;

(b) problems with, or limitations of current public programs related to bicycle use;

(c) obstacles to increased bicycle use;

(d) strategies and ideas for increasing bicycle use;

(e) innovative or exemplary programs to enhance or encourage bicycle use;

(f) research, development, and demonstrations needs related to bicycle use; and

(g) technical assistance needs.

Issued in Washington, D.C. on May 31, 1979.

John J. Fearnsides,

Deputy Under Secretary.

[FR Doc. 79-18137 Filed 6-11-79; 8:45 am]

BILLING CODE 4910-62-M

VETERANS ADMINISTRATION

Veterans Administration Wage Committee; Meetings

Pursuant to the provisions of section 10 of Public Law 92-463, notice is hereby given that meetings of the Veterans Administration Wage Committee will be held on:

Thursday, July 12, 1979
Thursday, July 26, 1979
Thursday, August 9, 1979
Thursday, August 23, 1979
Thursday, September 6, 1979

The meetings will be convene at 2:30 p.m. and will be held in Room 504, Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, DC. 20420.

The Committee's primary responsibility is to consider and make recommendations to the Chief Medical Director, Department of Medicine and Surgery, on all matters involved in the development and authorization of wage rate schedules for Federal Wage System (blue-collar) employees.

At these scheduled meetings, the Committee will consider wage survey specifications, wage survey data, local committee reports and recommendations, statistical analyses, and proposed wage schedules derived therefrom.

Under the provisions of section 10(d) of Public Law 92-463, the Federal Advisory Committee Act, as amended by Public Law 94-409, meetings may be closed to the public when they are concerned with matters listed under section 552b, Title 5, United States Code. Two of the matters so listed are those related solely to the internal personnel rules and practices of an agency (5 U.S.C. 552b(c)(2)), and those involving trade secrets and commerical or financial information obtained from a person and privileged or confidential (5 U.S.C. 552b(c)(4)).

Accordingly, I hereby determine that all portions of the meetings cited above will be closed to the public because the matters considered are related to the internal rules and practices of the Veterans Administration (5 U.S.C. 552b(c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b(c)(4)).

However, members of the public who wish to do so are invited to submit material in writing to the Chairman regarding matters believed to be deserving of the Committee's attention.

Additional information concerning these meetings may be obtained by contacting the Chairman, Veterans Administration Wage Committee, Room 1175, 810 Vermont Avenue, NW., Washington, DC. 20420.

Dated: June 6, 1979.

Max Cleland,

Administrator.

BILLING CODE 7035-01-M

[Exception No. 10 to Revised Service Order No. 1312]

Soo Line Railroad Co.; Authorization Grant

Because of the inability of the railroad to assemble the cars, a movement of 60 empty covered hopper cars has been seriously delayed on Soo Line Railroad Company enroute to Minneapolis, Minnesota, for loading. ConAgra desires to ship a sixty (60) car unit-grain-train of wheat to Martins Creek, Pennsylvania, route Soo Line-ConRail. The consignee at Martins Creek, Pennsylvania, is badly in need of the wheat. Only 25 empty covered hoppers have arrived at Minneapolis, Minnesota. Section (a) of Revised Service Order No. 1312 authorizes any railroad which is unable to supply the number of covered hopper cars required by its tariffs to transport unit-grain-trains of fewer cars in accordance with the scale in Section (b).

Pursuant to the authority vested in the Director, Bureau of Operations, by Section (h) of Revised Service Order No. 1312, Soo Line Railroad Company is authorized to operate a sixty (60) car unit-grain-train from Minneapolis, Minnesota, to Martins Creek, Pennsylvania, comprised of sixty (60)

railroad owned covered hoppers, on a one trip basis, with a minimum of 25 loaded cars operated in the first movement, and the remaining cars of the unit-train operated together in the final movement of this unit-grain-train. The total tariff minimum weight will be transported as required except if the railroad is unable to move all of the empty covered hoppers to the loading point on the final movement, the train can be reduced by the allowable number of cars or allowable weight percentage, as set forth in section (b) of this Service Order.

This exception applies to railroad owned covered hopper cars.

The bills of lading and waybills shall bear the following endorsement:

"Unit-grain-train of ( ) tons or ( ) cars. Partial movement of ( ) tons or ( ) cars forwarded authority Exception No. 10 to ICC Revised Service Order No. 1312. ( ) tons or [ ) cars to follow".

Demurrage rules will be treated as if each of the movements of the unit-train is a complete movement in itself.

Effective May 25, 1979.

Expires 11:59 p.m., June 15, 1979.

Issued at Washington, D.C., May 25, 1979.

NATIONAL SCIENCE BOARD.

DATE AND TIME: June 21, 1979, 9:30 a.m., Open Session. June 22, 1979, 10:30 a.m., Open Session. June 22, 1979, 12 noon, Closed Session.

PLACE: Headquarters, Association of Universities for Research in Astronomy and Kitt Peak National Observatory, Tucson, Arizona.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED AT THE OPEN SESSION:

Thursday, June 21

1. Minutes—Open Session—29th Annual (206th) Meeting.
2. Chairman's Report,
3. Director's Report:
   a. Report on Grant and Contract Activity—5/17-6/19, 1979,
   b. Organizational and Staff Changes,
   c. Congressional and Legislative Matters,
   d. NSB Budget for Fiscal Year 1980, and
   e. Other Items.
4. Board Committees—Reports on Meetings:
   a. Executive Committee,
   b. Committee on Eleventh NSB Report,
   c. Committee on Twelfth NSB Report,
   d. Ad Hoc Committee on Deep Sea and Ocean Margin Drilling Programs,
   e. Ad Hoc Committee on NSB Nominees, and
   f. Ad Hoc Committee on NSB Act Review.
5. NSP Advisory Groups.
6. Annual Reviews of RSB Centers at NSB.
7. Board Representation at Future Site Visits of Materials Research Laboratories.
8. Other Business.
9. Next Meetings.
10. Comments on Planning Environment Review.
11. Interim Reports of Discussion Groups.
12. Review of NSB Act of 1950 as Amended.

Friday, June 22

13. Final Reports of Discussion Groups.

MATTERS TO BE CONSIDERED AT THE CLOSED SESSION:

A. Minutes—Closed Session—29th Annual (206th) Meeting.

B. NSB Budgets for Fiscal Year 1981 and Subsequent Years.

C. NSB Annual Reports.

CONTACT PERSON FOR MORE INFORMATION: Miss Vernice Anderson, Executive Secretary, 202-632-5840.

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: To be published.

STATUS: Open meeting.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Monday, June 4, 1979.

CHANGES IN THE MEETING: Additional items.

The following additional items will be considered at an open meeting scheduled for Wednesday, June 13, 1979 at 10 a.m.:

1. Consideration of whether to adopt an amendment to Regulation S-X [17 CFR Part 210.3-16(k)] to permit financial statement disclosure of oil and gas reserve information to be designated "unaudited" for fiscal years ending before December 25, 1980. For further information, please contact James D. Hall at (202) 755-0222.

2. Consideration of whether to re-open the comment period on the "Supplemental Earnings Summary" which was proposed in Securities Act Release No. 5980 [43 FR 40728] and extend the new comment period through July 25, 1979. For further information, please contact James D. Hall at (202) 755-0222.

Commissioners Loomis, Evans, and Karmel determined that Commission business required the above changes and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted, or postponed, please contact: Mike Rogan at (202) 755-1638.

June 7, 1979.

Department of Agriculture

Food and Nutrition Service

Food Stamp Program; Procedures for Reduction or Cancellation of Allotments to Eligible Households

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 271, 272, and 273

[Amdt. 146]

Food Stamp Program; Procedures for Reduction or Cancellation of Allotments to Eligible Households

AGENCY: Food and Nutrition Service, USDA.

ACTION: Emergency rulemaking.

SUMMARY: This emergency rulemaking sets forth the procedures that are to be followed if the Secretary of Agriculture determines that it is necessary to reduce or cancel the food stamp allotments distributed to households eligible to receive food stamps. Such a reduction or cancellation would be necessary if it is determined that the value of full monthly food stamp allotments distributed to all eligible households will exceed the amount of funds appropriated by Congress. This rulemaking implements the provisions of Section 18(b) of the Food Stamp Act of 1977, Title XIII, P.L. 95–113, 91 Stat. 979, September 29, 1977, 7 U.S.C. 2525. Since there is a possibility that a reduction or cancellation of allotments may be necessary during this fiscal year, the Acting Administrator of the Food and Nutrition Service, Robert Greenstein, has determined that an emergency rulemaking is necessary to establish these procedures as expeditiously as possible. Comments are invited, however, for use in developing a final rule.

DATES: Effective date: Effective upon publication. Comments must be received on or before August 13, 1979, to be assured of consideration.

ADDRESSES: Comments should be submitted to: Alberta Frost, Acting Deputy Administrator for Family Nutrition Programs, Food and Nutrition Service, United States Department of Agriculture, Washington, D.C. 20250. A final rulemaking will be issued after considering the comments. All written comments, suggestions or objections will be open to public inspection at the offfice of the Food and Nutrition Service, USDA during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday) at 500 12th Street, S.W., Washington, D.C., Room 650. An Impact Analysis has been prepared, and is available from Acting Deputy Administrator Frost. A copy will also be open for public inspection at the office shown above.

FOR FURTHER INFORMATION CONTACT: Sue McAndrew, Chief, Program Standards Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, Washington, D.C. 20250, (202) 447–6535.

SUPPLEMENTARY INFORMATION:

Information

Section 18(b) of the Food Stamp Act of 1977 directs the Secretary to reduce monthly food stamp allotments if program requirements are in excess of the amount appropriated. In part, Section 18(b) states: "If in any fiscal year the Secretary finds that the requirements of participating States will exceed the limitation set herein, the Secretary shall direct State agencies to reduce the value of such allotments to be issued to households certified as eligible to participate in the food stamp program to the extent necessary to comply with the provisions of this subsection." This rulemaking establishes the procedures that will be used in carrying out this provision of the Act. Since there is a possibility that the procedures will have to be used during this fiscal year, they are being issued as an emergency rulemaking, effective immediately. The rules are subject to public comment, however, and will be reissued in final form following the end of the comment period.

The Department's General Counsel and the Comptroller General of the United States have ruled that only a *pro rata* benefit reduction is legally permissible under Section 18(b) of the Act. The procedures in this rulemaking provide for such a *pro rata* benefit reduction.

Nature of reduction action. If the Secretary determines that a reduction in food stamp allotments is necessary, a decision must be made as to how this reduction is to be affected. Based on the best information available on levels of participation and amounts of benefits, FNS will monitor the expenditure of funds to determine if a budgetary shortfall is likely to occur. If it appears that the available appropriated funds will not be sufficient to provide all households with full monthly allotments for the remainder of the fiscal year, the Secretary will determine the best manner in which to make up the shortfall. The choices available are to reduce allotments for one or more months, cancel allotments for one or more months or use a combination of reduced and cancelled allotments. The manner in which the Secretary decides to make up the shortfall will depend on the extent of the shortfall and the number of months available to make up the shortfall.

As noted earlier, any reduction or cancellation of allotments deemed necessary by the Secretary shall have an equal effect on all households. Reductions will be accomplished by providing households with a certain percentage of their normal full monthly allotments. Thus, if the Secretary determines that a 25 percent reduction in allotments will produce an adequate savings of money so that appropriations will not be exceeded, *all* households will have their allotments reduced by 25 percent. If it is determined that a cancellation of allotments is necessary, *all* allotments to all households for a given month will be cancelled.

Enactment of allotment reductions. Since State agencies are responsible for issuing food stamps to eligible households, they will be responsible for implementing reductions and cancellations of allotments. This rulemaking establishes the procedures that States are to follow in carrying out such directives.

All project areas with computerized issuance systems will be required to add an element to their computer programs to allow for percentage reductions in allotments to be made if the Secretary so directs. This element would be a new, final computation to reduce benefits by a specified percentage. The computation would be structured in one of two ways. States could choose to add a two step computation which would first multiply the full allotment by the percentage reduction factor and then subtract the result from the full allotment to arrive at the reduced allotment. Thus, if a 25 percent reduction was ordered, the full allotment would be multiplied by 25 percent and the result subtracted from the full allotment. Alternatively, State agencies could subtract the percentage reduction factor from 1.00 and multiply the full allotment by this result. For example, if a 25 percent reduction was ordered, States would multiply the full allotment by 0.75 to arrive at the reduced allotment. State agencies may use either of these two computations to reduce allotments. To ensure that this adaptation is made now, however, the implementation segment of these rules suggests that State agencies include this field in their computers when they update their data bases to reflect the July 1979 cost-of-food increases.

Any project area with a computerized issuance system that cannot be changed in the manner described above must be changed in some way to allow for the issuance of reduced allotments. The method adopted in these areas must

ensure that reduced allotments can be issued within 15 days of a notice from FNS to reduce allotments. Furthermore, the change in the computer system must be accomplished in time to reduce allotments for August 1979 if it is necessary to do so.

In project areas with manual issuance systems, preparation for a reduction in allotments in these areas includes the printing and distribution of new allotment tables or conversion tables to be used with current allotment tables. The Department will prepare and distribute them for State agencies to use. It is the responsibility of the State agencies, however, to ensure that sufficient copies are obtained and distributed in time to effect reductions in allotments.

A reduction in allotments in an area with an HIR card system can be accomplished in one of two ways. State agency personnel can either adjust all of the Household Issuance Records prior to the affected month's issuance or they can adjust the records as each household appears at the issuance office to pick up its monthly allotment. The choice of which method to use is up to the State agency.

It should be emphasized that if a reduction or cancellation of allotments is directed, the action is to affect all allotments for the month the cancellation or reduction is ordered. Thus, if August allotments are to be reduced by 50 percent, all allotments issued to eligible households for August are to be reduced by 50 percent. In States with fiscal months, this reduction shall be applied to all normal allotments for August, even if the allotment is not received until September. At the same time, allotments issued in the reduced month, but which actually represent the household's benefits for the previous month, shall not be reduced if no benefit reduction had been ordered for the previous month. Likewise, any retroactive or restored benefits for a period other than the reduced month should not be affected by the ordered reduction.

Along with putting a reduction or cancellation into effect, State agencies must notify households of the action. The rulemaking points out that the reduction or cancellation of allotments is to be considered a mass change and that the normal requirements for notifying households of mass changes are to be applied, with the one exception discussed below. Those requirements direct States to notify households through the news media, through posters in certification and issuance offices or through general explanatory notices mailed to participating households. Those requirements also give States the option of mailing individual notices of adverse action to households affected by the change. In view of the requirements of the law and the time element involved, this rulemaking prohibits States from using notices of adverse action. Households may not, under any circumstances, be entitled to continued benefits at their former level.

Included in this rulemaking is a provision that denies households an entitlement to the restoration of benefits lost as a result of a reduction or cancellation of allotments. Thus, if a reduction or cancellation of allotments results in a surplus of appropriated funds, the Department would not have to return these funds to the households affected by the reduction or cancellation. However, while households do not have an entitlement to the restoration of benefits and the Department would not be required to issue retroactive benefits the Department pledges to restore benefits to households affected by an allotment reduction or cancellation if the Secretary determines such a restoration is practicable.

In the event of a reduction or cancellation in benefits, the Department will endeavor to provide State agencies with as much lead-time as possible. Once the percentage reduction factor field is entered into computers, State agencies with computerized issuance will not require a great deal of lead-time to change the reduction factor on the computer. State agencies with manual systems will require more lead-time. The Department will make every effort to provide a minimum of one month lead-time for reductions in benefits and one-half month lead-time for cancellation. The Department anticipates that in the event a reduction or cancellation does occur, a longer lead-time than these minimums would be provided.

Effects of reductions and cancellations on ongoing Program operations. The reduction or cancellation of allotments is not intended to affect any aspect of Program operations other than the amount of benefits distributed to households. As noted in this rulemaking, applications are to be accepted and processed the same way during a month in which allotments are reduced or cancelled as they are in a normal month. Eligibility determinations are to be made according to the criteria in Part 273 and certification periods are to be assigned on a normal basis. Recertifications are also to be processed and not delayed.

As noted above, households affected by reductions and cancellations would not have an entitlement to a continuation of benefits if they object to the reduction or cancellation action. Households may request fair hearings and State agencies are required to honor and process the requests. However, fair hearings will not result in a reversal of the reduction or cancellation of a household's allotment. They will result in a correction to an incorrectly calculated allotment though, and to restored benefits if the reduction was too large because it was incorrectly computed.

Penalties

This rulemaking explains the penalties that may be invoked if State agencies fail to comply with a directive issued by FNS to reduce or cancel allotments. The penalties were developed with the realization that, in order to assure that the mandate of Congress is met, swift action would be necessary to induce to noncomplying State agencies to take immediate corrective action. Failing that, the penalties include a provision for the recovery of funds from State agencies that do not comply.

The first two penalty provisions describe what may occur if the Department discovers that a State agency does not intend to comply with an order to reduce or cancel allotments. FNS may issue a warning to such a State agency that will advise the State agency that if the ordered reduction or cancellation of allotments does not occur, FNS will cancel 100 percent of the Federal share of the State agency's administrative costs for the affected month. The warning period will be short and action to cancel the funding will come quickly following confirmation of the State's noncompliance. At the same time that this activity is taking place, FNS may, through the Attorney General, seek a court injunction against the State in question in an effort to compel the State to comply with the ordered allotment reduction or cancellation.

The last penalty provision involves the recovery of funds that are lost due to a State's failure to comply with an order to reduce or cancel allotments. As the rulemaking indicates, State agencies will be held liable for 100 percent of any overissuances that occur due to a State's failure to implement a reduction or cancellation order. It is obvious that if such an order is issued and a State ignores it, the effect of the order will be compromised, and both the Food Stamp Act and the Anti-Deficiency Act, 31 U.S.C. 665, as amended, could be in

danger of violation. Since the reason for the order is to stay within the limits set by the amount of funds appropriated by Congress and since the State agency's action will serve to force spending outside these limits, the Department determined that the noncomplying State agency should be liable for making up the overissuances it caused.

If a State agency fails to comply with an order to reduce or cancel benefits, FNS will bill the State agency for any resultant overissuances. The billing will prescribe a period of time in which FNS expects to receive payment of the bills. If payment is not made within that time period, steps will be taken to recover the billed amount through offsets to the Federal share of the State's administrative costs.

The penalty provisions in the rulemaking are strict. However, since orders to reduce or cancel allotments will only be issued if they are absolutely necessary, full compliance by all States is imperative.

Amendments

In order to ensure that there are no misunderstandings, Section 273.10(e) is being amended with the issuance of this rulemaking. This section explains how net income and benefit levels are to be calculated. The amendment in this rulemaking clarifies that the procedures for calculating benefit levels in paragraph (2) of that section apply only when a reduction or cancellation of allotments is not in effect. Further, the amendment suspends the requirement that all one and two person households be given a monthly $10 minimum allotment during months when allotments have been reduced or cancelled.

Implementation

Along with the rules establishing a procedure for reducing or cancelling allotments are requirements for the implementation of the procedure. The Department believes that there is a possibility that a reduction or cancellation of allotments may be necessary within the next few months. Therefore, expeditious implementation of the procedures is needed. To ensure that the procedures are put in place as swiftly as possible with as little disruption as possible in State agency operations, the adaptations to computer programs to add the new benefit computation can be made at the same time the issuance program is updated to reflect the July 1979 cost-of-food increases. In addition, all State agencies are required to establish internal procedures they need to have in palce so that they will be able to reduce allotments promptly if this proves necessary.

Parts 271, 272 and 273 are amended to include the following provisions:

PART 271—GENERAL INFORMATION AND DEFINITIONS

New § 271.7 is added to read as follows:

§ 271.7 Allotment reduction procedures.

(a) *General purpose.* This section sets forth the procedures to be followed if the monthly food stamp allotments determined in accordance with the provisions of § 273.10 are to be reduced or cancelled. A reduction in allotment levels would be necessary if it is determined by the Secretary that the amount of food stamp benefits that are to be distributed to households during a fiscal year, or remaining months of a fiscal year, will exceed the amount of funds appropriated. The best available data pertaining to the number of people participating in the program and the amount of benefits being issued shall be used in making this determination.

(b) *Nature of reduction action.* If the Secretary determines that the funds appropriated will not allow full monthly food stamp allotments for the remainder of a fiscal year, a decision shall be made as to the type of action needed to ensure that the appropriated funding level is not exceeded. Such action may be either a reduction in the allotment level for one or more months, a cancellation of allotments for one or more months or a combination of these two actions. All households shall be affected equally by a decision to either reduce or cancel food stamp allotments. If a reduction in allotments is deemed necessary, all households shall have their allotments reduced at the same rate. For example, if it is determined that a 25 percent reduction is necessary for two months, *all* allotments shall be reduced by 25 percent for two months. If cancellation is necessary, *all* eligible households shall have their allotments cancelled.

(c) *Implementation allotments reductions.* (1) *Reductions.* (i) If a decision is made to reduce monthly food stamp allotments, FNS shall notify State agencies of the date the reduction is to take effect and by how much they are to be reduced.

(ii) Upon receiving notification that a percentage reduction is to be made in an upcoming month's allotments, State agencies shall act immediately to implement the reduction. Such action would differ from State to State depending on the nature of the issuance systems in use. Where there are computerized issuance systems, the program used for issuing the affected month's ATP cards shall be altered to reflect the percentage reduction ordered in the FNS notice. In States where manual issuance is used, either through an HIR card system or through manually prepared ATP cards, new allotment tables or conversion tables reflecting the reduced allotments shall be prepared and distributed before the affected month's issuance activity begins. In an HIR card system State agencies have the option of enacting the reduction in benefits either by changing all HIR cards before issuance activity for the affected month begins or by adjusting allotments at the point of issuance as each household appears at the issuance office. FNS will assist State agencies in the preparation of issuance tables needed to implement a reduction in allotments.

(2) *Cancellations.* If a decision is made to cancel the distribution of food stamp benefits in a given month, FNS shall notify State agencies of the date the cancellation is to take effect. Upon receiving notification that an upcoming month's issuance is to be cancelled, State agencies shall take immediate action to effect the cancellation. This action would involve making necessary computer adjustments, and notifying issuance agents and personnel.

(3) *Affected allotments.* Whenever a reduction or cancellation of allotments is ordered for a particular month, all allotments issued for the designated month are to be reduced or cancelled. However, allotments or portions of allotments representing restored or retroactive benefits for a prior, unaffected month would not be reduced or cancelled, even though they are issued during an affected month.

(4) *Notification of eligible households.* Reductions and cancellations of allotments shall be considered to be Federal adjustments to allotments. As such, State agencies shall notify households of reductions and cancellations of allotments in accord with the notice provisions of § 273.12(e)(1), except that State agencies shall not provide notices of adverse action to households affected by reductions or cancellations of allotments.

(5) *Restoration of benefits.* Households whose allotments are reduced or cancelled as a result of the enactment of these procedures are not entitled to the restoration of the lost benefits at a future date. However, if there is any surplus of funds as a result of the reduction or cancellation, and the

Secretary determines that such a restoration is practicable, FNS will direct State agencies to provide affected households with retroactive benefits.

(6) *Records of reductions and cancellations.* State agencies must be able to produce a record of the amount of benefits each household receives during a month in which a percentage reduction is in effect along with a record of the amount of benefits each household would have received had full monthly allotments been distributed. Similarly, in the event that allotments are cancelled, State agencies must be able to produce a record of the amount of benefits each household would have received had full monthly allotments been distributed. These records will be used if FNS directs the provision of retroactive benefits.

(d) *Effects of reductions and cancellations on the certification of eligible households.* (1) Determinations of the eligibility of applicant households shall not be affected by a reduction or cancellation of allotments. State agencies shall accept and process applications during a month(s) in which a reduction or cancellation is in effect in accordance with the requirements of Part 273. Determinations of eligibility shall also be made according to the provisions of Part 273. If an applicant is found to be eligible for benefits, the amount of benefits shall first be figured in accordance with the provisions of § 273.10 and then either converted to reflect the percentage reduction in effect or not provided to reflect the cancellation in effect.

(2) The reduction or cancellation of allotments in a given month shall have no effect on the certification periods assigned to households. Those participating households whose certification periods expire during a month in which allotments were reduced or cancelled shall be recertified according to the provisions of § 273.14. Households found eligible to participate during a month in which allotments have been reduced or cancelled shall have certification periods assigned in accordance with the provisions of § 273.10.

(3) Any household that has its allotment reduced or cancelled as a result of the implementation of the requirements of this subpart may request a fair hearing if it disagrees with the action. However, since the reduction or cancellation would be necessary to avoid an expenditure of funds beyond those appropriated by Congress, the household does not have a right to a continuation of benefits. A household may receive retroactive benefits in an appropriate amount if it is determined that its benefits were reduced by more than the amount by which the State agency was directed to reduce benefits.

(e) *Penalties.* Notwithstanding any other provision of this subchapter, FNS may take one or more of the following actions against a State agency that fails to comply with a directive to reduce or cancel allotments in a particular month.

(1) If FNS ascertains that a State agency does not plan to comply with a directive to reduce or cancel allotments for a particular month, a warning will be issued advising the State agency that if there is not compliance, FNS may cancel 100 percent of the Federal share of the State's administrative costs for the affected month.

(2) If FNS ascertains after warning a State agency as provided in (1) above, that the State agency does not plan to comply with a directive to reduce or cancel allotments, a court injunction will be sought to compel compliance.

(3) If a State agency fails to reduce or cancel allotments as directed by FNS, FNS will bill the State agency for all overissuances that result. If a State agency fails to remit the billed amount to FNS within a prescribed period of time the funds will be recovered through offsets against the Federal share of the State agency's administrative costs, or any other means available under law.

* * * * *

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

Paragraph 272.1(g)(3) is added and reads as follows:

§ 272.1 General terms and conditions.

* * * * *

(g) Implementation.

* * * * *

(3) *Amendment.* The procedures contained in amendment shall be implemented by State agencies as quickly as possible. All State agencies shall complete implementation in time to be able to issue reduced food stamp allotments in August 1979 if such action is determined to be necessary. State agencies with computerized issuance systems shall adjust these systems so that they are capable of issuing reduced coupon allotments. These adjustments may be made at the same time State agencies reprogram their computers to reflect the July 1979 cost-of-food increases.

* * * * *

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

In Section 273.10, subparagraph (e)(2)(ii) is amended and the words "Except as provided in subparagraph (iii) below," are added at the beginning. In addition, subparagraph (e)(2)(iii) is added to Section 273.10 and reads as follows:

§ 273.10 Determining household eligibility and benefit levels.

* * * * *

(e) Calculating net income and benefit levels.

* * * * *

(2) Eligibility and benefits.

* * * * *

(iii) During a month when a reduction or cancellation of allotments has been ordered pursuant to the provisions of § 271.7, eligible households shall first have their benefits calculated as follows:

(A) If the action in effect is a reduction action, eligible households shall have their allotment levels calculated according to the procedures of subparagraph (ii) above, and then reduced by the percentage reduction in effect, and rounded to the nearest whole dollar.

(B) If the action in effect is a cancellation action, eligible households shall have their allotment levels calculated according to the procedures of subparagraph (ii) above. However, the allotments shall not be issued for the month the cancellation is in effect.

(C) The $10 minimum allotment level for one- and two-person households shall be applied in calculating allotment levels *before* a percentage reduction or cancellation is applied to the month's issuance. The actual allotments issued to one- and two-person households in a month in which allotments are reduced or cancelled may be less than $10.

* * * * *

Authority: 91 Stat. 958 (7 U.S.C. 2011–2027).

Note.—This interim final rule has been designated as significant and is being published in accordance with the emergency procedures of Executive Order 12044 and Secretary's Memorandum 1955. It has been determined by Assistant Secretary of Agriculture Carol Tucker Foreman that the emergency nature of this interim final rule warrants publication without opportunity for prior public comment. This interim final rule implements regulations in Parts 271, 272 and 273. A Draft Impact Analysis regarding this regulation is available from Alberta Frost, Acting Deputy Administrator for Family Nutrition Programs, Food and Nutrition Service, United States Department of Agriculture, 500 12th Street, Washington, D.C. 20250.

(Catalog of Federal Domestic Assistance Programs No. 10.551, Food Stamps.)

Dated: June 6, 1979.

Carol Tucker Foreman,

Assistant Secretary for Food and Consumer Services.

Part III

Department of Health, Education, and Welfare

Nondiscrimination on the Basis of Age in Programs or Activities Receiving Federal Financial Assistance

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

45 CFR Part 90

Nondiscrimination on the Basis of Age in Programs or Activities Receiving Federal Financial Assistance

AGENCY: Department of Health, Education, and Welfare.

ACTION: Final rule.

SUMMARY: These regulations implement the provisions of the Age Discrimination Act of 1975, as amended (Act). They are general regulations designed to guide the development of agency specific regulations by each Federal agency which administers programs of Federal financial assistance. The Age Discrimination Act prohibits discrimination on the basis of age in programs or activities receiving Federal financial assistance. The Act also contains certain exceptions which permit, under limited circumstances, continued use of age distinctions or factors other than age which may have a disproportionate effect on the basis of age. These regulations discuss what is age discrimination under the Act, the circumstances under which the statutory exceptions may be invoked, the responsibilities of Federal agencies and recipients to enforce the Act, and the procedures for investigation, conciliation, and enforcement. Each Federal agency which administers programs of Federal financial assistance must issue age discrimination regulations which conform to these general regulations.

EFFECTIVE DATE: July 1, 1979.

FOR FURTHER INFORMATION CONTACT: Bayla F. White, Director Age Discrimination Task Force, Room 711–E, Hubert Humphrey Building, 200 Independence Avenue, S.W., Washington, D.C. 20201, (202) 245–6284.

SUPPLEMENTARY INFORMATION:

Background

In November 1975, Congress enacted the Age Discrimination Act (42 U.S.C. 6101, *et seq.)* as part of the Amendments to the Older Americans Act (P.L. 94–135). At that time, the express purpose of the Act was to prohibit unreasonable discrimination based on age in programs and activities receiving Federal financial assistance, including the State and Local Fiscal Assistance Act of 1972. The Act also permitted federally assisted programs and activities, and recipients of Federal funds, to continue to use: (1) some age distinctions, and (2) "reasonable factors other than age." The Act applied to persons of all ages.

Prior to the enactment of any regulations, the Act required the Commission on Civil Rights to conduct a study of age discrimination in federally funded programs and activities. The Commission transmitted its study to the President and the Congress on January 10, 1978. The Commission published the second part of its study in January 1979. The Act also required each affected Federal agency to respond to the Commission's findings and recommendations.

After the receipt of the report of the Commission on Civil Rights and the Federal agency responses to that report, the Congress considered amendments to the Age Discrimination Act of 1975. In October 1978, Congress amended the Act (P.L. 95–478). Congress struck the word "unreasonable" from the statement of purpose clause, so that the purpose of the Act is to prohibit discrimination based on age in programs and activities receiving Federal financial assistance. However, the Congress retained the exceptions to the prohibition against age discrimination. Thus, the Act still permits the use of: (1) some age distinctions, and (2) "reasonable factors other than age." The Act continues to apply to persons of all ages.

According to the language of the Act, the prohibition against age discrimination will become effective when regulations are issued to enforce the Act. The Act requires the Secretary of HEW to publish proposed and then final general regulations. HEW issued proposed general regulations on December 1, 1978. These regulations are the final general regulations required by the Act. They set standards for other Federal agencies to follow in the development of agency specific regulations. The Act also requires each agency which provides Federal financial assistance to issue proposed and then final specific regulations. All agency specific regulations must conform to these general regulations and must be approved by the Secretary of HEW.

Rulemaking History

The Department of Health, Education, and Welfare has been vitally concerned about the need for public participation in the development of these regulations because of the substantial impact the Age Discrimination Act will have on the operation of federally assisted programs.

As the first step of its obligation to issue general regulations, HEW published in the Federal Register (43 FR 8756) a Notice of Intent To Issue Age Discrimination Regulations (NOI) on March 2, 1978. The NOI briefly identified some of the major issues addressed later in the regulatory process. Persons wishing additional information on the age discrimination regulations were asked to write to HEW. Over 600 individuals and organizations responded to the NOI. These names were incorporated into a mailing list for distribution of materials developed during the rulemaking process.

Since these general regulations apply to all Federal departments and agencies which administer programs of Federal financial assistance, HEW created an Interagency Age Discrimination Task Force to coordinate the development of the regulations. The Interagency Task Force consists of at least one representative from every department or agency which ultimately must issue its own age discrimination regulations, as well as observers, from other interested Federal agencies. The Interagency Task Force met five (5) times during the development of the age discrimination regulations to consider both substantive and procedural matters. Consultations were also held with individual Federal agencies. The Interagency Task Force will continue to function during the development of agency specific regulations.

The Notice of Proposed Rulemaking (NPRM) was published in the Federal Register (p. 56428–56448) on December 1, 1978. The NPRM contained a discussion of the major issues and a section-by-section analysis of the proposed regulations as well as the text of the proposed rules. At certain key places in the proposed rules, HEW presented options for public consideration and comment. Publication of the proposed rules inaugurated a 90-day public comment period.

HEW distributed more than 16,000 copies of the proposed rules. Copies were mailed to every member of Congress, every State governor, the head of every Federal agency which provides Federal financial assistance, adminstrators of federally assisted programs, recipients of Federal funds at the State and local levels, interested individuals and groups. Special efforts were made to distribute copies of the NPRM to groups representing the interests of the elderly and of children and youth.

In January and early February, the Department held public hearings in Washington, D.C., and in each of HEW's 10 Regions in order to obtain public comment on the proposed rules. A total of 170 witnesses made presentations at those hearings. In addition, 246 letters were received containing comments,

criticisms and suggestions on nearly every section of the proposed rules. Comments made at the public hearings and in writing have come from individuals, from State and local governmental units, from providers of federally supported services, from public officials at the Federal, State and local levels, and a large number have come from groups representing the interests of the elderly. The comments and verbatim transcripts from the eleven hearings have been analyzed and used in the development of these final regulations. A summary of the comments received and the responses to those comments follow the text of these regulations.

Although the final government-wide regulations have been significantly affected by the comments received, the implementation of the Age Discrimination Act is a continuing process which provides several opportunities for public participation. Each agency providing Federal financial assistance must now issue its own proposed and then final, specific age discrimination regulations. The issuance of proposed agency regulations 90 days after these general regulations are published will provide another opportunity for the public to participate in the shaping of age discrimination policies. The actual impact of the Age Discrimination Act and the problems which recipients of Federal financial assistance may encounter in implementing these general age discrimination regulations will be examined after 30 months time. Similarly, each agency will examine and publish for comment its own assessment of the effectiveness of its age discrimination regulations after they have been in effect for 30 months.

HEW will amend and revise the government-wide regulations as need and experience dictate.

Overview of the Regulations

The following paragraphs summarize the text of the final regulations. The last section of the preamble contains a discussion of the resolution of certain major issues which were raised in the NPRM and an explanation of key parts of the text of the final regulations.

Subpart A—General

The four sections in Subpart A explain the purpose of the Age Discrimination Act (§ 90.1), the purpose of the general age discrimination regulations (§ 90.2), the programs and activities covered by the Act (§ 90.3) and the meaning of important terms used in the regulations (§ 90.4).

The Age Discrimination Act is designed to prohibit discrimination on the basis of age in programs or activities which receive Federal financial assistance. The Act also contains certain exceptions which permit age distinctions and factors other than age to continue in use under certain circumstances (§ 90.1). The Act applies to persons of all ages.

The Act generally covers all programs and activities which receive Federal financial assistance. However, the Act does not apply to any age distinction "established under authority of any law" which provides benefits or establishes criteria for participation on the basis of age or in age related terms. Thus, age distinctions which are "established under authority of any law" may continue in use. These regulations (§ 90.3) define the phrase "any law" to mean Federal statutes, State statutes or local statutes adopted by elected, general purpose legislative bodies.

The Act also excludes from its coverage most employment practices, except for programs funded under the public service employment titles of the Comprehensive Employment and Training Act (CETA). These regulations do cover any program or activity which is both a program of Federal financial assistance and provides employment such as the College Work Study Program (42 U.S.C. 2751, *et seq.*) and the Work Incentive Program (42 U.S.C. 630, *et seq.*). The Age Discrimination in Employment Act (ADEA) which is administered by the Department of Labor, [Equal Employment Opportunity Commission (EEOC) after July 1, 1979], continues to be the Federal statute that prohibits employment discrimination for persons between the ages of 40 and 70. Individuals in this age range who experience employment discrimination, other than in CETA public service employment programs, must look to the ADEA for relief, not to the Age Discrimination Act.

Section 90.4 defines important terms used throughout these regulations.

Subpart B—What Is Age Discrimination?

This subpart sets out the rules against age discrimination and the conditions under which the statutory exceptions apply.

No person in the United States shall, on the basis of age, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any program or activity receiving Federal financial assistance (§ 90.12(a)). This general rule is limited by the exceptions which are contained in section 304 of the Act and which are explained in §§ 90.14 and 90.15 of these regulations. The specific prohibited actions, are patterned after the regulations issued under Title VI of the Civil Rights Act of 1964 (45 CFR Part 80). As a general rule, separate or different treatment which denies or limits service from or participation in a program receiving Federal financial assistance will be prohibited by these regulations.

The Act contains several exceptions which limit the general prohibition against age discrimination. Section 304(b)(1) of the Act permits the use of age distinctions which are necessary to the normal operation or to the achievement of a statutory objective. It also permits actions which are based on reasonable factors other than age. The regulations provide definitions for two terms which are essential to an understanding of those exceptions: "normal operation" and "statutory objective" (§ 90.13). "Normal operation" means the operation of a program or activity without significant changes that would impair its ability to meet its objectives. "Statutory objective" is defined to mean any purpose which is explicity stated in a Federal statute, State statute or local statute or ordinance.

The regulations establish a four part test, all parts of which must be met for an explicit age distinction to satisfy one of the statutory exceptions and to continue in use in a Federally assisted program (§ 90.14). This four part test will be used to scrutinize age distinctions which are imposed in the administration of Federally assisted programs, but which are not explicitly authorized by a Federal, State or local statute.

Recipients of Federal funds are also permitted to take an action otherwise prohibited by the Act, if the action is based on "reasonable factors other than age." In that event, the action may be taken even though it has a disproportionate effect on persons of different ages. However, according to the regulations (§ 90.15), the factor other than age must bear a direct and substantial relationship to the program's normal operation or to the achievement of a statutory objective.

The regulations place on the recipient the burden of proving that an age distinction or a factor other than age qualifies for an exception (§ 90.16).

Subpart C—What Are the Responsibilities of the Federal Agencies?

This subpart contains four sections which explain the responsibilities that

Federal agencies have to implement the ADA.

Each agency which extends Federal financial assistance must issue proposed and then final regulations to enforce the Act (§ 90.31). The agency specific regulations must be consistent with these government-wide regulations and must be approved by the Secretary of HEW. The final agency specific regulation must contain an appendix listing all age distinctions which appear in Federal statutes and regulations which affect the agency's programs of Federal financial assistance. The appendix is the first step of a process set in motion by these regulations to inform the public of those age distinctions used in Federal Program administration. The appendix will *not* constitute agency approval or disapproval of the age distinctions contained in its regulations.

As a second step in this public information process, each Federal agency must review the age distinctions it imposes on its recipients by regulation or by administrative action to determine whether these age distinctions are permissible under the Act (§ 90.32). This review must be completed within 12 months after publication of the agency final regulations and must be published for public comment in the **Federal Register**. The report must indicate which age distinctions meet the requirements of the Act and will be continued and which will be eliminated. The report must identify age distinctions not in regulations which meet the requirements of the Act and which will subsequently be incorporated into regulations. Beginning with the effective date of an agency's specific regulations, no new age distinction may be imposed, unless it is adopted by regulation using the notice and comment procedures of the Administrative Procedure Act (5 U.S.C. 553). Beginning one year from the publication of an agency's specific regulations, no existing age distinction may be continued unless it has already been adopted by regulation or is adopted by regulation using the notice and comment procedures of the Administrative Procedure Act (5 U.S.C. 553).

The next two sections of the regulations (§§ 90.33 and 90.34) reflect HEW's goal of reducing administrative burden on recipients while still ensuring compliance with the Act. To avoid or minimize conflicting actions by different Federal agencies which deal with the same recipient, the Secretary of HEW may designate "lead agencies" to coordinate compliance and enforcement activities in those instances where two or more agencies provide assistance to the same recipient (§ 90.33). Interagency cooperation may extend to all compliance and enforcement activities *except* for the actual termination of funds and the notification to Congress of that termination.

The Act requires each agency to report annually to the Congress, through HEW, on its compliance and enforcement activities. The final regulations adopt a targeted approach to data collection and analysis, which will maximize the opportunity to measure and analyze actual progress in complying with the Act and, at the same time, minimize the burden of unnecessary data collection on recipients (§ 90.34).

The targeted approach to data collection builds on the analysis of existing data about compliance, such as complaint data and information from compliance reviews. The regulations also provide for agencies to collect data which are directly relevant to particular patterns or practices of discrimination revealed by complaints, compliance reviews or other compliance activities. This targeted approach gives each agency the authority to tailor its own data collection to the characteristics of its programs, rather than establishing specific reporting requirements for every federally assisted program.

Subpart D—Investigation, Conciliation and Enforcement Procedures

This subpart of the regulations is divided into 10 sections dealing with various aspects of the compliance and enforcement process.

Each agency is required to establish procedures for compliance, investigation, conciliation and enforcement (§ 90.41). A recipient has primary responsibility to ensure that its programs and activities are in compliance with the Act and must take necessary steps to eliminate any violations. An agency has responsibility to attempt to secure recipient compliance with the Act by voluntary means. An agency must enforce the Act when a recipient fails to eliminate violations of the Act (§ 90.42).

Each agency is required to provide written notice to each recipient of the recipient's obligations under the Act, to provide technical assistance to recipients where necessary and to make available educational materials explaining the rights and obligations of beneficiaries and recipients (§ 90.43(a)).

Moreover, each Federal agency must direct its recipients which employ the equivalent of 15 or more persons on a full-time basis to prepare a written self-evaluation (§ 90.43(b)). A recipient's self-evaluation will focus on age distinctions which are imposed directly by the recipient and not on any factors other than age. Each recipient must justify the continued use of any distinction as sanctioned under these regulations. A recipient must take corrective and remedial action whenever the self-evaluation indicates a violation of the Act. The recipient self-evaluation must be completed 18 months after the effective date of agency regulations. The self-evaluation must be available to the agency or the public for a period of three years following its completion.

Every agency must establish a procedure for processing complaints of age discrimination (§ 90.43(c)). The complaint handling procedure must include an initial screening by the Federal agency and notice to complainants and recipients of their rights and obligations in the complaint process. All complaints which fall within the coverage of the Act will be referred to a mediation process which will be managed by a single agency designated by the Secretary of HEW. That agency is the Federal Mediation and Conciliation Service (FMCS).

Complainants and recipients are required to participate in the effort to reach a mutually satisfactory mediated settlement of the complaint, although they need not meet with the mediator at the same time. The mediation process may last no more than 60 days from the date the agency first receives the complaint. The mediator will have the authority to terminate the mediation at any time before the end of the 60-day period if the process appears to have broken down. The terms of settlement that are satisfactory to both parties will be reduced to writing and sent to the Federal agency which referred the complaint. The Federal agency will take no further action on a complaint which has been successfully mediated.

If mediation does not succeed, or if a mediated settlement is violated, Federal agencies will engage in informal fact finding and then, if necessary, proceed to formal investigation of the complaint. The formal investigation may result in an administrative hearing before an administrative law judge. A Federal agency may terminate a recipient's Federal funds if the administrative law judge finds that the recipient has violated the Act.

The regulations of each Federal agency must provide that the agency may conduct compliance reviews, preaward reviews and use other similar procedures to determine compliance with the Act. These procedures are *not*

dependent on the filing of a complaint of age discrimination (§ 90.44).

To help determine whether a recipient is in compliance with the Act, each Federal agency may require its recipients to make their records reasonably accessible to the agency and to furnish information to the agency (§ 90.45). Recipients are prohibited from acts of retaliation or intimidation against individuals who file age discrimination complaints or who cooperate in any aspect of the enforcement process (§ 90.46).

After a hearing before an administrative law judge, a Federal agency may terminate Federal funds to a recipient found to have violated the Act or regulations implementing the Act. Termination must be limited to the particular recipient which has violated the Act and to the program where the violation has been found. An agency may delay granting new Federal funds to a recipient when termination proceedings have been initiated (§ 90.47).

When Federal funds are terminated, the agency may pay those funds to another qualified recipient which can demonstrate the ability to achieve the goals of the Federal program's authorizing statute and to comply with the Age Discrimination Act (§ 90.48). If a Federal agency or an administrative law judge, finds that a recipient has engaged in age discrimination, the recipient must take remedial action as the agency requires. Even in the absence of a finding of discrimination, recipients may voluntarily take affirmative action to encourage the participation of persons in age groups where participation has been limited in the past. The regulations permit a recipient to provide special benefits to children or the elderly provided that the benefits do not result in the exclusion of persons who are eligible to participate in the recipients' program (§ 90.49).

The Act authorizes a private right of action, when an individual has exhausted administrative remedies. The regulations implement that provision (§ 90.50). Administrative remedies are exhausted when either 180 days have elapsed from the filing of the complaint and the agency has made no finding or the agency issues a finding in favor of the recipient. The complainant may then file a suit in a U.S. district court. The complainant must indicate at the time the suit is filed, if attorney's fees will be demanded in the event that the complainant is successful. No action can be brought if the same alleged violation by the same defendant is the subject of a pending action in any U.S. court. Complainants who wish to file an action must give 30 days notice to the Attorney General, the Secretary of HEW, the head of the granting agency and the recipient.

Subpart E—Future Review of Age Discrimination Regulations

HEW must review the effectiveness of these general age discrimination regulations 30 months after the regulations take effect (§ 90.61). In addition, each agency must review the effectivess of its own regulations 30 months after they become effective (§ 90.62). These reviews must be published in the Federal Register with an opportunity for public comment.

Critical Issues

Comments were submitted on many sections of the proposed regulations and on many different issues raised in the NPRM. These comments and the responses to them are set forth in the appendix which follows the text of the regulations. Some of the comments concerned critical policy issues with respect to the implementation of the Act. These critical issues are discussed in the following paragraphs.

1. *What Ages Does the Act Cover?* Section 303 of the Act prohibits discrimination on the basis of age in federally funded programs or activities. Although the legislative history indicates Congressional concern for the problems of the elderly in particular, the Congress made it clear in its Conference Committee report that the Act is intended to apply to persons of all ages.

When the Act was originally passed in 1975, Congress directed the United States Commission on Civil Rights to conduct a study of age discrimination in federally funded programs, and required each affected Federal agency to respond to the Commission's study. After reviewing the Commission's report and Federal agency responses to it, Congress considered amendments to the Act. Nowhere in the amendment process was there any discussion of limiting or changing the coverage of the Act. It continues to extend protection to persons of all ages.

Various advocacy groups for older persons have suggested that HEW construe these general implementing regulations to protect only the elderly or to provide greater protection for older persons than for other age groups. This construction is not legally supportable in view of the legislative history and the plain language of the Act.

However, the Congress has consistently made clear its support for the concerns of older persons. It is therefore unlikely that Congress intended the Act to call into question the generally accepted special benefits which are provided to older persons in programs that are otherwise available to a wider age range of the population. Public comment on the regulations was almost unanimously supportive of these benefits, which often take the form of special discounts. Similarly, no one has suggested that similar benefits for children should be questioned under the Act.

HEW supports the continuation of special benefits for children and older persons. Therefore, these regulations permit special benefits for the elderly persons and for children that are extended by recipients so long as they do not result in the exclusion from the program of otherwise eligible persons. [§ 90.49(c)].

2. *Does the Act Require Proportional Allocation of Services and Funds by Age?* Commenters also asked whether the Act requires proportional allocation by age of the services and the benefits of federally assisted programs. Some believe that certain groups, especially the elderly, do not get their "fair share" of funds in certain programs or that certain program participation rates among age groups like the elderly are disproportionately low.

These final regulations do not require proportional program participation by age or the proportional allocation of funds by age. Discrimination has not been defined in this way in other non-discrimination regulations. However, disproportionate allocation of funds or program participation may be one of the elements which triggers an examination of whether age discrimination exists in the federally funded program or activity. If further inquiry is necessary, the recipient may show that the disparity in rates of participation, fund allocation, or services has nondiscriminatory causes. Comments on the NPRM suggested that there may be nondiscriminatory reasons which adequately explain the disproportionately low participation of the elderly in some programs.

3. *What Programs or Activities are "Established Under Authority of Any Law"?* The Age Discrimination Act exempts from coverage age distinctions contained in a program or activity "established under authority of any law" which provides benefits on the basis of age or in age related terms. Congress did not expressly indicate anywhere in the legislative history of the Act what it meant by the term "any law." The regulations must, nevertheless, define the phrase "established under authority of any

law" in order to determine which age distinctions are exempted by this provision of the Act.

The NPRM presented four options for interpreting the phrase "any law" and asked for comments on those or any other reasonable interpretations. The NPRM cited two overriding issues to be considered in determining the meaning of "any law" (a) whether to include age distinctions contained in regulations; and (b) whether to include age distinctions enacted by State and local legislative bodies.

The narrowest option interpreted "any law" to mean only Federal statutes. The broadest option intepreted "any law" to include Federal, State and local statutes and Federal, State and local regulations. Supporters of defining "any law" to mean only Federal statutes argued that any other interpretation seriously weakens the Act. Congress could not have intended to give discretion to State or local legislative bodies to exempt any age distinction from the coverage of the Act. To do so would be an abdication of Federal responsibility which defeats the purpose of the Act.

Those who argued that "any law" should mean Federal and State statutes argued that the Act should permit the States to use age in exercising their traditional power in such areas as defining the age of majority, controlling access to a driver's license, and regulating compulsory school attendance. On the other hand, extending this exemption to local statutes and ordinances would permit thousands of local jurisdictions to introduce age distinctions into the administration of Federal programs which would fatally weaken the Act.

Supporters of defining "any law" to mean Federal, State and local statutes and ordinances argued that there is no clear basis for limiting the interpretation of "any law" to Federal statutes. Congress rejected an amendment to the Act in 1978 which would have defined "any law" to mean Federal statutes. Furthermore, there is no basis for excluding local statutes and ordinances if State statutes are included in the definition. They argued that no case has been made that age discrimination occurs as a result of age distinctions in State and local statutes and ordinances and that beneficial age distinctions are enacted by State and local legislative bodies.

Defining "any law" to include all regulations had relatively little support. Some suggested defining "any law" to mean Federal statutes and regulations. Supporters of including regulations in the definition argued that regulations have the force and effect of law and should be included in the "any law" exemption. This position has been rejected on the grounds that it would permit administrators of federally funded programs to impose age distinctions which are not authorized by a legislative body. In addition, HEW does not believe that the language "established under authority of any law" necessarily includes regulations having the force and effect of law.

The final regulations define "any law" to mean Federal, State and local statutes and ordinances. The language of the statute, and the general lack of legislative history to justify any narrower interpretation of that language support the conclusion that Federal and State statutes, and statutes or ordinances enacted by general purpose, elected local governments should be exempt from coverage of the Act. This is particularly appropriate in the absence of any clear indication that age discrimination occurs as a result of State and local statutes. This definition of "any law" recognizes the authority of State and general purpose, elected local governments to enact statutes which condition benefits or participation on the basis of age.

Examples: "Established Under Authority of Any Law".

1. *Federal statutes.* The Adult Education Act (20 U.S.C. 1201–1213) is statutorily designed to provide services or instruction below college level for adults. The Act defines adults as individuals who have attained the age of 16. This limitation on participation in adult education programs is not covered by the Act. The Runaway Youth Program (42 U.S.C. 5701) authorized under the Juvenile Justice & Deliquency Prevention Act, awards grants for the development and/or strengthening of local facilities to address the immediate needs of runaway youth in a manner which is outside of the law enforcement and juvenile justice systems. The terms "runaway youth," "juveniles," and "young people" are used in the statute without further definition. Reasonable definitions of these terms would not be covered by the Act.

2. *State statutes.* Statutes setting age limitations on obtaining a driver's license or fixing age limits for compulsory school attendance are not covered by the Act.

3. *Local statutes or ordinances.* Age limitations on consuming alcoholic beverages or possessing firearms are not covered by the Act as long as these are adopted by an elected general purpose legislative body.

Note.—Any age distinction not exempted from coverage by the "any law" provision, may still qualify for an exception under another provision of the Act or these regulations.

4. ***What are the Rules Against Age Discrimination?*** Many commenters asked for clarification of the rules against age discrimination contained in § 90.12 of the regulations. Section 90.12 sets forth a general rule against age discrimination which is based on Section 303 of the Act, and then presents specific rules against age discrimination. These rules are limited by the exceptions contained in the Act and these regulations.

The general rule in § 90.12 reflects the language of the Act: except as provided in the Act and these regulations, ". . . no person in the United States shall, on the basis of age, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any program or activity receiving Federal financial assistance." It means that, unless sanctioned by one of the exceptions, recipients of Federal financial assistance may not, either directly or indirectly, do anything to exclude persons from their programs or activities on the basis of age. Nor may recipients do anything not sanctioned by one of the exceptions to deny or limit persons in their efforts to participate in federally funded programs or activities on the basis of their age. For example, a medical school may not exclude persons from admission solely because of their age.

The prohibition against age discrimination does not include an absolute prohibition against separate or different treatment on the basis of age. As a general rule, separate or different treatment which denies or limits services from, or participation in, a program receiving Federal financial assistance would be prohibited by these regulations. On the other hand, these regulations do not automatically invalidate the provision of services through separate or different treatment on the basis of age. Separate or different treatment necessary to normal operations or to the achievement of a statutory objective would qualify for an exception under these regulations.

Section 90.49 of these regulations contains language which affects the rules against discrimination in two important ways: a recipient may voluntarily act to overcome the effects of conditions which, in the past, have limited participation in a federally assisted program on the basis of age; and, a recipient may provide special benefits for children or the elderly if, by so doing, the recipient does not exclude others who are eligible from participating in the federally assisted program. As mentioned earlier, HEW does not believe that Congress meant to disturb the practices of recipients which provide special benefits to children or

the elderly. For example, reduced fares for children and for senior citizens on public transportation or on railways or airlines would qualify as a special benefit under § 90.49 of these regulations. The definition of who qualifies as "children" or "elderly" for purposes of receiving a special benefit will be left to the reasonable discretion of the recipients who voluntarily provide the benefit.

5. *What are the Statutory Exceptions to the Rules Against Age Discrimination?* a. *Definitions of Statutory Objective and Normal Operation.* Many commenters questioned the meaning, clarity, and interpretation of the statutory exceptions to the prohibition against age discrimination contained in the proposed rules §§ 90.14 and 90.15.

Two phrases, "normal operations" and "statutory objective" are used in these regulations in interpreting the Act's exceptions for explicit age distinctions (§ 90.14) and for the use of factors other than age (§ 90.15). Critical to an understanding of these statutory exceptions is the definition of "statutory objective" and the definition of "normal operation."

The NPRM stated that statutory objective would mean either: (1) any purpose of a program or activity expressly stated in a statute, or (2) any purpose of a program or activity expressly stated in a statute or reasonably inferred from its provisions or legislative history. Because legislative history is a broad concept and because statutory objectives will be used to justify the use of administratively imposed age distinctions or factors other than age which have a disproportionate effect, HEW believes that the term "statutory objective" should be construed to mean only expressly stated objectives.

The NPRM was silent about whether the term "statutory objective" referred to Federal statutes, or State statutes, or local statutes, or all statutes. HEW believes the definition of "any law" in § 90.3 and the definition of "statutory objective" in § 90.13 should be parallel. Therefore, the final regulations define "statutory objective" to mean "any purpose of a program or activity expressly stated in any Federal statute, State statute or local statute or ordinance adopted by an elected, general purpose legislative body."

The final regulations have not changed the definition of "normal operation." "Normal operation" continues to mean "the operation of a program or activity without significant changes that would impair its ability to meet its objectives." This definition of "normal operation" means that a recipient of Federal funds may not use the statutory exceptions to justify refusing to make changes in program operation because those changes disturb administrative routine or are inconvenient.

b. *The four-part test for determining when an explicit age distinction is necessary to normal program operations or necessary to achieve a statutory objective.* Section 90.14 establishes a four-part test for explicit age distinctions which are claimed to be necessary to the normal operation of a program or activity, or to the achievement of a statutory objective of a program or activity.

The NPRM provided that an action reasonably takes age into account as a factor necessary to the normal operation or the achievement of a statutory objective of a program or activity, if:

(a) Age is used as a measure or approximation of one or more other characteristics (e.g., maturity);

(b) The other characteristic(s) must be measured or approximated in order for the normal operation of the program or activity to continue, or to achieve any statutory objective of the program or activity;

(c) The other characteristic(s) can be reasonably measured or approximated by the use of age; and

(d) The other characteristic(s) are difficult, costly, or otherwise impractical to measure directly.

The final regulations retain the four-part test, with some changes. The word "and" has been added after parts (a) and (b) to clarify the intent that an age distinction must meet all four parts in order to qualify for an exception. The reference to "maturity" has been deleted as an example of a characteristic for which age may be an approximation, because commenters felt that the term was too vague and did not illustrate what was meant in the test. The first part of the test in § 90.14 refers to a situation in which a program uses an age distinction as an indicator of some other characteristic, such as susceptibility to disease.

The third change occurs in part (d) of the test. The final regulations no longer contain a reference to cost or difficulty; however, part (d) now requires that the characteristics for which age is an approximation must be impractical to measure directly on an individual basis.

Thus, to qualify for an exception under § 90.14, all four of the following conditions must be met: (a) the age distinction in question must be used as an indicator or measure of some other (non-age) characteristic; (b) the *other* characteristic must be necessary for "normal operation" or for the achievement of a "statutory objective"; (c) the other characteristic must be capable of being reasonably approximated by age; and (d) the other characteristic must be impractical to measure directly on an individual basis.

The test set out in § 90.14 is designed to require careful scrutiny of age distinctions in programs receiving Federal financial assistance. It is not intended to serve as a basis for permitting continued use of age distinctions for the sake of administrative convenience if this results in denial or limitation of services on the basis of age.

HEW encourages recipients to apply age distinctions flexibly; that is, to permit a person, upon a proper showing of the necessary characteristic to participate in the activity or program even though he or she would otherwise be barred by the age distinction. Other things being equal, an age distinction is more likely to qualify under one of the statutory exceptions if it does not automatically bar all those who do not meet the age requirements.

Examples* "Necessary to the Normal Operation of the Program."

1. A youth organization receiving Federal financial assistance imposes a maximum age limitation on membership. The organization claims that it has as an objective, the training, education and character development of youth. The use of a maximum age limit *is necessary* to the normal operation of the recipient's program because:

(a) Age is used as a measure of the need for training, education, and character building experiences preparing for the assumption of adult responsibility; and

(b) The need for the service must be measured in order for the youth organization's objective to be met; and

(c) Age is highly related to the need for this service and is thus a reasonable measure of it; and

(d) It is not practical to measure this need on an individual basis (i.e., while some persons over the age limit might benefit from the service and some persons under the age limit might not need it, there is no practical way to identify them on an individual basis).

2. A medical school receiving Federal financial assistance generally does not admit anyone over 35 years of age, even though this results in turning away highly qualified applicants over 35.

The school claims that it has an objective, the teaching of qualified medical students who, upon graduation, will practice as long as possible. The school believes that this objective requires it to select younger applicants over older ones.

The use of such an age distinction *is not necessary* to the normal operation of the

*The examples illustrate general situations in which the regulations are applied to hypothetical recipients.

recipient's program because it does not meet the requirement of § 90.14(b).

Age of the applicant may be a reasonable measure of a non-age characteristic (longevity of practice). This characteristic may be impractical to measure directly on an individual basis. Nevertheless, achieving a high average longevity of practice for its graduates cannot be considered a program objective for a medical school within the meaning of the Act. The "normal operation" exception is not intended to permit a recipient to use broad notions of efficiency or cost-benefit analysis to justify exclusion from a program on the basis of age. The basic objectives of the medical school involve training competent and qualified medical school graduates. These objectives are not impaired if the average length its graduates practice medicine is lowered by a fraction of a year (or even more) by the admission of qualified applicants over 35 years of age.

Examples:* "Necessary to the Achievement of a Statutory Objective."

1. Applications for grants for disease control programs under the Public Health Service Act can only be approved if they "(B) contain assurances satisfactory to the Secretary that . . . the applicant will conduct such programs as may by necessary (i) to develop an awareness in those persons in the area served by the applicant who are most susceptible to the disease or conditions . . . of appropriate preventive behavior and measures (including immunization) and diagnostic procedures for such disease, and (ii) to facilitate their access to such measures and procedures," (42 U.S.C. 247b).

Under the test of § 90.14, *it is necessary* to the achievement of this explicit statutory objective to give priority in immunization to age categories most at risk to the disease in question because:

(a) Age is being used as a measure of susceptibility to a disease; and

(b) Susceptibility to disease must be measured for the statutory objective to be met; and

(c) Age is a reasonable measure of susceptibility to the particular disease; and

(d) Susceptibility to the disease is impractical to measure directly on an individual basis.

2. The purpose of the Adult Education Act (20 U.S.C. 1201 *et seq.*) is to provide education that will "enable all adults to continue their education . . . and . . . enable them to become more employable, productive, and responsible citizens." (20 U.S.C. 1201.) The Act defines an adult as "any individual who has attained the age of 16." (20 U.S.C. 1201(a).)

A recipient limits participation in its adult education program to adults under 35 on the grounds that this is necessary to achieve the explicit Adult Education Act objective of increasing employability, productivity, and responsibility.

It *is not necessary* to the achievement of this statutory objective to limit participation to those under 35. This age limitation fails at least two elements of the four-part test set out in § 90.14. Employability, productivity and responsibility need not be measured in order to meet the statutory objective of making adults more employable, productive or responsible because the objective is comparative rather than absolute. The statute only requires an effort to improve these characteristics in an individual, not to maximize the degree of improvement.

These characteristics have no demonstrable correlation with age and cannot be reasonably measured by the use of age (§ 90.14(c)).

Whether or not these characteristics can practically be measured directly on an individual basis need not be considered, since the characteristics do not have to be measured in order to meet the statutory objective.

c. *Use of Reasonable Factors Other than Age.* Section 90.15 of the NPRM set out four options to characterize the relationship between a factor other than age that may have a discriminatory effect and the normal operation of a program or the achievement of a statutory objective. Those four options were rational, direct, substantial, and necessary. Commenters disagreed about what relationship a factor other than age should bear to the normal operation or the statutory objective of a program or activity.

The final regulations require that a factor other than age bear a direct and substantial relationship to the normal operation of the statutory objective of a program or activity. The "rational" option, which was equated in the NPRM with the rational basis test used under the equal protection clause of the Fourteenth Amendment, has been rejected on the grounds that many serious discriminatory effects created by factors other than age would be likely to survive a rational basis level of scrutiny.

The "necessary" option has been rejected because it requires a test which is not sufficiently flexible to deal with the variety of factors other than age and the variation in facts and circumstances that contribute to whether those factors other than age are "reasonable."

The regulations adopt the "direct and substantial" standard because it provides the appropriate flexibility and, at the same time, avoids the weaknesses inherent in the "rational" standard. Use of the "direct and substantial" standard means that use of factors other than age must be carefully examined in light of the individual facts and circumstances surrounding their use. This examination will determine whether use of the factor other than age is a sufficiently effective method of achieving a worthwhile program purpose to justify limiting or denying services or participation to adversely affected persons.

Examples:* "Reasonable Factors Other Than Age."

1. A federally assisted training program uses a physical fitness test as a factor for selecting participants to train for a certain job. The job involves frequent heavy lifting and other demands for physical strength and stamina. Even though older persons might fail the test more frequently than younger persons, the physical fitness test measures a characteristic that is *directly and substantially* related to the job for which persons are being trained and is, therefore, permissible under the Act.

2. The same program referred to in (1) above uses the same physical fitness test to select participants for a training program for clerical work. It claims that persons who pass the test are likely to do better work than those who are unable to pass the test. Even if this were true, the relationship between the requirements of the test and the requirements of the type of job for which training is being offered *is not direct and substantial.* It is so tenuous and limited that it will not justify the test's age discriminatory effect. In this situation, use of the test would violate the Act.

6. *Cost/Benefit Analysis.* The NPRM raised the issue of whether cost-benefit considerations can justify the use of age distinctions or factors other than age. A majority of commenters expressed support for the NPRM position that a cost-benefit consideration by itself cannot be the sole justification for an exception under § 90.14 and § 90.15. Others, however, opposed any use of cost-benefit analysis in the administration of federally assisted programs.

The use of an explicit age distinction in the operation of a federally assisted program will have to be justified as necessary to the normal operation of the program or to the achievement of a statutory objective. That is, the explicit age distinction will have to meet the four part test of § 90.14 and cannot be disqualified or justified because it reflects a cost-benefit consideration. Use of a factor other than age will have to meet the test established in § 90.15 and cannot be disqualified or justified because it reflects a cost-benefit consideration. The scrutiny afforded age distinctions and factors other than age under these regulations should have the effect of screening out discriminatory cost-benefit considerations.

7. *Relationship Between General and Age-Targeted Programs.* Another major issue in the NPRM concerned similar services provided by both general and

*The examples illustrate general situations in which the regulations are applied to hypothetical recipients.

*The examples illustrate general situations in which the regulations are applied to hypothetical recipients.

age-targeted programs. The question was whether the existence of an age-targeted program in any way relieved a general program of its obligation to serve the age group eligible for the age-targeted program.

Many commenters expressed the view that the general program was not relieved in any way of its obligation to serve everyone regardless of age. They reasoned that: the age targeted program was intended to supplement service for the eligible population, not to replace the services provided by the general program; an age-targeted program recognizes the special or additional needs of an age group, so that any restriction on the availability of services in a general program based solely on the existence of an age-targeted program would be discriminatory; administrators should not be given discretion to limit participation on the basis of age in a general program which Congress created to serve all ages.

Some commenters did say, however, that there are occasions when a general program should be permitted to deny services to an age group which is served elsewhere. They reasoned that the general programs can then focus on those in need who are not being served elsewhere; services offered in a general program should be based on the needs of the community as a whole and should take into account what is offered elsewhere; to require a general program to spread its limited resources to all age groups, regardless of the availability of similar services, would weaken the quality of the services provided. There was no support for the view that the general program's obligation was unconditionally lessened by the existence of the age targeted program.

The final regulations continue the policy expressed in the NPRM that, for a general program, any deviation from a policy of serving all eligible persons regardless of age that results in a denial or limitation of service on the basis of age is only permissible if it meets one of the statutory exceptions under § 90.14 or § 90.15.

A general program can focus its services by referring persons to existing age targeted programs only if those actions do not result in the denial of services to the individual or in the provision of lesser or different services. However, HEW is persuaded that there are situations when referral to an age targeted program does not result in a denial or limitation of services. For example, a program which serves all ages may be aware of an age targeted program which, because of its specialization, offers better services to that age group. A general program may have a waiting list of applicants while a similar age targeted program has space available. In situations like these, a general program could refer an applicant to the age targeted program provided that it had sufficiently well established relationship with the age targeted program to assure that the person referred actually received the service sought.

8. *Mediation of Age Discrimination Complaints.* The NPRM proposed that complaints of age discrimination be subject to mediation after initial screening by the Federal agency. The NPRM also proposed that participation in mediation be mandatory for both complainant and recipient and that administration of the mediation process be centralized in one government agency, the Federal Mediation and Conciliation Service (FMCS). These provisions of the NPRM have been kept in the final regulations.

While most commenters supported the proposed use of mediation, some commenters questioned the appropriateness of requiring mediation as the first step in resolving an age discrimination complaint. They argued that mediation promotes inappropriate bargaining over civil rights, that mediation may jeopardize the rights of complainants, that not every complaint is suitable for mediation, that mediation introduces a new and different step in the complaint resolution process which will be unnecessarily confusing to complainants and recipients.

HEW continues to believe that the mediation process is an important innovation in resolution of age discrimination complaints. Mediation is an effort to provide faster and more creative resolution of complaints through informal methods of dispute resolution. Attempts to reach a mediated settlement of the complaint must be completed in the first 60 days after the complaint is received. While mediation does represent a new step in the complaint resolution process, the experience in resolving complaints under other civil rights statutes has been that the 60 days set aside for mediation will not significantly delay the enforcement process.

Experience with mediation in other areas indicates that even the most intransigent parties can arrive at a mutually satisfactory resolution of their dispute. Consequently, HEW believes it is desirable to require that mediation be attempted in all complaints. Mediation does not necessarily mean that the two parties to the dispute must meet face to face; each may meet separately with the mediator. Since the mediated settlement must be satisfactory to both parties, neither the complainant nor the recipient is compelled to settle the complaint. Since the cost of the mediator will be paid by the Federal government, the financial burden on complainants and recipients will be minimal. HEW believes that the ADA offers a unique opportunity to try this innovative approach to the resolution of disputes.

These regulations require that the management of the mediation process be centralized in one agency, designated by the Secretary of HEW. The FMCS will be that agency. Commenters critical of this decision questioned the wisdom of introducing a new agency into the civil rights enforcement process. Some suggested that each agency should manage its own mediation process, to permit the use of staff who would be more familiar with the program and problems of the Federal agency receiving the complaint.

HEW believes that the benefits to be realized by centralizing the management of the mediation process are substantial and that the FMCS is the appropriate agency for the job. The use of a single agency to manage the mediation process assures that uniform standards will be used in the recruitment and training of mediators, that the training will be centralized, that consistent procedures will be followed in the mediation, and that there can be a comprehensive and coherent evaluation of the process as part of the 30 month review of the effectiveness of these regulations. While the use of the FMCS does introduce a new agency into civil rights enforcement, one of the key elements in mediation is that both sides have confidence that the mediator is an independent third party. HEW believes that mediation of age discrimination complaints has a better chance to succeed if the mediator is not part of the staff of a Federal agency responsible for enforcing the Age Discrimination Act. The FMCS, which has an established reputation for mediating disputes, will draw on some of its experienced staff and will recruit and train a cadre of community based mediators who will work on age discrimination complaints.

After 30 months, HEW will evaluate the mediation process in accordance with § 90.61 of these regulations. The process will be used, revised or restructured as indicated by the results of that review.

The Department of Health, Education, and Welfare adds Part 90 to Title 45 of the Code of Federal Regulations as set forth below.

Dated: June 5, 1979.

Joseph A. Califano Jr.,

Secretary, Department of Health, Education, and Welfare.

The Department of Health, Education, and Welfare adds Part 90 to Title 45 of the Code of Federal Regulations as set forth below:

PART 90—NONDISCRIMINATION ON THE BASIS OF AGE IN PROGRAMS OR ACTIVITIES RECEIVING FEDERAL FINANCIAL ASSISTANCE

Subpart A—General

Sec.

90.1 What is the purpose of the Age Discrimination Act of 1975?
90.2 What is the purpose of these regulations?
90.3 What programs and activities does the Age Discrimination Act of 1975 cover?
90.4 How are the terms in the regulations defined?

Subpart B—What is Age Discrimination?
(Standards for Determining Discriminatory Practices)

90.11 Purpose of this Subpart.
90.12 Rules against age discrimination.
90.13 Definitions of "normal operation" and "statutory objective."
90.14 Exceptions to the rules against age discrimination. Normal operation or statutory objective of any program or activity.
90.15 Exceptions to the rules against age discrimination. Reasonable factors other than age.
90.16 Burden of proof.

Subpart C—What are the Responsibilities of the Federal Agencies?

90.31 Issuance of regulations.
90.32 Review of agency policies and administrative practices.
90.33 Interagency cooperation.
90.34 Agency reports.

Subpart D—Investigation, Conciliation and Enforcement Procedures

90.41 What is the purpose of this Subpart?
90.42 What responsibilities do recipients and agencies have generally to ensure compliance with the Act?
90.43 What specific responsibilities do agencies and recipients have to ensure compliance with the Act?
90.44 Compliance reviews.
90.45 Information requirements.
90.46 Prohibition against intimidation or retaliation.
90.47 What further provisions must an agency make in order to enforce its regulations after an investigation indicates that a violation of the Act has been committed?
90.48 Alternate funds disbursal procedure.
90.49 Remedial and affirmative action by recipients.
90.50 Exhaustion of administrative remedies.

Subpart E—Future Review of Age Discrimination Regulations

90.61 Review of general regulations.
90.62 Review of agency regulations.

Authority: *Age Discrimination Act of 1975, 42 U.S.C. 6101 et seq.*

Subpart A—General

§ 90.1 What is the purpose of the Age Discrimination Act of 1975?

The Age Discrimination Act of 1975, as amended, is designed to prohibit discrimination on the basis of age in programs or activities receiving Federal financial assistance. The Act also permits federally assisted programs and activities, and recipients of Federal funds, to continue to use certain age distinctions and factors other than age which meet the requirements of the Act and these regulations.

§ 90.2 What is the purpose of these regulations?

(a) The purpose of these regulations is to state general, government-wide rules for the implementation of the Age Discrimination Act of 1975, as amended, and to guide each agency in the preparation of agency-specific age discrimination regulations.

(b) These regulations apply to each Federal agency which provides Federal financial assistance to any program or activity.

§ 90.3 What programs and activities does the Age Discrimination Act of 1975 cover?

(a) The Age Discrimination Act of 1975 applies to any program or activity receiving Federal financial assistance, including programs or activities receiving funds under the State and Local Fiscal Assistance Act of 1972 (31 U.S.C. 1221 *et seq.*).

(b) The Age Discrimination Act of 1975 does not apply to:

(1) An age distinction contained in that part of a Federal, State of local statute or ordinance adopted by an elected, general purpose legislative body which:

(i) Provides any benefits or assistance to persons based on age; or

(ii) Establishes criteria for participation in age-related terms; or

(iii) Describes intended beneficiaries or target groups in age-related terms.

(2) Any employment practice of any employer, employment agency, labor organization, or any labor-management joint apprenticeship training program, except for any program or activity receiving Federal financial assitance for public service employment under the Comprehensive Employment and Training Act of 1974 (CETA), (29 U.S.C. 801 *et seq.*).

§ 90.4 How are the terms in these regulations defined?

As used in these regulations, the term:

"Act" means the Age Discrimination Act of 1975, as amended, (Title III of Public Law 94-135).

"Action" means any act, activity, policy, rule, standard, or method of administration; or the use of any policy, rule, standard, or method of administration.

"Age" means how old a person is, or the number of elapsed years form the date of a person's birth.

"Age distinction" means any action using age or an age-related term.

"Age-related term" means a word or words which necessarily imply a particular age or range of ages (for example, "children," "adult," "older persons," but not "student").

"Agency" means a Federal department or agency that is empowered to extend financial assistance.

"Federal financial assistance" means any grant, entitlement, loan, cooperative agreement, contract (other than a procurement contract or a contract of insurance or guaranty), or any other arrangement by which the agency provides or otherwise makes available assistance in the form of:

(a) Funds;

(b) Services of Federal personnel; or

(c) Real and personal property or any interest in or use of property, including:

(1) Transfers or leases of property for less than fair market value or for reduced consideration; and

(2) Proceeds from a subsequent transfer or lease of property if the Federal share of its fair market value is not returned to the Federal Government.

"Recipient" means any State or its political subdivision, any instrumentality of a State or its political sub-division, any public or private agency, institution, organization, or other entity, or any person to which Federal financial assistance is extended, directly or through another recipient. Recipient includes any successor, assignee, or transferee, but excludes the ultimate beneficiary of the assistance.

"Secretary" means the Secretary of the Department of Health, Education, and Welfare.

"United States" means the fifty States, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Wake Island, the Canal Zone, the Trust Territory of the Pacific Islands, the Northern Marianas, and the territories and possessions of the United States.

Subpart B—What is Age Discrimination?

Standards for Determining Discriminatory Practices

§ 90.11 Purpose of this subpart.

The purpose of this subpart is to set forth the prohibitions against age discrimination and the exceptions to those prohibitions.

§ 90.12 Rules against age discrimination.

The rules stated in this section are limited by the exceptions contained in sections 90.14, and 90.15 of these regulations.

(a) *General rule:* No person in the United states shall, on the basis of age, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any program or activity receiving Federal financial assistance.

(b) *Specific rules:* A recipient may not, in any program or activity receiving Federal financial assistance, directly or through contractual, licensing, or other arrangements use age distinctions or take any other actions which have the effect, on the basis of age, of:

(1) excluding individuals from, denying them the benefits of, or subjecting them to discrimination under, a program or activity receiving Federal financial assistance, or

(2) Denying or limiting individuals in their opportunity to participate in any program or activity receiving Federal financial assistance.

(c) The specific forms of age discrimination listed in paragraph (b) of this section do not necessarily constitute a complete list.

§ 90.13 Definitions of "normal operation" and "statutory objective."

For purposes of sections 90.14, and 90.15, the terms "normal operation" and "statutory objective" shall have the following meaning:

(a) "Normal operation" means the operation of a program or activity without significant changes that would impair its ability to meet its objectives.

(b) "Statutory objective" means any purpose of a program or activity expressly stated in any Federal statute, State statute, or local statute or ordinance adopted by an elected, general purpose legislative body.

§ 90.14 Exceptions to the rules against age discrimination. Normal operation or statutory objective of any program or activity.

A recipient is permitted to take an action, otherwise prohibited by section 90.12, if the action reasonably takes into account age as a factor necessary to the normal operation or the achievement of any statutory objective of a program or activity. An action reasonably takes into account age as a factor necessary to the normal operation or the achievement of any statutory objective of a program or activity, if:

(a) Age is used as a measure or approximation of one or more other characteristics; and

(b) The other characteristic(s) must be measured or approximated in order for the normal operation of the program or activity to continue, or to achieve any statutory objective of the program or activity; and

(c) The other characteristic(s) can be reasonably measured or approximated by the use of age; and

(d) The other characteristic(s) are impractical to measure directly on an individual basis.

§ 90.15 Exceptions to the rules against age discrimination. Reasonable factors other than age.

A recipient is permitted to take an action otherwise prohibited by section 90.12 which is based on a factor other than age, even though that action may have a disproportionate effect on persons of different ages. An action may be based on a factor other than age only if the factor bears a direct and substantial relationship to the normal operation of the program or activity or to the achievement of a statutory objective.

§ 90.16 Burden of proof.

The burden of proving that an age distinction or other action falls within the exceptions outlined in sections 90.14 and 90.15 is on the recipient of Federal financial assistance.

Subpart C—What are the Responsibilities of the Federal Agencies?

§ 90.31 Issuance of regulations.

(a) The head of each agency which extends Federal financial assistance to any program or activity shall publish proposed and final age discrimination regulations in the Federal Register to:

(1) Carry out the provisions of section 303 of the Age Discrimination Act of 1975; and

(2) Provide for appropriate investigative, conciliation, and enforcement procedures.

(b) Each agency shall publish its proposed agency age discrimination regulations no later than 90 days after the publication date of the final general, government-wide age discrimination regulations.

(c) Each agency shall submit its final agency regulations to HEW for review no later than 120 days after publication of proposed agency age discrimination regulations.

(d) Final agency age discrimination regulations shall be consistent with these general, government-wide age discrimination regulations and shall not be published until the Secretary approves them.

(e) Each agency shall include in its regulations a provision governing the operation of an alternate funds disbursal procedure as described in section 90.48 of these regulations.

(f) Each agency shall publish an appendix to its final age discrimination regulations containing a list of each age distinction provided in a Federal statute or in regulations affecting financial assistance administered by the agency.

§ 90.32 Review of agency policies and administrative practices.

(a) Each agency shall conduct a review of age distinctions it imposes on its recipients by regulations, policies, and administrative practices. The purpose of this review is to identify how age distinctions are used by each Federal agency and whether those age distinctions are permissible under the Act and implementing regulations.

(b) No later than 12 months from the date the agency published its final regulations, the agency shall publish, for public comment, a report in the Federal Register containing:

(1) The results of the review conducted under paragraph (a) of this section;

(2) A list of the age distinctions contained in regulations which are to be continued;

(3) The justification under the requirements of the Act and these regulations for each age distinction to be continued;

(4) A list of the age distinctions not contained in regulations but which will be adopted by regulation under the Administrative Procedure Act using the notice and comment procedures specified in 5 U.S.C. 553; and

(5) A list of the age distinctions to be eliminated.

(c) Beginning with the effective date of an agency's final regulations, the agency may not impose a new age distinction unless the age distinction is adopted by regulation under the Administrative Procedure Act using the notice and comment procedures specified in 5 U.S.C. 553.

(d) Beginning 12 months after the publication of its age discrimination regulations, an agency may not continue

an existing age distinction, unless the age distinction has already been adopted by regulation or is adopted by regulation under the Administrative Procedure Act using the notice and comment procedures specified in 5 U.S.C. 553.

§ 90.33 Interagency cooperation.

Where two or more agencies provide Federal financial assistance to a recipient or class of recipients, the Secretary may designate one of the agencies as the sole agency for all compliance and enforcement purposes with respect to those recipients, except for the ordering of termination of funds and the notification of the appropriate committees of Congress.

§ 90.34 Agency reports.

Each agency shall submit to the Secretary not later than December 31 of each year, beginning in 1979, a report which:

(a) Describes in detail the steps taken during the preceding fiscal year to carry out the Act; and

(b) Contains data on the frequency, type, and resolution of complaints and on any compliance reviews, sufficient to permit analysis of the agency's progress in reducing age discrimination in programs receiving Federal financial assistance from the agency; and

(c) Contains data directly relevant to the extent of any pattern or practice of age discrimination which the agency has identified in any programs receiving Federal financial assistance from the agency and to progress toward eliminating it; and

(d) Contains evaluative or interpretative information which the agency determines is useful in analyzing agency progress in reducing age discrimination in programs receiving Federal financial assistance from the agency; and

(e) Contains whatever other data the Secretary may require.

Subpart D—Investigation, Conciliation and Enforcement Procedures

§ 90.41 What is the purpose of this Subpart?

This subpart sets forth requirements for the establishment of compliance, investigation, conciliation, and enforcement procedures by agencies which extend Federal financial assistance.

§ 90.42 What responsibilities do recipients and agencies have generally to ensure compliance with the Act?

(a) A recipient has primary responsibility to ensure that its programs and activities are in compliance with the Age Discrimination Act and shall take steps to eliminate violations of the Act. A recipient also has responsibility to maintain records, provide information, and to afford access to its records to an agency to the extent required to determine whether it is in compliance with the Act.

(b) An agency has responsibility to attempt to secure recipient compliance with the Act by voluntary means. This may include the use of this services of appropriate Federal, State, local, or private organizations. An agency also has the responsibility to enforce the Age Discrimination Act when a recipient fails to eliminate violations of the Act.

§ 90.43 What specific responsibilities do agencies and recipients have to ensure compliance with the Act?

(a) *Written notice, technical assistance, and educational materials.* Each agency shall: (1) Provide written notice to each recipient of its obligations under the Act. The notice shall include a requirement that where the recipient initially receiving funds makes the funds available to a sub-recipient, the recipient must notify the sub-recipient of its obligations under the Act.

(2) Provide technical assistance, where necessary, to recipients to aid them in complying with the Act.

(3) Make available educational materials setting forth the rights and obligations of beneficiaries and recipients under the Act.

(b) *Self-evaluation.* (1) Each agency shall require each recipient employing the equivalent of 15 or more full time employees to complete a written self-evaluation of its compliance under the Act within 18 months of the effective date of the agency regulations.

(2) Each recipient's self-evaluation shall identify and justify each age distinction imposed by the recipient.

(3) Each recipient shall take corrective and remedial action whenever a self-evaluation indicates a violation of the Act.

(4) Each recipient shall make the self-evaluation available on request to the agency and to the public for a period of 3 years following its completion.

(c) *Complaints.*—(1) *Receipt of complaints.* Each agency shall establish a complaint processing procedure which includes the following:

(i) A procedure for the filing of complaints with the agency;

(ii) A review of complaints to assure that they fall within the coverage of the Act and contain all information necessary for further processing;

(iii) Notice to the complainant and the recipient of their rights and obligations under the complaint procedure, including the right to have a representative at all stages of the complaint procedure; and

(iv) Notice to the complainant and the recipient (or their representatives) of their right to contact the agency for information and assistance regarding the complaint resolution process.

(2) *Prompt resolution of complaints.* Each agency shall establish procedures for the prompt resolution of complaints. These procedures shall require each recipient and complainant to participate actively in efforts toward speedy resolution of the complaint.

(3) *Mediation of complaints.* Each agency shall prompty refer all complaints which fall within the coverage of the Act to a mediation agency designated by the Secretary.

(i) The referring agency shall require the participation of the recipient and the complainant in the mediation process, although both parties need not meet with the mediator at the same time.

(ii) If the complainant and recipient reach a mutually satisfactory resolution of the complaint during the mediation period, they shall reduce the agreement to writing. The mediator shall send a copy of the settlement to the referring agency. No further action shall be taken based on that complaint unless it appears that the complainant or the recipient is failing to comply with the agreement.

(iii) Not more than 60 days after the agency receives the complaint, the mediator shall return a still unresolved complaint to the referring agency for initial investigation. The mediator may return a complaint at any time before the end of the 60 day period if it appears that the complaint cannot be resolved through mediation.

(iv) The mediator shall protect the confidentiality of all information obtained in the course of the mediation process. No mediator shall testify in any adjudicative proceeding, produce any document, or otherwise disclose any information obtained in the course of the mediation process without prior approval of the head of the agency appointing the mediator.

(4) *Federal initial investigation.* Each agency shall investigate complaints unresolved after mediation or reopened because of a violation of the mediation agreement. As part of the initial investigation, the agency shall use informal fact finding methods including joint or individual discussions with the complainant and the recipient to establish the facts, and, if possible,

resolve the complaint to the mutual satisfaction of the parties. The agency may seek the assistance of any involved State program agency.

(5) *Formal investigation, conciliation, and hearing.* If the agency cannot resolve the complaint during the early stages of the investigation, it shall:

(i) Complete the investigation of the complaint.

(ii) Attempt to achieve voluntary compliance satisfactory to the agency, if the investigation indicates a violation.

(iii) Arrange for enforcement as described in section 90.47, if necessary.

§ 90.44 Compliance reviews.

(a) Each agency shall provide in its regulations that it may conduct compliance reviews, pre-award reviews, and other similar procedures which permit the agency to investigate, and correct, violations of the Act without regard to its procedures for handling complaints.

(b) If a compliance review or pre-award review indicates a violation of the Act, the agency shall attempt to achieve voluntary compliance with the Act. If voluntary compliance cannot be achieved, the agency shall arrange for enforcement as described in section 90.47.

§ 90.45 Information requirements.

Each agency shall provide in its regulations a requirement that the recipient:

(a) Provide to the agency information necessary to determine whether the recipient is in compliance with the Act; and

(b) Permit reasonable access by the agency to the books, records, accounts, and other recipient facilities and sources of information to the extent necessary to determine whether a recipient is in compliance with the Act.

§ 90.46 Prohibition against intimidation or retaliation.

Each agency shall provide in its regulations that recipients may not engage in acts of intimidation or retaliation against any person who:

(a) Attempts to assert a right protected by the Act; or

(b) Cooperates in any mediation, investigation, hearing, or other part of the agency's investigation, conciliation, and enforcement process.

§ 90.47 What further provisions must an agency make in order to enforce its regulations after an investigation indicates that a violation of the act has been committed?

(a) Each agency shall provide for enforcement of its regulations through:

(1) Termination of a recipient's Federal financial assistance under the program or activity involved where the recipient has violated the Act or the agency's regulations. The determination of the recipient's violation may be made only after a recipient has had an opportunity for a hearing on the record before an administrative law judge.

(2) Any other means authorized by law including but not limited to:

(i) Referral to the Department of Justice for proceedings to enforce any rights of the United States or obligations of the recipient created by the Act or the agency's regulations.

(ii) Use of any requirement of or referral to any Federal, State, or local government agency which will have the effect of correcting a violation of the Act or implementing regulations.

(b) Any termination under section 90.47(a)(1) shall be limited to the particular recipient and particular program or activity receiving Federal financial assistance or portion thereof found to be in violation of the Act or agency regulations. No termination shall be based in whole or in part on a finding with respect to any program or activity which does not receive Federal financial assistance.

(c) No action under paragraph (a) of this section may be taken until:

(1) The head of the agency involved has advised the recipient of its failure to comply with the Act or the agency's regulations and has determined that voluntary compliance cannot be obtained.

(2) Thirty days have elapsed after the head of the agency involved has sent a written report of the circumstances and grounds of the action to the committees of the Congress having legislative jurisdiction over the Federal program or activity involved. A report shall be filed whenever any action is taken under paragraph (a) of this section.

(d) An agency may defer granting new Federal financial assistance to a recipient when termination proceedings under section 90.47(a)(1) are initiated.

(1) New Federal financial assistance includes all assistance administered by or through the agency for which an application or approval, including renewal or continuation of existing activities, or authorization of new activities, is required during the deferral period. New Federal financial assistance does not include assistance approved prior to the beginning of termination proceedings or to increases in funding as a result of changed computation of formula awards.

(2) A deferral may not begin until the recipient has received a notice of opportunity for a hearing under section 90.47(a)(1). A deferral may not continue for more than 60 days unless a hearing has begun within that time or the time for beginning the hearing has been extended by mutual consent of the recipient and the agency. A deferral may not continue for more than 30 days after the close of the hearing, unless the hearing results in a finding against the recipient.

§ 90.48 Alternate funds disbursal procedure.

When an agency withholds funds from a recipient under its regulations issued under section 90.31, the head of the agency may disburse the withheld funds so directly to any public or non-profit private organization or agency, or State or political subdivision of the State. These alternate recipients must demonstrate the ability to comply with the agency's regulations issued under this Act and to achieve the goals of the Federal statue authorizing the program or activity.

§ 90.49 Remedial and affirmative action by recipients.

(a) Where a recipient is found to have discriminated on the basis of age, the recipient shall take any remedial action which the agency may require to overcome the effects of the discrimination. If another recipient exercises control over the recipient that has discriminated, both recipients may be required to take remedial action.

(b) Even in the absence of a finding of discrimination, a recipient may take affirmative action to overcome the effects of conditions that resulted in limited participation in the recipient's program or activity on the basis of age.

(c) If a recipient operating a program which serves the elderly or children in addition to persons of other ages, provides special benefits to the elderly or to children the provision of those benefits shall be presumed to be voluntary affirmative action provided that it does not have the effect of excluding otherwise eligible persons from participation in the program.

§ 90.50 Exhaustion of administrative remedies.

(a) The agency shall provide in its regulations that a complainant may file a civil action following the exhaustion of administrative remedies under the Act. Administrative remedies are exhausted if:

(1) 180 days have elapsed since the complainant filed the complaint and the agency has made no finding with regard to the complaint; or

(2) The agency issues any finding in favor of the recipient.

(b) If either of the conditions set forth in § 90.50(a) is satisfied the agency shall:

(1) Promptly advise the complainant of this fact; and

(2) Advise the complainant of his or her right, under section 305(e) of the Act, to bring a civil action for injunctive relief that will effect the purposes of the Act; and

(3) Inform the complainant:

(i) That a civil action can only be brought in a United States district court for the district in which the recipient is found or transacts business;

(ii) That a complainant prevailing in a civil action has the right to be awarded the costs of the action, including reasonable attorney's fees, but that these costs must be demanded in the complaint;

(iii) That before commencing the action the complainant shall give 30 days notice by registered mail to the Secretary, the Attorney General of the United States, the head of the granting agency, and the recipient;

(iv) That the notice shall state: the alleged violation of the Act; the relief requested; the court in which the action will be brought; and whether or not attorney's fees are demanded in the event the complainant prevails; and

(v) That no action shall be brought if the same alleged violation of the Act by the same recipient is the subject of a pending action in any court of the United States.

Subpart E—Future Review of Age Discrimination Regulations

§ 90.61 Review of general regulations.

The Secretary shall review the effectiveness of these regulations in securing compliance with the Act. As part of this review, 30 months after the effective date of these regulations, the Secretary shall publish a notice of opportunity for public comment on the effectiveness of the regulations. The Secretary will assess the comments and publish the results of the review and assessment in the Federal Register.

§ 90.62 Review of agency regulations.

Each agency shall review the effectiveness of its regulations in securing compliance with the Act. As part of this review, 30 months after the effective date of its regulations, each agency shall publish a notice of opportunity for public comment on the effectiveness of the agency regulations. Each agency shall assess the comments and publish the results of the review in the Federal Register.

Note.—The following comment analysis will not appear in the Code of Federal Regulations.

Comment Analysis

The following comments suggestions and criticisms were made at public hearings or submitted in writing in response to the proposed rules. After the summary of each comment, a response is set forth stating the changes which have been made in the regulations or the reasons why no change was deemed necessary or appropriate. The comments are grouped according to sections of the proposed rules and are arranged in sequence.

Subpart A—General

§ 90.1 *What is the purpose of the Age Discrimination Act of 1975?*

§ 90.1 *Exclusive protection for the elderly.*

Comment: A number of commenters stated that Congress intended the ADA to protect the elderly exclusively or to a greater extent than other age groups. These commenters cited the fact that the ADA is part of the Older Americans Act and that most of the debate on the Act concerned discrimination against the elderly.

Response: The House/Senate Conference Committee report is clear in stating that the ADA applies to persons of all ages. The regulations do not, therefore, limit protection to the elderly or to any other age group. HEW does not believe that this interpretation of the coverage of the Act will in any way diminish protection of the elderly.

§ 90.1 *Reference to statutory exceptions*

Comment: Several commenters were concerned specifically about the second sentence in § 90.1 of the NPRM which stated that the ADA permits the use of certain age distinctions and factors other than age. They felt the sentence weakened the intent of the ADA by emphasizing that some age distinctions are permitted.

Response: HEW agrees that the proposed wording may have created a wrong impression. HEW has modified the sentence to serve the intended purpose of informing the reader, early in the regulations, that the ADA specifically allows certain age distinctions.

§ 90.3 *What programs and activities does the Age Discrimination Act of 1975 cover?*

§ 90.3(b)(1) *"Any law" exemption.*

Comment: Many commenters responded to the issue presented in the NPRM of how "any law" should be interpreted. Although a number of commenters stated that "any law" should be interpreted to mean either Federal, State and local statutes and regulations, or Federal, State and local statutes, the majority of commenters favored either Federal and State statutes, or Federal statutes only. A small number of commenters supported an interpretation of Federal statutes and Federal regulations.

Response: A discussion of the four options (presented in the NPRM) for interpreting "any law", the commenters' reasons for supporting one of the options, and HEW's final choice appears in the preamble to these regulations.

§ 90.3(b)(1) *Coverage of employment practices.*

Comment: Many commenters discussed employment practices. Some requested clarification of the distinction between the ADA and Age Discrimination in Employment Act of 1967 (ADEA), which only covers persons between 40 and 70 years of age. These commenters were uncertain if persons under 40 or over 70 were covered under the ADA. Although the commenters recognized that CETA public service employment is covered by the ADA, they were concerned that the ADA regulations fail to reach other types of employment.

A few commenters supported the NPRM position that the ADA covers programs which are both financial assistance and employment, like the College Work Study Program and the Work Incentive Program. Many commenters suggested that mandatory retirement ages be prohibited.

Response: HEW has made no change in the text of the regulations. Section 304(c)(1) of the ADA excludes employment practices from coverage, except for CETA-funded public service employment. The final regulations continue to apply only to programs that are both employment and Federal financial assistance, for example: the College Work Study Program. Other types of employment and employment practices, including mandatory retirement ages, clearly are not covered by the ADA and are not addressed in these regulations.

The ADEA, which the Equal Employment Opportunity Commission (EEOC) will administer beginning July 1, 1979, is the statute that addresses age discrimination in employment. However, the ADEA applies only to persons between the ages of 40 and 70.

§ 90.4 *How are the terms in these regulations defined?*

§ 90.4 *Definition for the term United States.*

Comment: Several commenters questioned whether the regulations applied to *territories*. The proposed rules defined the word "recipient" in terms of a State or its political subdivision, but did not mention territory.

Response: HEW has added *"United States"* to the definitions and has defined United States to include the territories.

This is consistent with the regulations implementing Title VI of the Civil Rights Act of 1964 (45 CFR Part 80) which define United States to include territory.

§ 90.4 *Definition of other terms.*

Comment: A few commenters suggested that the word *action* be defined to include the failure to take an action. Other commenters suggested that additional terms should be defined in this section, including *benefits* or *assistance, discriminate, undesirable age distinction, person, program or activity.* Commenters also suggested additions or changes to the definitions of *Federal financial assistance* and *recipient.*

Response: HEW has not changed the definition of *action*. A failure to act is an action and is covered by the definition. Many of the definitions including *Federal financial assistance* and *recipient* are designed to

coincide with the definitions in other civil rights regulations (covering prohibitions against race, sex, and handicap discrimination). HEW believes that definitions appearing in more than one of the civil rights regulations, should be consistent with one another.

HEW believes that the regulations are sufficiently clear concerning the meaning of the suggested terms and that further additions to the definition section would not add to the clarity of the regulations. The phrase *cooperative agreement* has been added to the definition of Federal financial assistance to reflect another type of assistance.

Subpart B—What is Age Discrimination? (Standards for Determining Discriminatory Practices)

§ 90.13 *Definitions of "normal operation" and "statutory objective."*

§ 90.13(a) *Definition of normal operation.*

Comment: Several commenters supported the NPRM definition. Several other commenters stated that it was either unclear or too broad. Suggestions for making the definition clearer included the following: explain how the term will apply to new operations; define what constitutes a significant change; define how long a program's ability to meet its objectives must be impaired; and define how the program objectives should be determined. Suggestions for restricting the definition included: limiting the "normal operation" to a statutory objective; requiring that the operation be appropriate and not for administrative ease; or requiring that a change must impair substantially the program's achievement of a statutory objective.

Response: HEW has not changed the definition of "normal operation." The existing definition provides other governmental agencies flexibility in applying the definition to their own programs which receive Federal financial assistance. Since there is a wide variation in federally funded programs, HEW does not want to restrict other agencies from refining the definition of "normal operation" to suit the characteristics of their individual programs.

"Normal operation" is defined in a way that does not require a program to make any change in its operation so significant as to impair achievement of its objectives. At the same time, a recipient would be required to make a change that merely disturbs administrative routine or causes administrative inconvenience.

§ 90.13(b) *Definition of statutory objective.*

Comment: A number of commenters stated that the definition of "statutory objective" should include reasonable inferences from its provisions or legislative history.

Several commenters suggested that a statutory objective must be expressly stated in the statute. They feared that anything may be inferred from a statute or its legislative history.

A few commenters stated that the regulations should contain a discussion of the relationship between the normal operation and a statutory objective.

Another commenter stated that a statutory objective should be limited to a Federal statutory objective. One commenter stated that no definitions were necessary since § 90.14 provided a "functional way" of interpreting the terms.

Response: HEW has changed the definition of "statutory objective" to clarify that it refers to the objective of any applicable Federal, State or local statute. The final regulations provide that a "statutory objective" means expressly stated objectives of Federal, State or local statutes. HEW believe that the definitions of "statutory objective" and "any law" should coincide.

Since "legislative history" is a broad concept, and because the "statutory objective" exception will be used to justify the use of administratively imposed age distinctions or factors other than age which have a disproportionate effect, HEW believes that "statutory objective" should be construed to mean only the expressly stated objectives of any Federal, State or local statute which affects the provision of Federal financial assistance.

§ 90.14 *Exceptions to the rules against age discrimination. Normal operation or statutory objectives of any program or activity.*

§ 90.14 *General use of this exception.*

Comment: A large number of commenters stated that either age distinctions should not be permitted or should be permitted only under narrow circumstances. Several of these commenters cited the Civil Rights Commission's conclusion that factors other than age are nearly always available and should be used. Commenters suggested restricting the use of age distinctions to children's programs; situations where individual or public safety is concerned; or situations where alternative characteristics are not available.

Response: The ADA makes specific provisions for exceptions to the general prohibition against the use of age distinctions. Section 304(b)(1)(A) of the ADA permits an exception for actions which reasonably take into account age as a factor necessary to the normal operation or the achievement of a statutory objective of a program or activity. Section 304(b)(1)(B) permits a further exception from coverage under the Act for reasonable factors other than age. HEW believes that the intent of the ADA is conveyed most accurately by adoption of the specific statutory language into § 90.14 and § 90.15 of the regulations together with a strict four part test in § 90.14 and a narrow interpretation of reasonable factors other than age in § 90.15.

§ 90.14 *Restriction on use of the exceptions.*

Comment: Several commenters stated that the regulations should be altered to require that a program must accept any person who does not meet the program's age requirements, if the person possesses the characteristics for which age is a measure or approximation.

A few commenters suggested that the regulations should make clear that persons must not be excluded from programs or activities on the presumption that because of their age they are economically, mentally, socially, or physically unqualified. An age classification, based on that kind of presumption, is an improper subterfuge for the real consideration.

Response: The ADA allows the use of age distinctions which are necessary to the normal operation or to the achievement of a statutory objective of a program or activity. The regulations implement this legislative provision and establish standards for determining whether an age distinction is necessary to the normal operation or to the achievement of a statutory objective. HEW believes that the four part test in § 90.14 establishes an appropriate standard. In determining whether an age distinction qualifies for one of the exceptions, it may be relevant that as a matter of policy the age distinction is not rigidly applied. That is, the recipient employing an age distinction may permit a person, upon a proper showing of the necessary characteristic, to participate in the program or activity even though that person would otherwise be barred by the age distinction.

§ 90.14 *General comments on the four-part test for determining when an action reasonably takes age into account as a factor necessary to the normal operation or statutory objective.*

Comment: Several commenters supported the four-part test. Several others stated that the criteria used in the test are unclear and difficult to interpret. Their reasons were that many of the terms used cannot be defined and that the issue of whether an action meets the criteria must be resolved on the basis of individual judgments.

Another commenter said that it was not clear whether all of the four-part test had to be met. A few commenters suggested that the regulations should include a list of programs or activities that meet the test and qualify under the exceptions.

A few commenters stated that the criteria were too strict and might prohibit many desirable programs and activities, such as extracurricular school activities. Another commenter stated the exception should permit age distinctions that are reasonably necessary to achieve any statutory objective or normal program operation.

Several commenters said the test was too broad or too general. As a result, all age distinctions could meet the test and agencies would have too much latitude in applying the test.

Response: HEW has retained the four part test in the final regulations. The word "and" has been added after parts (a)–(c) of the test to make clear that all four criteria must be met for the age distinction to qualify for an exception.

HEW believes the test will prohibit the use of age distinctions that violate the ADA and will permit the use of age distinctions that meet the requirements of the ADA. The test set out in § 90.14 is similar to the criteria which agencies have used successfully under the Age Discrimination in Employment Act to show exceptions for age distinctions which are *bona fide* occupational qualifications.

§ 90.14(a) *Age is used as a measure or approximation of other characteristics.*

Comment: A commenter stated there is an incorrect presumption in § 90.14(a) and (c) that the relationship between age and other characteristics is the same at both ends of the age continuum.

Response: HEW does not agree that this section makes the stated presumption. The only presumption made is that age may represent, in varying degrees, other characteristics in persons of all ages. Since the Act applies to persons of all ages, HEW believes it is neither necessary nor desirable to provide different standards for different age groups.

Comment: Several commenters suggested that the term "maturity" used as an example in this section be omitted or further defined. The reasons were that it is too vague a term or that age may be an indicator of physical maturity but not mental or emotional maturity.

Response: HEW agrees with the suggestion and has deleted the example. HEW does believe, however, that age may be, in some circumstances, a reasonable measure or approximation of characteristics reflecting either physical or emotional maturity.

Comment: A commenter said that the regulations should not limit the use of age to situations where it is used as a proxy only. A few other commenters stated that the term "proxy" should be defined and one suggested that the word "indicator" be used instead of "proxy".

Response: HEW has made no change in § 90.14(a). Where age is used by itself and does not represent another characteristic, that use of age would not pass the four-part test of § 90.14. The term "proxy" was not used in the text of the proposed regulations but only for discussion purposes in the preamble to the NPRM.

§ 90.14(b) *The other characteristic(s) must be measured or approximated.*

Comment: A few commenters suggested that the regulations should explain the meaning of the phrases "must be measured" and "necessary characteristic".

Response: HEW believes no change is necessary. A characteristic that "must be measured" is one that, if omitted from the program or activity, would significantly impair the normal operation or the achievement of a statutory objective. The phrase "necessary characteristic" does not appear in the text of the proposed regulations but was used for discussion purposes in the preamble to the NPRM. A necessary characteristic is one which meets the four part test. For example, age may be used as a measure of the likelihood of catching a communicable childhood disease. A program would be permitted to use age as a factor in identifying those persons to be vaccinated only if, in addition to the other requirements of the four part test, identification of individuals who are likely to get the disease is necessary in order to achieve a statutory objective of the program or to allow normal operation of the program.

§ 90.14(c) *The other characteristic can be reasonably measured or approximated by age.*

Comment: A commenter said that age should not be a proxy for adult characteristics. Several commenters said there must be a close relationship between age and the characteristic it represents because anything less is typically the basis for stereotyping or other discriminatory practices. A few commenters suggested the relationship should be mathematically, or statistically valid. A few other commenters suggested omitting the term "reasonable".

Response: HEW has not changed the final regulations. When age is used as a measure of one or more adult characteristics, the age distinction must still meet the remaining parts of the four part test. Implicit in the requirement that a characteristic be reasonably measured or approximated by the use of age, is the idea that there must be a close relationship between age and the characteristic being measured.

§ 90.14(d) *The other characteristics are difficult, costly, or otherwise impractical to measure directly.*

Comment: Several commenters stated that cost factors should never be used or should be used only if the other characteristics are impossible to measure. A few stated that if the other characteristic is so difficult or costly to determine it should not be an eligibility factor.

A few other commenters stated that, as an alternative, age be considered if direct measurement of the other characteristic is either impossible or so onerous to recipients or participants that it would impair the normal operation or achievement of any statutory objective.

Response: HEW has changed part four of the test to require that the characteristics for which age is an approximation must be impractical to measure directly on an individual basis. The references to cost and difficulty in measuring the factor have been deleted.

§ 90.14 *Exceptions for clubs or programs that have no basis in Federal statutes.*

Comment: A number of commenters said that the regulations either should provide a special or additional exception for, or should clarify how, senior citizens and other clubs may continue to apply an age criteria. Most said that a separate exception is needed in order for these types of programs to continue.

Suggestions for exempting or providing for the effective continuation of these age-related programs under the regulations included: permitting an exception for administrative action by any governmental level in developing and funding programs; provide a definition of "program" that allows an age-focused group to administer Federal funds as long as absolute age restrictions are not used in that portion of the program receiving Federal funds; permitting affirmative action that addresses the needs of various constituent groups.

A few commenters said that these organizations should either be prevented from using age criteria or be allowed to do so only if they meet the exceptions stated in § 90.14.

Response: It is not HEW's intention to prohibit the existence of such age-focused groups as senior citizens clubs or Junior Chambers of Commerce. If the organization receives Federal financial assistance, however, the age distinctions used by these organizations must qualify under § 90.14 of the final regulations.

§ 90.15 *Exceptions to the rules against discrimination. Reasonable factors other than age.*

§ 90.15 *General comments about the exception.*

Comment: A few commenters suggested that the meaning of the phrase, "disproportionate effect" be explained or defined. Another commenter suggested that a list of examples be included to show how the exception applies.

Response: This phrase has an established meaning in other civil rights statutes, like Title VI of the Civil Rights Act of 1964. HEW intends the phrase to have a similar meaning in these regulations; i.e., to prohibit those actions which do not make use of express age distinctions, but which result in discrimination on the basis of age. This means, for example, that due to the recipient's use of a factor other than age which does not have a direct and substantial relationship to a statutory objective or to the normal operation of a program, persons of a certain age group do not receive services under the recipient's program in proportion to their needs for those services.

§ 90.15 *Rational for linking this exception to statutory objective/normal operation.*

Comment: A commenter stated that reasonable factors other than age need not bear any relationship to the normal operation of a program or to a statutory objective. The reason stated was that these terms are not used in Section 304(b)(1)(B) of the ADA, which is the basis for the exception provided under § 90.15. The commenter said that it is only necessary to show that the factors used are reasonable.

Response: HEW believes it is necessary to establish a standard for what may be considered reasonable factors other than age. If no standard is set, the interpretation of what is reasonable could be so broad and inclusive that few factors would be prohibited. If this were true, the Act would provide little protection against factors other than age used to discriminate against various age groups.

§ 90.15 *Relationship of factors other than age to statutory objective/normal operation.*

Comment: A number of commenters suggested that factors other than age must bear a rational relationship to a program's statutory objectives or normal operation. A rational relationship is less restrictive, permits greater flexibility in considering individual factors such as needs, and is consistent with the legislative history and reflects the language of the ADA. Several commenters said the use of a stricter standard would impose great hardships and would disrupt worthwhile programs.

A number of commenters stated that a stricter standard is needed. They stated that the rational standard is too subjective and is easily influenced by traditional modes of operation. It is too easy for a recipient to meet on the one hand, and too difficult for a plaintiff to overcome in proving a claim of discrimination on the other hand.

A few commenters stated that by deleting the term "unreasonable" from the purpose clause of the original ADA, Congress intended that any action, in order to qualify for an exemption, should be subject to strict scrutiny. A few commenters stated that since the use of age must be "necessary" to the normal operation or statutory objective, the use of factors other than age should also be "necessary."

Another commenter stated that there would be a discrepancy between § 90.14 and § 90.15 if the rational standard were used. While a program may be prevented from using an age distinction because the factor it represents is not necessary to its statutory objective, the factor itself may be used under § 90.15 if it is only rationally related to the statutory objective.

Another commenter stated that the ADEA contains a similar exception for the use of reasonable factors other than age. The regulations for the ADEA and court decisions made on this issue have successfully applied a standard of careful scrutiny.

Response: HEW has concluded that the relationship of factors other than age to the normal operation or statutory objective of a program must be a "direct and substantial" relationship. This relationship requires use of a standard of careful review and examination of uses of factors other than age on a case-by-case basis. The exception in § 90.15 for a factor other than age becomes an issue for resolution if raised in a complaint or in a compliance review.

To use a rational relationship or minimal scrutiny standard would leave open the possibility of purposefully circumventing the ADA by allowing administrators to use factors other than age to operate a program when an explicit use of age would be prohibitted. HEW also believes that a minimal scrutiny standard would permit activities that should be prohibited. The use of that standard would make it very difficult to establish that an activity is in violation of the ADA. Therefore, HEW has adopted the "direct and substantial" test to define the relationship between "factors other than age" and the "normal operation" or "statutory objective" of a federally assisted program or activity.

§ 90.15 *Cost-benefit considerations as justification for age-distinctions.*

Comment: A number of commenters supported the NPRM position that a cost-benefit consideration by itself cannot be the justification for an exception under § 90.14 or § 90.15. Several commenters suggested factors to be considered in applying the tests, such as availability of adequate alternative services, relative equality of services in a given locale over a longer time period, effectiveness of program coordination at the local level, and the degree of necessity of limiting services based on extent of need and resources available. A few commenters stated that examples of specific programs should be included in the ADA regulations to illustrate where cost-benefit considerations will be allowed.

A few commenters opposed any use of cost-benefit analysis because it is too difficult to quantify the benefits involved in human services and it is impossible to predict the benefits a person will derive from services.

Several commented that the use of cost-benefit considerations is especially harmful to the elderly, and two commented that young people are even more vulnerable, being without political power. A few commenters stated that cost-benefit analysis should be specifically disallowed in the regulations.

Several commenters supported providing wider latitude for targeting programs based on cost-benefit considerations. They stated that programs with limited funds are unable to function without cost-benefit allocations and that program administrators should not be required to compose lengthy justifications for those allocations.

Response: The final regulations do not permit a cost-benefit consideration alone to justify an age distinction or a factor other than age. They allow the use of cost-benefit justifications for age distinctions or factors other than age only where those actions meet the tests of §§ 90.14–90.15. The tests of § 90.14 and § 90.15 should be sufficient to eliminate the misapplication of cost-benefit analysis.

§ 90.15 *Services rendered under age-specific programs.*

Comment: A number of commenters stated that the responsibility of a general program is not diminished by the existence of or referral to an age-specific program which provides the same service. Several commenters stated that the main thrust of the ADA is to make certain that the elderly receive their fair share of services, which requires full participation by both types of programs. Commenters cited several adverse effects of relieving a general program's obligation by using an age-specific program: separate and unequal treatment; overlending the age-specific program; and creating gaps of unserved populations.

Several commenters suggested that, to prevent duplication of services, a general program could be permitted to fulfill its obligations by referring people to a special program if: the general program could prove that the specific program's services were available; the general program used outreach to identify those ineligible for the specific program; the general program did not use more than its proportional share of funding as compared to the funding of the specific program; the general program did not deny services to anyone wishing to participate in its program.

Response: General programs may not restrict eligibility solely because of the existence of a similar age-targeted program if the result is a denial or limitation of services. A general program can focus its services by referring persons to existing age-targeted programs only if those actions do not result in a denial of services to the individual, or in the provision of lesser or different services. The recipient operating a general program should establish procedures to insure that a person referred to an age-targeted program in fact receives service.

§ 90.16 *Burden of proof.*

Comment: Several commenters supported the position that the burden is on the recipient to prove whether an age distinction or other action falls within an exception. A few commenters disagreed. Commenters in favor of placing the burden of proof upon the recipient stated that only the recipient has sufficient program knowledge.

Another commenter stated that the burden should be on the recipient only after a charging party makes a reasonable showing of discrimination. A few commenters agreed that the recipient should have the burden when the complaint concerns advancing age, but that the burden should shift to the complainant when he or she is denied the benefits of the program because he or she is too young.

Response. The final regulations continue to require that the recipient has the burden of proving that an age distinction or other action used in its program qualifies for one of the statutory exceptions.

HEW believes that the recipient is best able to demonstrate that an age distinction or factor other than age is entitled to an exception under § 90.14 or § 90.15. The recipient (rather than the complainant) is the party most knowledgeable about its program or activity, the normal operation of the program or activity, and any statutory objective governing the program or activity.

Subpart C—What Are the Responsibilities of the Federal Agencies?

§ 90.31 *Issuance of regulations.*

§ 90.31(d) *HEW approval of other agency regulations.*

Comment: A number of commenters supported the ADA's requirement that HEW review and approve the specific regulations issued by co-equal Federal agencies because this review will ensure that all agency regulations are consistent with both the ADA and the general regulations. Several commenters opposed a review role for HEW because HEW lacks sufficient knowledge of other agency programs to review their regulations effectively. Another commenter suggested the HEW seek clarification of its evaluation role from Congress.

Response: Under Section 306(a)(4) of the ADA, HEW is required to approve all agency age discrimination regulations. The final regulations have been changed to make clear that the regulations of each agency must be submitted to HEW and may not be published in final form until approved by the Secretary.

§ 90.31 *Mechanics and timetable for HEW review of other agency regulations.*

Comment: A few commenters suggested that interagency teams be established to assist HEW in reviewing regulations of other agencies. Several commenters expressed concern that the mechanics and the timetable for the review process are unclear and noted that there is insufficient time allowed in § 90.31 of the NPRM for HEW to complete the

review and approval of other agency regulations required by the ADA.

Response: HEW has involved in the development of these regulations an Interagency Task Force composed of those agencies affected by the ADA. This Task Force will continue to function during the development of specific regulations by each agency. The final regulations have been revised to require that each agency submit its final regulations to HEW at the end of 120 days for review and approval. An agency's final regulations may not be published until approved by the Secretary.

§ 90.32(f) *Appendix listing age distinctions.*

Comment: Several commenters suggested that the appendix containing existing age distinctions be published together with the agency's proposed regulations so that the public has an opportunity to comment on existing age distinctions as well as on the regulations proposed.

Response: For information purposes, HEW requires each Federal agency to publish, together with its final regulations, a list of age distinctions found in statutes and regulations. During the 12 months following the publication of its final regulations and appendix listing age distinctions, each agency is further required to review and evaluate against the tests and criteria outlined in §§ 90.13 and 90.14 all the agency's existing and proposed age distinctions. At the end of 12 months, each agency must publish in the Federal Register a report of this review indicating for each age distinction: (1) its elimination, or (2) a justification for its retention in agency regulations or, if not contained in regulations, its proposed adoption in regulation form.

§ 90.32 *Review of agency policies and administrative practices.*

§ 90.32 (a) and (b) *Twelve month review.*

Comment: A few commenters suggested that HEW be the sole agency responsible for evaluating the appropiateness of any age distinctions proposed by other agencies in their 12 month reviews, prior to the adoption of those age distinctions by regulations. A few other commenters suggested that HEW outline in the general regulations criteria for judging whether an agency may continue an age distinction so that these criteria are available to other agencies as they assess their age distinctions.

Response: HEW does not have the necessary knowledge of other agencies' programs to determine whether specific age distinctions are or are not appropriate. Agencies must justify the age distinctions used in their programs as lawful under the Act and these final regulations. HEW believes each agency is in the best position to assess which of its age distinctions should be retained or eliminated. The publication of each agency's assessment of its age distinctions and the accompanying opportunity for public comment on that assessment should provide information useful to agencies in reviewing their age distinctions. HEW will comment, where appropriate, on those distinctions during that public comment process.

§ 90.32(c) *Adopting age distinctions through regulations.*

Comment: Several commenters supported the position that only Congress has the authority to create age distinctions. These commenters opposed the adoption of age distinctions through agency regulations.

Response: Congress, through the ADA, has prohibited the use of age distinctions, with certain specific legislative exceptions. These exceptions permit age distinctions to be imposed not only through Congressional action, but also by way of agency regulations, policies and guidelines. HEW has required that in the case of federally imposed age distinctions, agencies must adopt those age distinctions by regulation under the Administrative Procedure Act (APA). In doing so, agencies must use the notice and comment procedure specified in 5 U.S.C. 553 of the APA.

§ 90.33 *Interagency cooperation.*

Comment: The commenters supported interagency cooperation for those recipients receiving funds from more than one Federal agency. They stated cooperation would eliminate duplication of enforcement procedures and reporting requirements. Commenters noted that the problem of duplication was particularly acute for State agencies, counties, and local governments receiving funds from a number of Federal agencies.

A number of commenters suggested that HEW be responsible for developing uniform government-wide procedures for complaint processing, compliance investigations, and enforcement proceedings. One suggested that given HEW's authority to review regulations, HEW should also act as a clearinghouse to review government-wide procedures.

Some commenters questioned what constitutes a "class of recipients," asking whether State agencies, counties or local governments would be considered a "class" for the purpose of designating a lead agency, and whether senior citizens could be considered a "class". [If so, would an Area Agency on Aging be an appropriate lead agency for that class?] Several commenters stated that criteria need to be established for designating the lead agency responsible for each class of recipients.

Response: HEW has revised this section of the regulations to provide further guidance in the setting up of a system of interagency cooperation. The revised § 90.33 provides that where two or more agencies provide Federal financial assistance to a recipient, the Secretary may designate one of the agencies as the sole agency for all compliance and enforcement purposes with respect to those recipients, except for ordering the termination of funds and the notification of appropriate committees of Congress.

§ 90.34 *Agency reports.*

Comment: Many commenters favored the targeted approach to data collection proposed by HEW because it minimizes the paper-work burden. Others supported a targeted approach but questioned what criteria would be used to select the data for targeting and collection. Some commenters opposed the targeted approach. They believe it will not provide sufficient information to meet the Act's reporting requirements because program participation and service population data are necessary to track age discrimination.

Some commenters opposed relying exclusively on complaints to satisfy the ADA data requirements because complaints may not reflect accurately the extent of age discrimination. Other commenters supported the use of complaints as part of a targeted data collection approach because complaints may help identify programs in which discriminatory practices are occurring.

Reponse: HEW believes that targeting is the most effective way to satisfy the ADA's reporting requirements without increasing the burden on recipients. The targeted approach does not rely exclusively on tracking complaints but recognizes that complaint data have been useful in uncovering patterns of discrimination in other civil rights statutes. In all cases, each agency should seek data that appear to be most useful in identifying age discrimination and that will impose the least burden on recipients.

§ 90.34(e) *Data requirements.*

Comment: Some commenters suggested deleting the data requirement in § 90.34(e) because it permits HEW to require potentially unlimited additional data without giving agencies fair notice of what data they will be expected to collect.

Response: This section remains unchanged. Under the ADA it is HEW's responsibility to review the performance of each agency in complying with the ADA. HEW is committed to exercising this responsibility in the least burdensome way while retaining the flexibility to require the data necessary to fulfill that responsibility.

Subpart D—Investigation, Conciliation, and Enforcement Procedures

§ 90.43 *What responsibilities do recipients and agencies have specifically to ensure compliance with the act?*

§ 90.43(b)(3) [renumbered § 90.43(a)(3)] *Providing information to beneficiaries.*

Comment: Several commenters said that the regulations should place more emphasis on informing citizens of their rights under the Act.

Response: HEW has made no change. The regulations require that each agency make available educational materials on the rights and obligations of beneficiaries and recipients. Agencies are free to use whatever methods they deem appropriate to accomplish this.

§ 90.43(c) [renumbered § 90.43(b)] *Self-evaluation generally.*

Comment: Several commenters stated that all self-evaluations should be subjected to a review, either by the specific funding agency or by an objective third party. Other commenters suggested that the funding agency spot check recipients' self-evaluations for compliance purposes. Generally commenters stated that self-evaluations alone would be insufficient to meet the ADA reporting requirements.

Several commenters expressed a need for guidelines for self-evaluations, and suggested the development of uniform guidelines for all Federal recipients. Most commenters urged the importance of keeping the self-evaluation simple, while a few supported a broader examination of recipients' policies and practices. A few commenters suggested that recipients seek assistance in completing their self-evaluations from young people and the elderly.

Response: HEW believes that the primary purpose of the self-evaluation is internal review by the recipient. The self-evaluation process is not intended to yield sufficient information to satisfy the ADA reporting requirements. However, funding agencies will be able to review recipient self-evaluations where they might provide useful information. HEW plans to issue self-evaluation guidelines for HEW recipients after the publication of HEW specific regulations. Other agencies may choose to use HEW's guidelines as a model. The self-evaluations are intended to be simple and straightforward, with each age distinction capable of being analyzed in a page or less. HEW's position is that agency regulations should avoid imposing conflicting requirements on recipients. Although the general regulation is silent on the question of public participation in the self-evaluation process, agencies have discretion to provide in their regulations for public participation in recipient self-evaluations.

§ 90.43(c) [renumbered § 90.43(b)] *Self-evaluation timetable and application.*

Comment: Most commenters stated that 18 months is an appropriate time for recipients to complete their self-evaluations. Some commenters stated that 18 months is too long and suggested that Federal agencies be required to review their age distinctions within six months after publication of their final regulations (rather than the 12 months allowed under § 90.32 of the proposed regulations). Recipients would then be required to complete their self-evaluations six months later, or one year from publication of the agency's final regulations.

Several commenters stated that restricting self-evaluations to recipients with 15 or more employees is reasonable. A few suggested including recipients with fewer than 15 employees. Some commenters stated that requiring self-evaluations from recipients with as few as 15 employees is unreasonable; cutoffs of 50, 100 or 500 were suggested. Alternative bases suggested for self-evaluations were the amount of funding received, or the number of people served by the recipient.

Response: HEW has retained the 18 month self-evaluation period because the Federal agencies need a year to analyze and review the age distinctions imposed in their programs through statutes and administrative actions. HEW expects recipients to use the information in these Federal agency reviews in their self-evaluations.

HEW has retained a cut-off based on the equivalent of 15 or more employees in the ADA self-evaluation requirement because it is consistent with self-evaluation requirements in other civil rights statutes and regulations. In addition, HEW has determined that it would be impractical to use the number of people served, or the amount of Federal financial assistance received, as a basis for requiring recipients to perform the one-time self-evaluation.

§ 90.43(d)(1)(i) [renumbered § 90.43(c)(1)(i)] *Complaints by organizations or groups.*

Comment: A few commenters suggested that the complaint procedure specifically cover group complaints. They defined group complaints as complaints by an organization representing older persons; e.g. on behalf of one or more individuals. Inclusion of this type of complaint would permit advocates for older persons to assert rights on behalf of many individuals who would be reluctant to do so on their own.

Response: The regulations do not prohibit this kind of complaint. A complaint may be made by an individual, a class, or by an organization on behalf of its members or on behalf of other persons.

§ 90.43(d)(1)(ii) [renumbered § 90.43(c)(1)(ii)] *Agency screening of complaints prior to mediation.*

Comment: Several commenters stated that there should be an investigation prior to assigning the dispute to a mediator. Frivolous complaints could be eliminated by this process and many legitimate complaints could be settled without progressing to a more formal procedure. Several commenters said that this investigation period should be 60 days in length. A few commenters expressed similar concerns but stated only that HEW should clarify the steps for initiating mediation and provide more information regarding the initial stages of the process.

Response: HEW believes that the present screening process is the most effective possible without resorting to immediate investigation, which would be time consuming and duplicative. Each agency will screen complaints for those programs it administers which receive Federal financial assistance. Screening will eliminate complaints about actions which are not covered by the ADA, and thereby reduce the number of groundless complaints which might otherwise go forward in the process.

§ 90.43(d)(2) [renumbered § 90.43(c)(2)] *Length of time for the complaint process.*

Comment: Many commenters were concerned with the length of time that was involved to process a complaint. Several commenters stated that specific time lines were needed for each step in the complaint procedure. Other commenters stressed that even a few months was too long a time, for the elderly to wait for complaint resolution.

Response: HEW is aware of the damaging effect of long drawn out complaint resolution procedures. It has adopted mediation and an informal investigation step as part of the complaint resolution process in an attempt to improve the responsiveness of that process. However, HEW has decided not to impose government-wide timeframes for every step of the complaint process. This is a drastic step to take in advance of any specific indication that there will be unusual problems of delay. Accordingly, no additional timeframes have been placed in the regulations.

§ 90.43(d)(3) [renumbered § 90.43(c)(3)] *Mediation—mandatory mediation.*

Comment: A number of commenters discussed the proposal to make mediation a mandatory step in the complaint process. Several commenters supported mandatory mediation; a few stated that mediation should be made mandatory only after a successful trial period. Several other commenters stated that mediation should not be a mandatory step. Those opposing mandatory mediation through age discrimination should not be subject to such a broad experiment that might diminish the effectiveness of the ADA.

Response: HEW believes that making the mediation process voluntary is not a reliable way of testing its effectiveness. The need to get away from the the traditional problems of complaint backlogs in civil rights enforcement requires us to carry out this effort. HEW has instead sought to rely on other safeguards such as the presence of a trained Federal mediator, the 60-day time limit, the policy of mediator confidentiality, the informality of the process and continuous monitoring of the process to insure that mediation is effective.

§ 90.43(d)(3) [renumbered § 90.43(c)(3)] *Mediation: Effectiveness of the mediation process.*

Comment: A large number of commenters addressed the issue of the effectiveness of the mediation process. While many commenters thought the process would be quick and effective in resolving complaints, others cited problems regarding possible harm to or discouragement of complainants which could make the process ineffective.

The major problems cited were:

(1) Complainants would be discouraged or intimidated from seeking their full rights through the formal administrative process;

(2) Mediation would impose a burden of expense upon the parties to the complaint, including travel expenses to the mediation site;

(3) Complainants might desire legal assistance but would be unable to afford the expense;

(4) Mediation would not always be appropriate for a complaint; and

(5) Mediation would impose another layer on the complaint process thereby delaying relief to the complainant.

Response: HEW has tried to structure the mediation process to protect the complainant and insure that valid complaints are pursued and successfully resolved.

The mediation will be conducted by a specially trained mediator who will explain the procedure to both parties. A complainant who does not believe that he is obtaining full satisfaction through mediation need not agree to a settlement. A complainant will have to wait no more than 60 days for the agency enforcement process to begin. This 60 days will count as part of the 180 day period which the agency has to resolve the complaint before a court action can be filed by the complainant.

The mediation process has been designed to minimize expenses to the parties. The mediator can travel to the location of the parties and the mediator's services will be paid for by the Federal government. The mediation process is designed to allow a party to participate in mediation without resort to an attorney and without having to build a formal legal case. Experience with other processes similar to the proposed mediation system suggest that the expense to the parties will not be significant.

These concerns about the effectiveness of the mediation process will be carefully monitored, as part of the 30 month evaluation of the use of mediation.

§ 90.43(d)(3) [renumbered § 90.43(c)(3)] *Should mediation be conducted by a single mediation agency or by each Federal agency subject to the ADA?*

Comment: A majority of the commenters favored having a single agency manage all mediation under the ADA rather than having agencies develop their own mediation capabilities.

Response: The final regulations provide that the Secretary shall designate one agency to be responsible for administering a centralized mediation process for all age discrimination complaints. A single agency insures uniform policy and practice, efficiency and centralized accountability for purposes of monitoring and evaluation. In the early stages of implementing the ADA, it would be particularly inefficient to have each Federal agency develop it own separate mediation capability.

§ 90.43(d)(3) [renumbered § 90.43(c)(3)] *Use of the Federal Mediation and Conciliation Service (FMCS).*

Comment: Most commenters supported using the FMCS to coordinate the mediation process. A few favored using a private mediation agency. Many commenters favored the use of private individuals as mediators at the local level rather than FMCS staff mediators. Some Federal agency commenters expressed a desire for additional information regarding the procedures to be used in managing the national mediation system.

Response: HEW has designated the FMCS to coordinate the mediation of ADA complaints. As is the case with every other aspect of mediation, the results of this decision will be closely monitored and evaluated as part of the 30-month review of these regulations. The FMCS is the only Federal government agency with extensive expertise in mediation. The Service has a national staff of more than 300 experienced full-time mediators located in field offices around the country.

As currently planned, mediators will be drawn from both the professional staff of FMCS and from among private citizens experienced in resolving community disputes, who will be trained by the FMCS. HEW and the FMCS intend to work closely with other Federal agencies to implement mediation.

§ 90.43(d)(3) [renumbered § 90.43(c)(3)] *Availability of qualified mediators.*

Comment: A number of commenters raised problems about obtaining mediators. A commenter stated that all parties should be allowed to approve or disapprove the mediator. Several commenters stated that older persons who are familiar with the problems of the elderly should be trained as mediators. This group would not be limited to mediating complaints of the elderly.

Several commenters stated that although mediation has been used in labor-management disputes, different methods would be required to deal with age discrimination. The mediator should have knowledge of age discrimination in program services and knowledge of alternatives available in the delivery of services. The different requirements in mediating discrimination complaints might require development of a corps of Federal program specialists trained in mediation.

Response: Mediation is proving useful in resolving a wide variety of disputes outside the traditional labor-management area. Mediators will be selected by the FMCS in order to insure their neutrality. All mediators selected to resolve age discrimination complaints will receive thorough training in the ADA and applicable regulations. Moreover, mediators will be drawn from both FMCS staff and from private citizens who have experience in resolving community disputes.

§ 90.43(d)(3) [renumbered § 90.43(c)(3)] *Length of the mediation trial period.*

Comment: A number of commenters stated that mediation should be used only on an experimental basis. Some suggested limiting the mediation experiment to geographic regions or Federal agencies. Several commenters stated that the trial period should be 30 months; a few others suggested 12, 15, 18 or 24 months.

Response: HEW is aware that the use of mediation to resolve complaints on this scale is highly innovative. Accordingly, close monitoring and evaluation are planned. However, the likelihood of success appears high enough, and the problems of traditional methods are serious enough, that mediation will be attempted nationwide rather than as a regional demonstration project.

The final regulations continue to provide for a review of the mediation experiment 30 months after these regulations are published. No complaint of age discrimination can be processed until final agency regulations are effective. Therefore, mediation will not begin until late 1979. As a result, the 30 month review will report on approximately two years of mediation.

§ 90.43(d)(3) [renumbered § 90.43(c)(3)] *Confidentiality of mediation.*

Comment: Some commenters were concerned with the adequacy of confidentiality protections in the mediation process. A few others suggested that reports of mediated settlements shoud have restricted availability.

Response: The confidentiality provision of the regulations has been changed to deal exclusively with the protection of the neutrality of the mediator and the public interest in the success of the mediation process. The parties must be able to speak freely in the mediation without fear that the mediator will testify or provide information in a later enforcement proceeding. The parties must not be bound in subsequent administrative or court proceedings by the statements made in mediation. The terms of any settlement agreed to in mediation will be sent to the agency which received the complaint originally.

§ 90.43(d) [renumbered § 90.43(c)] *Mediation of multiple jurisdiction complaints.*

Comment: A few commenters were concerned about how agencies would handle complaints that involved charges of multiple types of discrimination (e.g., age and race). They were concerned about the usefulness of mediation with this type of complaint. A few commenters stated that in such complaints, each charge of discrimination should be processed individually.

Response: The potential problem with the multiple complaint is that the ADA mediation procedure is not required in other civil rights areas. HEW expects that agencies will be able to separately mediate the age element of a complaint. A successful mediation might also resolve all the issues which gave rise to the dispute in the first instance. If a successful mediation failed to do this or mediation was unsuccessful, the agency could further process the complaint following its normal procedures for handling multiple jurisdiction complaints.

§ 90.43(d)(3) [renumbered § 90.43(c)(3)] *Initial efforts to resolve complaints.*

Comment: Several commenters were concerned that a mediation process would preclude initial efforts to informally resolve complaints.

Response: Nothing in the regulations prohibits informal resolutions between parties. However, once a formal complaint has been filed, the Federal agency has a responsibility to become involved in the process. The mediation procedure is an attempt to achieve informal resolution of complaints and to avoid lengthy and costly litigation.

§ 90.43(4)(d) [renumbered § 90.43(c)(3)(iii)] *Mediation time limits.*

Comments: Several commenters addressed the issue of the length of time which should be allowed for mediation. Some stated that the period for mediation should be 60 days; others recommended 30 days; 90 days or 120 days.

Response: HEW has changed the final regulations to allow a maximum of 60 days for mediation. The 60 day period begins as soon as the complaint is received by the Federal agency. The mediator has been given authority to terminate mediation early if it appears no agreement can be reached. The 60 day period leaves at least 120 days for agencies to investigate an unresolved complaint before the expiration of the 180 day time limit for exhaustion of administrative remedies. Because the mediation period is part of the 180 day time limit, a short mediation period is important if complaints are going to be resolved administratively rather than in court.

§ 90.44(a) *Compliance reviews.*

Comments: Several commenters supported a requirement for mandatory compliance reviews. A few other commenters supported the retention of a requirement for optional compliance reviews.

Response: Compliance reviews will be conducted at the option of the agency. HEW has modified the regulations to require that every agency include in its regulations a provision that it may conduct compliance reviews if the need should arise, regardless of the size of the agency or its programs.

§ 90.45 [renumbered § 90.45 and § 90.46] *Information requirements and prohibition against intimidation or retaliation.*

Comment: A commenter recommended that HEW set minimum record keeping requirements and specify a length of time for retention of records by recipients.

Response: HEW has specified only general data provisions and record keeping requirements because it is almost impossible to achieve the desired level of detail in general regulations. As a matter of policy, HEW is committed to minimizing record keeping requirements whenever possible by avoiding duplicative and unnecessary requirements. A time limit for record retention may be considered if specific record keeping requirements are implemented in the future.

§ 90.45 *Information requirements—assurances of compliance.*

Comment: Some commenters suggested that the regulations should require recipients to submit assurances of compliance with the ADA, similar to those required under other civil rights statutes.

Response: The regulations remain unchanged. There is no requirement in these regulations that each recipient submit a general assurance of compliance with the ADA. However, even without an assurance of compliance, the legal obligation of a recipient remains unchanged. HEW wishes to avoid imposing any unnecessary burden on recipients with respect to the compliance and enforcement procedures and accordingly has decided not to require assurances of compliance with the ADA.

§ 90.46 [renumbered § 90.47] *What further provisions must an agency make in order to enforce its regulations after an investigation indicates that a violation of the act has been committed?*

§ 90.46(d)(1) [renumbered § 90.47(d)(1)] *Deferral of funds.*

Comment: A commenter recommended that the deferral of funds apply only to the program area where non-compliance is found.

Response: Deferral precedes any final finding of non-compliance through an administrative hearing. The enforcing agency must have discretion to defer Federal financial assistance in any program affected by the agency's preliminary findings. There would be no basis for deferring any other Federal financial assistance. Accordingly, it is not necessary to make any change in the regulations.

§ 90.47 [renumbered § 90.48] *Alternate funds disbursal procedure.*

Comment: A commenter suggested that the regulations further clarify the process of selecting the alternate recipient when a recipient's funds have been terminated for noncompliance with the ADA. The question was asked "Should the alternate recipient have to satisfy the requirements of the grant statute?"

Response: The regulations permit an agency to disburse withheld funds to an appropriate alternate recipient. The recipient must demonstrate the ability both to achieve the goals of the Federal statute authorizing the program or activity and to comply with the agency's regulations issued under the ADA. Each Federal agency is authorized and required to publish its own regulations implementing this process for its programs. These regulations may consider all relevant factors to determine if the required ability has been demonstrated. HEW believes that any amplification on this process should be made in each agency's own regulations consistent with the relevant requirements of the ADA.

§ 90.50 *Exhaustion of administrative remedies.*

Comment: A few commenters stated that the time period of 180 days before civil action may commence should be reduced to 90 or 120 days. A major reason cited in support of a reduced period was that six months is too long for the elderly to wait.

Response: The period of 180 days is expressly required by the Age Discrimination Act and accordingly cannot be changed by the regulations.

Subpart E—Future Review of Age Discrimination Regulations

§ 90.61 and § 90.62 *Review of General and Agency Regulations.*

Comment: A few commenters stated that 30 months is too long a time to wait for a review of the regulations. Some commenters stated that 30 months is an adquate time but another commenter suggested that waiting longer than 30 months would be wiser.

Response: HEW intends to wait 30 months before asking for public comment on the effectiveness of these regulations. The 30 month time period was selected because use of a 30 month period will enable HEW to have information from at least one complete cycle of complaints, mediation, data collection and report preparation and time to analyze that information.

BILLING CODE 4110-12-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Age Discrimination Regulations; Designation of Mediation Agency

The Secretary of Health, Education, and Welfare hereby designates the Federal Mediation and Conciliation Service as the agency to manage the mediation activities required under the age discrimination regulations issued by the Department set forth in 45 CFR Part 90 to implement the Age Discrimination Act of 1975.

Dated: June 5, 1979.

Joseph A. Califano, Jr.,

Secretary, Department of Health, Education, and Welfare.

Part IV

Department of Housing and Urban Development

New Community Development Corporation

Park Central New Town Project in Port Arthur, Texas; Proposal To Support Flood Plain Development

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

New Community Development Corporation

[Docket No. N-79-833]

Park Central New Town Project in Port Arthur, Texas; Proposal To Support Flood Plain Development

AGENCY: New Community Development Corporation, HUD.

ACTION: Notice of Proposal To Support Flood Plain Development. Park Central New-Town-In-Town.

SUMMARY: NCDC is proposing to approve the Park Central New Town project in Port Arthur, Texas, as a new community meeting eligibility standards of Title VII of the Housing and Urban Development Act of 1970 thereby making the project eligible for Community Development Block Grants from the new communities portion of the Secretary's Discretionary Fund and new communities assisted housing set-asides. The project is being developed in a hurricane flood-plain area. Public Notice is required by E.O. 11988.

FOR ADDITIONAL INFORMATION CONTACT:

Edwin Baker, Environmental Control Officer (Acting), New Community Development Corporation, 451 Seventh Street, S.W., Washington, D.C. 20410. Telephone: (202)755-5365 (not a toll free number).

In accordance with Executive Order 11988 (floodplain management guidelines) and HUD's draft regulations concerning Executive Order 11988, the New Community Development Corporation (NCDC), a corporate body within the Department of Housing and Urban Development (HUD), issues the following public notice of its proposed action:

Notice of Proposal To Support Floodplain Development, Park Central New Town In Town

Table of Contents:

Description of Proposed Action
Description of Project
Probable Environmental Impact of Proposed Action
Alternatives to Proposed Action
Probable Environmental Impact of Development
Alternatives to Planned Development
Reasons for Proposed Action

Description of Proposed Action

The New Community Development Corporation has issued a conditional commitment to New-Town-In-Town, Inc. (the Developer) for a "Determination of Eligibility" for a new community known as Park Central in Port Arthur, Texas (the project), in accordance with provisions of Title VII of the Housing and Community Development Act of 1970 (the Act). If approved by the Board of Directors of NCDC, the Developer and NCDC propose to enter into a project agreement and NCDC will determine that the project meets the eligibility standards for a new community under the Act. This determination will make the project eligible for grant assistance under Section 107(a)(1) of the Housing and Community Development Act of 1974 for Federal flood insurance eligibility. This determination enabled the Department to initially endorse a Title X insured mortgage for land acquisition and development in the project in December 1976. EIS and A-95 clearances by state and local agencies were attained prior to the endorsement of the Title X insured mortgage, and prior to E.O. 11988.

The final Environmental Impact Statement for Park Central was issued on December 12, 1975. While it is recognized that compliance with the National Flood Insurance Program (NFIP) does not assure compliance with E.O. 11988, the Secretary's determination of eligibility for Federal flood insurance was issued prior to Title X approval. Copies of the final EIS and the Secretary's determination are available for review at the New Community Development Corporation at HUD in Washington, D.C., and at the HUD Area Office loacted at 2001 Bryan Tower, 4th floor, Dallas, Texas (Telephone: (214) 749-1601).

Comments concerning this Notice are invited from all affected and interested parties. The comment period for the Notice will be 15 calendar days. Please send comments within 15 days to:

Edwin Baker, U.S. Department of Housing and Urban Development, New Community Development Corporation, Room 5186, Washington, D.C. 20410.

Telephone inquiries about this Notice may be directed to Edwin Baker, Acting Environmental Control Officer at (202) 755-5365.

SUPPLEMENTAL INFORMATION: The U.S. Department of Housing and Urban Development, New Community Development Corporation, Washington, D.C. proposes to approve the Park Central New-Town-In-Town project in Port Arthur, Texas, as a new community meeting the eligibility standards of Title VII of the Housing and Urban Development Act of 1970 thereby making the project eligible for Community Development Block Grants from the Secretary's Discretionary Funds and housing set-asides for new communities. The project is being developed in a hurricane flood plain area but the land is partially protected by a Hurricane Flood Control Project of the Army Corps of Engineers which is 85 percent complete and will be totally completed in 1981. In the event of a standard project flood (an occurrence with less than a 5 percent chance of happening in a given year; or, once in two hundred years) 30 percent of the project land is totally protected from flooding, 50 percent will pond to depths of 3'0" or less and 20 percent will pond to depths of 5'0" or less. 100 percent of the ponding above 3'0" would be on land used for open space, golf course, drainage canals or other similar uses. Of the balance of the project land, less than half will have any ponding and the maximum depth will be less than 3'0". No structures will be built below the ponding level according to the project agreement between HUD and the new town developer.

The New-Town-In-Town project area consists of 729 acres of a 1,600 acres new town within the city limits of Port Arthur. The present population of the entire 1,600 acres is approximately 2,300. As planned, the project has a completion goal of 12,000 people, 1,460 housing units of various types, and a mix of residential, commercial, institutional and open space land uses.

The Notice will describe the impact of the project development on the environment taking into account the implications of Executive Order 11988 relative to flood plain management guidelines. The Secretary of Housing and Urban Development has determined that Port Arthur meets all the conditions set forth in the National Flood Insurance Act of 1968 as amended by the Housing and Urban Development Act of 1974 (the new communities portion of the Secretary's Discretionary Fund). NCDC anticipates approving grant assistance of approximately $5.8 million over the next 2 years to finance construction of infrastructure in the project. The following analysis and findings concerning the project and the proposed action are made public in accordance with provisions of E.O. 11988.

Description of Project

The project is a 729 acre part of a 1,600 acre new town within the city limits of Port Arthur, Texas which has been construction since 1972. In December 1976, HUD initially endorsed a mortgage for insurance under Title X

of the National Housing Act for land acquisition and land development for the 729 acres. While the project is in a hurricane floodplain, it is partially protected by a substantially complete Corps of Engineers' Hurricane Flood Control Project. In the event of a standard project flood 30 percent of the project land is totally protected from flooding. 50 percent will pond to depths of 3'0" or less and 20 percent will pond to depths of 5'0" or less. The 1,600 acre development now has a population of approximately 2,300 people and $70,000,000 of public and private investment has occurred on site. NCDC's additional support for this project has been actively requested by the City of Port Arthur. When completed, the project will consist of a mix of residential, commercial, institutional, and open space land uses in accordance with an approved master plan.

Prior to issuance of E.O. 11988 on May 24, 1977, the public had received full notice and explanation of the project through the environmental impact assessment process. A final Environmental Impact Statement (EIS) for the Title X project (which is substantially the same project which the NCDC Board is expected to approve) was published by HUD on December 12, 1975. The local A–95 agency will receive a copy of this Notice. The NCDC Board will be relying on the 1975 EIS in taking the proposed action. A review of the significant facts considered in originally making the Title X decision can be found in that EIS.

Probable Environmental Impact of Proposed Action

Most land development in the project is expected to be financed through current and future Title X insured land development mortgages, as anticipated in the EIS. The primary effect of the proposed NCDC action is to enable some of the infrastructure to be financed through Federal grants instead of alternative sources of financing, thereby increasing the financial feasibility of the project, and making the project eligible for NCDC assisted housing set-asides. The type and location of development is not expected to be significantly changed from the planned development studies in the EIS and currently underway, except that there will be greater assurance of a substantial amount of low-and-moderate income housing (LMIH) included in the project.

Alternatives to the Proposed Action

Since the proposed action supports a project being developed in accordance with previously approved plans for federally-assisted land development, NCDC has only two alternatives to the proposed action—to assist the existing project or to not assist the project. These alternatives are discussed below:

(1) Do Not Assist—The project was eligible for the Title VII approval under all relevant regulations prior to the Executive Order. The project is underway and is likely to obtain enough funding to continue no matter what NCDC does. A decision not to provide NCDC assistance to the project solely on the basis of E.O. 11988 would not necessarily affect the ultimate physical development. Mitigating measures are required under Port Arthur's "Flood damage protection ordinance" and "Emergency plan for hurricanes or tropical storms" and Jefferson County's "Emergency Operations Plan". A NCDC decision not to assist would probably lengthen the project's development period, would not make provisions of housing for families of low and moderate income, and would prevent NCDC site plan and landscape provisions from being required.

(2) Make Substantial Modifications to the Development Plan Prior to Title VII Approval—Having reviewed the project development plan in detail prior to recommending the conditional commitment, NCDC found the plan sensitive to environmental and social concerns and found no need to recommend substantial modification. NCDC has assessed the factors relating to minimization of harm to lives, property, flood plain values, and restoration and preservation of these values. It has found that 100 percent of the site is protected from storm surge, 30 percent of the site protected from both surge and ponding and 70 percent subject to City, County, and Federal Regulations to protect people and property from harm in a shallow (less than 5') ponding situation. NCDC will require that prior to Board action, a firm plan for provision of housing for persons of low and moderate income be included in the agreements between the Developer and NCDC. In addition, since past actions have eliminated natural values, NCDC will require that additional site landscaping also be provided.

The following section describes the probable environmental impact of development in the project, including development financed through the grants, Title X mortgage insurance, and other sources.

Probable Environmental Impact of Development

The site under consideration is essentially a flat coastal prairie land that is almost devoid of trees. Until recently, the land had been unsuitable for development because it was unprotected by the City's levee system and, consequently, subject to flooding. Today, the land is partially protected by the nearly completed $76 million U.S. Army Corps of Engineers' Hurricane Flood Control Project scheduled to be completed in 1981. When the Corps has completed its flood protection system, approximately 70 percent of the project will remain in a ponding area. It can be expected that during a standard project flood a portion of the site (20 percent) will pond to a maximum depth of 5' with the majority of the area (50 percent) ponding to less than 3'. The complete site will be protected from wave damage from the standard project flood. The Housing and Urban Development Act of 1974 amended the National Flood Insurance Act of 1968 to provide that any community "that has made adequate progress, acceptable to the Secretary" on the construction of a flood protection system for the 100-year frequency flood, "will be eligible for Federal flood insurance". While it is recognized that compliance with the National Flood Insurance Program does not assure compliance with E.O. 11988, the Secretary of Housing and Urban Development has determined that Port Arthur meets all of the conditions set forth in the 1974 amendment, and, therefore, is eligible for flood insurance. The determination enabled HUD to initially endorse the Title X insured mortgage for land acquisition and development:

This previously undeveloped relatively close-in area can now be developed to fill the gap that has created urban sprawl and leapfrog development in the general area. Most of the areas surrounding the Park Central site have been developed to their capacities. Park Central constitutes the only large tract of vacant land under development by a single developer in the Port Arthur metropolitan area. This project provides an opportunity for the City of Port Arthur to capture a significant proportion of future growth within its corporate limits. Also, it offers amenities and employment opportunities that are not available in the older established neighborhoods.

There are no apparent adverse effects to the natural environment of major consequence or significance that cannot be avoided if the proposed project is

developed. The physical appearance of the land will change from its coastal state. However, the land had no delicate ecosystem and the site poses no great obstacles for development. The project will result in the minor loss to wildlife on site. It will remove existing scrub vegetation.

The social features of this area should not be drastically changed if this proposed project is implemented. It is true that all aspects of the human environment will be influenced by this project. The addition of 12,000 residents and the accompanying growth will affect the social and civic environment. However, the impact of these changes will be minimized by the long-term nature of the development plan.

The construction activities may temporarily disrupt the activities of some residents. Added movement of trucks and equipment associated with construction will result in temporary localized increases in noise and air pollution.

The general area around the proposed project is currently experiencing transition to a multiple-use center including residences, offices, and commercial facilities. This transitional process is expected to continue. This Title X project developed within the city limits will contribute to the urbanization of the land. Therefore, the use of the site proposed in the project action under consideration is in accordance with the maintenance and enhancement of its long-term productivity as an urban land resource.

Because of the large portion of the site that will be developed with single-family detached houses to be sold to individual purchasers, approval of this project would be expected to result in a commitment of the land resources to this type of urban development for at least 30 to 40 years.

Alternatives to the Planned Development

Since the Park Central site represents the single largest tract of undeveloped land that is under single ownership in the entire southern portion of the county, no other location for a project this size is feasible for the developer. Most of the area west of the site is undeveloped but lies within Aircraft Noise Zone #2 which the Department of Housing and Urban Development rates as normally unacceptable for residential development. The basic question concerns that highest and best use for the tract that will benefit social and environmental needs. Furthermore, the flexible zoning allows the developer to make changes as the market dictates.

Alternatives uses for the proposed tract evaluated in the project's EIS include the following:

(1) Total Commercial—The site is far too large and the market too small for the site to be entirely used for commercial purposes.

(2) Industrial—According to the Port Arthur *Comprhensive Plan,* most of the land west of the site will be used for industrial purposes. This land is adequate for a 25-year development. Thus, the project does not appear to have potential for industrial purposes. Without the amount of residential development proposed for the project the timely development of industrial land will be impossible. If the proposed site were developed as an industrial park, it would increase the area's already acute housing needs. Industrial development would probably increase air and water pollution levels and create some peak hour traffic problems. If feasible, industrial development would have a positive public fiscal impact, and would increase area employment opportunities.

(3) Institutional—Other than the Port Arthur Independent School District, no other educational institutions have expressed an interest in the land. Lamar University is located 15 miles to the north and Port Arthur College is approximately 4 miles to the south. The impact of such insititutional development would result in a negative public fiscal impact.

(4) Park and Recreation—The site, taken as a whole—has no particular potential for development or preservation as public open space. There is a 155 acre golf course in the middle of the development and a 60 park site south of the area. The developer also plans a greenbelt within the project. Park and recreation development would have a negative public fiscal impact and would not assist in solving the area housing needs.

(5) Conventionally Financed Residential and Commercial Development—This method of development financing has been the major source of growth in Port Arthur in recent years. The net impact of this alternative would be comparable to the proposed project, but would be less well-planned, less environmentally sensitive and less balanced racially and economically.

(6) Agricultural—The potential as an agricultural site is limited because it is subject to zoning restrictions set forth by the City of Port Arthur.

(7) Leave in Present Condition—The site's location, land value and property tax consequences would realistically eliminate this as a possible alternative once the Corps of Engineers Hurricane Flood Control Project is completed.

Reasons for Proposed Action

The following facts overwhelmingly outweigh any other in supporting the proposed action. Park Central is an existing federally supported project being built in conformity with Federal and local rules and guidelines. It is superior to any likely alternative land use. NCDC support for the project is being solicited by the City of Port Arthur.

The development of Park Central was cleared with state and local agencies through the EIS and A–95 processes prior to initial endorsement of the Title X insured mortage. The proposed NCDC action supports the continuation of that project.

The project has been designed to comply with Federal and local standards to minimize harm to property and occupants and storage of flood waters to prevent impact on other flood area residents. The Corps of Engineers' Hurricane Flood Control Project is 85 percent complete. The City of Port Arthur has enacted a "Flood damage prevention ordinance which requires siting of new construction at an elevation above the maximum ponding level for a standard project flood and flood proofing of all structures, and requires that all utility systems developed within such ponding areas also be protected from infiltration and outflow under base flood conditions. The city has also instituted a "Emergency plan for Hurricanes and Tropical Storms" to protect current and future residents from flood hazards. Through its project agreement NCDC will require landscaping and planning requirements which are intended to improve the quality of the living environment in the completed project. NCDC is also requiring the development of housing units for persons of low or moderate income to be constructed on the site to further insure that the project support the city's needs.

The natural and beneficial values of the site (except for flood water storage) have long been compromised. The area has been diked, vegetation and wildlife habitat associated with floodplain and wetlands are gone and the land has been drained with major canals and crossed by pipelines and roadways. In addition of significant portion of the 1,600 acre new town which includes the project has been developed. The flood water storage capacity will remain unchanged, and through careful design and landscaping some environmental

amenities will be added to what is now a barren site.

(Section 7(d) of the Department of HUD Act, 42 U.S.C. 3535(d))

FEDERAL ELECTION COMMISSION

[Notice 1979-7]

Multicandidate Political Committees; Index

The Federal Election Commission today publishes a comprehensive Index of "Multicandidate Political Committees," which is defined by 2 U.S.C. § 441a(a)(4) of the Federal Election Campaign Act of 1971, as amended, as a political committee "* * * registered under Section 433 for a period not less than 6 months, which has received contributions from more than 50 persons, and, except for any State political party organization, has made contributions to 5 or more candidates for Federal office."

The Multicandidate Committee Index contains two sections—Party-Related Committees and Non-Party Related Committees—and has been derived from a review of the reports and statements filed with the Commission, the General Accounting Office, the Clerk of the U.S. House of Representatives and the Secretary of the U.S. Senate since April 7, 1972. Please note that all committees which had met the qualifications for Multicandidate Committee status prior to January 1, 1975, are determined to have been qualified as of January 1, 1975, the effective date of the 1974 amendments to the Federal Campaign Act.

In addition, 11 CFR § 100.14 states "all committees * * * established, financed, and maintained or controlled by the same corporation, labor organization, person, or group of persons, including any parent, subsidiary, branch, division, department, or local unit thereof, are affiliated." Therefore, committees have been included in this Index specifically identifying their connected or affiliated organization(s) as reported by each committee.

The Commission is publishing this notice of an Index as prescribed by 2 U.S.C. § 438(a)(6), requiring periodic publication in the Federal Register of an Index of Multicandidate Committees, including the date of registration of such committees and the committees' dates of qualification under 2 U.S.C. § 441a(a)(4). Copies of this Index are available upon request from the Federal Election Commission's Office of Public Records, 1325 K Street, N.W., Washington, D.C. 20463 for $5 per copy or by calling (202) 523-4181 or toll free 800-424-9530.

Any person who believes that a committee not included on this Index has, in fact, met the qualifications for multicandidate status, should so advise the Commission in writing and provide documentation as appropriate, so that the Commission can correct or update its records.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[9 CFR Ch. I]

Ventilation of Animal Shipping Containers; Request for Information

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of request for information relative to minimum ventilation standards for animal shipping containers.

SUMMARY: The purpose of this document is to give interested persons an opportunity to provide views, data, and other information regarding the minimum amount of ventilation area required of shipping containers used to transport warmblooded animals in commerce.

DATE: Written comments must be filed on or before August 13, 1979.

ADDRESSES: Written comments to the Deputy Administrator, USDA, APHIS, VS, Room 703, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782

FOR FURTHER INFORMATION CONTACT: Dr. Dale F. Schwindaman (301) 436-8271.

SUPPLEMENTARY INFORMATION: As a result of requests and comments from the National Committee on Animal Transport, and from other interested persons for reconsideration of the Department's present standards regarding the minimum ventilation requirements for shipping containers used to transport dogs and cats in commerce, the Department is soliciting the submission of data, views, and opinions relative to such ventilation requirements for shipping containers used to transport warmblooded animals in commerce. Although the requests regarding this subject were primarily concerned with dogs and cats, the Department will consider comments relative to other animals as well since the transporation standards contained in the regulations pertain to all warmblooded animals subject to the Animal Welfare Act. The Department's present standards regarding ventilation state that, "Primary enclosures, * * * used to transport live (various animals subject to the Act) shall be constructed in such a manner that * * *; (4) * * *, there are ventilation openings located on two opposite walls of the primary enclosure and the ventilation openings on each such wall shall be at least 16 percent of the total surface area of each such wall, or there are ventilation openings located on all for walls of the primary enclosure and the vehtilation openings on each such wall shall be at least 8 percent of the total surface area of each such wall; *Provided, however,* That at least one-third of the total area providing ventilation for the primary enclosure shall be located on the lower one-half of the primary enclosure and at least one-third of the total area providing the ventilation for the primary enclosure shall be located on the upper one-half of the primary enclosure; * * *." The National Committee on Animal Transport and other persons requested that the Department "increase the minimum ventilation requirement in shipping containers to 25 percent for the six months from April 1 through October 1."

The purpose of this notice is to give all interested persons an opportunity to express opinions and comments and to submit pertinent facts, data, or arguments, in writing, regarding the amount of ventilation available to animals in shipping containers. Such opinions and comments should contain information regarding any factual data which might be available concerning the adequacy or inadequacy of the present ventilation requirements, as well as, any suggested changes. Opinions and comments, which the Department has already received with regard to this issue, will be given consideration and persons who have provided them need not submit these again unless they wish to supply new or additional information to the Department.

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, Room 703, 6505 Belcrest Road, Hyattsville, Maryland, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

Dated: June 7, 1979.

Norman L. Meyer,

Acting Deputy Administrator, Veterinary Services.

Part VII

Department of Housing and Urban Development

Office of Assistant Secretary for Housing—Federal Housing Commissioner

Section 8 Housing Assistance Payments Program for New Construction

Federal Register

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[24 CFR Part 880]

[Docket No. R-79-663]

Section 8 Housing Assistance Payments Program for New Construction

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, (HUD).

ACTION: Proposed rule.

SUMMARY: The regulation governing the Section 8 new construction program is being revised to accomplish three major objectives. First, the language of the regulation has been simplified and the format altered to make the regulation easier to read and use. Also, the regulation has been reviewed to make sure that all necessary material is included and that material which is not appropriate for inclusion no longer appears. Second, rent, cost and amenities limitations, and requirements for cost justification of rents in certain cases, have been added in order to control and reduce the costs of the program. Third, processing changes have been made to assure coordination of Section 8 and HUD mortgage insurance programs with fewer developer submissions and to reduce and level out field office workload in order to improve the efficiency and quality or processing.

In addition, marketing requirements are revised so that owners of non-elderly family projects located in non-impacted jurisdictions will adopt and implement a marketing plan for outreach to persons residing in impacted jurisdictions.

This regulation does not apply to projects developed under other Section 8 regulations including Parts 861, 882, 883 and 885, except as provided in those Parts.

COMMENTS DUE: August 13, 1979.

ADDRESS: Comments should be filed with the Rules Docket Clerk, Office of General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT: George Hipps, Office of Multi-family Housing Development, Room 6128, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410, 202-755-5720. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Since this is a proposed regulation, it will not be implemented until after it is published for effect. The Department is greatly interested in receiving comments on all of the proposed changes so that they may be carefully considered in developing the final regulation. The major change included in the proposed regulation are discussed below.

Language and Format

A primary purpose of this proposed revision of Part 880 is to simplify the language of the regulation and generally to improve readability and ease of use. A brief summary has been added as Subpart A so that the general concepts of the program can be understood without reading the entire regulation. To improve usability, the remainder of the regulation has been divided into various segments which generally flow chronologically from proposal submission through project occupancy and management.

In order to aid in understanding the program, the proposed regulation makes several changes in the basic terms used to describe the rent and assistance concepts of the program.

1. The term "total housing expense" has replaced the term "gross rent" which was confusing because the utility allowance (formerly "allowance for utilities and other services") making up part of the gross rent was not rent at all but rather an estimate of tenant-paid utilities and other services not included in the contract rent. Total housing expense is the sum of the contract rent and utility allowance, if any, for a unit.

2. The term "total family contribution" has replaced the term "gross family contribution." It consists of the "tenant rent," a new term which has been added to describe the portion of the total family contribution payable directly by the family to owner, and any utility allowance for the unit the family is leasing.

3. The term "housing assistance payments" includes two payments—the "housing assistance payment to the owner" and in some cases an additional "housing assistance payment to the family." The housing assistance payment to the owner for a leased unit is the difference between the contract rent and the tenant rent described in number 2 above. An owner may also receive a housing assistance payment for a vacant unit. An additional housing assistance payment to the family is made only if the utility allowance described in number 1 above is greater than the total family contribution, in which case the family is paid the difference between the two in order that the allowed total family contribution is not exceeded.

With these new terms, the basic rent and assistance concepts of the program can now be expressed in several simple formulas:

(1) Total housing expense = contract rent + utility allowance.

(2) Total family contribution = tenant rent + utility allowance. (Where the utility allowance is greater than the total family contribution, the tenant rent is 0 and housing assistance payment to family = utility allowance − total family contribution.)

(3) Housing assistance payment to owner = contract rent − tenant rent.

(4) Housing assistance payments (to owner and to family, where applicable) = total housing expense − total family contribution.

Several other terms have been introduced or revised for purposes of clarification or simplification. For example, the proposed regulation now uses "contract administrator" to describe either HUD or the PHA as the party contracting with the owner for housing assistance payments.

Cost Containment

In the interest of providing housing at the lowest possible costs and rents, and thereby serving more families with available funding, the proposed regulation includes the addition of several major cost containment features.

1. *Revised Limitation on Rents Including Cost Justification.* Although rent reasonableness has been a major determination of Section 8 project acceptability since the inception of the program, it has been implemented mainly through HUD handbooks, and an adequate explanation has never been included in the regulation. In addition to explaining rent reasonableness, the proposed regulation includes more stringent standards in determining the reasonableness of rents.

The current rent reasonableness test allows rents in Section 8 projects to exceed rents for comparable unassisted units by up to 15 percent without cost justification of any kind (to compensate for increased security and management costs for family housing, and the additional costs for management and special amenities and design features for elderly housing, and for higher financing costs for all assisted housing), and by anadditional 5 percent with cost justification. Two changes have been made in this area: (1) the proposed

reasonableness test would permit Section 8 rents to exceed comparable rents by a maximum of 10 percent, and (2) any rents above comparable rents would have to be justified by cost estimates during processing and by cost certification at the time the project is completed. Small and partially-assisted projects for non-elderly families would be exempt from this cost justification.

These changes, as well as the continuation of current Fair Market Rent limitations, are contained in Section 880.204(b). These revisions represent a major policy change which is expected to help avoid excessive expenditures under this program.

2. *Limitation on Replacement Costs.* To aid in controlling costs and assuring that Section 8 projects will be of "modest design," limits on project replacement costs have been included in § 880.204(d). For the purpose of obtaining comments, the numerical limits are included in the proposed regulation; however, the final regulation will state that the limits will be established initially, and updated periodically thereafter, by notice to the field offices.

The numerical limits as proposed are high enough to allow the use of all HUD mortgage insurance programs. Also, the proposed regulation contains provisions similar to HUD mortgage insurance programs which provide for increases in the limits in high cost areas and additional increases in Alaska, Guam and Hawaii.

This limitation will require the submission of a replacement cost estimate by the developer at the preliminary proposal stage and a certification of actual cost after completion of the project, except in the case of partially-assisted projects for non-elderly families which are exempt from the limitation because of their predominantly unassisted nature.

3. *Limitation on Amenities.* The current regulation does not expressly exclude amenities or design features considered luxurious, and some fear has been expressed that luxury level projects could result under the program. The proposed regulation prohibits the inclusion of amenities or design features which would exceed the standards of modest quality housing in the area in which the project is proposed. Partially-assisted projects for non-elderly families are exempt from this limitation because of their predominantly unassisted nature. See § 880.204(e).

4. *Amendments.* The Department may include in the final regulation provisions designed to reduce the volume of amendments to Section 8 new construction projects. One change currently under consideration would place a cap on the percentage increase allowable beyond the point of initial reservation of funds. The Department invites the public to comment on this potential change as well as to suggest alternative measures for improving control of amendments.

Limitation on Distributions

Section 880.205 of the proposed regulation limits the distributions that can be made to profit-motivated owners out of surplus project funds, with different rates of return for syndicated and non-syndicated owners, and for family and elderly housing. The Department believes that a lower rate of return for syndicated owners is justified by the fact that in a case of syndicated ownership a substantial profit is received initially. Accordingly, HUD believes that a lower rate of return in these cases provides sufficient incentive to promote development. The higher rates of return for family projects are intended to provide additional incentive for developers to provide this "hard to get" type of housing.

The proposed rates of return are at levels similar to those used by many state housing finance and development agencies participating in the Section 8 program. For non-syndicated owners, the permitted rate of return after the first year will be applied to total housing expense, so that the amount of the return will keep pace with annual increases in total housing expense.

Return is to be calculated annually, and shortfalls in one year may be paid from excess funds accumulated in the next five years.

The appropriate FHA programs regulations will be amended by the addition of a provision stating that distribution of project funds to mortgagors and the use of funds remaining after distribution will be governed by the Part 880 regulation in those cases where an insured project receives Section 8 assistance.

Pipeline Processing

The proposed regulation, in § 880.302, requires that previously submitted approvable proposals "in the pipeline" which have not been funded be reviewed first when any new contract authority becomes available. This will both reduce the level out field office workload by requiring the offices to consider previously submitted, high quality proposals before issuing the Notification of Fund Availability soliciting the submission of new proposals which would require full reviews. These provisions are contained in § 880.302.

Preapproved Sites

Currently, requests for preapproved sites may be submitted at any time. Such requests may be received when no contract authority is available, or when the field office has little time to review such requests. Also, scattered submissions preclude comparison of requests. The proposed regulation (§ 880.303) states that to the extent feasible such requests should be submitted early in the fiscal year. The purpose is to enable field offices to compare and approve requests prior to publication of the Notification of Fund Availability.

The proposed regulation also permits local government selection of developers on a competitive basis for preapproved sites acquired with Community Development Block Grant (CDBG) funds.

Finally, in order to reduce field office processing, projects on preapproved sites not subject to competitive selection may skip the preliminary proposal stage. The first submission would be comparable to a final proposal.

NOFA

Under current procedures, a field office issues various Notifications of Fund Availability (NOFAs) throughout the year requesting the submission of proposals for the various allocation areas within its jurisdiction. The process is repetitive and time-consuming for the field office, and occasionally permits NOFAs to be deferred until so late in the fiscal year that proper processing and selection become difficult. Also, developers are frequently unaware of when NOFAs will be issued for areas in which they are interested and, therefore, are unable to begin preparing proposals in advance of the NOFA.

Section 880.304 of the proposed regulation requires a single publication which will provide notice that the field office will accept proposals for the various allocation areas within its jurisdiction. Specific information for each allocation area will be contained in a detailed NOFA which will be provided by the field office on request.

Proposals for projects for non-elderly families will be accepted as long as contract authority remains available and will be reviewed on a monthly cycle. Proposals for projects for the elderly will be accepted only up to a set deadline date. The reason for the differentiation between proposals for family and elderly projects is the

relatively small number of proposals for family projects.

Small and Partially-Assisted Projects for Non-Elderly Families

In order to aid in deconcentration of assisted family housing, and thereby increase economic integration while at the same time lessening the impact of such housing on a neighborhood, the proposed regulation contains exemptions from program requirements and special preferences to encourage development of small projects for non-elderly families (20 units or fewer) and partially-assisted projects for non-elderly families, i.e., projects of more than 50 units of which 20 percent or less are assisted under Section 8.

1. *Small Projects.* Exempt from cost justification requirement of § 880.204(b)(2) and limitation on distributions of § 880.205. Special preferences in selection for technical processing (§ 880.306(b)) and ranking (§ 880.307).

2. *Partially-Assisted Projects.* Exempt from cost justification requirement of § 880.204(b)(2), limitation on replacement costs of § 880.204(c), limitation on amenities of § 880.204(e) and limitation on distributions of § 880.205. Special preferences in selection for technical processing (§ 880.306(b)) and ranking (§ 880.307).

Changes in Selection Procedures

The current regulation permits field offices to (1) place all acceptable proposals in technical processing and then rank all those found approvable in order to make selections or (2) identify clearly superior proposals, place only those clearly superior proposals in processing, and select those projects without further comparison to any others submitted. In some cases, field offices have processed far more proposals than could be funded, which creates costly delays to both the field office and the prospective developers. In other cases, where the clearly superior standard was used to reduce the processing burden on the field office, it was not applied in a consistent manner because it was not defined but was left to subjective judgment.

The proposed regulation continues the requirement for a preliminary evaluation of all proposals. If the number found acceptable for further processing substantially exceeds the number which can be processed expeditiously, the field office is authorized to reduce the number of proposals to be placed in technical processing by the use of specified comparison factors (see § 880.306(b)) instead of the clearly superior standard. This approach assures that competition is maintained, and a pipeline of approvable proposals is identified, without causing undue delay and processing burden.

Improved Coordination of Section 8 and Mortgage Insurance Programs

The proposed regulation has eliminated any request at preliminary proposal for special submissions for projects requesting mortgage insurance. At later stages of processing, all duplication of documents and reviews between the two programs has been eliminated. Section 8 documents and processing will constitute only a minor addition to the HUD mortgage insurance program requirements. (See §§ 880.306(d) and 880.306(b).)

Review of Architectural Drawings

The proposed regulation requires field office review of all final architectural drawings and specifications to assure that excessive amenities are not included. (See § 880.310.) HUD also reserves the right to review on a case-by-case basis for compliance with HUD Minimum Property Standards; this review is now and will continue to be done for all HUD mortgage-insured projects as part of mortgage insurance processing.

Site and Neighborhood Standards Unchanged

The proposed regulation does not alter the current site and neighborhood standards. Revisions to these standards have been published for comment. Comments have been received and are currently under study. When new standards are published, they will replace the standards contained in this regulation.

Rent Increase During Construction

The current regulation prohibits rent increases during the construction period except in very limited circumstances. A number of requests for waivers of this provision have been received, and many have been granted because of the unforeseeable nature of the circumstances which occasioned the requests and the hardships which would result if increases were not granted. The proposed regulation would permit rent increases during construction under certain circumstances described in § 880.403. These provisions are similar to, but not the same in all respects as, the current bases for mortgage increases under HUD mortgage insurance programs.

Contract Provisions

Two major changes in the Housing Assistance Payments Contract are included in the proposed regulation. First, the provision for an initial term of five years renewable at the sole option of the owner for up to the maximum total term of the Contract has been deleted. Under § 880.502 of the proposed regulation, the Contract will be executed for a single term without optional renewals. The reason for this change is to assure that units built under the Section 8 program remain available as assisted housing for the total term of the Contract. The second change, in § 880.504, has the same purpose. It places a 10 percent limitation on the leasing of assisted units to ineligible families without the prior approval of HUD and provides for appropriate remedies, including a reduction of the number of units covered by the Contract.

A new provision is included in § 880.501(a), similar to a provision in 24 CFR, Part 811. It permits execution of the Contract upon acceptable physical completion of the project, even though evidence of completion in other respects is not yet acceptable. In such cases, however, and until acceptable completion of all such other requirements, housing assistance payments will be limited to the amount of debt service, and rent-up and occupancy will be subject to field office conditions.

Changes have been made in § 880.502(a) to limit the availability of a 40-year maximum Contract term to projects which:

(1) Are not financed with the aid of a loan insured, co-insured, made, guaranteed or intended for purchase by the Federal Government,

(2) Are owned or financed by a loan or loan guarantee from a state or local agency,

(3) Are intended for occupancy by non-elderly families, and

(4) Are located in an area designated by HUD as requiring special financing assistance.

Increased Housing Opportunities for Non-elderly Families Residing in Impacted Jurisdictions

The revised regulation includes new provisions under which owners of non-elderly family projects that are located in non-impacted jurisdictions will be required to adopt and implement a marketing plan to promote occupancy in these projects by families living in impacted jurisdictions.

An impacted jurisdiction is defined in § 880.201 as a jurisdiction (smallest unit of general local government) in a Standard Metropolitan Statistical Area (SMSA) where the ratio of lower income families to total families is materially higher than the ratio of lower income families to total families for the entire SMSA.

The objective of these provisions is to help achieve the Departmental policy of increasing housing opportunities for lower income families, and to promote the objective contained in the Housing and Community Development Act of 1974, as amended, for spatial deconcentration of housing opportunities for lower income families and reduction of isolation of such families.

These provisions will be coordianted with other HUD actions to be taken in the near future with respect to housing and community development programs aimed at promoting mobility and increased housing choice. This will involve participation by public housing agencies, local government community development program agencies, area-wide planning organizations, and nonprofit and other private sector agencies and organizations concerned with these objectives.

Section 880.308(a) provides that final proposals for non-elderly family projects located in non-impected jurisdictions will contain a marketing plan to achieve occupancy of units by families from impacted jurisdictions. The plans will include activities and efforts needed to achieve an appropriate level of initial and subsequent occupancy by such families. This would be similar to the affirmative fair housing marketing activities pursuant to current requirements for achieving occupancy by minority households.

Section 880.601(a) provides that initial marketing to impected area families is to begin one month prior to marketing to non-impacted area families. However, applications from such families will not be accepted until the date of initiation of marketing to other families, which date will also be the announced date for acceptance of applications from all applicants.

Section 880.311(c) provides for HUD notification of PHAs, community development agencies, metropolitan-wide clearinghouses, and fair housing organizations as to projects that are about to begin construction. These agencies may then inform impacted area families who may be interested in occupying the housing. Owners will contact these agencies again for specific referrals during the initial and subsequent marketing periods.

As further incentive for owners to meet these requirements and implement effective marketing plans, the ranking system for selecting among competing proposals established pursuant to § 880.307(b) will include the extent of previous experience or other evidence of competence of the owner and other participants in the development of non-elderly family housing, and in marketing units located in non-impacted jurisdictions to families from impacted jurisdictions subsequent to the establishment of this requirement. These same factors will also be used in the selection of proposals for further technical processing as provided in § 880.308(b).

In addition, compliance with the various marketing requirements established pursuant to § 880.601 is one of the conditions for making vacancy payments to owners under § 880.611.

HUD intends to monitor compliance with these requirements and with the affirmative fair housing marketing requirements through the management review checklist in the appropriate Section 8 handbooks. This will focus on reviews of initial and subsequent marketing activities and the records of owners as to the race and place of previous occupancy of both applicants and occupants of projects, for comparison with the marketing standards established pursuant to § 880.308(a)(4) and (5).

Residency Requirements and Preferences

Section 880.603(b)(1) prohibits residency requirements and preferences in establishing criteria for the selection of tenants. This provision is being added to the regulation as part of the Department's efforts to promote the objective of spatial deconcentration of housing opportunities for lower income families.

Project Reserves

Two project reserves, an operating deficit escrow and a replacement reserve, have been added in § 880.602. Experience with both HUD mortgage insurance programs and the state agency program indicates that reserves are an important form of insurance against default on the basis of operating shortfalls during the early years of a project and extraordinary maintenance, repair and capital costs in later years.

The operating deficit escrow is set at 2 percent of total replacement cost for all profit-motivated owners; there is no escrow requirement for nonprofit owners. One-half of the amount escrow will be released at the end of the third year of project operation and the remainder at the end of the fourth year.

The replacement reserve is to be built up by annual deposits equal to 5 percent of total housing expenses for elderly projects and 7 percent for non-elderly family projects. Total housing expense was used as the basis for these annual deposits to the replacement reserve rather than replacement cost because it reflects cost increases over time. The reserve must be built up to and maintained at a level determined by HUD to be sufficient to meet projected requirements. Should the reserve achieve that level, the rate of deposits may be reduced with the approval of HUD. On the other hand, should withdrawals from the reserve and projected requirements make this necessary, higher rates of deposit may be required by HUD from time to time.

Termination of Tenancy and Modification of Leases

The provisions regarding termination of tenancy have been expanded considerably. Section 880.607 now specifies that a tenancy may be terminated by the owner only for good cause and provides detailed notice requirements. This section also contains provisions concerning modification of leases as of the end of any lease term.

Other Management Changes

1. Section 880.601(d) adds a requirement for the submission annually of audited financial and operating statements so that HUD can assure that a project is being properly managed.

2. Section 880.603(c) provides that owners will use their best efforts to achieve occupancy by families with incomes averaging at least 40 percent of the median income in the area for the purpose of promoting economically-mixed housing as stated in Section 8(a) of the U.S. Housing Act of 1937, as amended.

3. Section 880.603(d) requires annual reexamination of the incomes of all assisted families, including the elderly. Currently, only biennial review is required for elderly families.

4. A new provision is added permitting a family to report at any time a change in income or other circumstances that would result in a decrease of its required family contribution. However, an owner may not require a family to report increases in income between scheduled reexaminations.

5. Section 880.608 contains a requirement for a security deposit from

the tenant, rather than the permissive provision included in the current regulation.

Related Section 8 Changes

1. *Other Section 8 Regulations.* The program regulations for substantial rehabilitation (Part 881) and housing finance and development agencies (Part 883) are currently in the process of being revised also. Each of these regulations will reflect the revised new construction regulation (Part 880), particularly as it relates to major programmatic changes such as the addition of new cost containment factors. In addition, the regulations will contain provisions which pertain to the unique aspects of the individual programs.

2. *Mobile Homes.* This regulation does not include provisions for a Section 8 program which would assist mobile home owners in renting space in newly-constructed mobile home parks, as authorized in Section 8(j) of the United States Housing Act of 1937 which was added by the Housing and Community Development Amendments of 1978. Comments on such a program are invited at this time to assist the Department in developing a proposed regulation.

Applicability of Proposed Regulation

1. The revised Part 880 will apply to all proposals for which a notification of selection was not issued before the effective date of the revision. Where a notification was issued for a proposal before the effective date, the revised Part will apply if the owner notifies HUD within 60 calendar days that it wishes the revision to apply and promptly brings the proposal into conformance.

2. Subparts E and F will apply to all projects for which an Agreement was not executed before the effective date of the revision. Where an Agreement was so executed:

(a) The owner and HUD may agree to make the revised Subpart E applicable and to execute appropriate amendments to the Agreement and/or Contract.

(b) The owner and HUD may agree to make the revised Subpart F applicable (with or without the limitation on distribution) and to execute appropriate amendments to the Agreement and/or Contract.

3. However, § 880.607, Termination of Tenancy and Modification of Leases, will apply to all projects, including those for which an Agreement or Contract was executed before the effective date of the revision.

4. In the interest of uniformity of management standards in Section 8 new construction projects, the Department is exploring the extent to which Subparts E and F should be made applicable in the final regulation to all projects, consistent with the rights of owners under existing Contracts. Comments are specifically invited on this matter.

Inapplicability of NEPA

A finding of inapplicability regarding the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this finding of inapplicability will be available for public inspection during regular business hours at the Office of the Rules Docket Clerk, Office of the General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

Accordingly, it is proposed to amend Part 880 in its entirety as follows:

PART 880—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM FOR NEW CONSTRUCTION

Subpart A—Summary and Applicability

Sec.
880.101 General.
880.102 Processing.
880.103 Construction and management.
880.104 Applicability of revised regulation.
880.105 Applicability to proposals and projects under 24 CFR, Part 811.

Subpart B—Definitions, Project Eligibility and Other Requirements

880.201 Definitions.
880.202 Project eligibility.
880.203 Fair market rents.
880.204 Limitations on contract rents, replacement costs and amenities.
880.205 Limitation on distributions.
880.206 Site and neighborhood standards.
880.207 Property standards.
880.208 Financing.
880.209 Other Federal requirements.

Subpart C—Proposal Submission to Start of Construction

880.301 Allocation of contract authority to field offices.
880.302 Procedures for resumption of processing of proposals and preapproved site requests.
880.303 Special procedures for certain categories of proposals.
880.304 Publication of NOFA and receipt of proposals.
880.305 Contents of preliminary proposal.
880.306 Preliminary evaluation and technical processing.
880.307 Selection of proposals and use of remaining or additional contract authority.
880.308 Contents of final proposal.
880.309 Review of final proposals.
880.310 Submission and review of working drawings, architect's certification and requested changes.
880.311 Execution of agreement (and ACC if applicable).

Subpart D—Construction Period and Cost Certification

880.401 Timely performance of work.
880.402 Inspections during construction.
880.403 Increases in contract rents or utility allowances before contract execution.
880.404 Project completion.
880.405 Cost certification and adjustment of contract rents.

Subpart E—Housing Assistance Payments Contract

880.501 The contract.
880.502 Term of contract.
880.503 Maximum annual commitment and project account.
880.504 Reduction of number of units covered by contract.
880.505 Contract administration and conversions.
880.506 Default by owner (private-owner/HUD and PHA-owner/HUD projects).
880.507 Default by PHA and/or Owner (Private-Owner/PHA Projects).

Subpart F—Management

880.601 Responsibilities of owner.
880.602 Project reserves.
880.603 Selection and admission of tenants.
880.604 Tenant rent.
880.605 Overcrowded and underoccupied units.
880.606 Lease requirements
880.607 Termination of tenancy and modification of leases.
880.608 Security deposits.
880.609 Adjustments of contract rents.
880.610 Adjustment of utility allowances.
880.611 Conditions for receipt of vacancy payments.
880.612 Reviews during management period.

Subpart A—Summary and Applicability.

880.101 General.

(a) *Purpose.* The purpose of the Section 8 program is to provide lower-income families with decent, safe and sanitary rental housing through the use of a system of housing assistance payments. This Part contains the policies and procedures applicable to the Section 8 new construction program. In addition to this regulation, Section 8 new construction assistance may also be made available through State housing finance and development agencies (24 CFR, Part 883, Subparts A–D), in connection with financing by the Farmers' Home Administration (24 CFR, Part 883, Subparts G and H) or in connection with direct HUD loans for housing for the elderly or handicapped (24 CFR Part 885). The assistance may be provided to public housing agency owners or to private owners either directly from HUD or through public housing agencies. Section 8 may also provide assistance in substantially

rehabilitated housing (24 CFR, Part 881) or in existing housing in acceptable condition or needing only moderate rehabilitation (24 CFR, Part 882). This Part does not apply to projects developed under other Section 8 program regulations, including Parts 881, 882, 883, and 885, except to the extent specifically stated in those Parts.

(b) *Housing Assistance.* Under the Section 8 new construction program, monthly payments are made directly by the contract administrator (HUD or a public housing agency) to the project owner to assist an eligible family leasing an assisted unit or for vacancies in certain cases. These payments, known as "housing assistance payments," are made pursuant to a Housing Assistance Payments Contract, which is executed upon satisfactory completion and HUD acceptance of a project and which has a maximum term of between 20 and 40 years. This Contract is discussed in Subpart E.

(c) *Tenant Rents and Eligible Families.* In addition to the housing assistance payment, the project owner receives a tenant rent directly from the eligible family occupying an assisted unit. The total amount received by the owner for rent is called the contract rent and is set forth in the Contract. "Eligible families," including elderly and handicapped individuals, must have incomes within the HUD specified limits (based on 80 percent of median income for the area), and pay between 15 percent and 25 percent of their income, as adjusted in accordance with HUD regulations for housing (including utilites).

(d) *Rent, Cost and Amenities Limitations.* In the Section 8 new construction program, rents, replacement costs and amenities must comply with limitations contained in Subpart B. These limitations serve to establish the modest nature of housing assisted under the program and to assure that the rents in Section 8 housing are reasonable in relation to comparable unassisted housing in the area. After occupancy, rents will be adjusted to reflect changes in the costs of owning and operating rental housing.

(e) *Financing.* The Section 8 program provides only rental assistance. It does not provide construction or permanent financing. Section 8 may be used with any type of construction or permanent financing, such as FHA, mortgage insurance programs, tax exempt financing (see 24 CFR, Parts 811 and 883) and loans from conventional lending institutions. The owner can use the commitment contained in the Contract to make housing assistance payments to support financing.

(f) *Eligible Owners.* All types of private developers and sponsors, including profit-motivated and non-profit, and public housing agency developers and sponsors are eligible to develop and own housing assisted under this program. In all cases, the owner is responsible for the determination of eligibility and selection of tenants and for all ordinary management and maintenance functions. The provision governing project management are contained in Subpart F.

(g) *Allocation of Contract Authority.* HUD commits funding for new projects under the Section 8 program and increases the funding commitment for previously approved projects pursuant to contract authority provided by Congress. The contract authority for new projects is allocated to HUD field offices on the basis of a "fair share" formula reflecting population, poverty, overcrowding, housing condition and similar indices of housing need. Each field office, in turn, suballocates its contract authority among the various allocation areas within its jurisdiction on essentially the same "fair share" basis. Not every area receives an allocation of contract authority for new construction. A further description of this process is contained in 24 CFR, Part 891, Subpart D.

§ 880.102 Processing.

Proposals for housing to be assisted under this Part are submitted to HUD field offices and processed differently depending on several criteria.

(a) Previously submitted "pipeline" proposals which were found approvable but not funded are reviewed first when any new contract authority becomes available. If additional authority remains, HUD may consider preapproved sites, and, in certain areas, permit selections of developers by local governments. Where there are set-asides for projects to be owned by local public housing agencies or to be located in HUD-approved New Communities or for other purposes, proposals may be received, processed and approved without the need to await specified acceptance periods or to undergo formal competition. Sections 880.302 and 880.303 of Subpart C detail these procedures.

(b) Other proposals under this Part are received by HUD from owners (developers) in response to public invitations, called Notifications of Fund Availability (NOFA), which request the submission of preliminary proposals containing a maximum number and type of units in a particular area. Interested owners obtain copies of the detailed developer's packet from the HUD field office which published the NOFA. All proposals received in response to a NOFA are reviewed for deficiencies in documentation and content in order to determine eligibility for further processing. If there are more acceptable proposals than can be approved under available Section 8 contract authority, the proposals are evaluated and ranked, and the highest ranking proposals are selected. Those not selected are placed in the pipeline for possible later funding. Proposals for projects for non-elderly families are accepted as long as contract authority remains available and are reviewed on a monthly cycle. Proposals for projects for elderly families must be submitted by the specified deadline date and are reviewed at the end of the submission period. Details of this process are contained in Subpart C, §§ 880.304 through 880.307.

(c) After a preliminary proposal is selected, the owner of the selected proposal submits a final proposal for the project. This proposal contains a more detailed description of the project, including cost and expense estimates where required, and more detailed plans for design, construction, financing and management. After HUD review and approval of the final proposal, the working drawings are completed by the owner's architect and reviewed by HUD for compliance with program amenities limitations. When these drawings are found to be acceptable, an Agreement is executed by the owner and the contract administrator (either HUD or a public housing agency) and construction begins. Details of this process are contained in Subpart C, §§ 880.308 through 880.311. The Agreement provides that a Contract will be executed upon proper construction, completion and acceptance by HUD of the project.

§ 880.103 Construction and management.

(a) *Construction.* Construction of the project is carried out in conformance with the HUD-approved final proposal. Increases in contract rents or utility allowances are permitted with HUD approval during construction if they are necessary to cover cost increases as specified in § 880.403. The project will be accepted by HUD and a Contract executed upon completion in accordance with the Agreement. These provisions are contained in Subpart D, §§ 880.401 through 880.404.

(b) *Cost Certification.* As soon as possible after completion of a project, the owner, except in the case of

exempted projects, will provide HUD with cost certifications. HUD will review the contract rents based on the owner's certified cost and reduce them where not justified. Section 880.405 details this process.

(c) *Contract.* The Contract will be executed on satisfactory completion of the project. It provides that the owner will receive housing assistance payments for the units covered by the Contract. The housing assistance payments include payments for units being leased by eligible families and payments for vacant units. The Contract provides that the owner may not reduce the number of units in a project available for lower-income families by more than 10 percent without the prior approval of HUD. The term of the Contract varies depending on the type of financing used by the owner. Administration of the Contract is done either by HUD or by a public housing agency under an Annual Contributions Contract with HUD. Subpart E contains provisions concerning the Contract.

(d) *Management.* Subpart F contains management provisions. The owner is responsible for all management functions, including marketing, selection of tenants, reexamination of family incomes, evictions and other terminations of tenancy and collection of rents. The owner must also provide for an operating deficit escrow, except in the case of non-profit owners, and a replacement reserve. Contract rents will be adjusted annually in accordance with 24 CFR, Part 888.

§ 880.104 Applicability of revised regulation.

(a) The revised Part 880 applies to all proposals for which a notification of selection was not issued before the effective date of the revision. Where a notification was issued for a proposal before the effective date, the revised Part will apply if the owner notifies HUD within 60 calendar days that it wishes the revision to apply and promptly brings the proposal into conformance.

(b) Subparts E and F apply to all projects for which an Agreement was not executed before the effective date of the revision. Where an Agreement was so executed:

(1) The owner and HUD may agree to make the revised Subpart E applicable and to execute appropriate amendments to the Agreement and/or Contract.

(2) The owner and HUD may agree to make the revised Subpart F applicable (with or without the limitation on distributions) and to execute appropriate amendments to the Agreement and/or Contract.

(c) However, § 880.607, Termination of Tenancy and Modification of Leases, applies to all projects, including those for which an Agreement or Contract was executed before the effective date of the revision.

§ 880.105 Applicability to proposals and projects under 24 CFR, Part 811.

Proposals and projects involving financing with tax exempt obligations under 24 CFR, Part 811 will be subject to the provisions of this Part, with the following modifications:

(a) The term "replacement cost" used in this Part will mean "development cost" as defined in 24 CFR, Part 811, adjusted to include the same components as the definition contained in § 880.201.

(b) Preliminary proposals and final proposals will contain such additional information as may be required under 24 CFR, Part 811.

(c) The preliminary evaluation and technical processing of preliminary proposals and the review of final proposals will include such additional reviews and determinations as may be required under 24 CFR, Part 811.

(d) Additional inspections during construction will be provided as required under 24 CFR, Part 811.

(e) The additional provisions in 24 CFR, Part 811 concerning completion and acceptance of the project will also be applicable and, in case of any conflict with § 880.404, will be controlling.

(f) In lieu of § 880.405, non-HUD-insured projects will be subject to the provisions of 24 CFR, Part 811 concerning the submission of certified statements as to amounts actually expended for development and other costs, yield on the obligations and amount of debt service, and specifying the actions to be taken in the light thereof.

(g) In lieu of the provisions of § 880.504, such projects will be subject to the provisions of 24 CFR, Part 811 designed to assure that all the units will continue to be available for lower-income occupancy throughout the term of the tax-exempt financing.

(h) A debt service reserve may be established and maintained in accordance with the provisions of 24 CFR, Part 811.

(i) The forms of ACC, Agreement and Contract will be modified in accordance with the provisions of 24 CFR, Part 811.

Subpart B—Definitions, Project Eligibility and Other Requirements

§ 880.201 Definitions.

ACC. (Annual Contributions Contract) For a private-owner/PHA project, for which the Contract is administered by a PHA, the ACC is the contract between the contract administrator PHA and HUD under which HUD commits to provide the PHA with the funds needed to make housing assistance payments to the owner and to pay the PHA for HUD-approved administrative fees and the PHA agrees to perform the duties of a contract administrator.

Agreement. (Agreement to Enter into Housing Assistance Payments Contract) The agreement between the owner and the contract administrator which provides that, upon satisfactory completion of the project in accordance with the HUD-approved final proposal, the administrator will enter into the Contract with the owner.

Allocation Area. A municipality, county, one or more Indian areas, or group of contiguous municipalities or counties identified by HUD or in an approved Areawide Housing Opportunity Plan for the purpose of allocating housing assistance to support economically feasible housing projects.

Assisted Unit. A dwelling unit eligible for assistance under a Contract.

Contract. (Housing Assistance Payments Contract) The contract entered into by the owner and the contract administrator upon satisfactory completion of the project, which sets forth the rights and duties of the parties with respect to the project and the payments under the Contract.

Contract Administrator. The entity entering into the Contract with the owner. The contract administrator is a PHA in the case of private-owner/PHA projects, and HUD in private-owner/HUD and PHA-owner/HUD projects.

Contract Rent. The total amount of rent specified in the Contract as payable by HUD and the tenant to the owner for an assisted unit.

Decent, Safe and Sanitary. Housing is decent, safe and sanitary at project completion if the dwelling units and related facilities are accepted by HUD as meeting the requirements of the Agreement. Housing continues to be decent, safe and sanitary if it is maintained in a condition substantially the same as at the time of acceptance.

Elderly Family. An elderly family as defined in 24 CFR, Part 812, including a disabled or handicapped individual.

Fair Market Rent. HUD's determinations of the rents, including utilities (except telephone), ranges and

refrigerators, parking, and all maintenance, management and other essential housing services, which would be required to obtain privately developed and owned, newly constructed rental housing of modest quality with suitable amenities and sound architectural design.

Family. (Eligible Family) A family which qualifies as a lower-income family, as defined in this section. For purposes of this definition, "family" will have the meaning of "family" contained in 24 CFR, Part 812 (including single elderly, handicapped, disabled and displaced persons and the remaining member of a tenant family).

Final Proposal. The detailed description of a proposed project to be assisted under this Part, which an owner submits after selection of the preliminary proposal, except where a preliminary proposal is not required under § 880.303(c).

Housing Assistance Payment. The payment made by the contract administrator to the owner of an assisted unit as provided in the Contract. Where the unit is leased to an eligible family, the payment is the difference between the total housing expense and the total family contribution. A housing assistance payment, known as a "vacancy payment," is made to the owner when an assisted unit is vacant. An additional housing assistance payment is made to the family if the utility allowance is greater than the total family contribution.

Housing Assistance Plan. A housing plan submitted by a unit of general local government and approved by HUD as being acceptable under the standards of 24 CFR, Part 570.

HUD. The Department of Housing and Urban Development.

Impacted Jurisdiction. A jurisdiction in a Standard Metropolitan Statistical Area (SMSA) where the ratio of lower-income families to total families is materially higher than the ratio of lower-income families to total families for the entire SMSA.

Jurisdiction. The smallest unit of general local government for which adequate population and income data are available for determining whether a jurisdiction is an impacted or non-impacted jurisdiction.

Lower-Income Family. A family whose income does not exceed 80 percent of the median income for the area, as determined by HUD, with adjustments for the size of the family. HUD may establish income limits higher or lower if necessary in certain cases. For purposes of this definition, "income" shall have the meaning of "income for eligibility" contained in 24 CFR, Part 889.

New Communities. New community developments approved under Title IV of the Housing and Urban Development Act of 1968 and Title VII of the Housing and Urban Development Act of 1970.

Non-Impacted Jurisdiction. A jurisdiction which is not an impacted jurisdiction and which is located in an SMSA having one or more impacted jurisdictions.

NOFA. (Notification of Fund Availability) The notice published by HUD announcing the availability of contract authority for housing assistance and inviting the submission of proposals.

Non-Syndicated Owner. Any owner other than a limited partnership, and a limited partnership if it falls within the following definition. A limited partnership is a non-syndicated owner if its general partners, in the aggregate, receive or bear, as general partners, more than 25 percent of each of the following: income, gain, loss, deduction, credit and distributive share upon sale or refinancing of the project, as determined by the general partners' interest in the partnership. The general partners' interest shall be determined by the partnership agreement, or where not set forth therein, by other relevant documents. In applying this definition, the distributive shares of income, gain, loss, deduction, credit and distributive share upon sale or refinancing, of limited partners who are members of the family of a general partner will be added to the distributive shares of that general partner where such treatment would be authorized by Section 2057(c)(4) of the Internal Revenue Code.

Owner. Any private person or entity (including a cooperative) or a PHA having the legal right to lease or sublease newly constructed dwelling units assisted under this Part. The term owner also includes the person or entity submitting a proposal under this Part.

Partially-Assisted Project. A project for non-elderly families under this Part which includes more than 50 units of which 20 percent or fewer are assisted.

PHA. (Public Housing Agency) Any State, county, municipality or other governmental entity or public body (or agency or instrumentality thereof) which is authorized to engage in or assist in the development or operation of housing for lower-income families.

PHA-Owner/HUD Project. A project under this Part which is owned by a PHA. For this type of project, the Agreement and the Contract are entered into by the PHA, as owner, and HUD, as contract administrator.

Preliminary Proposal. The application describing a proposed project under this Part which an owner submits in response to a NOFA in order to be selected for housing assistance.

Private-Owner/HUD Project. A project under this Part which is owned by a private owner. For this type of project, the Agreement and Contract are entered into by the private owner, as owner, and HUD, as contract administrator.

Private-Owner/PHA Project. A project under this Part which is owned by a private owner. For this type of project, the Agreement and Contract are entered into by the private owner, as owner, and the PHA, as contract administrator, pursuant to an ACC between the PHA and HUD. The term also covers the situation where the ACC is with one PHA and the owner is another PHA.

Project Account. A specifically identified and segregated account for each project which is established in accordance with Section 880.503(b) out of the amounts by which the maximum annual commitment exceeds the amount actually paid out under the Contract or ACC, as applicable, each year.

Rent. In the case of an assisted unit in a cooperative project, rent means the carrying charges payable to the cooperative with respect to occupancy of the unit.

Replacement Cost. The construction cost of the project when the improvements are completed. The replacement cost may include the land, the physical improvements, utilities within the boundaries of the land, architect's fees, miscellaneous charges incident to construction as approved by the Assistant Secretary for Housing.

Secretary. The Secretary of Housing and Urban Development (or designee).

Small Project. A project for non-elderly families under this Part which includes 20 or fewer units.

Syndicated Owner. A limited partnership which does not qualify under the definition of non-syndicated owner.

Tenant Rent. The portion of the contract rent payable directly to the owner by an eligible family occupying an assisted unit. Tenant rent equals the total family contribution less any utility allowance.

Total Family Contribution. The portion of an eligible family's income payable toward the family's total housing expense, as determined in accordance with 24 CFR, Part 889.

Total Housing Expense. The total monthly cost of housing an eligible family, which is the sum of the contract rent and any utility allowance for the assisted unit occupied by the family.

Utility Allowance. An estimate, made or approved by HUD, of the cost of utilities (except telephone) and other essential housing services for an assisted unit which are not included in the contract rent paid directly to the owner but which are the responsibility of the eligible family leasing the unit.

Vacancy Payment. The housing assistance payment made to the owner by the contract administrator for a vacant assisted unit if certain conditions are fulfilled as provided in the Contract. The amount of the vacancy payment varies with the length of the vacancy period.

Very Low-Income Family. An eligible family whose income does not exceed 50 percent of the median income for the area, as determined by HUD, with adjustments for the size of the family.

§ 880.202 Project eligibility.

(a) For purposes of this Part, "new construction" refers to (1) housing for which construction starts after execution of the Agreement, or (2) housing which is already under construction when the Agreement is executed provided that:

(i) At the date of application to HUD, a substantial amount of construction (generally at least 25 percent) remains to be completed;

(ii) At the date of application to HUD, the project cannot be completed and occupied by eligible families whithout assistance under this Part; and

(iii) At the time construction was initiated, all parties reasonably expected that the project would be completed without assistance under this Part.

(b) The Section 8 new construction program under this Part is applicable to rental housing only; no assistance will be provided for any unit occupied by an owner. Cooperatives are considered rental housing rather than owner-occupied housing for purposes of this Part.

(c) The types of new construction rental housing which can be assisted under this Part include: (1) single-family houses, mobile homes, where appropriate, and multifamily structures; (2) housing designed for the elderly, disabled or handicapped, and (3) single-room occupant housing planned specifically as a relocation resource for eligible single persons.

(d) High-rise elevator projects for families whith children are prohibited unless HUD determines that there is no practical alternative.

(e) High-rise elevator projects for the elderly may be approved only if HUD determines that high-rise construction is appropriate after taking into account land costs, safety and security factors.

(f) Housing assisted under other provisions of the U.S. Housing Act of 1937, such as public housing assisted with annual contributions under Section 5 and 9 of the act, is not eligible for assistance under this Part. Tax exemption under Section 11(b) of the Act is not considered assistance for this purpose.

(g) Conversions of new construction projects under the Section 23 Leased Housing Program to the section 8 program will be permitted, where appropriate, provided that the Section 23 project qualifies as new construction under paragraph (a) of this section and that all parties, including HUD, agree.

(h) No proposal for housing under this Part may be approved unless the requirements of 24 CFR, Part 891, implementing Sections 213(a), (b) and (c) of the Housing and Community Development Act of 1974, as amended, concerning review and comment by units of general local government, have been satisfied. (See Section 880.306(c)(1).)

§ 880.203 Fair market rents.

(a) Fair Market Rents are HUD's determinations of the rents, including utitlities (except telephone), ranges and refrigerators, parking, and all maintenance, management and other essential housing services, which would be required to obtain privately developed and owned, newly constructed rental housing of modest quality with suitable amenities and sound architectural design.

(b) Separate Fair Market Rents are established by unit size (number of bedrooms), basic structure type (detached, semi-detached/row, walk-up and elevator apartments) and occupant group (non-elderly family and elderly family, including handicapped) for individual market areas.

(c) Fair Market Rents for mobile homes may be established for an area upon application to HUD. The application must show that there is a need and demand for mobile homes in the area for which they are proposed, and that mobile homes are acceptable under local requirements in that area.

(d) Fair Market Rents are published in the Federal Register at least annually in accordance with 24 CFR, Part 888. Interim revisions for one or more market areas may be initiated by HUD at any time and may be published as market conditions dictate.

§ 880.204 Limitations on contract rents, replacement costs and amenities.

(a) *Purpose and Applicability of Limitations.* The purpose of the Section 8 program is to assist lower-income families in renting decent, safe and sanitary housing of modest quality with suitable amenities and sound architectural design. This section sets limitations on the contract rents, replacement costs and amenities of projects contructed under this Part. These limitations are intended to permit production of suitable housing without excessive costs, design features or amenities.

(b) *Limitation on Contract Rents.* The contract rents for a project from proposal submission through cost certification, must be within both of the following limitations:

(1) *Fair Market Rent.* The contract rent plus any utility allowance for the unit must not exceed the Fair Market Rent in effect at the time of processing. The published Fair Market rents will include an estimate of anticipated rent increases in order to allow for the period of construction as stated in the publication. If the scheduled construction time for a project is less, an appropriate reduction will be made in determining the approvable Contract Rent. On the other hand, the applicable Fair Market Rent may be exceeded under special circumstances or if needed to implement a local Housing Assistance Plan or Areawide Housing Opportunity Plan:

(i) By up to 10 Percent with the approval of the HUD field office manager, or

(ii) By up to 20 percent with the approval of the HUD Assistant Secretary for Housing; and

(2) *Rent Reasonableness.* The contract rent must be reasonable. Contract rents will be considered reasonable only if HUD determines that:

(i) The rents are comparable to or below the rents of unassisted units of similar age, design and location which provide comparable amenities and services, or

(ii) For small projects and partially-assisted projects, the rents exceed the comparable rents by no more than 10 percent; or

(iii) For all other proposals, the rents do not exceed the comparable rents by more than 10 percent and the owner has provided cost and expense estimates at final proposal and cost certification, as specified in §§ 880.308 and 880.405, which justify the need for rents above

comparable rents and which have been accepted by HUD.

(c) *Limitation on Replacement Costs:*

(1) No proposal for a project to be assisted under this Part will be selected or approved by HUD, and no Agreement may be executed for a project, with an estimated replacement cost greater than the following limits plus any additional cost not attributable to dwelling use to the extend approved by HUD. The limits applicable to the part of the project attributable to dwelling use, as determined by HUD, depending on the number of bedrooms, are as follows:

(i) The basic limits are: (A) $23,720 per dwelling unit without a bedroom; (B) $27,129 per dwelling unit with one bedroom; (C) $32,983 per dwelling unit with two bedrooms; (D) $42,217 per dwelling unit with three bedrooms; and (E) $47,032 per dwelling unit with four or more bedrooms.

(ii) Where necessary to compensate for the higher costs incident to construction of elevator type structures of sound standards of construction and design, HUD may increase the limits provided in paragraph (c)(1)(i) of this section, not to exceed: (A) $24,982 per dwelling unit without a bedroom; (B) $28,614 per dwelling unit with one bedroom; (C) $34,795 per dwelling unit with two bedrooms; (D) $45,011 per dwelling unit with three bedrooms; and (E) $49,409 per dwelling unit with four or more bedrooms.

(iii) For any market area where cost levels so require, the Assistant Secretary for Housing may increase, at the request of the field office, the dollar amount limits set forth in paragraphs (c)(1)(i) and (ii) by up to 50 percent.

(iv) If the Assistant Secretary finds that, because of high costs, it is not feasible to construct dwellings in Alaska, Guam, or Hawaii without the sacrifice of sound standards of construction, design, and within the limits in paragraphs (c)(1) (i) and (ii), livability, the principal amount of the replacement cost limits may be increased by amounts as are necessary to compensate for additional costs, but not to exceed the maximum, including high cost area increases under paragraph (c)(1)(iii), if any, otherwise applicable by more than 50 percent.

(2) Partially-assisted projects are exempt from the replacement cost limitation of this paragraph.

(3) The mortgage amount of a HUD-insured proposal will also be subject to the mortgage limits of the applicable mortgage insurance program.

(d) *Excess Costs.* The limitation of paragraph (c) will not prohibit the actual cost of a project from exceeding the limit referred to in that paragraph in the event of cost overruns or other unforeseeable causes. However, in determining or adjusting contracts rents, or housing assistance payment, HUD will not take into account or give credit for any cost which exceeds the applicable replacement cost limit.

(e) *Limitation on Amenities.* Amenities in projects assisted under this Part will be limited to those amenities which are generally provided in unassisted housing of modest quality in the market area, as determined by HUD. Generally, the amenities included in the determination of Fair Market Rents for the area may be included in a project. Other amenities will not be permitted unless the owner provides justification for each additional amenity to HUD, and its inclusion is approved by HUD. Partially-assisted projects are exempt from the limitation of this paragraph.

§ 880.205 Limitation on distributions.

(a) For the purposes of this Part, there will be two types of owners—non-profit and profit-motivated. In the case of HUD-insured projects, profit-motivated owners will include both general mortgagors and limited distribution mortgagors as defined in applicable HUD mortgage insurance regulations.

(b) Non-profit owners are not entitled to distributions of project funds.

(c) For the life of the Contract, project funds may only be distributed to profit-motivated owners at the end of each fiscal year of project operation following the effective date of the Contract after all project expenses have been paid, or funds have been set aside for payment, and all reserve requirements have been met. The first year's distribution may not be made until cost certification, where applicable, is completed. Distributions may not exceed the following maximum returns:

(1) For projects for elderly families that have syndicated owners, 6 percent on equity per year;

(2) For projects for non-elderly families that have syndicated owners, 8 percent on equity per year;

(3) For projects for elderly families that have non-syndicated owners, the first year's distribution will be limited to 8 percent on equity. Subsequent years' distributions will be determined by applying to each subsequent year's sum of total housing expenses the percentage arrived at by dividing the first year's allowable return by the sum of the first year's total housing expenses.

(4) For projects for non-elderly families that have non-syndicated owners, the first year's distribution will be limited to 10 percent on equity. Subsequent years' distributions will be determined by applying to each subsequent year's sum of total housing expenses the percentage arrived at by dividing the first year's allowable return by the sum of the first year's total housing expenses.

(d) For the purpose of determining the allowable distribution, an owner's equity investment in a project is deemed to be 10 percent of the replacement cost of the part of the project attributable to dwelling use accepted by HUD at cost certification (see Section 880.405).

(e) Any short-fall in return may be made up from surplus project funds at the end of any of the next five fiscal years of the project.

(f) If HUD determines at any time that project funds are more than the amount needed for project operations, reserve requirements and permitted distribution, HUD may require the excess to be placed in an account to be used to reduce housing assistance payments or for other project purposes. Upon termination of the Contract, any excess funds must be remitted to HUD.

(g) Owners of small projects or partially-assisted projects are exempt from the limitation on distributions contained in this section.

(h) In the case of HUD-insured projects, the provisions of this section will apply in lieu of the otherwise applicable mortgage insurance program provisions.

§ 880.206 Site and neighborhood standards.

Proposed sites for new construction projects must be approved by HUD as meeting the following standards:

(a) The site must be adequate in size, exposure and contour to accommodate the number and type of units proposed; and adequate utilities (water, sewer, gas and electricity) and streets must be available to service the site.

(b) The site and neighborhood must be suitable from the standpoint of facilitating and furthering full compliance with the applicable provisions of Title VI of the Civil Rights Act of 1964, Title VIII of the Civil Rights Act of 1968, Executive Order 11063, and HUD regulations issued pursuant thereto.

(c) The site must not be located in:

(1) An area of minority concentration unless (i) sufficient, comparable opportunities exist for housing for minority families, in the income range to be served by the proposed project, outside areas of minority concentration, or (ii) the project is necessary to meet overriding housing needs which cannot otherwise feasibly be met in that

housing market area. An "overriding need" may not serve as the basis for determining that a site is acceptable if the only reason the need cannot otherwise feasibly be met is that discrimination on the basis of race, color, religion, creed, sex, or national origin renders sites outside areas of minority concentration unavailable; or

(2) A racially mixed area if the project will cause a significant increase in the proportion of minority to non-minority residents in the area.

(d) The site must promote greater choice of housing opportunities and avoid undue concentration of assisted persons in areas containing a high proportion of low-income persons.

(e) The site must be free from adverse environmental conditions, natural or manmade, such as instability, flooding, septic tank back-ups, sewage hazards, or mudslides; harmful air pollution, smoke or dust; excessive noise vibration, or vehicular traffic; rodent or vermin infestation; or fire hazards. The neighborhood must not be one which is seriously detrimental to family life or in which substandard dwellings or other undesirable elements predominate, unless there is actively in progress a concerted program to remedy the undesirable conditions.

(f) The site must comply with any applicable conditions in the local Housing Assistance Plan approved by HUD.

(g) The housing must be accessible to social, recreational, educational, commercial, and health facilities and services, and other municipal facilities and services that are at least equivalent to those typically found in neighborhoods consisting largely of unassisted, standard housing of similar market rents.

(h) Travel time and cost via public transportation or private automobile, from the neighborhood to places of employment providing a range of jobs for lower-income workers, must not be excessive. (While it is important that elderly housing not be totally isolated from employment opportunities, this requirement need not be adhered to rigidly for such projects.)

(i) The project may not be built on a site that has occupants unless the relocation requirements referred to in § 880.209(a) are met.

(j) The project may not be built in an area that has been identified by HUD as having special flood hazards and in which the sale of flood insurance has been made available under the National Flood Insurance Act of 1968, unless the project is covered by flood insurance as required by the Flood Disaster Protection Act of 1973, and it meets any relevant HUD standards and local requirements.

§ 880.207 Property standards.

Projects must comply with:

(a) HUD Minimum Property Standards;

(b) In the case of mobile homes, the American National Standards Institute Standard No. A–119.1, or applicable State standards, in accordance with applicable HUD regulations as to certification, and standards issued pursuant to Title I of the National Housing Act, 24 CFR 201.520–1;

(c) In the case of congregate or single room occupant housing, the appropriate HUD guidelines and standards;

(d) HUD requirements pursuant to Section 209 of the Housing and Community Development Act of 1974 for projects for the elderly or handicapped;

(e) HUD requirements pertaining to noise abatement and control; and

(f) Applicable State and local laws, codes, ordinances and regulations.

§ 880.208 Financing.

(a) *Types of Financing.* Any type of construction financing and long-term financing may be used, including: (1) conventional loans from commercial banks, savings banks, savings and loan associations, pension funds, insurance companies or other financial institutions; (2) mortgage insurance programs under the National Housing Act; (3) mortgage and loan programs of the Farmers' Home Administration of the Department of Agriculture compatible with the Section 8 program; and (4) financing by tax-exempt bonds or other obligations.

(b) *HUD Approval.* The terms and conditions of the financing must be approved by HUD. As a condition of obtaining this approval, all issuers of tax-exempt obligations purporting to be exempt from Federal taxation under any provision of law or governmental regulation other than 24 CFR Part 811 (except an issuer which is a qualified participating agency pursuant to 24 CFR Part 883) must submit all documents required by 24 CFR 811.107, 811.108, 811.109 and 811.110 to the field office for review and approval. The terms and use of such obligations and the operation of the project must comply with the requirements of 24 CFR Part 811. (See also 24 CFR 811.117.)

(c) *Pledge of Contracts.* An owner may pledge, or offer as security for any loan or obligation, an Agreement, Contract or ACC entered into pursuant to this Part: Provided, however, that such security is in connection with a project constructed pursuant to this Part. Any pledge of the Agreement, Contract, or ACC, or payments thereunder, will be limited to the amounts payable under the Contract or ACC in accordance with its terms. If the pledge or other document provides that all payments will be paid directly to the mortgagee or the trustee for bondholders, the mortgagee or trustee will make all payments or deposits required under the mortgage or trust indenture and remit any excess to the owner.

(d) *Foreclosure and Other Transfers.* In the event of foreclosure, assignment or sale approved by HUD in lieu of foreclosure, or other assignment or sale approved by HUD,

(1) The Agreement, the Contract and the ACC, if applicable, will continue in effect, and

(2) Housing assistance payments will continue in accordance with the terms of the Contract.

§ 880.209 Other Federal requirements.

(a) *Relocation and Land Acquisition Requirements.*

(1) The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act) is applicable only to displacement resulting from acquisition of real property by a Federally-assisted public agency. However, in the evaluation or selection of all proposals, consideration will be given to whether there are site occupants who would have to be displaced, whether the relocation of site occupants is feasible, and the degree of hardship which displacement might cause. Preference points will be given to proposals which do not require displacement, or, where displacement is required, which will involve the least amount of hardship.

(2) Where the site for a project is acquired by a PHA and the site has occupants, the Agreement will provide that, pursuant to the Uniform Act, the PHA undertakes responsibility for:

(i) The provision of relocation payments and assistance as prescribed in Sections 202, 203 and 204 of the Uniform Act;

(ii) The provision of relocation assistance programs offering the services described in Section 205 of the Uniform Act;

(iii) Assuring that within a reasonable period of time prior to displacement, decent, safe and sanitary replacement dwellings will be available to displaced persons; and

(iv) Compliance with Title III of the Uniform Act. The Agreement must also provide that the PHA will provide full funding for the required relocation

payments and assistance unless other commitments, satisfactory to HUD, have been made for the funding of such payments and assistance.

(b) *Equal Opportunity Requirements.* Participation in this program requires compliance with Title VI of the Civil Rights Act of 1964, Title VIII of the Civil Rights of 1968, Executive Orders 11063 and 11246, and Section 3 of the Housing and Urban Development Act of 1968, and all related rules, regulations and requirements.

(c) *National Environmental Policy Act.* Participation in this program requires compliance with the National Environmental Policy Act and all related rules, regulations and requirements.

(d) *Clean Air Act and Federal Water Pollution Control Act.* Participation in this program requires compliance with the Clean Air Act and the Federal Water Pollution Control Act and all related rules, regulations and requirements.

(e) *Davis-Bacon Wage Rates.* Not less than the wages prevailing in the locality, as predetermined by the Secretary of Labor pursuant to the Davis-Bacon Act (49 Stat. 1011), must be paid to all laborers and mechanics employed in the development of any project with nine or more assisted units.

(f) *Rehabilitation Act.* Participation in this program requires compliance with the Rehabilitation Act of 1973 and Executive Order 11914 and all related rules, regulations and requirements.

(g) *Other Federal Statutes and Regulations.* Participation in this program requires compliance with the National Historic Preservation Act (Public Law 89-665), the Archeological and Historic Preservation Act of 1974 (Public Law 93-291), and Executive Order 11593 on Protection and Enhancement of the Cultural Environment, including the procedures prescribed by the Advisory Council on Historic Preservation in 36 CFR, Part 800.

Subpart C—Proposal Submission To Start of Construction

§ 880.201 Allocation of contract authority to field offices.

(a) Funding authorization for the Section 8 program is assigned to HUD field offices annually in the form of contract authority, which is the maximum amount authorized for annual payments under Contracts. Assignments are made pursuant to 24 CFR, Part 891, Subpart D. Each field office suballocates this authority to the areas within its jurisdiction, also in accordance with Part 891, Subpart D.

(b) In the allocation process, the field office determines the amount of contract authority and the approximate number of units of Section 8 new construction specifically designed for elderly families, for non-elderly families and for large non-elderly families (3 or more bedrooms) which will be made available in each allocation area.

(c) For the contract authority made available in each allocation area, the HUD field office will process proposals as provided for in §§ 880.302, 880.303 and 880.304.

§ 880.202 Procedures for resumption of processing of proposals and preapproved site requests.

(a) Prior to the publishing of a NOFA or the consideration of requests for preapproved sites, the pipeline of approvable proposals and preapproved site requests proposals will be reviewed to determine whether to resume processing any or all of them. In making the decision as to whether to resume processing, the following will be considered:

(1) Whether the proposal or preapproved site request is consistent with the final or tentative allocation plan for the area in which the project is proposed to be located;

(2) Whether the proposal or preapproved site request conforms to the housing type and household type requirements of any applicable Housing Assistance Plan;

(3) Whether the proposal or preapproved site request is consistent with priorities for targeting of contract authority to localities which have previously been underfunded relative to their needs and the funding of the needs of other localities in that allocation area; and

(4) Whether the proposal or preapproved site request is considered to be of high quality relative to the standards and requirements of this Part.

(b) Owners of proposals or local governments with preapproved site requests which are eligible in accordance with paragraph (a) to resume processing will be sent a letter requesting them to advise HUD within 5 days as to whether or not they wish processing to be resumed on their proposals or requests and, if their decision is in the affirmative, to submit to HUD within an additional 10 days (for a total of 15 days):

(1) For proposals, updated proposed rents;

(2) For proposals, the replacement cost estimate required by Section 880.305;

(3) Up-to-date evidence of site control; and

(4) Any information on other factors which might affect the current approvability of their proposals or requests.

Owners or local governments may submit any other information they wish, but the field office is not required to consider this additional information.

(c) Upon receipt of notification from an owner that it wishes processing of a proposal to be resumed, the unit of general local government and A-95 clearinghouse will be notified under Part 891 of the resumption of processing and asked for comments if the proposal is more than 6 months old or if there has been a substantive change in the local Housing Assistance Plan.

(d) Upon receipt of the updated information, the field office will resume processing of the proposal or request in accordance with § 880.303(c) or 880.303(a).

(e) Owners of proposals and local governments with preapproved site requests for which processing is not resumed because of failure to meet the requirements of paragraphs (a) and (b), or for which owners or local governments do not request resumption of processing will be notified in writing that their proposals or requests will not be processed further. One file copy of each will be retained by the field office.

§ 880.303 Special procedures for certain categories of proposals.

(a) *Preapproved Sites.* (1) Units of general local government may submit written requests to the field office for preapproval of sites. Requests for preapproval must indicate the anticipated number of units, structure type, household type, bedroom distribution and the price at which the site will be made available. Further, the local government must indicate if it wishes to select the proposal as allowed under paragraph (a)(5) of this section. To the extent feasible, such requests should be submitted early in the fiscal year.

(2) If the field office determines that use of a site for which preapproval has been requested may be appropriate, it will review the request to determine compliance with site and neighborhood standards (§ 880.208) and environmental standards, and to determine the acceptability, as to both reasonableness and feasibility, of the proposed price at which the site will be made available. The request will also be reviewed for consistency with the allocation plan for the area, any applicable Housing

Assistance Plan and targeting priorities described in § 880.302(a)(3).

(3) If the site meets all of these requirements, the field office will advise the unit of general local government:

(i) That the site is approvable for Section 8 use;

(ii) Of the approximate number of units, by structure type, household type and bedroom distribution that may be assisted;

(iii) Of the contract authority required;

(iv) Whether HUD has reserved such contract authority, will do so as soon as sufficient contract authority becomes available or will retain the request in the pipeline for consideration in accordance with Section 880.302; and

(v) How processing will proceed, including how selection of the proposal will be accomplished.

(4) Reservations of contract authority for preapproved sites may only be made after the amount of authority necessary for pipeline proposals has been determined.

(5) For approvable sites in Federally-assisted urban renewal areas (including unsold land in closed out urban renewal areas), selection of the proposal may be under applicable urban renewal procedures, subject to the field office approval. For sites acquired or to be acquired with Community Development Block Grant funds or located in non-Federally-assisted urban renewal areas, the local government may select the proposal in accordance with a competitive method approved by the field office and consistent with State law.

(6) For approvable sites outside those areas set forth in paragraph (a)(5) of this section, selection of the proposal will be accomplished by the field office by publishing a NOFA requesting proposals for that site pursuant to § 880.304.

(b) *Other Categories.* Where set-asides are made for projects to be owned by PHAs, for projects to be located in New Communities or for other purposes, proposals may be obtained by invitation or other appropriate means, as determined by the field office, or the New Communities Development Corporation where appropriate. Selection procedures may be modified, as approved by the Assistant Secretary for Housing, to meet the objectives of the set-asides. Prior to submission of proposals, prospective owners will be advised of the modified procedures.

(c) *Proposal Submissions for Special Categories of Projects.* Preliminary proposals are not required for projects submitted pursuant to paragraphs (a) or (b), except in the case of proposals under paragraph (a)(6) of this section. The first proposal submitted for such projects may be a final proposal in accordance with § 880.308.

§ 880.304 Publication of NOFA and receipt of proposals.

(a) After determination of the amount of contract authority necessary for pipeline proposals as provided in § 880.302, and any commitments of contract authority for preapproved sites as provided in § 880.303, the field office will publicize the availability of the remaining contract authority, if any, in accordance with paragraph (b) of this section.

(b) A summary notification of fund availability (NOFA) for all allocation areas within the jurisdiction of the field office will be published at least once a week for two consecutive weeks in a newpaper(s) of general circulation in the allocation areas. Specific information for each allocation area will be contained in a detailed NOFA which will be provided upon request. The detailed NOFA will identify the geographic area of each allocation area for which contract authority is available and include the following information for each area:

(1) The contract authority available for new construction and the approximate numberr of units for elderly, non-elderly and large non-elderly families that the contract authority is expected to support;

(2) The first and last dates for acceptance of preliminary proposals for projects for elderly families and the first date for acceptance of proposals for projects for non-elderly families;

(3) The fact that proposals for projects for non-elderly families will be accepted at any time after the initial acceptance date so long as contract authority remains available, and that all such proposals received during one monthly period will be processed and, if necessary, ranked against each other;

(4) The fact that the NOFA will be cancelled for an allocation area when all available contract authority has been or is expected to be used or when a decision by HUD pursuant to Section 891.405 to reallocate any unused contract authority has been made;

(5) The fact that developer's packets for each allocation area and type of proposal will be available prior to the opening date for submission of proposals and that information and assistance are available from the field office.

(6) A listing of non-impacted jurisdictions within the allocation area for which a marketing plan with respect to families in impacted areas will be required for non-elderly family projects.

(c) Copies of the detailed NOFA will be provided to minority and fair housing organizations and media in the allocation area.

(d) Field offices may issue Conditional NOFAs subject to the sufficiency of the allocation of contract authority. Proposals received in response to a Conditional NOFA will be processed in accordance with the provisions of § 880.306, but notifications of selection will not be sent until contract authority becomes available and is reserved.

(e) Proposals will be accepted by the field office beginning on the published opening date for submission and may be opened for review immediately. The contents will remain confidential until sent by the field office to the A-95 clearinghouses or local government for review or, in the case of projects for elderly families, until the deadline date has passed, whichever is earlier.

§ 880.305 Contents of preliminary proposal.

Each preliminary proposal must contain:

(a) A description of the proposed housing, including sketches of the proposed building, unit plans, listing of amenities, estimated date of completion and whether it will be completed in stages, and other information requested in the developer's packet.

(b) Identification and description of the proposed site, site plan and neighborhood, and evidence of site control or a description of actions likely to result in site control, as requested in the developer's packet;

(c) Evidence that the proposed construction is permitted by current zoning ordinances or regulations or evidence to indicate that needed rezoning is likely and will not delay the project;

(d) The proposed contract rent per unit, including an indication of which utilities, services and equipment are included in the rent and which are not. For those utilities and services which are not included, an estimate of the average monthly cost for each unit type for the first year of occupancy.

(e) The estimated replacement cost per unit.

(f) A statement describing how the proposal is consistent with any applicable Housing Assistance Plan, and/or Areawide Housing Opportunity Plan;

(g) Information concerning displacement of site occupants: if any displacement will occur; the number of families, individuals, and business

concerns affected, by race, and whether they own or rent; and a demonstration that relocation is feasible. In the case of a project involving acquisition of real property by a PHA, a statement as to how necessary relocation payments will be funded;

(h) A signed certification on the prescribed form of the owner's intention to comply with Title VI of the Civil Rights Act of 1964, Title VIII of the Civil Rights Act of 1968, Executive Order 11063, Executive Order 11246, and Section 3 of the Housing and Urban Development Act of 1968. If the proposed project is to be located within the area of a Housing Assistance Plan, include certification that the owner will take affirmative action to provide the opportunity to apply for units in the proposed project to persons expected to reside in the community as a result of current or planned employment, as indicated in the Housing Assistance Plan. If the proposed project is a non-elderly family project to be located in a non-impacted jurisdiction, include a certification that the owner will comply with the requirements for marketing with respect to families in impacted jurisdictions as contained in §§ 880.308(a)(5) and 883.601(a)(3).

(i) The identity of the owner, developer, builder, architect, management agent (and other participants) and the names of officers and principal members, shareholders, investors, and other parties having a substantial interest; the previous participation of each in HUD programs on the prescribed HUD form; and a disclosure of any possible conflict of interest by any of these parties which would be a violation of the Agreement, the Contract, or the ACC, if any; and information on the qualifications and experience of the principal participants;

(j) The proposed financing method and proposed terms of financing. For proposals not requesting mortgage insurance, written evidence of review and interest by a lender, including a state housing finance agency or financing agency under Part 811, or bond underwriter, indicating that the financing is likely to be available for the proposed project;

(k) The proposed term of the Contract, and justification for the term, in accordance with § 880.502; and

(l) The identity of the contract administrator entity (PHA or HUD).

§ 880.205 Preliminary Evaluation and Technical Processing.

(a) *Preliminary Evaluation.*

(1) After receipt of a preliminary proposal for a project for elderly families received prior to the deadline date in the NOFA, the field office will make a preliminary evaluation of the proposal in accordance with paragraph (a)(3) of this section. Proposals received after the deadline date will be returned unopened.

(2) After receipt of a preliminary proposal for a project for nonelderly families, the field office will, so long as contract authority remains available, make a preliminary evaluation of each such proposal in accordance with paragraph (a)(3) of this section.

(3) In performing the preliminary evaluation, the field office will determine whether it appears, without field review, that:

(i) The proposal contains all of the required documentation in the proper form; and

(ii) The proposal is responsive to and in compliance with the requirements of the NOFA, developer's packet, and program policies and regulations, including Fair Market Rent, replacement cost, and amenities limitations.

(4) If a proposal is found deficient in accordance with paragraph (a)(3), it may be rejected. If a deficiency is minor, or if there are not sufficient proposals to use the available contract authority, the field office may request correction of the deficiency within a specified time period.

(5) If the proposal is not deficient, or if necessary corrections are made within the time limit established by the field office, the proposal will be considered in accordance with paragraph (b) or (c) as appropriate.

(b) *Selection for Technical Processing.* In the event the number of proposals found eligible for technical processing exceeds the number that the field office can process expeditiously, the field office may limit the proposals placed into technical processing to those which comprise a total number of units approximately equal to two to four times the number of units which can be approved. In order to determine which proposals to place into technical processing, the field office will, in order to eliminate the excess, rank the proposals by household type (elderly family and nonelderly family) considering the following factors and such other factors as may have been recommended by the field office and approved by the Assistant Secretary:

(1) The previous experience and qualifications of the owner, developer, builder, architect, management agent, and other participants in development, marketing and management (particularly of non-elderly family housing);

(2) Responsiveness to the preferences and priorities contained in the applicable Housing Assistance Plan;

(3) The current availability of the site for development and the availability of utilities and services;

(4) The permissiveness of current zoning;

(5) The likelihood of financing and the relative speed with which a firm financing commitment can be obtained; and

(6) the relative need for and prior housing assistance to the jurisdiction in which the housing would be located. Preference points in selection of proposals for technical processing will be given to small projects and partially-assisted projects, and to projects not involving the displacement of site occupants. The owners of proposals not selected for technical processing will be notified that their proposals will not be processed further and will not be considered for selection under the provisions of Section 880.202. One copy of each proposal will be retained by the field office.

(c) *Technical Processing.*

(1) In accordance with the procedures in 24 CFR, Part 801, a description of each proposal proceeding to technical processing will be sent to the unit of general local government for review and comment. In accordance with OMB Circular A-95, a copy of each proposal will also be sent to the A-95 state and areawide clearinghouses.

(2) Technical processing in the field office will include a review of the rents (see paragraph (c)(3)), site, design, experience of the owner and other participants, local government and A-95 clearinghouse comments, extent of displacement, feasibility of the project as a whole (including financing and marketability) and compliance with all applicable standards and requirements. Any deficiencies found will be treated in the same manner as deficiencies found during preliminary evaluation (see paragraph (a)(4) of this section).

(3) The field office will evaluate proposed rents in accordance with Section 880.204(b)(2).

(i) If the proposed rents are no more than the rents determined to be comparable, or are within 110 percent of comparable for small and partially-assisted proposals, the rents will be accepted.

(ii) If the proposed rents exceed the comparable rents by not more than 10 percent, they will be tentatively accepted subject to cost estimation at final proposal (see Section 880.205(a)) and cost certification after completion (see Section 880.606).

(iii) If the proposed rents exceed the comparable rents by more than 10 percent, the field office may either reject the proposal or tentatively accept rents at 110 percent of the comparable rents subject to cost estimation at final proposal and cost certification after completion.

(4) Amenities and design features will be reviewed to assure that they do not exceed those normally provided in modest quality housing in the general area of the proposed project.

(d) *Proposals Requiring Mortgage Insurance.* Proposals requiring mortgage insurance need not contain more information than is required for a preliminary proposal not requiring mortgage insurance. Technical processing of such proposals will include a preliminary determination of eligibility under the applicable mortgage insurance program. If such proposals are selected, subsequent processing will be in accordance with § 880.306(b), and applicable mortgage insurance requirements. If the proposal is ineligible for mortgage insurance, it may be rejected, or the field office may request the owner to submit documentation showing availability of an alternative method of financing.

§ 880.307 Selection of proposals and use of remaining or additional contract authority.

(a) All of the proposals found approvable in technical processing may be selected if sufficient contract authority was available in the NOFA or has subsequently become available prior to selection. In no case will proposals be selected prior to completion of and without compliance with the final allocation plan.

(b) If the available contract authority is insufficient to select all proposals found approvable in technical processing, all approvable proposals will be ranked by household type (elderly family and nonelderly family). The ranking factors are: rents; site (including minority concentration considerations); design; previous experience of the owner and other participants in development, marketing and management (particularly of non-elderly family housing); comments from the A–95 clearinghouse and local government and responsiveness to preferences and priorities of any applicable Housing Assistance Plan and/or Areawide Housing Opportunities Plan; extent of displacement; and feasibility of the project as a whole (including likelihood of financing and marketability). Within the ranking for nonelderly family proposals, preference points will be given to small projects and partially-assisted projects. Any deviation in the ranking procedures as set forth in this paragraph and the program handbook must be approved by the Assistant Secretary for Housing.

(c) Owners who submit proposals will be notified in writing as to whether their proposals have been found not approvable, found approvable but not selected, or selected. Selection notifications will include any special conditions or requirements applicable to the proposal. Owners who are notified of the selection of their proposals must notify the field office of their acceptance of the notification within the time period specified in the notification and must submit a final proposal by the deadline stated in the notification unless an extension of the deadline is approved by the field office. Owners of proposals found not approvable will be notified of the reason for the finding. One file copy of each proposal will be retained by the field office. Proposals found approvable but not selected will be retained by the field office for reconsideration when additional contract authority becomes available in the same or subsequent fiscal years (see § 880.302).

(d) Units of general local government and A–95 clearinghouses notified under Paragraph 880.306(c) will be notified of the field office's decision regarding the proposals within their jurisdiction.

(e) When contract authority remains available after selection of proposals for housing for elderly families, or after a decision is made to reallocate unused contract authority for housing for nonelderly families, or additional contract authority becomes available due to cancellation or recapture of contract authority for a selected proposal, or due to the assignment of additional contract authority within the same fiscal year, the field office will determine the allocation areas and types of housing for which the contract authority will be used and proceed in accordance with §§ 880.302, 880.303, and 880.304.

§ 880.308 Contents of final proposal.

(a) *Proposals for Uninsured Projects.* Final proposals for all projects except those requesting mortgage insurance will contain:

(1) Preliminary architectural drawings, including site plans, landscape plans, unit plans, general floor plans, elevations at the prescribed scale, outline specifications on the prescribed form and a listing of amenities.

(2) A statement that the documentation submitted with the preliminary proposal as required by § 880.305 (b) through (g) and (i) through (l) has not changed or a statement of the changes. In the case of special categories of projects submitted in accordance with § 880.303(c), the original documentation required by § 880.305 (b) through (l) must be submitted.

(3) Description of the terms and conditions of construction and permanent financing, including copies of the commitments for such financing from a lender or bond underwriter, or satisfactory evidence that commitments will be forthcoming before execution of the Agreement. Copies of the financing documents should also be furnished if available; otherwise, they must be submitted as soon as possible but no later than with the working drawings and specifications.

(4) For proposals for projects of five units or more, an Affirmative Fair Housing Marketing Plan.

(5) For proposals for non-elderly family projects located in non-impacted jurisdictions, a marketing plan to achieve occupancy of units by families residing in impacted juriscictions. The plan must be consistent with HUD instructions for preparation of final proposals and other requirements set forth in these regulations. The marketing plan must include marketing activities directed at families from impacted jurisdictions for purposes of achieving an appropriate level of initial and subsequent occupancy by such families. The activities may include: information and publicity; recruiting efforts through local and community organizations; transportation and other assistance for interested applicants; contacting families on existing waiting lists or lists developed by PHAs or other agencies; and other activities or efforts as agreed to by the owner and HUD. In preparing the plan, consideration will be given to: the extent of housing need among lower income families in impacted jurisdictions as compared to the need in non-impacted jurisdictions in the SMSA; the likelihood of occupancy by families from impacted jurisdictions; the nature and extent of need in the jurisdiction in which the project is located; the availability of public transportation and travel time between the project site and essential facilities, such as shopping, schools, employment, and recreation; the availability of other non-elderly assisted housing in the jurisdiction in which the project is located and in other non-impacted jurisdictions; the sizes and types of units to be made available; and other relevant factors.

(6) For proposals for projects to be located within the jurisdiction of a unit

of general local government with a Housing Assistance Plan, a statement of the affirmative actions the owner intends to take the opportunity to apply for units in the proposed project to persons expected to reside in the community as a result of current or planned employment, as indicated in the Housing Assistance Plan. Examples of such efforts include: participation in regional or semi-regional application pools; establishment of a referral system with PHAs and other Section 8 owners and managers in surrounding jurisdictions; contacts with and provisions of information about the project to local industries and their employees.

(7) Evidence of management capability, a proposed management plan and certification in the prescribed form, a copy of any proposed contracts for management services, and the proposed form of lease (see § 880.606).

(8) An indication of the estimated time for completion of the project after the Agreement is signed and, if the project is to be completed in stages, identification of the units and the scheduled completion of each stage.

(9) Estimates in the HUD prescribed form of the replacement cost, operating expenses, income, and debt service, sufficient to enable the field office to determine the cost justified rent, where required under § 880.204(b)(2). The cost estimate must indicate and reflect any anticipated benefits from land write-down, tax abatement, favorable financing terms and similar savings.

(b) *Proposals for Insured Projects.*

(1) For projects requiring mortgage insurance, except special categories of proposals which are discussed in paragraph (b)(3), the complete final proposal will consist of the application for firm commitment, plus statements in accordance with paragraphs (a)(2), (a)(6) and (a)(8), the proposed form of lease, and, where applicable, the marketing plan required by (a)(5).

(2) Although it is preferable for projects requiring mortgage insurance to proceed directly from preliminary proposal to the application for firm commitment/final proposal stage, an owner may elect to submit an application for SAMA or conditional commitment first. In these cases, no additional documentation other than that normally submitted for the mortgage insurance processing stage is required. SAMA letters or conditional commitments issued for mortgage-insured projects which are infeasible without Section 8 assistance will be conditioned upon the subsequent review and approval of the application for firm commitment/final proposal.

(3) In the case of special categories of proposals submitted in accordance with § 880.303 which are requesting mortgage insurance, the first proposal may be an application for conditional or firm commitment plus the proposed form of lease, applicable information on staging, if any, and the documentation required by § 880.305 (f), (g), (h), (i) (with respect to possible conflicts of interest), (k) and (l).

§ 880.309 Review of final proposals.

(a) All final proposals will be reviewed for compliance with program policies and standards. Material deviations from the preliminary proposal will be reviewed and may cause rejection of the proposal.

(1) Preliminary architectural drawings will be reviewed for compliance with amenity standards. In addition, HUD reserves the right to review for conformance with the HUD Minimum Property Standards, adequacy of design for tenant security and efficiency in construction and design; however, HUD has no obligation to do so and any such review or non-review will not constitute approval as to these standards.

(2) The field office will review the projected replacement cost to assure compliance with the limitations of § 880.204(c) in effect of the time. The field office will also review the proposed rents to assure that the rents are within the limitations of § 880.204(b)(1) and cost justified, where required under § 880.204(b)(2). Cost justification at this stage will consist of a review by the field office of the cost and expense estimates to determine whether the estimates justify the need for rents above comparable rents based on a debt service calculation.

(3) Where the final proposal requests rents higher than were approved with the preliminary proposal, such rents may be approved only after the review required in paragraph (a)(2). In addition, the field office may approve the request for an increase only if it determines, based on documentation by the owner, that the need for increased rents is due to:

(i) Factors beyond the owner's control which could not reasonably have been foreseen and which (A) will result in substantial delay in the originally estimated completion date, or (B) will result in substantial cost increases which would make the project infeasible.

(ii) Design changes approved by the field office which are necessary because of additional requirements imposed by governmental agencies or HUD; or

(iii) HUD-approved changes in the method or terms and conditions of financing.

(b) Each owner will be notified as to whether the final proposal has been approved, rejected, or could be approved with the submission of additional information or after correction of specified deficiencies. Notifications of approval will indicate a deadline for acceptance of the notification and, for projects not requiring mortgage insurance, a deadline for submission of working drawings and architect's certifications.

§ 880.310 Submission and review of working drawings, architect's certification and requested changes.

(a) For projects which do not involve mortgage insurance, working drawings and specifications must be submitted to the field office for review after approval of the proposal. The owner must also submit an architect's certification in the prescribed form that the drawings and specifications and proposed construction comply with the HUD Minimum Property Standards, local codes and ordinances, and zoning requirements. The working drawings and specifications will be reviewed for compliance with amenity standards. Any project may, at HUD's option, be reviewed for conformance with the HUD Minimum Property Standards, adequacy of design for tenant security and efficiency in construction and design; however, HUD has no obligation to do so and any such review or non-review will not constitute approval as to these standards.

(b) Any requests for rent increases or any material deviations from preliminary or final proposal which are submitted with the working drawings will be reviewed in the same manner as required in § 880.309(a).

(c) For projects involving mortgage insurance, working drawings are reviewed as part of the review of the application for firm commitment/final proposal.

§ 880.311 Execution of agreement (and ACC, if applicable).

(a) Upon receipt of the working drawings and acceptance of the architect's certification for projects not involving mortgage insurance, or at the time of initial endorsement in the case of projects involving mortgage insurance:

(1) HUD and the owner will execute the Agreement in the case of private-owner/HUD and PHA-owner/HUD projects; or

(2) HUD and the PHA will execute the ACC, and thereafter the PHA and the owner will execute the Agreement and HUD will approve it, in the case of private-owner/PHA projects.

(b) No Agreement will be executed unless HUD has approved the financing for the project, including a definite commitment from a lender, and the final proposal is in all other respects unconditionally approved.

(c) In the case of non-elderly family projects located in non-impacted jurisdictions, the field office will promptly notify PHAs and Community Development Agencies in impacted jurisdictions in the SMSA, as well as any metropolitan-wide clearinghouse, or fair housing organizations where there is no metropolitan-wide clearinghouse, of the execution of the Agreement; the size and bedroom distribution of the project; and the expected time of initial marketing and occupancy. The notification will indicate that the agencies will be contacted again by the owner for referrals of families from impacted jurisdictions.

Subpart D—Construction Period and Cost Certification

§ 880.401 Timely performance of work.

(a) After execution of the Agreement, the owner must proceed promptly with construction as provided in the Agreement and complete the project within the time stated in the Agreement. If the owner fails to start, diligently continue or complete construction, the contract administrator will have the right to rescind the Agreement or take other appropriate action.

(b) Extensions of the time may be granted for the reasons stated in the Agreement. However, contract rents will be increased only for the reasons stated in § 880.403.

§ 880.402 Inspections during construction.

(a) All projects will be inspected by HUD periodically to determine compliance with Davis-Bacon Act requirements.

(b) Projects which involve HUD mortgage insurance, or another type of financing which requires HUD construction inspection, will be subject to the applicable inspection requirements.

(c) A review to determine contractor compliance with equal opportunity requirements may be conducted at any time during the construction period.

§ 880.403 Increases in contract rents or utility allowances before contract execution.

(a) Increases in contract rents or utility allowances after execution of the Agreement and prior to execution of the Contract are permitted with HUD approval only:

(1) To correct substantial errors by HUD in the original processing which would otherwise result in serious inequities;

(2) To reflect substantial and necessary changes in the plans and specifications which have been approved by HUD (no optional betterments may result in rent increases);

(3) To reflect additional costs for interest, taxes, hazard insurance, mortgage insurance premiums, and commitment fees, due to construction delays excusable under the Agreement;

(4) To reflect additional costs which result from new requirements imposed by local governments, HUD or other Federal agencies, which are beyond the control of the owner, which have been approved by HUD and which could not have been anticipated at the time the Agreement was executed; or

(5) To reflect increased costs which result from a change in contractors which is necessary because the original contractor became bankrupt, was terminated by the owner due to inadequate performance or abandoned the job.

(b) Such increases will be:

(1) Limited to the amount necessary to cover the specific cost increase associated with the applicable item cited in paragraph (a); and

(2) Reviewed and approved only in accordance with the Fair Market Rent and rent reasonableness limitations of § 880.204(b) and the replacement cost limitations of § 880.204(c) all in effect at the time of the review of the request.

(c) All requests for increases must be submitted promptly to the field office for review as soon as the need for the increases becomes apparent.

§ 880.404 Project Completion.

(a) *Notification and Evidence of Completion.* The owner must notify HUD and the PHA, where the PHA is the contract administrator, when work is completed and provide HUD with:

(1) A set of as-built drawings;

(2) A certificate of occupancy and any other official approvals necessary for occupancy;

(3) A certification in the prescribed form that the project has been completed and is ready for occupancy in accordance with the requirements of the Agreement; and

(4) For projects where HUD construction inspection is not required during construction, a certification from the inspecting architect in the prescribed form which states that the project has been constructed in accordance with the certified work drawings and specifications, HUD Minimum Property Standards, local codes and ordinances, and zoning requirements.

(b) *Review and Inspection.* After receipt of the notification and evidence of completion, HUD will review the evidence of completion for adequacy and will inspect the project to determine whether it appears that the project has been completed in accordance with the Agreement.

(c) *Acceptance of the Project.*

(1) If HUD determines from review and inspection that the project (or a stage of the project) has been completed in accordance with the Agreement, the project (or stage) will be accepted.

(2) If there are any items of delayed completion which are minor items or which are incomplete because of weather conditions, and in any case which do not preclude or affect occupancy, and all other requirements of the Agreement have been met, the project (or stage) will be accepted. An escrow fund determined by HUD to be sufficient to assure completion for items of delayed completion will be required, as well as a written agreement between HUD and the owner, to be included as an exhibit to the Contract, specifying the schedule for completion. If the items are not completed within the agreed time period, the contract administrator may terminate the Contract or exercise other rights under the Contract.

(3) If other deficiencies exist, HUD will determine whether and to what extent the deficiencies are correctable, and whether the contract rents should be reduced. The owner will be notified of HUD's decision. If the corrections required by HUD are possible, HUD and the owner will enter into an agreement for the correction of the deficiencies. If the deficiencies are corrected within the period of time allowed, HUD will accept the project.

(4) Otherwise, the project will not be accepted, and the owner and the PHA, where applicable, will be notified with a statement of the reasons for nonacceptance. [However, see § 880.501(a) for action where evidence of completion is acceptable only with respect to physical completion of the project.]

(d) *Pending Davis-Bacon Act Claims.* If there are pending claims under the

provisions in the Agreement relating to place a sufficient amount, as determined by HUD, in escrow as approved by HUD to assure such payments. The amount withheld may be disbursed by HUD for and on account of the owner or any subcontractor to the employees to whom it is due.

§ 880.405 Cost certification and adjustment of contract rents.

(a) As soon as possible after acceptance of the project by HUD, the owner will certify the actual cost, except in the case of partially-assisted projects, and submit a cost certification including the unqualified certificate of an Independent Public Accountant to HUD in the manner and form prescribed by HUD, based on the following guidelines:

(1) Projects which involve HUD mortgage insurance will be subject to the cost certification requirements of the applicable insurance program;

(2) For projects not insured by HUD, a simplified form of cost certification will be completed and submitted;

(3) There will be no cost certification submission required for projects with rents that are equal to or less than comparable rents or for small projects or partially-assisted projects; and

(4) The provisions of paragraphs (a) (2) and (3) do not preclude the imposition of different cost certification requirements appropriate as part of project financing requirements (such as tax exempt financing under 24 CFR, Part 811).

(b) The cost certification for projects with rents that are higher than comparable rents will be subject to review by HUD. As part of this review, additional documentation may be required.

(c) If the owner's certified costs provided in accordance with paragraph (a) of this section, as approved by HUD, are less than the cost estimate provided for in § 880.308(a)(9), the contract rents will be reduced accordingly.

(d) If the contract rents are reduced pursuant to paragraph (c) of this section, the maximum annual Contract commitment (and the Maximum ACC commitment, in the case of private-owner/PHA projects) will be reduced. If contract rents are reduced based on certification after Contract execution, any overpayment since the effective date of the Contract will be recovered from the owner by HUD.

Subpart E—Housing Assistance Payments Contract

§ 880.501. The contract.

(a) *Contract.* The Housing Assistance Payments Contract sets forth rights and duties of the owner and the contract administrator with respect to the project and the housing assistance payments. It is entered into upon satisfactory completion of the project. If the field office finds that the evidence of completion is acceptable with respect to the physical completion of the project, including the certificate of occupancy and/or other official approvals required for occupancy, but the evidence of completion in other respects is not acceptable, the field office will, upon request by the owner, execute or approve the execution of the Contract; in such case, however, until the remaining evidence of completion is submitted to and found acceptable by the field office:

(1) The contract rent for the purpose of computing housing assistance payments with respect to any unit will be the monthly amount of the debt service on the permanent obligations attributable to the unit, and

(2) Rent-up and occupancy will be subject to such conditions as the field office may require.

(b) *Effective Date of Contract.* The effective date of the Contract may be earlier than the date of execution, but no earlier than the date HUD inspects and accepts the project, except as provided in paragraph (a).

(c) *Housing Assistance Payments to Owners under the Contract.* The housing assistance payments made under the Contract are:

(1) Payments to the owner to assist eligible families leasing assisted units, and

(2) Payments to the owner for vacant assisted units ("vacancy payments") if the conditions specified in § 880.610 are satisfied.

The housing assistance payments are made monthly by the contract administrator upon proper requisition by the owner, except payments for vacancies of more than 60 days which are made semi-annually by the contract administrator upon requisition by the owner.

(d) *Amount of Housing Assistance Payments to Owner.* (1) The amount of the housing assistance payment made to the owner of a unit being leased by an eligible family is the difference between the contract rent for the unit and the tenant rent payable by the family.

(2) A housing assistance payment will be made to the owner for a vacant assisted unit in an amount equal to 80 percent of the contract rent for the first 60 days of vacancy, subject to the conditions in § 880.611. If the owner collects any tenant rent or other amount for this period which, when added to this vacancy payment, exceeds the contract rent, the excess must be repaid as HUD directs.

(3) For a vacancy that exceeds 60 days, a housing assistance payment for the vacant unit will be made, subject to the conditions in § 880.611, in an amount equal to the principal and interest payments required to amortize that portion of the debt attributable to the vacant unit for up to 12 additional months.

(e) *Additional Housing Assistance Payments to Families.* In those cases where the total family contribution of a family leasing an assisted unit is less than the utility allowance for the unit, the difference will be paid to the family as an additional housing assistance payment. The Contract will provide that the owner will make this payment on behalf of the contract administrator. Funds for this purpose will be paid to the owner in trust solely for the purpose of making the additional payment.

§ 880.502 Term of contract.

(a) *Maximum Term (Except for Mobile Homes).* The term of the Contract will be for the total number of years approved by the field office within the following limits:

(1) For assisted units in a project financed with the aid of a loan insured or co-insured by the Federal government (except for units in a co-insured project owned by or financed by a loan or loan guarantee from a state or local agency) or a loan made, guaranteed or intended for purchase by the Federal government, the maximum term is 20 years.

(2) For units in a project financed other than as described in paragraph (a)(1), the maximum term is the lesser of (i) the term of the project's financing (but not less than 20 years), or (ii) 30 years, except that this maximum will be 40 years if (A) the project is owned or financed by a loan or loan guarantee from a state or local agency, (B) the project is intended for occupancy by non-elderly families and (C) the project is located in an area designated by HUD as one requiring special financing assistance.

(b) *Maximum Term for Mobile Homes.* For mobile homes, the maximum initial term of the Contract is 5 years, subject to renewal by the owner for additional terms of not more than 5 years each with the approval of the contract administrator (and HUD if the

contract administrator is a PHA), up to a maximum total term of 20 years. In this paragraph, the term "mobile home" means the original mobile home and any replacement(s) combined.

(c) *Staged Projects.* If the project is completed in stages, the term of the Contract must relate separately to the units in each stage. The total Contract term for the units in all stages, beginning with the effective date of the Contract for the first stage, may not exceed the overall maximum term allowable for any one unit under this section, plus two years.

§ 880.503 Maximum Annual Commitment and Project Account.

(a) *Maximum Annual Commitment.* For a private-owner/HUD or PHA-owner/HUD project, the maximum annual amount that may be committed under the Contract is the total of the contract rents and utility allowances for all assisted units in the project. For a private-owner/PHA project, the maximum annual contribution that may be contracted for in the ACC is the total of the contract rents and utility allowances for all assisted units plus the HUD-approved fee for PHA administration. Where the PHA is a State Housing Finance and Development Agency, the maximum total annual contribution will not include a fee payable by HUD for the regular costs of administration of the Contract, nor will the agency be eligible for a fee payable by HUD for the preliminary costs of administration of the Contract, if the amount charged for the permanent loan by the agency to the owner ancillary is greater than the agency's cost of borrowing including costs of servicing the obligations, such as trustee fees, maintenance of books and accounts and audit expenses.

(b) *Project Account.*

(1) A project account will be established and maintained by HUD as a specifically identified and segregated account for each project. The account will be established out of the amounts by which the maximum annual commitment exceeds the amount actually paid out under the Contract or ACC each year. Payments will be made from this account when needed to cover increases in contract rents or decreases in tenant rents for:

Housing assistance payments (and fees for PHA administration, if appropriate), and

(ii) Other costs specifically approved by the Secretary.

(2) Whenever a HUD-approved estimate of required annual payments under the Contract or ACC for a fiscal year exceeds the maximum annual commitment and would cause the amount in the project account to be less than 40 percent of the maximum, HUD will, within a reasonable period of time, take such additional steps authorized by Section 8(c)(6) of the U.S. Housing Act of 1937, as may be necessary, to assure that payments under the Contract or ACC will be adequate to cover increases in Contract rents and decreases in tenant rents.

§ 880.504 Reduction of number of units covered by contract.

(a) *Limitation on Leasing to Ineligible Families.* Owners may not lease more than 10 percent of the assisted units in a project to ineligible families without the prior approval of HUD. Failure on the part of the owner to comply with this prohibition is a violation of the Contract and grounds for all available legal remedies, including suspension or debarment from HUD programs and reduction of the number of units under the Contract, as set forth in paragraph (b) of this section.

(b) *Reduction for Failure to Lease to Eligible Families.* If, at any time beginning six months after the effetive date of the Contract, the owner fails for a continuous period of six months to have at least 90 percent of the assisted units leased or available for leasing by eligible families, HUD (or the PHA at the direction of HUD, as appropriate) may, on at least 30 days' notice, reduce the number of units covered by the Contract. HUD may reduce the number of units to the number of units actually leased or available for leasing plus 10 percent (rounded up). This reduction, however, will not be made if the failure to lease units to eligible families is permitted in writing by HUD under paragraph (a) of this section.

(c) *Restoration.* HUD will agree to an amendment of the ACC or the Contract, as appropriate, to provide for subsequent restoration of any reduction made pursuant to paragraph (b) if:

(1) HUD determines that the restoration is justified by demand,

(2) The owner otherwise has a record of compliance with his obligation under the Contract, and

(3) Contract authority is available.

§ 880.505 Contract administration and conversions.

(a) *Contract Administration.* For private-owner/PHA projects, the PHA is primarily responsible for administration of the Contract, subject to review and audit by HUD. For private-owner/HUD and PHA-owner projects HUD is responsible for administration of the Contract, but may contract with another entity for the performance of some or all of its contract administration functions.

(b) *PHA Fee for Contract Administration.* A PHA will be entitled to a reasonable fee, determined by HUD, for administering a Contract except under certain circumstances (see 24 CFR Section 883.203) where a state housing finance agency is the PHA and finances the project.

(c) *Conversion of Projects from One Ownership/Contractual Arrangement to Another.* Any project may be converted from one ownership/contractual arrangement to another (for example, from a private-owner/HUD to a private-owner/PHA project) if:

(1) The owner, the PHA and HUD agree,

(2) HUD determines that conversion would be in the best interest of the project, and

(3) In the case of conversion from a private-owner/HUD to a private-owner/PHA project, contract authority is available to cover the PHA fee for administering the Contract.

§ 880.506 Default by owner (private-owner/HUD and PHA-owner/HUD projects).

The Contract will provide:

(a) That if HUD determines that the owner is in default under the Contract, HUD will notify the owner of the actions required to be taken to cure the default and of the remedies to be applied by HUD including reduction or suspension of housing assistance payments and recovery of overpayments, where appropriate; and

(b) That if the owner fails to cure the default, HUD has the right to terminate the Contract or to take other corrective action.

§ 880.507 Default by PHA and/or owner (private-owner/PHA projects).

(a) *Rights of Owner if PHA Defaults under Agreement.* The ACC and the Agreement will provide that, in the event of failure of the PHA to comply with the Agreement with the owner the owner will have the right, if he is not in default, to demand that HUD determine whether a substantial default exists. HUD will first give the PHA a reasonable opportunity to take corrective action. If HUD determines that a substantial default exists, HUD will assume the PHA's rights and obligations under the Agreement and meet the obligations of the PHA under the Agreement, including the obligations to enter into the Contract.

(b) *Rights of Owner if PHA Defaults under Contract.* The ACC and the Contract will provide that, in the event

of failure of the PHA to comply with the Contract with the owner, the owner will have the right, if he is not in default, to demand that HUD determine whether a substantial default by the PHA exists. HUD will first give the PHA a reasonable opportunity to take corrective action. If HUD determines that a substantial default exists, HUD will assure that the obligations of the PHA to the owner are met.

(c) *Rights of HUD if PHA Defaults under ACC.* The ACC will provide that, if the PHA fails to comply with any of its obligations, HUD may determine that there is a substantial default and require the PHA to assign to HUD all of its rights and interests under the Contract; however, HUD will continue to pay annual contributions in accordance with the terms of the ACC and the Contract. Before determining that a PHA is in substantial default, HUD will give the PHA a reasonable opportunity to take corrective action. The PHA's obligations include enforcing its rights under the Contract, in the event of a default by the owner, to achieve compliance to the satisfaction of HUD or to terminate the Contract in whole or in part, as directed by HUD.

(d) *Rights of PHA and HUD if Owner Defaults under Contract.* The Contract will provide:

(1) That if the PHA determines that the owner is in default under the Contract, the PHA will notify the owner, with a copy to HUD, of the actions required to be taken to cure the default and of the remedies to be applied by the PHA including abatement of housing assistance payments and recovery of overpayments, where appropriate; and

(2) That if he fails to cure the default, the PHA has the right to terminate the Contract or to take other corrective action, in its discretion or as directed by HUD. If the PHA is the leader, the Contract will also provide that HUD has an independent right to determine whether the owner is in default and to take corrective action and apply appropriate remedies, except that HUD will not have the right to terminate the Contract without proceeding in accordance with paragraph (c) of this section.

Subpart F—Management

§ 880.601 Responsibilities of owner.

(a) *Marketing.* (1) The owner must commence diligent marketing activities in accordance with the Agreement not later than 90 days prior to the anticipated date of availability for occupancy of the first unit of the project.

(2) Marketing must be done in accordance with the HUD-approved Affirmative Fair Housing Marketing Plan and all Fair Housing and Equal Opportunity requirements. The purpose of the Plan and requirements is to assure that eligible families of similar income in the same housing market area have an equal opportunity to apply and be selected for a unit in projects assisted under this Part regardless of their race, color, creed, religion, sex or national origin.

(3) In addition, in the case of a non-elderly family project located in a non-impacted jurisdiction, initial and subsequent marketing must be done in accordance with the HUD-approved plan for outreach to families from impacted jurisdictions. Initial marketing to such families must commence one month before the initiation of marketing to families living in non-impacted jurisdictions. However, applications from such families will not be accepted until the date of initiation of marketing to other families, which date will also be the announced date for acceptance of applications from all families.

(4) At the time of Contract execution, the owner must submit a list of leased and unleased units, with justification for the unleased units, in order to qualify for vacancy payments for the unleased units. (See §§ 880.501(c) and (d) and § 880.609.)

(b) *Management and Maintenance.* The owner is responsible for all management functions (including selection of tenants, reexamination of family incomes, evictions and other terminations of tenancy, and collection of rents) and all repair and maintenance functions (including ordinary and extraordinary maintenance and replacement of capital items). All these functions must be performed in compliance with applicable Equal Opportunity requirements.

(c) *Contracting for Services.* With HUD approval, the owner may contract with a private or public entity (except the contract administrator) for performance of the services or duties required in paragraphs (a) and (b). However, such an arrangement does not relieve the owner of responsibility for these services and duties.

(d) *Submission of Financial and Operating Statements.* After execution of the Contract, the owner must submit to the contract administrator:

(1) Within 60 days after the end of each fiscal year of the project, financial statements for the project audited by an Independent Public Accountant in the form required by HUD, and

(2) Other statements as to project operation, financial conditions and occupancy as HUD may require pertinent to administration for the Contract and monitoring of project operations.

(e) *Use of Project Funds.* Project funds must be used for the benefit of the project, to make required deposits to the replacement reserve in accordance with Section 880.602(b), and to provide distributions to the owner as provided in Section 880.206. Any remaining project funds must be deposited with the mortgagee or other HUD-approved depository in a residual receipts account. Withdrawals from this account will be made only for project purposes and with the approval of HUD. In the case of HUD-insured projects, the provisions of this paragraph will apply in lieu of the otherwise applicable mortgage insurance provisions.

§ 880.602 Project reserves.

(a) *Operating Deficit Escrow.* (1) Prior to the execution of the Contract, a profit-motivated owner must provide an escrow, in the form of cash, and unconditional, irrevocable letter of credit, or other negotiable instrument, to meet any potential operating deficit during the early years of project operation. The escrow will at least 2 percent of the total replacement cost, as determined by HUD. This does not preclude more stringent requirements that may be imposed as part of HUD mortgage insurance or other project financing requirements. If the owner is not in default under the Contract or project mortgage, one-half of the unused escrow will be released to the owner at the end of the project's third fiscal year after the Contract becomes effective and the remainder will be released at the end of the project's fourth fiscal year.

(2) Funds will be held by the mortgagee or trustee for bondholders, and may be drawn from the escrow and used only in accordance with HUD guidelines and with the approval of, or as directed by, HUD.

(b) *Replacement Reserve.* (1) A replacement reserve must be established and maintained in an interest-bearing account to aid in funding extraordinary maintenance and repair and replacement of capital items. An amount equivalent to 5 percent of total housing expenses for elderly family projects, and 7 percent of this total for projects other than those designed for the elderly, or any higher rate as required by HUD from time to time, will be deposited in the replacement reserve annually.

(2) The reserve must be built up to and maintained at a level determined by

HUD to be sufficient to meet projected requirements. Should the reserve achieve that level, the rate of deposit to the reserve may be reduced with the approval of HUD.

(3) All earnings including interest on the reserve must be added to the reserve.

(4) Funds will be held by the mortgage or trustee for bondholders, and may be drawn from the reserve and used only in accordance with HUD guidelines and with the approval of, or as directed by, HUD.

(c) In the case of HUD-insured projects, the provisions of this section will apply in lieu of the otherwise applicable mortgage insurance provisions.

§ 880.603 Selection and admission of tenants.

(a) *Application.* The owner must accept applications for admission to the project in the form prescribed by HUD. Both the owner (or designee) and the applicant must complete and sign the application. On the request, the owner must furnish copies of all applications to HUD and the PHA, if applicable.

(b) *Determination of Eligibility and Selection of Tenants.* The owner is responsible for determining whether the applicant is eligible, in accordance with 24 CFR, Parts 812 and 889, and for the selection of families:

(1) In establishing criteria for selection, no local residency requirements or preferences may be used.

(2) If owner determines that the family is eligible and is otherwise acceptable and units are available, the owner will assign the family a unit of the appropriate size in accordance with HUD standards. If no suitable unit is available, the owner will place the family on a waiting list for the project and notify the family of when a suitable unit may become available. If the waiting list if so long that the applicant would not be likely to be admitted for the next 12 months, the owner may advise the applicant that no additional applications are being accepted for that reason.

(3) If the owner determines that an applicant is ineligible on the basis of income or family composition, or that the owner is not selecting the applicant for other reasons, the owner will promptly notify the applicant in writing of the determination, the reasons for the determination, and that the applicant has the right to meet the owner or managing agent in accordance with HUD requirements. Where the owner is a PHA, the applicant may request an informal hearing. If the PHA determines that the applicant is not eligible, the PHA will notify the applicant and inform the applicant that he has the right to request a review by HUD of the PHA's determination. The applicant may also exercise other rights if he believes he is being discriminated against on the basis of race, color, creed, religion, sex, or national origin.

(4) Records on applicants and approved eligible families, which provide racial, ethnic, gender and place of previous residency data required by HUD, must be maintained and retained for three years.

(c) *Income Mix.* In the initial renting of assisted units, the owner must lease at least 30 percent of the assisted units to very low-income families. After initial renting, the owner must use his best efforts to maintain at least 30 percent occupancy by very low-income families. In addition, at all times, the owner will use his best efforts to achieve leasing to families with a range of incomes so that the average of incomes of all families in occupancy is at or above 40 percent of the median income in the area.

(d) *Reexamination of Family Income and Composition.*

(1) The owner is responsible for reexamining the income and composition of all families, including elderly families, at least once each year and, upon verification of the information provided by the family, making appropriate adjustments in the total family contribution in accordance with the provisions of 24 CFR, Part 889. The owner will adjust tenant rent and the housing assistance payment in accordance with any change in total family contribution. The owner may schedule reexaminations at intervals of less than one year when it is not possible to make a reasonable estimate of the family's income for a full year.

(2) If the family reports a change in income or other circumstances that would result in a decrease of total family contribution between regularly scheduled reexaminations, the owner, upon receipt of verification of the decrease in income, must promptly make appropriate adjustments in the total family contribution. The owner may not require families to report increases in income between scheduled reexaminations.

§ 880.604 Tenant rent.

The tenant rent is paid directly to the owner by the eligible family to whom as assisted unit is leased in partial payment of the contract rent. It is equal to the family's total family contribution minus any utility allowance for the unit. If the family's total family contribution is less than the utility allowance for the unit which it occupies, the tenant rent payable by the family to the owner is zero.

§ 880.605 Overcrowded and underoccupied units.

If the contract administrator determines that because of change in family size an assisted unit is smaller than appropriate for the eligible family to which it is leased, or that the unit is larger than appropriate, housing assistance payments with respect to the unit will not be reduced or terminated until the eligible family has been relocated to an appropriate alternative unit. If possible, the owner will, as promptly as possible, offer the family an appropriate unit. The owner may receive vacancy payments for the vacated unit if he complies with the requirements of § 880.610.

§ 880.606 Lease requirements.

(a) *Term of Lease.* The term of the lease will be for not less than one year. The lease may, or in the case of a lease for a term of more than one year must, contain a provision permitting termination on 30 days advance written notice by the family.

(b) *Form.* The form of lease must contain all required provisions, and none of the prohibited provisions specified in the developer's packet, and must conform to the form of lease included in the approved final proposal.

§ 880.607 Termination of tenancy and modification of leases.

(a) *Entitlement of Families to Occupancy.*

(1) *General.* The owner may not terminate any tenancy except upon the following grounds:

(i) Material noncompliance with the lease;

(ii) Material failure to carry out obligations under any state landlord and tenant act; or

(iii) Other good cause.

No termination by an owner under paragraph (b)(1) (i) or (ii) of this section will be valid to the extent it is based upon a lease or a provision of State law permitting termination of a tenancy solely because of expiration of an initial or subsequent renewal term.

(2) *Notice of Good Cause.* The grounds for termination cannot be deemed "other good cause" under paragraph (b)(1)(iii) unless the owner has given the family prior notice that the grounds constitute a basis for termination of tenancy. The notice will be served on the family in the same

manner as that provided for termination notices in paragraph (c)(2).

(3) *Material Noncompliance.* Material noncompliance with the lease will include:

(i) One or more substantial violations of the lease, or

(ii) Repeated minor violations of the lease which disrupt the livability of the project, adversely affect the health or safety of any person or the right of any tenant to the quiet enjoyment of the leased premises and related project facilities, interfere with the management of the project or have an adverse financial effect on the project. Nonpayment of rent or any other financial obligation due under the lease (including any portion thereof) beyond any grace period permitted under State law will constitute a substantial violation of the rental agreement. The payment of rent or any other financial obligation due under the lease after the due date but within the grace period permitted under state law will constitute a minor violation.

(b) *Termination Notice.*

(1) *Requirements of Termination Notice.* The owner's determination to terminate the tenancy must be in writing and:

(i) State that the tenancy is terminated on a specified date;

(ii) State the reasons for the owner's action with enough specificity so as to enable the tenant to prepare a defense; and

(iii) Advise the family that if a judicial proceeding for eviction is instituted the family may present a defense; and

(iv) Be served on the family in the manner prescribed by paragraph (c)(2) of this section.

(2) *Manner of Service.* The notice provided for in paragraph (c)(1) of this section must be accomplished by:

(i) Sending a letter by first class mail properly stamped and addressed to the family at its address at the project with a proper return address, and

(ii) Serving a copy of the notice on any adult person answering the door at the leased dwelling unit or if no adult responds, by placing the notice under or through the door.

Service will not be deemed effective until both notices provided for in this paragraph have been acomplished. The date on which the notice will be deemed to be received by the family will be the date on which the first class letter provided for in this paragraph is mailed or the date on which the notice provided for in this paragraph is properly served, whichever is later.

(3) *Time of Service.* When a termination notice is issued according to this section for other good cause, the notice will be effective, and it will so state, at the end of a term (or in accordance with the applicable provisions of the lease), but in no case earlier than 30 days after receipt by the family of the notice. Where the termination notice is based on material noncompliance with the lease or material failure to carry out obligations under a state landlord and tenant act pursuant to paragraph (b)(1)(ii) or (iii), the time of service shall be in accord with the lease and state law.

(4) *Specificity of Notice in Rent Nonpayment Cases.* In any case in which a tenancy is terminated because of the family's failure to pay rent, a notice stating the dollar amount of the balance due on the rent account and the date of the computation will satisfy the requirement of specificity set forth in paragraph (c)(1)(ii) of this section.

(5) *Failure of Family to Object.* The failure of the family to object to the termination notice will not constitute a waiver of rights to contest the owner's action in any judicial proceeding.

(6) *Limitations on Allegations of New Grounds.* In any judicial action instituted to evict the family, the owner may not rely on any grounds which are different from the reasons set forth in the termination notice served on the family according to this section.

(c) *Modification of Lease.* Notwithstanding any provision of this subpart, the owner may, with the prior approval of HUD, modify the terms and conditions of the lease effective at the end of the initial term or a successive term, by serving an appropriate notice on the family, together with the offer of a revised lease or an addendum revising the existing lease. This notice and offer must be served on the family in the same manner as provided for in paragraph (c)(2) and must be received by the family at least 30 days prior to the last date on which the family has the right to terminate the tenancy without being bound by the modified terms and conditions. The family may accept the modified terms and conditions by executing the offered revised lease or addendum, or may reject the modified terms and conditions by giving the owner written notice in accordance with the lease that he intends to terminate the tenancy. Any increase in rent will in all cases be governed by § 880.609 and other applicable HUD regulations.

(d) *State and Local Law.* This section will apply in conjunction with any State and local landlord tenant law.

§ 880.608 Security deposits.

(a) At the time of the initial execution of the lease, the owner will require each family to pay a security deposit in an amount equal to one month's total family contribution or $50, whichever is greater. The family is expected to pay the security deposit from its own resources and/or other public sources. The owner may collect the security deposit on an installment basis.

(b) The owner must place the security deposits in a segregated, interest-bearing account. The balance of this account must at all times be equal to the total amount collected from the families then in occupancy, plus any accrued interest. The owner must comply with any applicable State and local laws concerning interest payments on security deposits.

(c) In order to be considered for the return of the security deposit, a family which vacates its unit will provide the owner with its forwarding address or arrange to pick up the refund.

(d) The owner, subject to State and local law and the requirements of this paragraph, may use the security deposit, plus any accrued interest, as reimbursement for any unpaid family contribution or other amount which the family owes under the lease. Within 30 days after receiving notification of the family's forwarding address, the owner must:

(1) Refund to a family owing no rent or other amount under the lease the full amount of the security deposit, plus accrued interest;

(2) Provide to a family owing rent or other amount under the lease a list itemizing any unpaid rent, damages to the unit, and estimated costs for repair, along with a statement of the family's rights under State and local law. If the amount which the owner claims is owed by the family is less than the amount of the security deposit, plus accrued interest, the owner must refund the unused balance to the family. If the owner fails to provide the list, the family will be entitled to the refund of the full amount of the security deposit plus accrued interest.

(e) In the event a disagreement arises concerning reimbursement of the security deposit, the family will have the right to present objections to the owner in an informal meeting. The owner must keep a record of any disagreements and meetings in a tenant file for inspection by the contract administrator. The procedures of this paragraph do not preclude the family from exercising its rights under State and local law.

(f) If the security deposit, including any accrued interest, is insufficient to

reimburse the owner for any unpaid tenant rent or other amount which the family owes under the lease, and the owner has provided the family with the list required by paragraph (d)(2), the owner may claim reimbursement from HUD or the PHA, as appropriate, for an amount not to exceed the lesser of:

(1) The amount owed the owner, or

(2) One month's contract rent, minus the amount of the security deposit plus accrued interest.

Any reimbursement under this section will be applied first toward any unpaid tenant rent due under the lease. No reimbursement may be claimed for unpaid rent for the period after termination of the tenancy.

§ 880.609 Adjustment of contract rents.

(a) *Annual Adjustment of Contract Rents.* Contract rents will be adjusted on the anniversary date of the Contract in accordance with 24 CFR, Part 888.

(b) *Special Additional Adjustments.* For all projects, special additional adjustments will be granted, to the extent determined necessary by HUD, to reflect increases in the actual and necessary expenses of owning and maintaining the assisted units which have resulted from substantial general increases in real property taxes, assessments, utility rates, and utilities not covered by regulated rates, and which are not adequately compensated for by annual adjustments under paragraph (a). The owner must submit to the contract administrator required supporting data, financial statements and certifications.

(c) *Overall Limitation.* Any adjustments of contract rents and utility allowances for a unit after cost certification must not result in material differences between the rents charged for assisted units and comparable unassisted units except to the extent that the differences existed with respect to the contract rents set at cost certification.

§ 880.610 Adjustment of utility allowances.

The owner must recommend to the contract administrator, in connection with annual and special adjustments of contract rents, and at other times if appropriate, whether and to what extent the utility allowance for any assisted unit should be adjusted. Whenever a utility allowance for a unit is adjusted, the contract administrator will promptly notify the families occupying assisted units and make a corresponding adjustment of the tenant rent and the amount of the housing assistance payment for the unit.

§ 880.611 Conditions for receipt of vacancy payments.

(a) *General.* Vacancy payments under the Contract will not be made unless the conditions for receipt of these housing assistance payments set forth in this section are fulfilled.

(b) *Vacancies During Rent-up.* For each assisted unit that is not leased as of the effective date of the Contract, the owner is entitled to vacancy payments in the amount of 80 percent of the contract rent for the first 60 days of vacancy if the owner:

(1) Conducted marketing in accordance with § 880.601(a) and otherwise complied with § 880.601;

(2) Has taken and continues to take all feasible actions to fill the vacancy; and

(3) Has not rejected any eligible applicant except for good cause acceptable to the contract administrator.

(c) *Vacancies after Rent-Up.* If an eligible family vacates a unit, the owner is entitled to vacancy payments in the amount of 80 percent of the contract rent for the first 60 days of vacancy if the owner:

(1) Certifies that he did not cause the vacancy by violating the lease, the Contract or any applicable law;

(2) Notified the contract administrator of the vacancy or prospective vacancy and the reasons for the vacancy immediately upon learning of the vacancy or prospective vacancy;

(3) Has fulfilled and continues to fulfill the requirements specified in § 880.601(a)(2) and (3) and § 880.611(b)(2) and (3); and

(4) For any vacancy resulting from the owner's eviction of an eligible family, certifies that he gave the family written notice of the proposed eviction, stating the grounds and advising the family that it had 10 days to present objections to the owner.

(d) *Vacancies for Longer than 60 Days.* If an assisted unit continues to be vacant after the 60-day period specified in paragraph (b) or (c), the owner may apply to receive additional vacancy payments in an amount equal to the principal and interest payments required to amortize that portion of the debt service attributable to the vacant unit for up to 12 additional months for the unit if:

(1) The unit was in decent, safe and sanitary condition during the vacancy period for which payments are claimed;

(2) The owner has fulfilled and continues to fulfill the requirements specified in paragraphs (b) or (c), as appropriate; and

(3) The owner has demonstrated to the satisfaction of HUD that:

(i) For the period of vacancy, the project is not providing the owner with revenues at least equal to project expenses (exclusive of depreciation), and the amount of payments requested is not more than the portion of the deficiency attributable to the vacant unit, and

(ii) The project can achieve financial soundness within a reasonable time.

(e) *Prohibition of Double Compensation for Vacancies.* The owner is not entitled to vacancy payments for vacant units to the extent he can collect for the vacancy from other sources (such as security deposits, payments under § 880.608(f), and governmental payments under other programs).

§ 880.612 Reviews during management period.

(a) After the effective date of the Contract, the contract administrator will inspect the project and review its operation at least annually to determine whether the owner is in compliance with the Contract and the assisted units are in decent, safe and sanitary condition.

(b) In addition, for private-owner/PHA projects, HUD:

(1) Will review the PHA's administration of the Contract at least annually to determine whether the PHA is in compliance with the Contract, and

(2) May independently inspect project operations and units at any time.

(c) Equal Opportunity reviews may be conducted by HUD at any time.

Authority: Section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)); Section 3(b), U.S. Housing Act of 1937 (42 U.S.C. 1437c(b)). (Section 7(o) of the Department of HUD Act 42 U.S.C. 3535(o), Section 324 of the Housing and Community Development Amendments of 1978)

Issued at Washington, D.C., May 4, 1979.

Lawrence B. Simons,

Assistant Secretary for Housing—Federal Housing Commissioner.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	MSPB*/OPM*		CSA	MSPB*/OPM*
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

*NOTE: As of January 1, 1979, the Merit Systems Protection Board (MSPB) and the Office of Personnel Management (OPM) will publish on the Tuesday/Friday schedule. (MSPB and OPM are successor agencies to the Civil Service Commission.)

REMINDERS

The items in this list were editorially compiled as an aid to Federal Register users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.

Rules Going Into Effect Today

TREASURY DEPARTMENT
Currency Comptroller—

22388 4-13-79 / Leasing of personal property by national banks; interpretive ruling

List of Public Laws

Last Listing June 7, 1979

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (telephone 202-275-3030).

H.R. 3404 / Pub. L. 96-18 To amend the Federal Reserve Act to authorize Federal Reserve banks to lend certain obligations to the Secretary of the Treasury to meet the short-term cash requirements of the Treasury, and for other purposes. (June 8, 1979; 93 Stat. 35) Price $.60.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.
WHO: The Office of the Federal Register.
WHAT: Free public briefings (approximately 2½ hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between Federal Register and the Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them, as part of the General Services Administration's efforts to encourage public participation in Government actions. There will be no discussion of specific agency regulations.

WASHINGTON, D.C.

WHEN: July 6 at 9 a.m. (identical sessions).
WHERE: Office of the Federal Register, Room 9409, 1100 L Street NW., Washington, D.C.
RESERVATIONS: Call Mike Smith, Workshop Coordinator, 202-523-5235.

BOSTON, MASSACHUSETTS

WHEN: June 14, at 9:30 a.m. (identical sessions).
WHERE: John F. McCormack Federal Building, Conference Room 208, Boston.
RESERVATIONS: Call James Mullen, 617-223-2368.

LOS ANGELES, CALIFORNIA

WHEN: June 28 and 29 at 9:00 a.m. (identical sessions).
WHERE: Federal Building, Army Corps of Engineers Conference Room 7412, 300 N. Los Angeles Street
RESERVATIONS: Federal Information Center, 213-688-3800.

SAN FRANCISCO, CALIFORNIA

WHEN: June 28 and 29 at 9:00 a.m. (identical sessions).
WHERE: Federal Building, Room 2007, 450 Golden Gate Avenue
RESERVATIONS: Call Mike Madena or Judy Barbee, Federal Executive Board, 415-556-0250.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies of 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Area Code 202–523–5240

Highlights

34078 **Historic Properties** Historic Preservation Advisory Council offers programs concerning accessibility of handicapped; comments by 7–13–79 (Part VI of this issue)

33962–33973 **Older Americans** HEW/OE announces 8–13, 8–27, 9–4, and 9–20–79 as closing dates for receipt of grant applications for certain programs. (7 documents)

33953 **Peaceful Uses of Atomic Energy** DOE/Secy announces proposed "subsequent arrangements" between the United States government and Republic of Korea government

33961 **Public Education Desegregation Awards** HEW/OE accepts sex desegregation assistance applications for certain states; closing date 7–27–79

33913 **Case Assistance, Medical Assistance, and Social Service Programs** HEW drafts regulations on fair hearings process for applicants and recipients

33960 **Occupational and Adult Education Bureau** HEW/OE requests suggestions concerning leadership activities, research ideas, and documentation of need; comments by 8–1–79

Rules and Regulations

Federal Register
Vol. 44, No. 118
Wednesday, June 13, 1979

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1446

General Regulations Governing 1978 and Subsequent Crops Peanut Warehouse Storage Loans and Handler Operations

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: These regulations provide the terms and conditions under which producers acting through their associations may receive price support on their eligible peanuts through warehouse storage loans for the 1978 and subsequent crop peanuts. Producers and handlers may market peanuts in accordance with the provisions of this subpart. This revision is necessary so that the program may be administered more effectively.

EFFECTIVE DATE: June 13, 1979.

FOR FURTHER INFORMATION CONTACT: Dalton J. Ustynik, (ASCS), 202-447-6761.

SUPPLEMENTARY INFORMATION: A notice that the Department was preparing to make determinations with respect to these provisions was published in the Federal Register on April 27, 1979 (44 FR 24854). The comment period expired on May 29, 1979; however, all written comments received through June 2, 1979 were considered. There were 31 written responses: 8 from members of Congress; 3 from farm organizations; 5 from peanut grower groups; 5 from sheller organizations and shellers; 6 from individuals; one from the Peanut Administrative Committee; the Florida State ASC Committee and two from manufacturers.

On May 22, 1979, a group of producers and handlers from the Virginia-Carolina and Southeastern peanut production areas met with Department officials. Recommendations made at this meeting were given consideration by the Department and are discussed in this analysis of comments. A summary report of the meeting is on file with comments received directly by the Department.

On May 23, 1979, a hearing on these proposals was held before the Oilseeds and Rice Subcommittee of the Agriculture Committee of the House of Representatives. Consideration was given by the Department to the written testimony presented to the Subcommittee by representatives of one grower organization, one farm organization and one sheller organization. Copies of this testimony are on file with comments received directly by the Department.

Following is a summary of the major provisions on which comments were received:

Sec. 1446.3(c) *Farmers stock peanuts.* One commentator approved, one disapproved, and one requested clarification of the proposal to define loose shelled kernels as farmers stock peanuts. Currently, producers are required to market loose shelled kernels (those kernels which have become free of the shell and may be damaged or coated with dirt or other foreign material) with other inshell farmers stock peanuts. There has been no provision for inspection of these kernels if they are removed from the load. The provision to define loose shelled kernels as farmers stock will be adopted so that growers may remove these kernels, have them inspected, and sell them at market value (which is usually higher than the loan value of 7 cents per pound). Removal of the lower quality loose shelled kernels will enhance the quality and value of the inshell peanuts from which they have been removed.

Sec. 1446.3(z) *Edible Export Standard for Contract Additional Peanuts.* One commentator approved and none disapproved of the proposal to provide that raw or inshell peanuts of any grade exported for human consumption shall meet the requirements as specified in the outgoing quality regulations of the peanut marketing agreement for such crops. This provision will be adopted in order to make compliance uniform with quota peanuts moving in edible export trade.

Sec. 1446.3(ff) *Peanut Products.* Two commentators approved and none disapproved of the proposal to add a definition of peanut products but one suggested that the definition be clarified. The definition will be added with the clarifications as suggested.

Sec. 1446.3(hh) *Peanut segregations.* One respondent approved and none disapproved of the proposal to define Segregation 2 and 3 peanuts as Segregation 1 peanuts when purchased under "buy back" provisions for domestic edible and related [seed] use for pool accounting purposes. This provision will be adopted so that profits returned to growers will more accurately reflect commercial demand for Segregation 2 and 3 peanuts sold under the buy back provision.

Sec. 1446.3(ll) *Raw peanuts.* One respondent approved and none disapproved of the proposal to add the definition of raw peanuts. This definition will be adopted.

Sec. 1446.5(a) *Contracts between handlers and producers.* Amended to delete from contract provisions the language that the amount of segregation 1 peanuts required to be delivered shall not exceed the difference between the farm base production poundage and the sum of the farm poundage quota and the quantity of additional peanuts covered by prior contracts.

Sec. 1446.5(b) *Deliveries under optional provisions of the contract.* Three respondents approved and none disapproved of the provision under which a producer retains the right to market Segregation 1 peanuts as quota peanuts in lieu of delivering them under a contract, to the extent that the farm poundage quota has not been filled. This provision will be adopted.

Sec. 1446.7 *Use of additional peanuts as domestic edible peanuts.* The proposed change would have increased from one to two work days, excluding Saturdays, Sundays and Federal holidays, following the day of inspection for completing the paperwork associated with purchases under the "immediate buy back" provision. In response to four recommendations for a longer time period, the period will be extended from two to three workdays. One respondent opposed extending the time period beyond one workday.

1446.8(b) *Method of determining compliance.* A proposed change would delete the provision that shellers may account for commingled additional peanuts on a shelled basis. One respondent favored this proposal and none disapproved the changes. The proposal will be adopted to eliminate substantial handler reports and recordkeeping requirements from the regulations.

Sec. 1446.9(d) *Replacements.* A proposed change would have permitted handlers to use additional peanuts as quota peanuts for which approval was not previously given, provided the handler pays CCC a penalty of 120 percent of the quota loan rate for such peanuts. When the handler established to the satisfaction of CCC that a like amount of quota peanuts was exported the penalty would be refunded. One respondent favored this proposal, other respondents favored a bond or other acceptable security, and one opposed permitting handlers to use additional peanuts as quota peanuts before a like amount of quota peanuts were sold as additional peanuts. Considering all comments, it has been determined that handlers may furnish a letter of credit in an amount not less than 120 percent of the basic quota support rate of the quantity of peanuts to be replaced. If satisfactory evidence is not presented to the association by the final date for exportation the association will draw against the letter of credit the full amount of the marketing quota penalty applicable to any quantity of peanuts on which an accounting was not made.

Sec. 1446.10(i) *Ineligible peanuts.* One respondent approved and one opposed a provision which will enable CCC to assess liquidated damages for ineligible peanuts placed under loan. Opposition was on the grounds that the provision would be burdensome on administration of the program and would not provide any counterbalancing effects. The provision will be retained because commingling of ineligible peanuts (those containing excess moisture, foreign material, or other contamination) with other loan stocks causes a deterioration in average quality of the stocks and results in losses to CCC. Assessment of damages in such instances will enable CCC to recover such losses.

Sec. 1446.14(b) *Additional support.* Under current regulations, all peanuts containing more than 10 percent moisture and/or foreign material are ineligible for price support. It was proposed that an exception be made on foreign material in the case of additional peanuts if a handler agrees to purchase such peanuts under the immediate buy back provision. Also that exceptions be made for both moisture and foreign material on Segregation 2 and 3 peanuts to be sold without storage for crushing or fragmentation for export, up to a maximum determined appropriate by the producer association, based on the crushing market and other local conditions. Five respondents favored and one opposed the proposal. The objector is opposed to any redefinition of quality standards of eligible peanuts as to moisture and foreign material. The proposal will be adopted in order to reduce both compliance and economic burdens to the producer in specific instances which do not involve storage.

Sec. 1446.15 *Disposition and liquidated damages on Segregation 3 peanuts.* This provision has been amended to delete Segregation 2 peanuts from the "antishopping" procedures contained in that section. One commentator approved and one opposed this amendment, which will be retained as a means of reducing compliance and economic burdens to the producer. Segregation 2 peanuts do not create a hazard to health or the integrity of the support and inspection programs.

It was also proposed to amend this section to prohibit producers from attempting to reclean peanuts graded as segregation 3 peanuts on the day of initial inspection. Farmers would be required, as a condition of continued loan eligibility, to dispose of such peanuts, as specified in this section, on the day in inspection. There was considerable opposition to this proposal as presented. However, most respondents (9) were in favor of the proposal, provided the discount on segregation 3 peanuts transferred from additional to quota loan pools was reduced from $50 to $25 per ton. The consensus appears to be that a reduced discount was needed to offset the economic hardship to producers no longer permitted to reclean segregation 3 peanuts. The proposed procedure for disposition of segregation 3 peanuts will be retained. The recommendation to make an offsetting reduction in the segregation 3 discount, from $50 to $25 per ton, will be adopted and included in the forthcoming annual crop supplement pertaining to loan rates, premiums and discounts.

Sec. 1446.16 *Producer transfers of additional loan stocks to quota pools.* The proposed change in this section was to specify that only Segregation 2 and 3 additional loan stocks may be transferred to quota pools. No comments were received on this proposal. However, two respondents recommended that growers be permitted to make such transfers immediately on delivery, rather than after marketings have been completed. The change limiting transfers to Segregation 2 and 3 peanuts will be adopted. The recommendation to permit immediate transfers is rejected because this would be contrary to the intent of the disaster program by permitting transfers whether or not producers suffered quality problems which reduced the production of segregation 1 peanuts to below the farm poundage quota.

In addition to comments on changes proposed by the Department, the following recommendations were received:

Sec. 1446.3(hh) *Peanut segregation.* One respondent recommended no change in the definition of segregation 2 peanuts with regard to freeze damage. No changes will be made, because eliminating freeze damage as a grade factor could cause freeze damaged peanuts to be classed as segregation 1 peanuts. Such peanuts would have to be sold for crushing causing substantial costs to CCC.

Sec. 1446.9 *Compliance by handlers of contract additional peanuts.* Two respondents recommended that certification be accepted in lieu of supervision in determining compliance with the regulations governing disposition of contract additional peanuts. This recommendation was rejected because supervision is considered necessary to assure timely compliance, maintain the identity of restricted peanuts, and avoid unnecessary costs to the Department of verifying the authenticity of alternative documents.

Sec. 1446.9(d) *Replacements.* Six commentators recommended that replacement of different sized shelled peanuts between domestic and export markets be allowed and two respondents opposed such change. This recommendation was not adopted since it was not authorized by law, particularly section 359(h) of the Agricultural Adjustment Act of 1938, as added by the Food and Agriculture Act of 1977, which authorizes the interchange of quota and additional peanuts only if they are of "like type and segregation or quality." The statutory scheme was devised to prevent the blending of the export and crushing markets and the domestic edible market which receive different levels of price support. If additional peanuts of lower quality are permitted to move into the domestic edible market, some price erosion might occur in that

market. The structure of the legislation was designed to prevent price erosion of this kind, with the potential for added expense to the Government because of the higher level of support in the domestic edible market.

Sec. 1446.(9)(i) *Export provisions and handling of additional contract peanuts.* One respondent recommended that additional peanuts be considered exported upon delivery at cold storage warehouses. This recommendation was rejected since it was determined that CCC could not effectively control the exportation of these peanuts and some additional peanuts could enter domestic channels if supervision were relaxed.

Sec. 1446.11 *Pooling and distribution of net profits.* Seven respondents recommended that "buy back" pools be established separately from the additional segregation 1 pools. Under such a provision, profits on sales of additional peanuts for domestic edible and related use under the immediate buy back procedure could not be retained to offset losses on quota pools of the same type. Whether such a recommendation could legally be adopted is questionable in view of Section 108(c)(2) of the Agricultural Act of 1949, as amended, which provides in part that net gains from the sale of additional peanuts for domestic food and related uses shall be used to offset any loss on disposition of all peanuts in the pool for quota peanuts and the fact that the Secretary informed Congress at the time this legislation was being considered that he intended to use area pools. Furthermore, it is hereby determined that the adoption of such a recommendation, if legally permissible, would not be desirable since it would not result in the efficient and effective administration of the peanut price support program and would probably result in increased losses to the Government.

Final Rule

7 CFR 1446.1–1446.16 and the title of this subpart of Part 1446 are amended to read as follows effective for the 1979 and subsequent crops.

Subpart—General Regulations Governing 1979 and Subsequent Crops Peanut Warehouse Storage Loans and Handler Operations.

General

Sec.

1446.1 General statement.

Authority: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 101, 106, 401, 63 Stat. 1051, as amended (7 U.S.C. 1441, 1421); sec. 358, 52 Stat. 91, as amended (7 U.S.C. 1358).

Subpart—General Regulations Governing 1979 and Subsequent Crops Peanut Warehouse Storage Loans and Handler Operations

General

§ 1446.1 General statement.

(a) *Scope.* This subpart sets forth conditions under which producers and handlers may trade in 1979 and subsequent crop(s) peanuts. This subpart also sets forth the terms and conditions under which eligible producers acting collectively through specified marketing associations (referred to severally in this subpart as "the association") may obtain price support on their 1979 and subsequent crop farmers stock peanuts. Eligible farmers stock peanuts produced by eligible producers which are quota peanuts shall be eligible for price support at the quota support rate. Farmers stock peanuts which are not quota peanuts shall be eligible for price support at the additional support rate. Additional peanuts may only be marketed through contracts with handlers or by being pledged to Commodity Credit Corporation ("CCC") for loans. Annual supplements to this subpart will specify support prices, and other terms and conditions not contained in this subpart which are applicable to the warehouse storage loan program for peanuts of a particular crop.

(b) *Price Support Advances.* Producers may obtain price support loans at the rates specified in the applicable annual supplement through the applicable association. Each association will make appropriate loan advances on peanuts delivered to it by producers at warehouses operating under peanut receiving and warehouse contracts with the association. CCC will make a loan (referred to in this subpart as a "warehouse storage loan") to the association. Such loan will be secured by peanuts received by the association.

(c) *Farm storage loans and purchases from producers.* Regulations containing the terms and conditions under which CCC will make farm storage loans directly to producers and purchases directly from producers on any crop farmers stock peanuts will be published separately in the Federal Register.

§ 1446.2 Administration.

(a) *Responsibility.* Under the general direction and supervision of the Executive Vice President, CCC, and the Producer Associations Division, Agricultural Stabilization and Conservation Service (ASCS) will administer this subpart.

(b) *Limitation of authority.* State and county committees or their employees and the associations have no authority to modify or waive any of the provisions of this subpart or any amendments or supplements thereto.

(c) *Supervisory authority.* No delegation of authority in this subpart shall preclude the Executive Vice President, CCC, or the Executive Vice President's designee from determining any questions arising under the regulations or from reversing or modifying any determinations made pursuant to such delegation.

§ 1446.3 Definitions.

As used in this subpart, and in instructions and documents in connection herewith, the words and phrases defined in this section shall have the meanings herein assigned to them unless the content or subject matter otherwise requires.

(a) *Additional peanuts.* Any peanuts which are marketed from a farm other than peanuts marketed or considered marketed as quota peanuts.

(b) *Additional support rate.* The support rate published in annual crop supplements to this part applicable to additional peanuts.

(c) *ASCS.* The Agricultural Stabilization and Conservation Service of the United States Department of Agriculture.

(d) *Association.* An area marketing association which is operated primarily for the purpose of conducting loan activities and which is selected and

approved for such activities by the Secretary.

(e) *CCC.* The Commodity Credit Corporation, an agency and instrumentality of the United States within the Department of Agriculture.

(f) *Compliance regulations.* The Regulations Governing Acreage and Compliance Determinations for Farm Marketing Quotas, Acreage Allotments, and Related ASCS Programs, as amended, issued by the Administrator, ASCS, and effective for the applicable crop, Part 718 of this title.

(g) *Contract additional peanuts.* Additional peanuts for crushing or exporting, or both, on which a contract has been entered into between a handler and producer in accordance with § 1446.5.

(h) *County committee.* Persons elected within a county as the county committee under the regulations governing the selection and function of Agricultural Stabilization and Conservation county and community committees in Part 7 of subtitle A of this title, except that for Puerto Rico and the Virgin Islands, the Carribbean Area Agricultural Stabilization and Conservation committee shall insofar as applicable, perform the functions of the county committee.

(i) *County office.* The office of the county ASC committee where records for the farm are kept.

(j) *Domestic edible use.* Use for milling to produce domestic food products or seed and use on the farm.

(k) *Effective farm allotment.* The effective farm peanut acreage allotment for the applicable crop of peanuts, as defined in the peanut marketing quota regulations, Part 729 of this title.

(l) *Effective farm poundage quota.* The effective farm poundage quota for the applicable crop of peanuts as defined in the marketing quota regulations, Part 729 of this title.

(m) *Extra large kernels.* Shelled Virginia type peanuts which are "whole" and free from "minor defects" and "damage" as such terms are defined in the U.S. Standards for Shelled Virginia type peanuts effective on the date of inspection and which will not pass through a screen having 21.5/64 by 1 inch openings.

(n) *Farm.* A farm, as defined in the Regulations Governing Reconstitution of Farms, Allotments, and Bases, Part 719 of this title.

(o) *Farmers stock peanuts.* Picked or threshed peanuts produced in the United States which have not been changed (except for removal of foreign material, loose shelled kernels, and excess moisture) from the condition in which picked or threshed peanuts are customarily marketed by producers, plus any loose shelled kernels removed by producers from farmers stock peanuts.

(p) *Final acreage.* The acreage on the farm from which peanuts are picked or threshed as determined and adjusted under Part 718 of this title.

(q) *Form MQ–94 and Form FVQ–95.*

(1) *Form MQ–94.* Inspection Certificate and Sales Memorandum for farmers stock peanuts.

(2) *Form FVQ–95.* Federal-State Inspection Service, Peanut Inspection Note Sheet.

(r) *Handler.* Any person or firm who acquires peanuts through a business of buying, shelling, or drying peanuts.

(s) *Inspector.* A Federal-State inspector authorized or licensed by the Secretary, U.S. Department of Agriculture.

(t) *Lot.* That quantity of farmers stock peanuts for which one MQ–94 or other inspection certificate is issued. In case of farmers stock peanuts delivered to the association for a loan advance, a lot shall consist of not more than the content of one vehicle, or two or more vehicles containing approximately 24,000 pounds.

(u) *Marketing cards.* Forms MQ–76 issued each year according to Part 729 of this title by ASCS county offices to growers for use in marketing peanuts of the applicable crop. Each Form MQ–76 shall indicate the farm operator's eligibility for quota price support and the pounds that may be marketed as quota peanuts and contract additional peanuts.

(v) *Marketing quota penalties.* The penalties prescribed in the marketing quota regulations, Part 729 of this title, which shall be computed and collected in accordance with those regulations.

(w) *Marketing quota regulations.* The Allotment and Marketing Quota Regulations for Peanuts of the 1978 and Subsequent Crops, as amended, issued by the Administrator, ASCS, Part 729 of this title.

(x) *Marketing year.* The period beginning on August 1 of the year in which the peanuts of the applicable crop are planted and ending on July 31 of the following year.

(y) *Net weight.* That weight of farmers stock peanuts obtained by deducting from the gross scale weight of the peanuts (1) foreign material, and (2) moisture in excess of seven percent in the Southwestern and Southeastern areas, and eight percent in the Virginia-Carolina area.

(z) *Edible export standard for contract additional peanuts.*

(1) Raw shelled or inshell peanuts of any crop exported for human consumption shall meet such U.S. grade requirements, or modifications thereof, or requirements as to wholesomeness as specified in the outgoing quality regulations for such crop in the Marketing Agreement for peanuts No. 146.

(2) Peanuts shown by the applicable Federal-State Inspection Certificate to deviate from these requirements may be exported if the handler certifies to the association that such deviations are acceptable (i) to the export buyer and (ii) under the Marketing Agreement.

(aa) *Eligible country.* Any destination outside the United States, other than any country or area for which a validated export license is required under regulations issued by the Bureau of International Commerce, unless such license for shipment or transshipment thereto has been obtained from the Bureau, except that neither Canada nor Mexico shall be considered an eligible country for the export of peanut products other than treated seed peanuts.

(bb) *Export and exportation.* A shipment of peanuts or peanut products from the United States directed to a destination outside the United States to become part of the mass of goods of the country of destination.

(cc) *Fragmented peanuts.* Peanuts not more than 20 percent of which are whole kernels which will not pass through the following openings, by type: Spanish 15/64 x 3/4 inch slot; Runner 15/64 x 3/4 inch slot; and Virginia 15/64 x 1 inch slot.

(dd) *Loan value.* The amount of the loan which may be obtained under these regulations on a lot of eligible farmers stock peanuts computed for quota or additional peanuts, as applicable, on the basis of the weight, quality, and the support values for such type appearing in the applicable crop supplement.

(ee) *Peanut meal.* Any meal, cake pellets, or other forms of residue remaining after extraction or expulsion of oil from peanut kernels, but not including pressed peanuts.

(ff) *Peanut Products.* Any products manufactured or derived from peanuts such as but not limited to peanut candy, peanut butter, peanut granules or peanut flakes.

(gg) *Peanut receiving and warehouse contract.* Form CCC–1028 Identity Preserved, Form CCC–1028–A, Commingled Storage, or any other form approved by CCC for this purpose.

(hh) *Peanut segregations—(1) Segregation 1.* Farmers stock peanuts which (i) have at least 80 percent peanuts of one type, (ii) have not more

than two percent damaged kernels nor more than 1.00 percent concealed damage caused by rancidity, mold, or decay, nor more than 0.5 percent freeze damage, and (iii) are free from visible Aspergillus flavus mold;

(2) *Segregation 2.* Farmers stock peanuts which (i) have less than 99 percent peanuts of one type, or (ii) have more than two percent damaged kernels or more than 1.00 percent concealed damage caused by rancidity, mold, or decay, or more than 0.5 percent freeze damage, and (iii) are free from visible Aspergillus flavus mold; *Provided however,* If such peanuts are placed under additional loan and purchased under the immediate buy back procedure, as provided in § 1446.7 of these regulations, such peanuts shall be considered Segregation 1 additional peanuts for loan pool accounting purposes.

(3) *Segregation 3.* Farmers stock peanuts which have visible Aspergillus flavus mold. *Provided, however,* if such peanuts are placed under additional loan and purchased under the immediate buy back procedure as provided in § 1446.7 of these regulations, such peanuts shall be considered Segregation 1 additional peanuts for loan pool accounting purposes.

(ii) *Pools.* Accounting pools established by the association and on which complete and accurate records are maintained by area, by type, and by segregation for quota peanuts and additional peanuts not under contract.

(jj) *Quota peanuts.* Peanuts which are eligible for domestic edible and related use, are marketed or considered marketed from a farm as quota peanuts, and which are not in excess of the farm poundage quota.

(kk) *Quota support rate.* The support rate published in annual crop supplements applicable to quota peanuts.

(ll) *Raw Peanuts.* Inshell, shelled peanuts, or blanched peanuts which have not passed through any other processing operation.

(mm) *Sound mature kernels.* Kernels which are free from "damage" and "minor defects" as defined in the U.S. Standards for the applicable type of peanuts effective on the date of the inspection, and which will not pass through screens with the following openings:

Runner type: 1⁹⁄₆₄ x ¾ inch slot
Spanish type: 1⁹⁄₆₄ x ¾ inch slot
Virginia type: 1⁹⁄₆₄ x 1 inch slot

(nn) *Type.* The generally known types of peanuts (i.e., Runner, Spanish, Valencia, and Virginia), as defined in the marketing quota regulations.

(oo) *United States.* The 50 States of the United States, Puerto Rico, the territories and possessions of the United States, and the District of Columbia.

(pp) *United States government agency.* Any corporation wholly owned by the Federal Government, and any department, bureau, administration, or other agency of the Federal Government.

(qq) *Valencia type peanuts produced in the Southwest suitable for cleaning and roasting.* Valencia type peanuts produced in the Southwest containing not more than 25 percent having shells damaged by (1) discoloration, (2) cracks or broken ends, or (3) both.

Handler Operations

§ 1446.4 Handler responsibilities.

(a) *Examination of producer's marketing card.* All handlers shall examine producer's marketing cards and record each purchase or delivery of peanuts as required in part 729 of this title. Any peanuts delivered under the additional peanut contract (Form CCC–1005) in excess of the provisions of such contract shall be considered as a marketing of quota peanuts. No peanuts shall be handled from any producer who does not present a marketing card and farm identification card at time of delivery.

(b) *Purchase records.* (1) Purchases of quota peanuts on which an MQ–94 is prepared. Each handler shall maintain records of the peanuts, the State and county code, and the farm number of the farm on which the peanuts were produced or the registration number of the seller if the seller is a handler and must indicate the quantity, type, date of purchase, and applicable MQ–94 serial number. The handler shall imprint forms MQ–94 and FVQ–95 with the farm identification card, the peanut buyers card, and the buying point card.

(2) Purchases of quota peanuts from producers on which MQ–94 is not prepared. The handler shall immediately transmit a record of such purchase to CCC. Such record shall show name and address of producer, State and county code, farm number, handler's name, address and registration number, buying point, any marketing quota penalty collected, quantity, and date of purchase.

(c) *Sales and disposal records.* Each handler shall maintain records of all sales and other disposals of peanuts. Such records shall show date of sale, quantity, type, to whom sold, whether sold as edible peanuts or for crushing, and any other information required by this subpart.

(d) *Method of keeping records.* Handler records shall be maintained within their operation in such a manner that will enable representatives of the Secretary to readily reconcile the quantities, grades, and qualities of all such peanuts disposed of by a handler. Records concerning the acquisition and disposal of contract of additional peanuts must also be kept in such a manner that representatives of the Secretary can readily determine compliance with the regulations and contract provisions.

(e) *Retention of records.* All records shall be maintained for a period of three years following the end of the marketing year in which the peanuts were produced.

§ 1446.5 Contracts for additional peanuts for crushing and export.

(a) *Contracts between handlers and producers.* Handlers who have a U.S. address may contract with producers on form CCC–1005 to buy additional peanuts from the producers for crushing or export, or both. The type and quality of each lot of contract peanuts delivered under contract shall be determined by an inspector when such peanuts are delivered by a producer. All such contracts shall be completed and submitted to the county office for approval prior to June 15 of the year in which the crop is produced. Such contracts cannot be sold or traded: *Provided,* That if a handler is unable to perform under such contracts because of conditions beyond his control, including but not limited to insolvency, bankruptcy, death, or destruction of warehouse facilities, the handler and the producers may agree to the delivery of the peanuts to other handlers under the terms of the original contract, if specifically authorized by the Deputy Administrator, State and County Operations, ASCS. The county office shall summarize contracts and send such summary to the association through the State office. Contracts shall include at least the following provisions:

(1) Name and address of operator, State and county code, and farm serial number of the farm.

(2) Name, address of handler, and registration number.

(3) Amount of segregation 1 peanuts in pounds by type.

(4) Contract price shown as a percentage of quota peanut support rate.

(5) Requirement for disclosure by producer of any liens on peanuts on date of delivery.

(6) A provision that the producer shall not be liable for failure to deliver against such contract above the actual production of such type quality on the farm: *Provided*, that such physical loss of production resulted solely from an external source such as drought, fire, lightning, inherent explosion, windstorm, tornado, flood, or other acts of God.

(7) Signature of farm operator and producer if different from operator.

(8) Signature of handler or authorized agent.

(9) The following agreement by the handler:

I agree that I will either export or crush the peanuts delivered under this contract as provided in Part 1446, Subpart-General Regulations Governing 1979 and Subsequent Crops Peanuts Warehouse Storage Loan and Handler Operations, by August 31 following the calendar year in which the crop is grown and that, upon my failure to do so, I shall be subject to liquidated damages as specified in such regulations, on all such peanuts which have not been so crushed or exported. I further agree that if I contract with another Handler to market any such peanuts, I shall include as part of the contract the agreement contained herein, and upon my failure to do so, I shall be subject to liquidated damages, as specified in the regulations on all such peanuts.

(b) *Deliveries under optional provisions of the contract.* Contracts may also include provisions under which a specified quantity of segregation 1 peanuts in excess of the quantity specified in paragraph (a) of this section may be delivered under the contract: *Provided*, The quantity of segregation 1 peanuts specified in paragraph (a) has been delivered and the producer retains the right to market Segregation 1 peanuts as quota peanuts to the extent that the farm poundage quota has not been filled. Contracts may also provide for delivery of segregations 2 and 3 peanuts without regard to any quantity limits specified in this section.

(c) *Contracts between handlers.* Handlers may contract with other handlers to market additional contract peanuts. Such contracts must contain the agreement specified in paragraph (a)(9) of this section and an agreement that such agreement will be included in all subsequent contracts covering resale of such peanuts.

§ 1446.6 Commingling of quota and additional peanuts.

Quota and additional farmers stock peanuts of like type and segregation may be commingled and exchanged on a dollar value basis to facilitate handling and marketing. The dollar value basis shall be determined on the basis of the quota support rate. The handler shall receive, store, and deliver all such peanuts in accordance with good commercial practices and instructions provided by CCC. For each lot of quota and/or additional peanuts stored commingled, the records of the handler shall show at all times the date and place received, name and address of the producer, the type, segregation, pounds, and dollar-value-in. The handler shall keep such other accounts and records and furnish such information and reports relating to the dollar value out and disposition of such peanuts as may be prescribed by the association or CCC.

§ 1446.7 Use of additional peanuts as domestic edible peanuts.

During harvest season, a handler shall have the right to purchase additional peanuts for domestic edible use at buying points owned or controlled by such handler at 100 percent of the quota loan value of such peanuts plus handling charges. Such purchase may be made only from the association and only on the date such peanuts were offered by producers to the association for loan. The handler shall advance to the producer, as an agent for the association, price support at the additional level and forward to the association a check payable to CCC for the peanuts at the quota support rate plus handling charges. The check and applicable MQ–94 will identify the peanuts as additional peanuts that may be used as domestic edible peanuts and must be postmarked not later than the third work day excluding Saturdays, Sundays, and Federal holidays following the day the peanuts were inspected. The association shall credit such receipts to the additional pool for such peanuts. Handlers may also purchase additional peanuts from the loan pool for domestic edible use after delivery by producers to the association, under terms and conditions announced by CCC. The minimum price for such purchases shall be not less than carrying charges plus (a) 105 percent of the quota loan value if purchased not later than December 31 of the marketing year, or (b) 107 percent of the quota loan value if purchased after December 31 of the marketing year.

§ 1446.8 Compliance by handlers of contract additional peanuts.

All contract additional peanuts acquired by a handler shall be disposed of by domestic crushing or export to an eligible country. All handler's records shall be subject to a review by CCC or other representatives of the Secretary, to determine compliance with the provisions of this subpart. Failure to dispose of such peanuts by August 31 following the calendar year in which the crop was grown or such later date as may be authorized by the association shall constitute noncompliance with the provisions of this subpart. Refusal to make such handler's records available to authorized representatives of the Secretary or failure of such records submitted to establish such disposition shall constitute prima-facie evidence of noncompliance with this subpart. Reviews shall be made by the association in accordance with guidelines established by CCC and the association shall not take any administrative or any other actions concerning indicated program violations until directed to do so by the Director, Producer Associations Division, ASCS.

(a) *Quota peanuts.* A handler will be subject to a penalty for noncompliance if it is determined by CCC that he marketed from any crop, for domestic edible use, a larger quantity, or higher grades or quality of peanuts than could reasonably be produced from the quantity of peanuts having the grade, kernel content and quality of quota farmers stock peanuts purchased by the handler for domestic edible use during the applicable marketing year and of those purchased under § 1446.7, whether or not additional peanuts were acquired by the handler. In such case, the handler will be obligated to pay a penalty equal to 120 percent of the basic quota support rate on that quantity of farmers stock peanuts determined by CCC to be necessary to produce the excess quantity or grade or quality of peanuts sold.

(b) *Method of determining compliance (1) Commingled storage.* Handlers may commingle quota loan, quota commercial, additional loan and contract additional peanuts. In such instance, quota loan and additional loan peanuts must be inspected as farmers stock peanuts and settled on a dollar value basis less adjustments for shrinkage except when such peanuts are purchased from the association for domestic edible and related use on an in-grade, in-weight basis. Contract additional peanuts must be inspected on a farmers stock basis and accounted for on a dollar value basis less a one time adjustment for shrinkage for each crop equal to 4.0 percent of the dollar value for Virginia type peanuts and 3.5 percent for all other types except that if the additional contract peanuts are graded

out and accounted for prior to February 1, the adjustment shall be 3.5 for Virginia type and 3.0 percent of the dollar value for all other peanuts.

(2) *Identity preserved storage.* Contract additional peanuts stored identity preserved shall be inspected as farmers stock peanuts and settled on a dollar value basis. The handler shall receive, store, and otherwise handle such peanuts in accordance with good commercial practices.

§ 1446.9 Supervision and handling of additional contract peanuts.

The association shall supervise domestic handling of contract additional peanuts including storing, shelling, crushing, cleaning, weighing, and shipping.

(a) *Access to facilities.* The handler, by entering into contracts to receive contract additional peanuts, shall be deemed to have agreed that authorized representative(s) of CCC and the association:

(1) May enter and remain upon any of the premises when such peanuts are being received, shelled, cleaned, bagged, sealed, weighed, graded, stored, crushed, packaged, shipped, or otherwise handled.

(2) May inspect such peanuts and the oil, meal, and other products thereof, and

(3) May inspect the premises, facilities, operations, books, and records to the extent necessary to determine that such peanuts have been handled in accordance with these regulations.

(b) *Notifying the association.* Before moving or processing any peanuts, the handler (or cleaner, sheller, or processor under contract with the handler) shall notify the association of the time such operation will begin and the approximate period of time required to complete the operation. When a plant is not currently under supervision, the handler shall give at least five working working days advance notice to the association so that supervision can be arranged.

(c) *Processing.* The peanuts shall be shelled or otherwise milled, crushed, or shelled and crushed as a continuous operation separate from other peanuts. Shelled peanuts shall be identified with positive lot identity tags before being stored and moved for crushing, export or domestic use in peanut products to be exported. Except as authorized by the association, positive lot identity shall be maintained when peanuts are transported or stored in the following manner:

(1) *Transportation.* The peanuts shall be transported from the storage location in a covered vehicle, such as a truck or railroad car. The vehicle shall be sealed unless the association determines that identity of the peanuts can be maintained without sealing.

(2) *Storage.* The peanuts shall be stored in separate building(s) or bin(s) which can be sealed or which the association determines will satisfactorily maintain lot identity.

(d) *Replacements.* The identical additional farmer stock peanuts contracted shall be handled in accordance with this section except that with prior notification and approval of the association, farmer stock quota peanuts of the same crop, type, quality, and area may be used to replace such additional peanuts. The identical additional milled peanuts shelled under supervision of the association shall be disposed of in accordance with this section except that prior notification and approval of the association, such peanuts may be used to replace in domestic use quota peanuts of the same crop, type, area, and screen size which have been exported. The quota peanuts exported, for which replacement is requested, must have been positive lot identified and otherwise handled as additional peanuts. Additional peanuts may be used in domestic edible and related uses with prior notification and approval of the association and upon presentation to the association of an irrevocable letter of credit in an amount not less than 120 percent of the quota support rate on any portion of the lot for which replacement has not been approved. Such letter of credit shall be issued in a form and by a bank acceptable to CCC. The handler shall deliver to the association satisfactory evidence that a like amount of quota peanuts of appropriate screen sizes have been exported in accordance with these regulations. Such evidence must be submitted no later than 30 days after August 31, the final date for exportation or such later date as may be approved by the association. If satisfactory evidence is not presented by such date, the association will draw against the letter of credit the full amount of the marketing quota penalty applicable to the quantity of peanuts on which an accounting was not made.

(e) *Expense charged to handlers.* All supervision costs shall be borne by handlers.

(f) *Domestic sale or transfer—(1) Farmers stock.* The handler must submit contracts covering any domestic sale, transfer, or other disposition of farmers stock contract additional peanuts to the association and obtain written approval prior to any physical movement of the peanuts from the buying point. Approval of such contracts may be made before or after delivery by the producer.

Approval of any domestic sale, transfer, or other disposition may be made only if the person to whom the peanuts are sold, transferred, or disposed of agrees in writing to handle and crush or export as raw peanuts or peanut products in accordance with the terms and conditions of these regulations.

(2) *Milled peanuts.* The handler must submit contracts covering any domestic sale, transfer, or other disposition of milled contract additional peanuts to the association and obtain approval prior to any physical movement of the peanuts. Approval of any domestic sale, transfer, or other disposition may be made only if the person to whom the peanuts are sold, transferred, or disposed of agrees, in writing, to handle and crush or export the peanuts in accordance with the terms and conditions of these regulations.

(g) *Disposal of additional contract peanuts.* Contract additional peanuts may be disposed of by domestic crushing or by exporting to an eligible country as follows:

(1) All kernels may be crushed domestically, or

(2) All kernels may be exported for crushing, if fragmented, or

(3) All kernels that are graded to meet the edible export standards may be exported and the remaining kernels:

(i) Crushed domestically, or

(ii) Exported for crushing if peanuts are fragmented, or

(4) All of the peanuts may be exported as farmers stock peanuts, or

(5) Peanuts may be exported as peanut products if such peanuts meet edible export standards, or

(6) Peanuts may be exported as milled or inshell peanuts.

(h) *Disposal of meal contaminated by aflatoxin.* All meal produced from peanuts which are crushed domestically and found to be unsuitable for use as feed because of contamination by aflatoxin shall be disposed of for nonfeed purposes only. If the meal is exported, the export bill of lading shall reflect the analysis of the lot by inclusion thereon of the following statement, "This shipment consists of lots of meal which contain aflatoxin ranging from———to———PPB and averaging———PPB."

(i) *Final dates for scheduling supervision.* Additional contract peanuts shall be scheduled for supervision by the association during the normal marketing period but not later than July 31 following the calendar

year in which the crop is grown unless prior approval of a later date is authorized by the association.

(j) *Export provisions*—(1) *General.* Exports to Southern Rhodesia, North Korea, Vietnam, Cambodia, and Cuba are regulated by U.S. Department of Commerce regulations and require a validated export license. Additional information concerning the regulations may be obtained from the Bureau of International Commerce or from the field office of the Department of Commerce.

(2) *Export to a U.S. Government agency.* Except for the export of raw peanuts to the military exchange services for processing outside the United States, export of peanuts in any form by or to a United States government agency shall not be considered an export to an eligible country. However, sales to a foreign government which are financed with funds made available by a United States agency such as the Agency for International Development are not considered sales to a United States government agency: *Provided,* The peanuts were not purchased by the foreign buyer for transfer to a United States agency.

(3) *Exportation of contract additional peanuts.* All contract additional peanuts which are not crushed domestically and which are eligible for export shall be exported to an eligible country as peanuts or peanut products.

(4) *Reentry Transshipment and Liquidated Damages*—(i) *Reentry Transshipment.* Peanuts and peanut products exported shall not be reentered by anyone into the United States in any form or product and shall not be caused by the handler to be diverted or transshipped to other than an eligible country in any form or product, and if they are reentered, the handler shall be subject to liquidated damages as specified in subparagraph (4)(ii) of this paragraph.

(ii) *Liquidated Damages.* The handler, by entering into contracts to receive contract additional peanuts, shall be deemed to have agreed that CCC will incur serious and substantial damages to its program to support the price of quota peanuts if additional contract peanuts are exported and later are reentered into the United States or diverted or transshipped to other than an eligible country in any form or product; that the amount of such damages will be difficult, if not impossible, to ascertain exactly; and that the handler shall, with respect to any peanuts or peanut products reentered into the United States or diverted or transshipped to other than an eligible country, pay to CCC, as liquidated damages and not as a penalty, ten cents ($.10) per net pound for such peanuts or peanut products. It is agreed that such liquidated damages are a reasonable estimate of the probable actual damages which CCC would suffer because of such reentry, diversion, or transshipment.

(5) *Evidence of Export.* The handler shall furnish the association with the following documentary evidence of exportation of peanuts or peanut products not later than 30 days after August 31, the final date for exportation, or such later date as may be approved by the association:

(i) *Export by water.* A nonnegotiable copy of an onboard ocean bill of lading, signed, on behalf of the carrier, showing the date and place of loading onboard vessel, the weight of the peanuts, peanut meal, or products exported, the name of the vessel, the name and address of the exporter, and the country of destination. Peanut meal which is unsuitable for use as feed because of contamination by aflatoxin shall be identified on the bill of lading in accordance with this section.

(ii) *Export by rail or truck.* A copy of the bill of lading (showing the weight of the peanuts or peanut meal exported), supplemented by a copy of the Shipper's Export Declaration or other documentation acceptable to the association. Peanut meal which is unsuitable for feed use because of contamination by aflatoxin shall be identified on the bill of lading according to this section.

(iii) *Export by air.* A copy of the Airway Bill (showing weight consignee and shipper) and other acceptable documentation acceptable to the association.

(iv) *Certified statement.* A statement signed by the handler specifying the name and address of the consignee and the applicable Bureau license number if exportation has been made to one or more of the countries or areas for which a validated license is required under regulations issued by the Bureau of International Commerce, U.S. Department of Commerce.

(6) *Penalties.* Failure to dispose of contract additional peanuts acquired by a handler for domestic crushing or export by August 31 following the calendar year in which the crop was grown or such later date as may be authorized by the association shall constitute noncompliance with the provisions of this subpart. In such case, the handler will be obligated to pay a penalty equal to 120 percent of the basic quota support rate on that quantity of the additional peanuts not crushed or exported.

Warehouse Storage Loans

§ 1446.10 Availability of warehouse storage loans.

(a) *Loans to associations.* CCC will make warehouse storage loans to the associations specified in subparagraph (b) which contract with CCC to arrange for the storing and handling of farmers stock peanuts, make price support advances to producers on such peanuts, and use such peanuts as collateral for loans to be obtained from CCC. Loans on quota peanuts shall be made on the basis of the quota support rate, and loans on additional peanuts shall be made on the basis of the additional support rate. The association shall establish an adequate system of records to identify each lot of peanuts delivered from producers as quota or additional peanuts and shall establish adequate records to identify whether such peanuts were pledged to CCC at the quota loan rate or additional loan rate. Such loans will mature on demand.

(b) *Associations and Areas.* Price support advances will be available through:

(1) GFA Peanut Association, Camilla, Georgia, in the Southeastern area consisting of the States of Alabama, Georgia, Mississippi, Florida, and that part of South Carolina south and west of the Santee-Congaree-Broad Rivers.

(2) The Southwestern Peanut Growers Association, Gorman, Texas, in the Southwestern area consisting of the States of Arizona, Arkansas, California, Louisiana, New Mexico, Oklahoma, and Texas.

(3) The Peanut Growers Cooperative Marketing Association, Franklin, Virginia, in the Virginia-Carolina area consisting of the States of Missouri, North Carolina, Tennessee, Virginia, and that part of South Carolina north and east of the Santee-Congaree-Broad Rivers.

(c) *Where available.* Price support advances will be available to eligible producers at warehouses which have entered into peanut receiving and warehouse contracts with the association. Such contracts will require the warehouses to inform producers that price support advances are available and to make advances to producers on eligible peanuts tendered for price support as provided in paragraph (g) of this section. The contracts will require warehousemen to examine the producer's marketing cards to determine price support eligibility and make

entries on the marketing card as required by Part 729 of this title and record each delivery as to quota or additional peanuts and date of delivery. If quota peanuts or contract additional peanuts are delivered, the balance of the quota or contract additional peanuts must be shown on the marketing card after each delivery. The names and locations of such warehouses may be obtained from the office of the appropriate association or from a State or county ASCS office. The associations shall pledge to CCC all peanuts upon which they have made price support advances as security for loans obtained pursuant to agreements with CCC.

(d) *Time.* Price support advances to eligible producers on peanuts of any crop will be available from the beginning of harvest through the following January 31 or such later date as may be established by the Executive Vice President, CCC. If the final date of availability falls on a nonworkday for the association, the applicable final date shall be the next workday.

(e) *Inspection.* The type and quality of each lot of farmers stock peanuts delivered to an association for a price support advance shall be determined by an inspector when such peanuts are received at a warehouse under contract with an association.

(f) *Producer agreement.* To obtain a price support advance, the producer shall, in writing, authorize the association to pledge peanuts delivered to the association to CCC as collateral for a warehouse storage loan and relinquish any right to redeem or obtain possession of such peanuts.

(g) *Advance to producer.* For each lot of peanuts received, the associations will make a price support advance to the producer in an amount equal to the support value of such peanuts, except that, in addition to marketing quota penalties and the deductions specified in § 1446.12, the association will deduct from such advances and pay over to the proper State authorities, any assessments or excise taxes imposed by State law, and the Southwestern Peanut Growers Association will, upon the prior agreement of the producer, deduct from such advance an amount approved by CCC, not to exceed 50 cents per net weight ton of peanuts upon which such advance was made, to be used in payment for its peanut activities outside the price support program.

(h) *Fraud by Producer.* The making of any fraudulent representation by a producer in the loan documents or in obtaining a loan or an advance shall render him subject to criminal prosecution under Federal law. The producer shall be personally liable to CCC, aside from any additional liability under criminal or civil fraude statutes, for the amount of such advance and for all costs which CCC would not have incurred except for the producer's fraudulent representation, together with interest upon such amounts at the rate for fraudulent representation as shown in a separate notice in the Federal Register: *Provided,* That the producer shall be given credit for the proceeds received by CCC upon sale of the peanuts upon which such advance was made.

(i) *Ineligible Peanuts.* Any person who causes ineligible peanuts, as defined in § 1446.14, to enter the loan, shall pay to CCC, as liquidated damages, the amount by which the average quota or additional loan level for that type of peanuts exceeds the market price as determined by CCC and shall pay such amount to CCC promptly upon demand. The market price shall be based upon the estimated value for crushing stock.

§ 1446.11 Pooling and distribution of net gains.

The association shall establish separate pools by area, type, and segregation or quality of peanuts and maintain separate, complete and accurate records for quota peanuts under loan and for additional peanuts not under contract. Net gains on peanuts in each pool shall be distributed to each grower in proportion to the value of peanuts placed in the pool by the grower except any distribution of net gains on additional pools of any type to a producer shall be reduced to the extent of any loss incurred by CCC on quota peanuts of a different type placed under loan by the same producer, and the proceeds available to any producer from any pool shall be reduced by the amount of any losses to CCC on peanuts transferred from an additional loan pool to a quota loan pool under the provisions of this subpart.

(a) *Quota pool.* Net gains from peanuts in the quota pool consist of:

(1) The net gains over and above the loan indebtedness on quota peanuts and other costs or losses incurred by CCC on such peanuts placed in the pool by a producer, plus

(2) An amount from the net gains on additional peanuts sold into domestic food and related uses equal to the losses incurred on disposing of an equal quantity of quota peanuts of the same type and segregation in the same production area, considering sales of quota peanuts for export first and then as necessary, sales for crushing.

(b) *Additional pool.* Net gains for peanuts in the additional pool consist of:

(1) The net gains over and above the loan indebtedness on additional peanuts and other costs or losses incurred by CCC on such peanuts placed in the pool by a grower, less

(2) An amount of the net gains on the additional pool allocated to the quota pool to offset any loss on that pool attributed to additional peanuts being used in domestic edible use.

§ 1446.12 Producer indebtedness.

(a) *Facility and drying equipment loans.* If any installment or installments on any loan made by CCC on farm storage facilities or drying equipment are payable under the provisions of the note evidencing such loan and the amount due is recorded on the producer's marketing card, any amount due the producer under this subpart, after deduction of amounts due prior lienholders, shall be applied to such installment(s).

(b) *Producers listed on county debt record.* If the producer is indebted to CCC or to any other agency of the United States and such indebtedness is listed on the county debt record and recorded on the producer's marketing card, amounts due the producer under this subpart, after deduction of amounts due prior lienholders and on farm storage facilities or drying equipment, shall be applied to such indebtedness as provided in the Secretary's Setoff Regulations, Part 13 of this title.

§ 1446.13 Eligible producer.

(a) *Requirements.* An eligible producer is an individual, partnership, association, corporation, estate, trust, or other legal entity, and whenever applicable, a State, political subdivision of a State or any agency thereof, producing peanuts as a landowner, landlord, tenant, or sharecropper on a farm. No producer on a farm for which the farm operator fails timely to file a report of crop or land use acreages as required by Part 718 of this title shall be eligible for price support at the quota rate unless the late filed report was accepted by the county committee.

(b) *Estates and trusts.* A receiver of an insolvent debtor's estate, an executor or an administrator of a deceased person's estate, a guardian of an estate or of a ward or of an incompetent person, and trustees of a trust estate shall be considered to represent the insolvent debtor, the deceased person, the ward or incompetent, and the beneficiaries of a trust, respectively, and the production of the receiver, executor, administrator, guardian or trustees shall be considered

to be the production of the person represented. Loan documents executed by any such person shall be accepted by CCC only if they are legally valid and such person has the authority to sign the applicable documents.

(c) *Eligibility of minors.* A minor who is otherwise an eligible producer shall be eligible for price support only if such minor meets one of the following requirements: (1) The right of majority has been conferred on such minor by court proceedings or by statute; (2) a guardian has been appointed to manage such minor's property and the applicable price support documents are signed by the guardian; or (3) a bond is furnished under which a surety guarantees to protect CCC from any loss incurred for which the minor would be liable had such minor been an adult.

§ 1446.14 Eligible peanuts.

Eligible peanuts shall be farmers stock peanuts of the applicable crop which were produced in the United States by an eligible producer.

(a) *Quota support.* Peanuts eligible for quota support are peanuts which (1) are segregation 1 peanuts; and (2) contain not more than 10 percent moisture and which, if mechanically dried, contain at least 6 percent moisture; and (3) contain not more than 10 percent foreign material; (4) are free and clear of all liens and encumbrances, including landlord's lien, or if liens or encumbrances exist on the peanuts, acceptable waivers are obtained; and (5) the beneficial interest is in the producer who delivers them to the association and has always been in such producer or in such producer and a former producer whom such producer succeeded before the peanuts were harvested. To meet the requirements of succession to a former producer, the rights, responsibilities, and interest of the former producer with respect to the farm on which the peanuts were produced shall have been substantially assumed by the person claiming succession. Mere purchase of a crop prior to harvest, without acquisition of any additional interest in the farm on which the peanuts were produced, shall not constitute succession. Any producer in doubt as to whether such interest in the peanuts complies with the requirements of this section should, before applying for price support, make available to the county ASC committee all pertinent information which will permit a determination with respect to succession to be made by CCC; (6) are, if delivered to the association in bags in the Southwestern area, in new or thoroughly cleaned used bags which are made of material other than mesh or net, weighing not less than 7½ ounces nor more than 10 ounces per square yard and containing no sisal fibers, are free from holes and are finished at the top with either the selvage edge of the material, binding, or a hem. Such bags shall be of uniform size with approximately 2 bushel capacity; (7) must not have been produced on land owned by the Federal Government if such land is occupied without a lease permit or other right of possession; (8) must have been produced on a farm on which the effective farm allotment has not been knowingly exceeded; and (9) must have been inspected as farmer stock peanuts and have an official grade determined by an inspector.

(b) *Additional support.* Peanuts eligible for additional support are peanuts which (1) contain not more than 10 percent moisture; and (2) contain not more than 10 percent foreign material, except that such peanuts may contain more foreign material if the handler agrees to purchase for domestic edible use as provided in the first sentence in § 1446.7 of these regulations; (3) segregation 2 or 3 peanuts which will be sold without storage for crushing or fragmentation for export, may contain more than 10 percent moisture and/or foreign material up to a maximum determined appropriate by the producer association based on the crushing market and other local conditions; (4) are free and clear of all liens and encumbrances, including landlord's lien, or if liens or encumbrances exist on the peanuts, acceptable waivers are obtained; and (5) the beneficial interest is in the producer who delivers them to the association and has always been in such producer or in such producer and a former producer whom such producer succeeded before the peanuts were harvested. To meet the requirements of succession to a former producer, the rights, responsibilities, and interest of the former producer with respect to the farm on which the peanuts were produced shall have been substantially assumed by the person claiming succession. Mere purchase of a crop prior to harvest, without acquisition of any additional interest in the farm on which the peanuts were produced, shall not constitute succession. Any producer in doubt as to whether such interest in the peanuts complies with the requirements of his section should, before applying for price support, make available to the county ASC committee all pertinent information which will permit a determination with respect to succession to be made by CCC; (6) are, if delivered to the association in bags in the Southwestern area, in new or thoroughly cleaned used bags which are made of material other than mesh or net, weighing not less than 7½ ounces nor more than 10 ounces per square yard and containing no sisal fibers, are free from holes and are finished at the top with either the selvage edge of the material, binding, or a hem. Such bags shall be of uniform size with approximately 2 bushel capacity; (7) must not have been produced on land owned by the Federal Government if such land is occupied without a lease permit or other right of possession; (8) if produced on acreage in excess of the effective farm allotment, the penalty has been collected in accordance with Part 729 of this title; and (9) must have been inspected as farmer stock peanuts and have an official grade determined by an inspector.

§ 1446.15 Disposition and liquidated damages on segregation 3 peanuts.

(a) Any producer who has a lot of farmers stock peanuts classified by the inspector as segregation 3 peanuts shall (1) deliver the peanuts to the association for loan at the additional loan rate, (2) deliver such lot as contract additional peanuts under the provisions of § 1446.5, (3) sell as quota peanuts to a handler who is a signer of the peanut marketing agreement or (4) retain the lot for seed. If the producer does not dispose of or market such peanuts as provided above on the day of inspection, such producer shall be ineligible for continued quota price support for the rest of the marketing year on all peanuts at the close of business on the day of the inspection. If the producer elects to retain a lot for seed, he shall designate such peanuts as quota peanuts, have the net weight of such peanuts determined and deducted from the farm marketing card, and advise the inspector that the peanuts are being retained for seed. The producer shall be given a copy of the MQ–94 as a record showing the quantity and quality factors of the peanuts and must store such peanuts separate from other peanuts on the farm. The producer shall notify CCC when such peanuts are used and otherwise account for the disposition of such peanuts. Should it later be determined that such peanuts are unfit for seed use, the producer may, after receiving prior approval from the county office, sell such peanuts for crushing as quota peanuts without benefit of price support.

(b) *Liquidated damages.* The producer, by participating in the loan program, shall be deemed to have agreed that CCC will incur serious and substantial damages to its program to

support the price of peanuts if segregation 3 peanuts are disposed of other than in accordance with the provisions of paragraph (a) of this section; that the amount of such damage will be difficult, if not impossible, to ascertain exactly; and that the producer shall, with respect to any lot of peanuts ineligible for quota support which are placed under quota loan or any lot of peanuts which are placed under quota loan by a producer after he has disposed of any lot of segregation 3 peanuts in any manner other than in the manner prescribed in paragraph (a) of this section, pay to CCC as liquidated damages and not as a penalty, seven cents ($.07) per net pound of such peanuts. It is agreed that such liquidated damages are a reasonable estimate of the probable actual damages which CCC would suffer because of such action by the producer. The provisions of § 1446.11 relating to the producer's liability (Aside from liability under criminal and civil frauds statutes) shall not be applicable to such peanuts.

§ 1446.16 Producer transfers of additional loan stocks to quota pools.

Producers may transfer Segregation 2 and 3 additional loan stocks to quota loan after the producer has completed marketing and returned his marketing card to the county office not to exceed the smaller of the farm poundage quota minus the production of segregation 1 peanuts on the farm, or the undermarketing of quota peanuts shown on the farm marketing card: *Provided:* That the proceeds available to such producer from peanuts in any other pool shall be reduced by the amount of any losses to CCC on the peanuts so transferred. The support values for any segregation 2 peanuts so transferred shall be the support value for quota peanuts minus the damage discount published in the quota support schedule and the support value for segregation 3 peanuts shall be the support value for quota peanuts minus the applicable discount published in the quota support schedule. Producers eligible to transfer additional loan peanuts to the quota loan in accordance with this section may apply for such transfers with the county office. The county office shall determine the quantity of undermarketing of quota peanuts and the quantity of additional peanuts which are eligible for transfer. The producer may indicate to the county office the net weight and applicable Farm MQ–94 numbers for the peanuts to be transferred. Such pounds shall be considered as quota peanuts marketed, the applicable MQ–94's recomputed at the quota loan level, and the producer advanced the difference between the additional and quota support.

Note.—This regulation has been determined to be not significant under the USDA criteria implementing Executive Order 12044 and only contains necessary operating decisions and requirements to implement the national average peanut price support rates announced on February 16, 1979. An approved Final Impact Statement is available from Dalton J. Ustynik (ASCS) 202 447–6701.

Signed at Washington, D.C., on June 6, 1979.

Ray Fitzgerald,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

FEDERAL RESERVE SYSTEM

12 CFR Part 205

[Reg. E; Docket No. R-0212]

Electronic Fund Transfers; Disclosure of Consumers' Liability for Unauthorized Transfers

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: Section 908 of the Electronic Fund Transfer Act, which relates to consumers' liability for unauthorized transfers, became effective on February 8, 1979. The Board is adopting an amendment to Regulation E, which implements the EFT Act. The amendment requires financial institutions to give certain disclosures before imposing any liability for unauthorized use of an access device. The amendment generally corresponds to Proposal B, one of two proposals that was published for comment on March 28, 1979 (44 FR 18514). Unlike Proposal B, however, the amendment does not set a deadline for making disclosures. Rather, it permits an institution to make the disclosures if and when the institution chooses to do so. Until disclosures are made, however, a consumer cannot be held liable for unauthorized use of the access device.

This amendment becomes effective August 1, 1979. Unauthorized transfers initiated between February 8 and July 31, 1979, are governed by the statutory provisions and by the regulations adopted by the Board in March (44 FR 18468). Since, under those provisions, liability disclosures were required only in the case of unsolicited access devices, consumers could be held liable for transfers initiated during this period even if liability disclosures were not made before the transfer occurred.

EFFECTIVE DATE: August 1, 1979.

FOR FURTHER INFORMATION CONTACT: Regarding the regulation: Dolores S. Smith, Section Chief, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202–452–2412). Regarding the economic impact analysis: Frederick J. Schroeder, Economist, Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202–452–2584).

SUPPLEMENTARY INFORMATION: (1) On March 28, 1978, the Board published final regulations implementing sections 909 and 911 of the Electronic Fund Transfer Act, the two sections that became effective on February 8, 1979. Under those regulations, only consumers who receive an unsolicited access device for making electronic fund transfers need be given notice of their potential liability for unauthorized transfers. The vast majority of users of EFT devices, however, might not learn of their liability until the remaining provisions of the Act and regulation go into effect in May 1980.

The Board believes it is important for all consumers to be informed about the rules that govern liability for unauthorized transfers. Accordingly, the Board published two alternative proposals regarding disclosure of liability (44 FR 18514, March 28, 1979). The proposals, labelled Proposals A and B, would have required financial institutions that hold consumers liable for unauthorized use to disclose no later than August 1, 1979: the consumer's liability for unauthorized transfers, the address and telephone number to be used for reporting the loss or theft of an access device, and the financial institution's business days. For access devices issued after August 1, disclosures would have been required before the first electronic fund transfer was initiated. Proposal B would have made delivery of the three disclosures a precondition to the institution's imposing liability on the consumer. Under either proposal, an institution that imposed no liability on consumers would have been exempt from making the disclosures.

Both proposals would have required disclosures to be made by August 1, 1979, for accounts that can be accessed by an EFT device. Many commenters did not understand this. They thought that under Proposal B disclosures could be made at any time before May 1980, so

long as the consumer was not held liable until the disclosures were made.

The Board received 55 comments. Twenty-five supported Proposal B, and a number of commenters endorsed both proposals. Twenty-one objected to the Board's adopting any disclosure requirement; of this number, 8 preferred Proposal B provided the Board gave institutions the right to decide when to make disclosures and to whom.

The commenters who supported Proposal B (or a modified version of it) believe it would give financial institutions greater flexibility to decide for themselves whether and when to make the liability disclosures. They note that under Proposal B consumers would be protected whether or not an institution chose to make the disclosures. They also believe that consumers must be told the rules for limiting their liability if the Act's provisions limiting liability are to have any meaningful effect.

Commenters who oppose a disclosure requirement say that the proposed disclosures would mean added costs, since other disclosures still have to be given in May 1980. Having to make disclosures now may require a reallocation of resources, and some also feel that they need more time to resolve apparent conflicts between Federal and State EFT laws.

Sixteen commenters questioned the Board's authority to require disclosures and to make their delivery a precondition to an institution's being able to impose liability on consumers. They believe that Congress, in making the liability limitations effective in February 1979, consciously decided to postpone disclosure of these provisions until May 1980 (except in the case of access devices issued on an unsolicited basis). Similarly, they believe that Congress did not intend to precondition liability on disclosures until the general disclosure requirements go into effect in May 1980.

Some argued that, as a practical matter, disclosure is not necessary to protect consumers. This opinion is based on the fact that consumers who previously had potentially greater liability than the Act now allows will automatically have that liability reduced to conform to the Act's limits. This reduction of potential liability will take place even if consumers are not personally notified of their more limited liability. In addition, these commenters noted, consumers who previously had less liability than the Act allows will not be affected, because the Act does not override agreements or State laws that impose lesser liability.

These arguments fail to address, however, the need for consumers to know that liability standards require prompt reporting of the loss or theft of an access device to insure minimum liability. Many consumers may not know, for example, that their potential liability will increase from $50 to $500 if they fail to report the loss or theft of an access device within two business days of learning of the loss or theft. Similarly, they may not know that they must report an unauthorized transfer that appears on a periodic statement within 60 days, in order to avoid unlimited liability for subsequent transfers. Without knowledge of these rules, consumers' legal right to limit their liability may be meaningless.

In the Board's judgment, based on the comments and its own analysis, disclosure of consumers' liability is necessary to carry out the purposes of § 909 of the Act, which is now in effect. The primary purpose of the EFT Act is to provide protection to consumers who use EFT services. The Board believes consumers will be protected only if they are advised of the rules that govern their liability for unauthorized transfers.

Accordingly, the Board is adopting an amendment to § 205.5(a) of Regulation E. The amendment adds a third condition to the general rule regarding consumer liability for unauthorized transfers, by requiring the issuer of an access device to disclose: the consumer's liability for unauthorized transfers, the telephone number and address for reporting a lost or stolen access device, and the institution's business days. Financial institutions must make these disclosures before they can hold consumers liable for the unauthorized use of an access device. Institutions are not required to make new disclosures to comply with § 205.5(a) as amended if they have already told customers of their potential liability for unauthorized use under State or Federal law or an agreement with the institution.

This amendment will become effective on August 1, 1979, and applies to any transfer initiated on or after that date. It should be noted that the Board has not set a deadline for making disclosures. The amendment permits an institution to make the liability disclosures if and when the institution chooses to do so. Until disclosures are made, however, a consumer cannot be held liable for unauthorized use of the access device.

Financial institutions may elect to send disclosures to some accounts and not others. For example, they may send disclosures to active accounts accessible by an EFT device, and not send disclosures (absorbing any losses) for inactive accounts. Similarly, an institution may decide to send disclosures to customers with an EFT card usable at cash dispensing machines, but not to customers whose sole access device is a code used in a telephone bill-paying service.

Unauthorized transfers initiated between February 8 and July 31, 1979, remain subject to the statutory and regulatory disclosure requirements now in effect. Since these requirements mandate disclosures only in connection with unsolicited access devices, a consumer could be held liable for transfers initiated during this period even if disclosures had not been given.

The amendment contains an exception regarding disclosure of an institution's business days (item 3 of the required disclosures). The business day disclosure is intended to let consumers know what days will count toward determining whether the consumer has notified the institution "within 2 business days" of learning of the loss or theft of an access device. After 2 business days, the consumer's potential liability increases from $50 to $500 under the Federal EFT Act. Wisconsin institutions requested an exception to the business-day requirement on the grounds that under Wisconsin law, consumers can only be held liable for up to $50, whether or not they report a loss within 2 business days. They believe that institutions which have already disclosed the first two items to consumers should not have to make new disclosures because of a remaining undisclosed item that is largely irrelevant.

The exception in § 205.5(a)(3)(iii) will be available in instances where a consumer's liability, under applicable State law or an agreement with the institution, cannot exceed $50 and, thus, is not contingent on notification within a specified number of business days.

(2) *Economic impact analysis.* Section 904(a)(2) of the Act requires the Board to prepare an analysis of the economic impact of regulations issued by the Board to implement the Act.[1] The

[1] The analysis must consider the costs and benefits of the proposed regulation to suppliers and users of EFT services, the effects of the proposed regulation on competition in the provision of electronic fund transfer services among large and small financial institutions, and the effects of the proposed regulation on the availability of EFT services to different classes of consumers.

Footnotes continued on next page

following economic analysis accompanies amended § 205.5(a) of the regulation, which implements in part § 909 of the Act.

The amendment adopted by the board makes disclosures before May 1980 optional but provides that a financial institution can hold a consumer liable for unauthorized transfers from the consumer's account only after disclosures have been made. The amendment shifts to the institution all liability for unauthorized transfers after July 31, 1979, unless disclosures are made. Institutions thus face potentially large losses associated with lost or stolen access devices or unauthorized transactions not reported by consumers.

Institutions may regard this increased liability exposure as an incentive to make disclosures, which would induce consumers to handle access devices more carefully and to scrutinize periodic statements for unauthorized transfers. Making disclosures for all existing accounts—or, alternatively, for all active accounts—would provide more consumers with information and give them the incentive for quickly reporting loss or theft of a card or unauthorized transfers from an account. Both system-wide and average individual losses would be diminished. Interim liability disclosures would also provide consumers with information that improves their ability to decide whether to use EFT services. Another potential benefit to institutions is greater consumer acceptance of EFT stemming from increased certainty about the liability rules applicable to unauthorized transfers.

Against these potential benefits financial institutions would have to weigh costs that would be incurred for disclosure statement drafting, legal advice, printing and distribution. Costs associated with the disclosure program would be passed on to consumers to some degree. Commenters offered no empirical estimates of expected per-account costs associated with disclosure programs, although several commenters stated that they expected costs to exceed all possible benefits. The amendment would permit institutions to choose optimal disclosure programs after weighing the expected costs and benefits associated with making the disclosures to all or some of their account holders. A more efficient allocation of resources would result with no loss of consumer protection relative to the liability provisions established by the Act.

It is not apparent whether small financial institutions or low-income consumers are likely to be placed at significant cost or other disadvantage. The amendment will, however, allow institutions flexibility to adapt to the ultimate disclosure requirements mandated by the Act for May 1980, so that small institutions should be better able (than under a mandatory disclosure requirement) to schedule the relatively larger fixed-cost expenditures associated with their disclosure programs.

(3) Pursuant to the authority granted in Pub. L. 95–630 (to be codified in 15 U.S.C. 1693b), the Board revises 12 CFR 205.5(a) as follows:

§ 205.5 Liability of consumer for unauthorized transfers.

(a) *General rule.* A consumer is liable, within the limitations described in paragraph (b) of this section, for unauthorized electronic fund transfers involving the consumer's account only if:

(1) The access device used for the unauthorized transfers is an accepted access device;

(2) The financial institution has provided a means (such as by signature, photograph, fingerprint, or electronic or mechanical confirmation) to identify the consumer to whom the access device was issued; and

(3) The financial institution has provided the following information, in writing, to the consumer:

(i) The consumer's liability under § 205.5, or under other applicable law or agreement, for unauthorized electronic fund transfers and, at the financial institution's option, notice of the advisability of prompt reporting of any loss, theft, or unauthorized transfers.

(ii) The telephone number and address of the person or office to be notified in the event the consumer believes that an unauthorized electronic fund transfer has been or may be made.

(iii) The financial institution's business days, as determined under § 205.2(d), unless applicable State law or an agreement between the consumer and the financial institution sets a liability limit not greater than $50.

particularly low-income consumers. The analysis presented here is to be read in conjunction with the economic impact analysis that accompanied the Board's Regulation E at 44 FR 18474, March 28, 1979, and 44 FR , May 2, 1979.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Parts 15, 17 and 18

Statement of Policy on Aggregation of Accounts and Adoption of Related Reporting Rules

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission (Commission) is issuing a statement of policy regarding the aggregation of positions held in discretionary accounts or accounts which are part of a customer trading program for purposes of speculative position limits, and is adopting amendments to its regulations concerning the reporting of positions held in such accounts. These amendments leave unchanged the general requirement that for determining reporting status all positions in accounts which a trader holds, has a financial interest in, or controls must be combined. Moreover, positions in accounts trading pursuant to an expressed or implied agreement or understanding must also continue to be combined.

With respect to reports filed by futures commission merchants, the amendments require that for determining reporting status all positions held in discretionary accounts and accounts traded pursuant to customer trading programs of a futures commission merchant or its officers, partners, or employees, must be combined with all other positions in accounts which the futures commission merchant holds, has a financial interests in, or controls *unless*, in general, (1) a person other than the futures commission merchant directs trading in the accounts, and (2) trading decisions in the accounts are determined independently from trading decisions in other accounts which the futures commission merchant holds, has a financial interest in, or controls.

The amended rules also set forth the conditions under which positions in accounts of commodity pools and certain partnership accounts are required to be combined for purposes of determining reporting status.

The Commission's statement of policy states the Commission's views regarding the aggregation of certain accounts for purposes of compliance with speculative limit requirements. The policy sets forth indicia the Commission will consider to determine whether the limits have been

exceeded and appropriate enforcement proceedings should be instituted by the Commission. The statement of policy generally parallels the Commission's rules for determining reporting status.

EFFECTIVE DATE: July 13, 1979.

SUPPLEMENTARY INFORMATION: On February 25, 1977, the Commission published for public comment in the Federal Register, 42 FR 11150, a proposed policy different from that implemented by the Commission's predecessor, the Commodity Exchange Authority, concerning aggregation of accounts of traders for reporting purposes and determining compliance with speculative limits. In addition, the Commission sought comment on the need for uniform Commission and exchange rules concerning the aggregation of accounts to determine compliance with federal and/or exchange-imposed speculative limits. New reporting requirements were also proposed which would allow the Commission to implement its proposed aggregation policy.

Background: One of the primary objectives of the Commodity Exchange Act, 7 U.S.C. § 1 *et seq.* (1976), as amended by the Futures Trading Act of 1978, Pub. L. 95-405, 92 Stat. 865, is to maintain orderly and competitive futures markets. Section 4a(1) of the Act, 7 U.S.C. § 6a(1) (1976), specifically provides that:

"Excessive speculation in any commodity under contract of sale of such commodity for future delivery made on or subject to the rules of contract markets causing sudden or unreasonable fluctuations or unwarranted changes in the price of such commodity, is an undue and unnecessary burden on interstate commerce in such commodity."

Pursuant to this section the Commission is authorized to establish limits on the amount of trading which may be done or positions which may be held by any person. Section 4a(1) of the Act further provides that in determining whether

"... any person has exceeded such limits, the positions held and trading done by any persons directly or indirectly controlled by such person shall be included with the positions held and trading done by such person; and further, such limits ... shall apply to positions held by, and trading done by, two or more persons acting pursuant to an expressed or implied agreement or understanding, the same as if the positions were held by, or the trading were done by, a single person." [1]

Prior to the enactment of the Commodity Futures Trading Commission Act of 1974, Pub. L. 93-463, 88 Stat. 1389 (October 23, 1974), Section 4a(1) had been the subject of interpretative statements issued by the Administrator of the Commodity Exchange Authority. One interpretative statement, Administrative Determination 229 (October 14, 1971) (A.D. 229), concerned "customer trading programs" of a futures commission merchant ("FCM") and stated that these programs have the following elements:

They normally require the customer to sign an agreement not obtained from other customers and to make a minimum deposit in excess of that required of other customers. Those in the program are given specific advice or recommendations not made available to other customers of the firm. Although participants are not required to follow specific recommendations, the programs are designed to provide best results when such recommendations are followed.

A.D. 229 concluded with respect to these trading programs that:

All trades and positions of all customer accounts included in a trading program must be combined for reporting and speculative purposes. Any officer, partner, or employee of a futures commission merchant who operates a customer trading program is acting on behalf of the futures commission merchant. ...

Thus, under A.D. 229, the FCM was deemed to control the trading of customer accounts in the trading program and was required to file large trader reports under Part 18 of the regulations under the Act if the positions in the accounts exceeded the reporting limits.[2] A related determination (A.D. 232), April 20, 1972, was also made by the Administrator concerning uniform application of A.D. 229 to commodities for which exchanges had established their own speculative limits. A.D. 232 stated:

... that each exchange which has speculative limits in a regulated commodity notify members that the Commodity Exchange Authority interpretation of the application of speculative limits to customer trading programs applies equally to exchange limits.

The Commission has received petitions and inquiries from FCM's and others requesting that the Commission revise the prior interpretations made by the Administrator of the Commodity Exchange Authority. Due to the general importance of these issues, the Commission sought comment from interested persons. See 40 FR 44804 (September 30, 1975). Subsequently, questions concerning aggregation were discussed and reported on by two advisory committees established by the Commission: The Advisory Committee on the Economic Role of Contract Markets, chaired by Commissioner Seevers,[3] and the Advisory Committee on Commodity Futures Trading Professionals, chaired by Commissioner Martin.[4]

The Advisory Committees generally found that customer trading programs, commodity pools and guided account programs may perform a useful function in the market. The Advisory Committee on Commodity Futures Trading Professionals specifically noted that "[t]rading programs and commodity pools are evidentially becoming increasingly attractive to the trading public and may serve a valuable economic function in bringing speculative funds into the market." [5]

The Advisory Committee on the Economic Role of Contract Markets found that customer trading programs provided less stability than most standard types of speculative capital in the market.[6] The placing of large block orders from trading programs, especially if trading is based on "technical factors," may produce "technical runaways" in the market.[7] It was reported that markets have been "buffeted for short periods by these trend-trading blocks." [8]

Despite noting potential market problems accompanying large market orders, neither committee recommended further restrictions on trading by customer trading programs. Both committees did recommend further study and review of the existing aggregation policy, especially as it required FCM's to aggregate all trading programs operated by its personnel and "house accounts" of the FCM for

---

[1] The Commission has recently amended its rules to eliminate daily trading limits on speculative trading for all commodities where such limits were in effect. See 44 FR 7124, *et seq.* (February 6, 1979). The Commission has retained limits on the positions which may be held for speculative purposes on all these commodities. Those commodities are grains (defined to include oats, barley and flaxseed), cotton, rye, soybeans, eggs, potatoes, corn and wheat. 17 CFR Part 150, 44 FR 7127-7128.

[2] For purposes of Part 18, a trader is any person, including an FCM, who, for his own account or for an account he controls, makes or has made transactions in commodity futures. 17 CFR 18.00(e).

purposes of determining compliance with reporting and speculative limit requirements. The Advisory Committee on Commodity Futures Trading Professionals suggested that the Commission's aggregation policy with regard to programs affiliated with the FCM "should not emphasize principal—agent or employee relationships . . ." but should place the burden on the FCM to demonstrate independence in "program design, internal procedures and surveillance." [9]

The Commission believes the aggregation policy it is now adopting is in accordance with the general recommendations of these committees. The Commission recognizes the great variety of commodity trading programs available for trader participation. If such accounts and programs are traded independently and for different purposes, such trading can be beneficial to the markets by adding liquidity to the markets and aiding in the price-discovery process. Further, the Commission believes that the aggregation policy of the CEA did not adequately reflect the efforts made by FCM's, as well as others, to establish internal management procedures designed to assure independence by the person who controls trading in a discretionary account or a customer trading program. However, the Commission also recognizes that purportedly different programs which in fact are similar in design and purpose and are under common control may be initiated in an attempt to circumvent speculative limit and reporting requirements.

Overview of Aggregation Policy. The Commission received six comments in response to its February 25, 1977 proposed policy statement, one of which fully endorsed the policy and did not recommend any changes. Several of the commentators raised questions or made suggestions that have persuaded the Commission that some changes to the proposed policy statement were warranted.

The policy of the Commission's predecessor, and that proposed by the Commission, presumed that an FCM controlled all accounts of customers which were part of a customer trading program affiliated with the FCM, or its officers, partners, or employees. The Commission's proposed policy would have required an FCM to aggregate positions in all such customer trading program accounts unless it could make a sufficient showing in advance that control of trading was vested in a person other than the FCM. The Advisory Committees, and for that matter three of the four commentators who stated their opinion on the subject, agreed that the burden should be on the FCM to establish that the FCM does not control an affiliated customer trading program.

The Commission agrees that the FCM or other trader bears the responsibility to comply fully with applicable legal requirements. However, the Commission, after further consideration, has determined that an initial showing by the FCM prior to commencement of trading in customer trading programs is an inefficient method to establish whether the FCM in fact controls trading in an account. In all cases, control is a matter of fact, the existence of which may be fairly inferred from surrounding circumstances. Thus, the FCM's initial affirmation, even though accurate when made, would not be dispositive of compliance with either speculative limit or reporting requirements if, in fact, there develops a consistent pattern of trading between accounts in supposedly different programs carried by the FCM and/or supposedly controlled by different employees of the FCM. Indeed, at the time the Commission published its proposal it noted that, despite the initial showing by the FCM, trading in the accounts would be subject to periodic review. In this connection, the administrative cost to the Commission to determine in each case, whether a sufficient showing has been made by the FCM prior to trading cannot be justified when, in any case, the Commission must continually monitor the programs to determine if coordinated patterns of trading are occurring.

In view of these considerations the Commission has determined to amend its reporting regulations to provide that for purposes of determining reporting status an FCM will be assumed to control all customer discretionary accounts and accounts which are part of a customer trading program of the FCM, or its officers, partners, or employees, unless specified conditions indicative of the absence of control exist. If these conditions exist with respect to a particular account, the FCM need not aggregate positions in such account for purposes of determining reporting status. In such a case, of course, the positions held in the account must be combined with those of the officer, partner or employee of the FCM who does control the account in determining the reporting status of such officer, partner or employee. [10]

Further, the Commission's statement of policy on aggregation included in this release makes clear that the Commission will employ similar criteria in determining the FCM's compliance with speculative position limits insofar as those limits apply to controlled positions. If, after investigation or otherwise, the Commission has reason to believe that the FCM or any other trader has failed to aggregate positions in customer accounts properly for determining reporting status, or has violated speculative limits set in Part 150 of the regulations based on a failure to aggregate accounts properly or otherwise, the Commission may institute appropriate enforcement proceedings.

As adopted, the Commission's statement of policy on aggregation with respect to controlled accounts does no more than restate Section 4a(1) of the Act, which expressly provides that any person who directly or indirectly controls the positions held or trading done by any other person, must include the positions held or trading done by such other person in determining whether that person has exceeded the speculative limits set by the Commission. The language in Section 4a(1) regarding controlled positions was enacted in 1968. Pub. L. 90–258, § 2, 82 Stat. 26 (1968). The Senate Report accompanying the 1968 amendment states:

> "All of the changes made by this section incorporate longstanding administrative interpretations reflected in orders of the [Commodity Exchange] Commission." [11]

Indeed, the Commodity Exchange Commission's order setting speculative limits issued in 1938, had placed limits on the positions which "any person may hold or control." [12]

Applicability of Speculative Limits to FCM's. One commentator on the Commission's February, 1977 proposal suggested that, while an FCM who controls several customer accounts

[10] The Commission's authority to require futures commission merchants and floor brokers, to report transactions and positions of such persons, and the transactions and positions of their customers, is set forth in Section 4g of the Act, 7 U.S.C. § 6g (1976). Further, Section 4i of the Act, 7 U.S.C. § 6i (1976), in pertinent part provides: "It shall be unlawful for any person to make any contract for the purchase or sale of any commodity for future delivery on or subject to the rules of any contract market unless such person shall report or cause to be reported to the properly designated officer in accordance with the rules and regulations of the Commission . . . whenever such person shall directly or indirectly have or obtain a long or short position in any commodity or in any future of such commodity, equal to or in excess of such amount as shall be fixed from time to time by the Commission."

[12] *In the Matter of Limits on Positions and Daily Trading in Wheat, Corn, Oats, Barley, Rye, and Flaxseed, for Future Delivery*, C.E.A. Docket No. 3 (December 22, 1938).

should be subject to the Act's speculative limit provisions, Section 4a(4) of the Act precludes the use of presumptions of control applied to an FCM. Although an FCM need not make a showing to the Commission prior to trading under the policy and regulations herein adopted, the Commission again wishes to express its views on the applicability of Section 4a(4).

In pertinent part, Section 4a(4) of the Act provides that the speculative limit provisions of Section 4a

". . . shall apply to a person that is registered as a futures commission merchant or floor broker . . . only to the extent that transactions made by such person are made on behalf of or for the account or benefit of such person."

As indicated above, as originally enacted, Section 4a did not expressly refer to trading in controlled accounts. However, trading effected either "directly or indirectly" was subject to speculative limits, and served as the basis for the Commodity Exchange Commission's interpretations regarding controlled accounts. Thus, the enactment of Section 4a(4) can only be understood to clarify that the broad, remedial provisions of Section 4a were not meant to apply to transactions effected for customers by an FCM or floor brokers, acting merely in that capacity as traditionally viewed. Considering the rationale for the enactment of Section 4a, Congress could hardly have intended to grant FCM's and floor brokers an exemption from any speculative limits established by the Commodity Exchange Commission if they traded "directly or indirectly," through controlled or otherwise managed accounts.

Thus, the Commission and its predecessor have consistently construed Section 4a(4) to apply only to situations in which the FCM or floor broker was handling customer accounts and exercised no discretion or control, either direct or indirect. See 42 FR 11150–51 (February 25, 1977).

Trading programs operated by non FCM's. Several persons who are not FCM's but who operator customer trading programs have inquired concerning the effect of the aggregation policy on their activities. The Commission's February 1977 release focused primarily on programs operated by FCM's. However, the Commission wishes to emphasize that Section 4a(1) of the Act and Part 150 of the Commission's regulations, expressly apply to any person, and thus cover an associated person of an FCM, a commodity pool operator ("CPO"), commodity trading advisor ("CTA"), or any other trader who directly or indirectly controls futures positions. Similarly, these persons are subject to the large trader reporting requirements of the Commission's regulations, 17 CFR Part 18.

All traders who operate customer trading programs share the ability, through control of large trading blocks, to influence the market. Accordingly, a non-FCM who has an affiliated customer trading program is required to aggregate positions in accounts of such program with all other positions in accounts which the non-FCM holds, has a financial interest in, or controls, for purposes of determining reporting status and for purposes of compliance with speculative position limits. These requirements are discussed more fully below.

Definitions. In its February 25, 1977 release the Commission used and requested comments on definitions of terms referring to specific types of trading programs to which its aggregation policy would apply. No specific comments concerning these definitions were received. Upon review of other general comments which it received, the Commission has adopted certain of the definitions in a modified form in Part 15 of its regulations. The definitions will also apply to terms used in its policy statement on aggregation.

Rule 15.00(l) defines the term "customer trading program" to mean any system of trading offered, sponsored, promoted, managed or in any other way supported by, or affiliated with, an FCM, a commodity trading advisor, a commodity pool operator, or other trader, or any of its officers, partners or employees, and which by agreement, recommendations, advice, or otherwise directly or indirectly controls trading done and positions held by any other person. The term includes but is not limited to, arrangements where a program participant enters into an expressed or implied agreement not obtained from other customers and makes a minimum deposit in excess of that required of other customers for the purpose of receiving specific advice or recommendations which are not made available to other customers. The term includes any program which is of the character of, or is commonly known to the trade as, a managed account, guided account, discretionary account, commodity pool or partnership account.

The Commission has retained that part of its definition regarding programs designed to provide its participants with specific advice or recommendations not given to other customers. However, the Commission has modified the definition to make clear that specific advice or recommendations given to a particular customer without more is not a customer trading program.

Rule 15.00(g) defines the term "guided account program" to mean any customer trading program which limits trading to the purchase or sale of a particular contract for future delivery of a commodity that is advised or recommended to the participant in the program.

As adopted the definition makes clear that the term "guided account program" does not include market letters or programs which give specific advice or recommendations regarding trading, but do not limit the trading activities to the advice or recommendations generated. An example of a guided account program is where the person controlling the account advises the customer to buy "May wheat." The customer may either agree to the trade or reject the trade before it is made.

One commentator suggested that if a participant in a customer trading program is given the option to accept or reject a suggested trade, the participant's account is not being "controlled" and should not be aggregated with other customer trading program accounts. The Commission is not persuaded that control should be viewed so narrowly for this purpose. Even though a customer may reject a specific trade in a guided account program, the only trades which can in fact be made for these accounts are those generated by the program. Secondly, customer trading programs, such as guided account programs, are designed and represented to customers to give best results by complete or general participation in the trades generated by the program. Thus, the incentive to join the program inhibits at the outset the independent judgment the customer might otherwise exercise. Moreover, the Commission understands that, in most cases, customers in a guided account program are contacted prior to the execution of an order, informed that the program expects a trend to develop, and that the customer's account will be traded in accordance with the program trend analysis unless the customer contacts the program and rejects the trade. Finally, although a guided account program may represent many individual customer accounts, orders placed may be block orders. The coordinated trading of these individual accounts at the direction of a single trader based on technical factors could have just as significant an impact in the market as

where the trader had complete discretionary authority over the accounts.

Rule 15.00(h) defines the term "discretionary account" to mean a commodity futures trading account for which buying and/or selling orders can be placed or originated, or for which transactions can be effected, under a general authorization and without the prior specific consent of the customer, whether the general authorization for such orders or transactions is pursuant to a written agreement, power of attorney, or otherwise.

Rule 15.00(i) defines the term "managed account program" to mean a customer trading program which includes two or more discretionary accounts traded pursuant to a common plan, advice, or recommendations. The Commission did not include a definition of this term in its February, 1977 release. Upon further consideration the Commission has determined that it was advisable to add this definition in order to emphasize that a group of discretionary accounts traded pursuant to a common plan, advice or recommendations are required to be aggregated for reporting purposes and for purposes of speculative limits.

If several discretionary accounts are part of a managed account program, all positions that are in the accounts must be aggregated by the trader or traders controlling trading in the program. For example, if several associated persons of an FCM individually manage one or more discretionary accounts, and all such accounts are traded according to a common plan or a commonly derived recommendation, then all positions in such accounts must be aggregated. If the FCM directs trading, the FCM would be obligated to aggregate the positions for purposes of reporting.

On the other hand, if the associated persons direct trading, each associated person would be deemed to share control of all the positions in all accounts which trade in accordance with the plan. Of course, irrespective of whether a managed account program is involved, when an associated person directs trading in one or more discretionary accounts, the associated person must aggregate the positions in such accounts with all positions in accounts which he holds, has a financial interest in, or controls. Similarly, if the FCM directs trading in a discretionary account, positions in such an account must be aggregated with positions owned or controlled by the FCM for reporting purposes.

The Commission received several comments asking for a definition or clarification of "control." As indicated above, control is a question of fact in each case. The Commission considers its existing definition adequate for this purpose. Section 1.3(j) of the Commission's regulations, 17 CFR § 1.3(j) (1978), states that:

"An account shall be deemed to be controlled by a person if such person by power of attorney or otherwise actually directs trading for such account."

The February, 1977 release provided that the term "house accounts" would refer to a commodity futures trading account owned by or carried in the name of the futures commission merchant. The Commission believes that a definition of this term is unnecessary at this time.

The Commission received one comment asking for a definition or clarification of the term "account or program controller" used in its February, 1977 release. The term "account or program controller" has been deleted from the adopted rules.

Financial Interest in Accounts. Consistent with the underlying rationale of aggregation, existing reporting Rule 18.10(a) a basically provides that if a trader holds or has a financial interest in more than one account, all accounts are considered as a single account for reporting purposes. Several inquiries have been received regarding whether a nomial financial interest in an account requires the trader to aggregate. Traditionally, the Commission's prodecessor and its staff have expressed the view that except for the financial interest of a limited partner or shareholder (other than the commodity pool operator) in a commodity pool, a financial interest of 10 percent or more requires aggregation. The Commission has determined to codify this interpretation at this time and has amended Rule 18.01 to provide in part that

"For purposes of this Part, except for the interest of a limited partner or shareholder (other than the commodity pool operator) in a commodity pool, the term 'financial interest' shall mean an interest of 10 percent or more in ownership or equity of an account."

Thus, a financial interest at or above this level will constitute the trader as an account owner for aggregation purposes.

Reporting Status of FCM's. New Rule 18.01(b)[13] has been adopted to provide generally that for the purpose of determining reporting status of an FCM the positions held in a discretionary account or a customer trading program of the FCM, or of any of its officers, partners, or employees, shall be considered positions controlled by such FCM—unless (1) a trader other than the FCM directs trading in the account; (2) the FCM maintains only such control over trading in such an account as is necessary to fulfill its duty to supervise diligently trading in the account; and, (3) each trading decision in the discretionary account or customer trading program is determined independently of all trading decisions in other accounts which the FCM holds, has a financial interest in, or controls.

Evidence demonstrating control by FCM. The Commission's February, 1977 proposal noted that an FCM or other trader seeking to avoid the requirment to aggregate positions in accounts affiliated with customer trading programs would have to demonstrate, among other things, that the customer trading program for which the exemption would be sought was independent from the control of the FCM or other trader seeking the exemption. The Commission received several comments concerning the type of evidence that the FCM could submit to demonstrate that a program controller is free to act independently of the FCM. Altough the Commission has decided not to require an FCM or other trader to submit evidence prior to trading, the issues raised by the commentators have assisted the Commission in developing its aggregation policy. As indicated above the determination of control must be decided on a case-by-case basis. However, FCM's and other affected persons should be aware that in assessing whether a particular trader exercises control, the Commission will look to whether any of the following indicia of control exist, among others. The Commission believes that discussion of some of these indicia will assist FCM's and other affected persons in complying fully with applicable legal requirements.

(A) *Agreements vesting control in the name of the FCM or other trader.* The documents signed by a customer to participate in the customer trading program account, indicating that the FCM or other trader has the authority to direct trading in the account. Relevant documents would include those opening a customer account, any power of attorney or other document authorizing execution of trades and any special agreement that may be signed by a customer to participate in a customer trading program.

(B) *Advertising.* Advertisements and other promotional material containing statements or representations that

[13] The Commission has redesignated existing Rule 18.01(b)—net positions—as part of new Rule 18.01(h), with certain clarifying changes.

indicate that the FCM or other trader will direct trading in the program.

(C) *Agreements between the FCM and other traders.* Agreements between the FCM and its employees or other affiliated traders demonstrating the degree of independence between the FCM and the trader. Several commentators have suggested that in some cases a contract between the FCM and its associated persons assuring independence of action might be inconsistent with the employer-employee relationship and in any event would be self-serving. The Commission agrees and has attempted to structure its regulations to make clear that control should not be equated with the supervisory responsibilities of the FCM. The existence or nonexistence of a self-serving contract will not be determinative. Of primary importance will be whether the practices of the FCM include only supervisory and surveillance procedures, or whether they interfere with the trading determinations made by the person designated to direct trading in a customer's account.

(D) *Degree of supervision.* Several commentators suggested that an FCM would be abdicating its fiduciary responsibilities to its customers if it allowed any person who directs trading in a program to act completely independent of its supervision in the trading of the customer programs. Commentators stated that the FCM must be allowed to control margin policies and be able to act with respect to a program controller's trading practices which in the opinion of the FCM are not appropriate for its customers.

As stated above, the Commission does not intend for its policy on aggregation to reduce the FCM's responsibility to supervise and monitor the activity of the persons who direct trading in an account or program. The Commission's customer protection regulations require that an FCM diligently supervise persons who control accounts. See Commission rule 166.3, 43 FR 31886, 31890–31891 (July 24, 1978). Thus, the retention by the FCM of general supervisory obligations over the trader who actually directs trading in an account or program will not, in and of itself, require the FCM to aggregate positions. The Commission's aggregation policy and reporting rules have been modified to make this clear.

(E) *Confidentiality of trading decision of a customer trading program.* Indications of control by the FCM may exist if the FCM has not taken steps to assure that trading decisions in any one program generally not be available to other program managers.

(F) *Access to and reliance on market information generated by the FCM.* One commentator noted that although a person who directs trading in a customer account or program should be denied access to specific trading decisions generated by other customer programs, such persons should not be precluded from access to general research information generated by the FCM. The Commission agrees that research information concerning fundamental demand and supply factors and other data should be readily available to a person who directs trading in a customer account or programs. However, the Commission is concerned that specific trading recommendations of the FCM contained in such information not be substituted for independently derived trading decisions. When the person who directs trading in an account or program regularly follows the trading suggestions disseminated by the FCM, such account or program will be evidence that the account is controlled by the FCM.

(G) *Financial interest of the futures commission merchant.* As stated above, when the financial interest of the FCM is greater than 10 percent, the Commission will consider the FCM to be the owner of all positions in the program. However, quite apart from considerations of ownership, any financial interest may also be indicative of control of the account. Thus, a financial interest held by an FCM in a customer trading program will be considered for this purpose.

Common trading patterns. Several commentators offered arguments that common trading patterns are an insufficient basis for requiring aggregation of accounts for reporting or speculative limit purposes. The Commission disagrees. A common trading pattern indicates either that several programs are traded in accordance with a common plan or understanding, or that the programs share a common design despite what the original object of each program may have been or the difference in the stated factors which are to influence trading in each program. The Commission is mindful that at times similar trading patterns may result in the case of customer trading programs that are in fact designed to react to different market signals. But the existence of common trading patterns generally indicates that the programs are similar in design and purpose and hence most probably under the control of the FCM or jointly controlled by several traders. Moreover, it is the responsibility of the FCM to assure that supposedly different trading programs offered by or affiliated with such FCM, in fact, are different in design or purpose.

Additional possible amendments. The Commission will be reviewing the existing reporting and recordkeeping requirements and special call provisions set forth in its regulations in order to ascertain whether any modifications are necessary in order to assure that the documentation relating to the existence of control is readily available for Commission review.

Discretionary accounts of associated persons. In its February 25, 1977 release the Commission proposed several criteria that it would consider to determine if an associated person actually exercises control over a discretionary account or is merely providing administrative service to an account which an FCM controls. 42 FR 11152. The Commission's policy and regulations herein adopted are consistent with that approach. Discretionary accounts, whether or not traded as part of a managed trading program, raise the same concerns as other customer trading programs. Therefore, aggregation of positions in such accounts for determining reporting status and for speculative limit purposes should be based on the same factors as those that apply to managed account programs. Thus, if the associated person directs trading in the customer's account it would be required to aggregate positions in such account with all other positions which the associated person holds, has a financial interest in, or controls. On the other hand, the FCM would be required to aggregate where it is determined that the associated person acts only at the direction of the FCM. In that regard the Commission will look to the overall policy of the FCM regarding associated persons who are authorized to handle discretionary accounts; the apparent reliance by the associated persons who handle discretionary accounts on the suggested trading decisions of the FCM; and whether a pattern of trading exists between the discretionary account and any other customer trading program or house account.

Commodity pools and partnership accounts. The Commission's February 25, 1977 proposed policy statement indicated that a general partner in a commodity pool organized as a limited partnership need not aggregate positions in the partnership account with other positions which the general partner held, had a financial interest in, or controlled, if the general partner could show that (1) he had divested himself of control over the trading in the

partnership's account, and (2) he had maintained a minimal beneficial interest in the partnership of no more than necessary to form a partnership under applicable state or federal law and in any case less than 10 percent. However, the proposal did not make clear that when the general partner of the commodity pool is also an officer, partner, or employee of an FCM, the partnership account must also be considered as any other customer trading program of the FCM in order to determine whether the FCM or the officer, partner or employee should aggregate. In order to make this clear, the definition of the term "customer trading program" as adopted includes reference to commodity pools. Thus, under Rule 18.01(b), positions in accounts of customer trading programs of officers, partners or employees of an FCM, including commodity pools, are presumed to be controlled by the FCM. Further, the Commission has adopted new Rule 18.01(c) of its regulations to provide rules for determining reporting status of CPO's and has included reference to commodity pools in its statement of policy on aggregation.[14] Since Section 18.01(a) makes clear that any person holding a financial interest in any account 10% or more in ownership or equity is an account owner, the Commission has deleted from its final statement of policy and reporting rules the proposed financial limitation which specifically referred to commodity pools.

The rules for determination of reporting status provide that positions held in all commodity pools operated by a CPO, other than a CPO who is an officer, partner, or employee of an FCM, shall be considered positions controlled by such CPO unless:

(1) A trader other than the CPO directs trading in such commodity pool;

(2) The CPO maintains only such minimum control over trading in the commodity pool that is necessary to fulfill its duty to supervise diligently all accounts of the pool; and

(3) Each trading decision of the commodity pool is determined independently of all trading decision in other commodity pools and position in accounts which the CPO holds, has a financial interest in, or controls.

The above rules apply to all of commodity pool operators, whether individuals, corporations or partnerships. And, of course, any trader other than the commodity pool operator who directs or otherwise controls trading for the pool, such as an independent commodity trading advisor, must aggregate the pool's positions with his own for speculative limit and reporting purposes. *Interest of a commodity pool participant, including a limited partnership interest.* The February 25, 1977, release stated that limited partners in partnership accounts, such as pool participants in a commodity pool limited partnership, who do not control the trading or have property rights in the partnership, are not required to combine the trading in the partnership accounts with any other account which they own or control. One commentator generally requested an explanation of the term "property rights." The term originated in A.D. 234 (July 20, 1972) and referred to an individual interest in the specific assets of the partnership, as distinct from the residual beneficial interest in the partnership account.

The Commission is in agreement with the approach taken by its predecessor. The determination must be made on a case-by-case basis. Where a limited partner neither has direct or indirect control of trading in the partnership account, nor has a property interest in particular assets of the partnership, other than his residual, beneficial interest in the account or accounts of the partnership, the limited partner generally is not required to aggregate the positions held in partnership accounts with other positions which he holds, has a financial interest in, or controls. In the Commission's final reporting rules and statement of policy the term "property interest" has been substituted for the term "property rights."

Speculative Trading and Position Limits. Two commentators suggested that the Commission inquire into the current necessity and advisability of speculative limits in general. The Commission has recently eliminated daily trading limits on all commodities traded for which such limits were previously imposed. See 44 FR 7124 (February 6, 1979). However, after an extensive review of both trading and position limits, the Commission has determined to continue the enforcement of position limits. Further, the Commission believes that the modifications to its aggregation policy will to a great extent alleviate the burden to aggregate previously imposed on certain FCM's.

Uniform Exchange and CFTC Rules on Aggregation. The Commission's proposal had generally requested comment on the need to require exchanges to adopt the CFTC's aggregation policy. One commentator requested a separate comment period for interested parties to respond if the Commission were to propose regulations in this area. The Commission has decided not to take action in this area at this time; however, the Commission may in the near future issue a Federal Register release requesting comment on a proposed rule requiring exchanges which have limits on the maximum net long or net short position which one person may hold or control under contracts for future delivery of a particular commodity on or subject to the rules of the contract market to adopt and enforce an aggregation policy at least as stringent as that set forth in the Commission's statement of policy on aggregation.

Statement of Aggregation Policy

Accordingly, for the reasons stated above, the Commission adopts the following statement of policy on the aggregation of positions in certain accounts for purposes of speculative limits. This statement of policy is meant to advise traders of the enforcement policy of the Commission.

1. All positions in accounts directly or indirectly controlled by a person shall be included with the positions in accounts owned by such person for purposes of determining whether such person has exceeded speculative position limits set by the Commission. Except for a limited partner or shareholder (other than a commodity pool operator) in a commodity pool, any person who has a 10 percent or more financial interest in an account will be considered as an account owner.

2. Positions in accounts held by two or more persons acting pursuant to an expressed or implied agreement or understanding shall be combined as if the positions were held by and trading done by a single person.

3. *Customer trading programs and discretionary accounts.* The positions held in a discretionary account or held in an account which is part of, or participates in, or receives trading advice from, a customer trading program of a futures commission merchant, or of any of the officers, partners, or employees of such futures commission merchant, shall be considered positions controlled by such futures commission merchant unless:

(a) A trader other than the futures commission merchant directs trading in such an account;

(b) The futures commission merchant maintains only such minimum control over the trading in such an account as is

[14] The Commission has redesignated existing Rule 18.01(c)—Cross positions—as part of new Rule 18.00(h), with certain clarifying changes.

necessary to fulfill its duty to supervise diligently trading in the account; and,

(c) Each trading decision of the discretionary account or the customer trading program is determined independently of all trading decisions in other accounts which the futures commission merchant holds, has a financial interest in, or controls.

4. *Commodity Pools.* The positions held in all commodity pools operated by a commodity pool operator, other than a commodity pool operator who is an officer, partner, or employee of a futures commission merchant, shall be considered positions controlled by such commodity pool operator unless:

(a) A trader other than the commodity pool operator directs trading for such commodity pool;

(b) The commodity pool operator maintains only such control over trading in the commodity pool as is necessary to fulfill its duty to supervise diligently all accounts of the pool; and

(c) Each trading decision of the commodity pool is determined independently of all trading decisions in other commodity pools and positions in accounts which the commodity pool operator holds, has a financial interest in, or controls.

Other changes in the reporting requirements. The Commission is also adding § 17.00(d) to its regulations to provide that where an FCM files a series 03 report for purposes of Part 18 for an account in which it has a financial interest the FCM is not required to file the report as to such an account required pursuant to § 17.00(a).

In consideration of the foregoing, the Commission, pursuant to its authority contained in sections 4a, 4f, 4g, 4i and 8a(5) of the Commodity Exchange Act, 7 U.S.C. 6a, 6f, 6g, 6i and 12a(5), as amended, Pub. L. 95-405, §§ 5 and 6, 92 Stat. 869 (1978), hereby amends Parts 15, 17 and 18 of Chapter I of Title 17 of the Code of Federal Regulations as follows:

PART 15—REPORTS—GENERAL PROVISIONS

Section 15.00 is amended by adding paragraphs (f), (g), (h) and (i) as follows:

§ 15.00 Definitions.

* * * * *

(f) Customer Trading Program. This term means any system of trading offered, sponsored, promoted, managed or in any other way supported by, or affiliated with, a futures commission merchant, a commodity trading advisor, a commodity pool operator, or other trader, or any of its officers, partners or employees, and which by agreement, recommendations, advice or otherwise directly or indirectly controls trading done and positions held by any other person. The term includes but is not limited to, arrangements where a program participant enters into an expressed or implied agreement not obtained from other customers and makes a minimum deposit in excess of that required of other customers for the purpose of receiving specific advice or recommendations which are not made available to other customers. The term includes any program which is of the character of, or is commonly known to the trade as, a managed account, guided account, discretionary account, commodity pool or partnership account.

(g) Guided Account Program. This term shall mean any customer trading program which limits trading to the purchase or sale of a particular contract for future delivery of a commodity that is advised or recommended to the participant in the program.

(h) Discretionary Account. This term means a commodity futures trading account for which buying and/or selling orders can be placed or originated, or for which transactions can be effected, under a general authorization and without the specific consent of the customer, whether the general authorization for such orders or transactions is pursuant to a written agreement, power of attorney, or otherwise.

(i) Managed Account Program. This term means a customer trading program which includes two or more discretionary accounts traded pursuant to a common plan, advice or recommendations.

PART 17—REPORTS BY FUTURES COMMISSION MERCHANTS AND FOREIGN BROKERS

Section 17.00 is amended by adding a new paragraph (d) as follows:

§ 17.00 Information to be furnished by futures commission merchants and foreign brokers.

* * * * *

(d) A futures commission merchant which files a series 03 report for purpose of Part 18 for an account in which it has a financial interest is not required to file a report for such an account pursuant to this section.

PART 18—REPORTS BY TRADERS

1. Section 18.00 is amended by adding a new paragraph (h) as follows:

§ § 18.00 Information to be furnished by traders.

* * * * *

(h) *Reporting of positions, net or gross.* (1) *Net positions.* The reporting trader shall report the *net* open contracts, long *or* short, in each future of such commodity in all such accounts, except as specified in subparagraph (2) of this section.

(2) *Gross positions.* In the following cases, the reporting trader shall report the *gross* open contracts, *i.e.*, total long open contracts *and* total short open contracts in each future of such commodity in all such accounts:

(i) Positions on the New York Mercantile Exchange;

(ii) Positions on the Chicago Mercantile Exchange;

(iii) Positions on any exchange carried through different futures commission merchants or foreign brokers;

(iv) Positions which represent spreads between different types of contracts in the same commodity;

(v) Positions against which notice have been stopped or issued, but upon which actual delivery has not been made;

(vi) Positions in accounts owned or held jointly with another person or persons as specified in § 18.01; and

(vii) Positions in accounts subject to trading control by the reporting trader, but in which he has no interest as an owner as specified in § 18.01.

2. Section 18.01 is amended by deleting paragraphs (a), (b) and (c), and by adding as new paragraphs (a), (b) and (c) the following:

§ 18.01 Interest in or control of several accounts.

(a) *Multiple accounts.* If any trader holds or has a financial interest in or controls more than one account, whether carried with the same or with different futures commission merchants or foreign brokers, all such accounts shall be considered as a single account for the purposes of determining whether such trader has a reportable position and for the purpose of reporting. For the purpose of this Part, except for the interest of a limited partner or shareholder (other than the commodity pool operator) in a commodity pool, the term "financial interest" shall mean an interest of 10 percent or more in ownership or equity of an account.

(b) *Customer trading programs and discretionary accounts of traders who are futures commission merchants.* For the purpose of paragraphs (a) and (d) of this section, positions held in a discretionary account, or held in an account which is part of, or participates in, or receives trading advice from, a customer trading program of a futures commission merchant, or any of the

officers, partners, or employees of such futures commission merchant, shall be considered positions controlled by such futures commission merchant unless:

(1) A trader other than the futures commission merchant directs trading in such an account;

(2) The futures commission merchant maintains only such minimum control over the trading in such an account as is necessary to fulfill its duty to supervise diligently trading in the account; and

(3) Each trading decision of the discretionary account or the customer trading program is determined independently of all trading decisions in other accounts which the futures commission merchant holds, has a financial interest in, or controls.

(c) *Commodity Pools.* For the purpose of paragraphs (a) and (d) of this section, the positions held in a commodity pool operated by a commodity pool operator, other than a commodity pool operator who is an officer, partner or employee of a futures commission merchant, shall be considered positions controlled by such commodity pool operator unless:

(1) A trader other than the commodity pool operator directs trading for such commodity pool;

(2) The commodity pool operator maintains only such control over trading in the commodity pool as is necessary to fulfill its duty to supervise diligently all accounts of the pool; and

(3) Each trading decision of the commodity pool is determined independently of all trading decisions in other commodity pools and positions in accounts which the commodity pool operator holds, has a financial interest in, or controls.

(d) * * *

Issued in Washington, D.C. on June 8, 1979.

Jane K. Stuckey,

Secretary to the Commission, Commodity Futures Trading Commission.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 211

[Release No. SAB-31]

Staff Accounting Bulletin No. 31

AGENCY: Securities and Exchange Commission.

ACTION: Publication of Staff Accounting Bulletin

SUMMARY: This interpretation clarifies and reiterates the Staff's long-standing position concerning the presentation believed appropriate in balance sheets for notes and other receivables evidencing a promise to contribute capital from affiliates of corporate general partners in limited partnership offering filed with the Commission. This interpretation supersedes Topic 4–G(2) which also stated the staff's view with respect to this matter.

DATE: June 7, 1979.

FOR FURTHER INFORMATION CONTACT: Howard P. Hodges, Jr. (202–755–1744), Division of Corporation Finance, or Eugene W. Green, Office of the Chief Accountant (202–755–0222), Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The statements in Staff Accounting Bulletins are not rules or interpretations of the Commission nor are they published as bearing the Commission's official approval; they represent interpretations and practices followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the federal securities laws.

George A. Fitzsimmons,

Secretary.

June 7, 1979.

Staff Accounting Bulletin No. 31

The staff hereby issues topic 4–I, "Notes and Other Receivable from Affiliates." Topic 4–I supersedes Topic 4–G(2) which also stated the staff's position with respect to certain receivables from affiliates. It has come to our attention that some registrants have interpreted that topic to apply only to notes and other receivables arising directly from the sale of capital stock. As a result, several registrants have not followed the presentation described under Topic 4–G(2) of Staff Accounting Bulletin No. 1 in recent limited partnership offerings filed with the Commission.

To preclude possible misunderstanding in the future as to the staff's position concerning the presentation of such items in balance sheets, this revised interpretation is placed under a separate caption "Notes and Other Receivables from Affiliates."

Topic 4: Equity Accounts

* * * * *

I. Notes and Other Receivables from Affiliates.

Facts. The balance sheet of a corporate general partner is often presented in a registration statement. Frequently the balance sheet of the general partner discloses that it holds notes or other receivables from a parent or another affiliate. Often the notes or other receivables were created in order to meet the "substantial assets" test which the Internal Revenue Service utilizes in applying its "Safe Harbor" doctrine in the classification of organizations for income tax purposes.

Question. How should such notes and other receivables be reported in the balance sheet of the general partner?

Interpretive Response. While these notes and other receivables evidencing a promise to contribute capital are often legally enforceable, they seldom are actually paid. In substance these receivables are equivalent to unpaid subscriptions receivable for capital shares which Rules 5–02.30 of Regulation S–X requires to be deducted from the dollar amount of capital shares subscribed.

The balance sheet display of these or similar items is not determined by the quality or actual value of the receivable or other asset "contributed" to the capital of the affiliated general partner, but rather by the relationship of the parties and the control inherent in that relationship. Accordingly, in these situations, the receivable must be treated as a deduction from stockholders' equity in the balance sheet of the corporate general partner.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 290

[Docket No. RM79-6]

Procedures Governing Collection and Reporting of Information Concerning Cost of Providing Retail Electric Service

June 5, 1979

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final regulations.

SUMMARY: These regulations implement section 133 of the Public Utility Regulatory Policies Act of 1978 and establish procedures governing the collection and reporting of information concerning the cost of providing retail electric service.

DATES: Effective July 15, 1979. Written comments on § 290.404 (d) and (f) by July 15, 1979.

ADDRESS: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 (Reference Docket No. RM79–6).

FOR FURTHER INFORMATION CONTACT:

Gregory Martin, Office of Commissioner Matthew Holden, 825 North Capitol Street, NE., Room 9010, Washington, D.C. 20426 (202) 275–4176.

William Lindsay, Office of Electric Power Regulation, 825 North Capitol Street, NE., Room 5200, Washington, D.C. 20426 (202) 275–4777.

Jane Phillips, Office of the General Counsel, 825 North Capitol Street, NE., Room 8000, Washington, D.C. 20426 (202) 275-0422.

SUPPLEMENTARY INFORMATION: In this final rule, we seek to implement section 133 of the Public Utility Regulatory Policies Act of 1978 (PURPA) Pub. L. 95-617. This provision of the statute requires the Federal Energy Regulatory Commission (Commission) to prescribe, within 6 months of enactment, the methods, procedure and format to be used by electric utilities in gathering information necessary to determine the costs of providing electric service.

We have made an intense effort to inform electric utilities, their customers, potential intervenors and State regulatory agencies about both the nature of thinking and the timing of action within the Commission. Since last November we have held a variety of staff-level conferences with interested persons, the details of which are recorded in the public file. On December 4, 1978, an informal conference was held to elicit the views of interested persons, and on January 13, 1979, representatives of the Commission met with Commissioners from sixteen State regulatory authorities constituting the Ad Hoc Committee on the National Energy Act of the National Association of Regulatory Utility Commissioners (NARUC).

Various memoranda, correspondence and drafts concerning concepts of the Commission's responsibilities regarding section 133 have been placed in the public file and have been reported in the trade press. The product of this procedure was the Notice of Proposed Rulemaking in Docket No. RM79-6, adopted by the Commission on March 1, 1979, and printed in the Federal Register on March 7, 1979 (44 FR 12438).

In order to avail ourselves of the opportunity for comment on the rule, we held four regional hearings on the proposed rules in addition to soliciting written comments. During the 30-day comment period the Commission received, in addition to the 628 pages of regional hearing transcript, more than 230 oral and written comments from over 180 utilities, State regulatory authorities and consumer groups. Because of the range, number and complexity of these comments the Commission was unable to issue a final rule within the prescribed time limits and issued on May 8, 1979 (44 FR 29102) a Notice of Intent to Act in promulgating final regulations by May 30, 1979.

The Commission has considered carefully all of the testimony and all of the written comments received on its Notice of Proposed Rulemaking, including the 60 or more comments that were filed as many as two weeks after the close of the comment period.

The procedure which we have followed is, we posit, in more than substantial compliance with the requirements and spirit of the Administrative Procedure Act and any other applicable provisions of law, as well as the requirements of elementary fairness and good sense.[1]

Basic Determination

Upon careful review, we have concluded that the basic concept of the proposed rule was correct, although we have been persuaded to limit many of the specific data requirements originally contained therein.

The Joint Explanatory Statement of the Committee of Conference succinctly summarizes at page 86 the general purpose of section 133:

> The conferees intend that good information with regard to costs of providing service must be readily available on a timely basis to everyone concerned.

In preparing its rules under section 133, the Commission was faced with certain key questions as to what would constitute good information readily available on a timely basis. Those issues include: The nature of the cost data to be reported (i.e., whether accounting, marginal or both costs should be required); the extent of reporting (i.e., whether raw data or calculations should be required); and the format for reporting (i.e., whether information should be supplied in Form 1 or in a discrete form for section 133 alone. The initial discussion in this Preamble focuses on these three issues. The Commission has also undertaken a section by section analysis of the comments, keyed to the provisions in the proposed rule and has indicated what position it has adopted in the final rules.

Accounting or Marginal Costs—Legal Issues

Several commentators, mostly utilities, maintained that to require marginal cost data would go beyond the minimum requirements of section 133 since that section of PURPA does not contain any explicit reference to marginal costs or marginal cost pricing. One of these commentators [2] further asserted that "the Commission lacks the statutory authority to compel the submission of marginal costs." This same commentator [3] also argued that it was "reasonable" to assume that when it used the term "costs" in Title I, Congress intended reference to the industry's understanding of the term as referring to embedded costs or fully allocated costs.

In the proposed rules, we interpreted the obligation to insure that "good information with regard to [the] costs of providing service * * * be readily available on a timely basis to everyone concerned * * * " to require the gathering and reporting of both marginal and accounting cost information. Paragraph (a) of section 133 lists four broad categories of information that are to be required under this rule, and then states: "Such rules shall provide that information required to be gathered under this section shall be presented in such categories and in such detail as may be necessary to carry out the purposes of this section." The Commission interprets this as providing considerable latitude for the exercise of its judgment, including the authority to require both accounting cost information and marginal cost information.

It is true that Title I of PURPA does not use the words "marginal costs." However, Title I does not specifically mention accounting or embedded costs either. We do not dispute that this Commission and various State regulatory commission have typically used the term "costs" as synonymous with embedded or fully allocated costs. However, the legislative history of Title I of PURPA suggests that Congress wanted State regulatory authorities and non-regulated utilities to conduct a

---

[1] We specifically reject the comments made in a late filing (on behalf of Appalachian Power Company and eleven other utilities) which assert that this final rule violates Executive Order 12044. Executive Order 12044 requires that the public be given at least 60 days to comment on any proposed "significant regulations" and that, if the additional economic impact of the regulations will be equal to or greater than $100 million, the agency prepare a comprehensive regulatory analysis assessing the cost of the program and alternative approaches which could minimize its adverse impact on the economy. Executive Order 12044 does not purport to bind independent regulatory commissions acting as agents of Congress. However, the Commission has acted on its own initiative in full accord with the spirit and intent of this order. Utilities have had full opportunity to comment in the entire rulemaking process (not merely on specific regulations) with full understanding of its foundation and evolution. Moreover, we have sought to ascertain the cost of compliance, and to choose cost minimizing strategies wherever possible. See, for example, the discussion at pages 14 through 16 and 66 and 67. Given the mandatory time for promulgating these rules, the Commission could not submit to a paralysis of analysis that would violate its specific statutory obligations under section 133.

[2] See the comments filed on behalf of the Edison Electric Institute (EEI) and Individual Members of the Utility Regulatory Analysis Program, April 6, 1979, Part II, pages 1 and 3. The same assertion is later reiterated as a subtitle heading "Elementary Rules of Statutory Interpretation do not Permit the FERC to Require Marginal Cost Information under Section 133."

[3] See EEI comments, Part II, page 3.

thorough reevaluation of retail rate structures. State regulatory authorities and non-regulated utilities cannot begin to make decisions on the issue of whether marginal or embedded costs are more relevant for utility cost of service calculations unless they are provided information showing what the numbers look like under the two approaches. The Commission will not interpret section 133 so as to bar the reporting of marginal cost information and thus hinder such an inquiry.

Accounting or Marginal Costs—Policy Considerations

We also received a variety of policy and procedural arguments against the marginal cost reporting requirement. Several commentators urged us not to set forth data requirements but instead to accept as sufficient for complying with section 133 whatever information is currently supplied to State regulatory authorities. Others argued that it would be duplicative to require both accounting and marginal cost data, and that the utility or its State regulatory authority should be allowed to choose the appropriate type of data necessary for performing cost calculations.

It is our belief that Congress included section 133 in PURPA to ensure the availability of adequate cost and load data in all states. The regulations would not comply with the intent of Congress if they simply required the submission of whatever cost of service information is currently supplied to the relevant State regulatory authorities.

Many of those who objected to requiring marginal cost data imputed to the industry a lack of familiarity with marginal cost concepts and contended that marginal cost calculations were imprecise and subject to considerable speculation. These commentators argued that accounting cost data are more familiar to the industry and would therefore be more reliable.

The contention that industry is not familiar with marginal cost methods appears overstated. We estimated that marginal cost studies have been initiated or completed for approximately fifty of the one hundred and ninety utilities that will be required to comply with the section 133 reporting requirements in November 1980. Nor do we agree that accounting cost calculations will necessarily be more reliable. We do not dispute that accounting or embedded costs have been the industry norm for many years. However, such costs have not been used extensively for determining time differentiated costs. Section 133, in contrast, emphasizes the need to determine how costs differ by time of day and season of year. No present methods for determining time differentiated accounting costs are very advanced. As one respondent commented, "The time differentiation of accounting costs, as you know, is probably subject to [as] much uncertainty and debate at this point, as are most of the aspects of the marginal cost studies."[a]

Calculations or Raw Data

In preparing its rules under section 133, the Commission recognized that it had the discretion to require only raw information which could then be used as the basis for calculating costs by costing periods, by customer group and by voltage level or to require calculated costs for such functions and customer groups. The question was raised of whether the reporting requirements should have been limited to raw data or should also have included calculated costs. In its Notice of Proposed Rulemaking the Commission recognized that the information must be calculated in order to be useful and posed the question of where the burden of such calculations should lie: with the utility providing the information or with each of the potential users of the information.

Over a third of the participants in this rulemaking addressed this question. Several indicated that the decision should be left to either the discretion of the utility or to the relevant State regulatory commission. Those arguing against supplying more than raw information asserted that the benefits accruing from such calculations would not outweigh the associated expenses and emphasized that such expenses would ultimately be borne by ratepayers. Those supporting the requirement that utilities submit calculations generally argued that it would be easier and less expensive for the submitting utility rather than outside parties to make the calculations.

Under the final rules, the Commission has required the submission of both raw information and calculations. The Commission believes that there are several advantages to requiring both raw information and calculations. First, the availability of calculated costs will lead to more informed participation by various intervenors in retail rate proceedings. We agree with one comment that many State regulatory commissions "do not currently have the expertise necessary for conducting in-house cost of service studies * * * ." The resources of environmental and residential consumer groups are generally even more limited. One commentator indicated in this regard: "We cannot overemphasize the importance of requiring the utilities to complete the summary table * * *. Limiting the utilities' responsibilities to the compilation of raw data would restrict the ratesetting process to those groups able to hire expensive consultants before intervening in a rate case [and] * * * would tend to exclude consumer and environmental groups from the ratemaking process * * *."[b]

If intervenors and State commission staffs do not have ready access to cost of service information, in a manageable form, the quality of the deliberation will suffer or the proceedings will be delayed until the data become available to all parties. We would be remiss if we promulgated regulations which produced either result.

A second advantage of having utilities perform calculations is the likelihood that confusion about what the data actually means, in the understanding of the utility, will be minimized. One utility commented that "misinformation and misunderstanding will be reduced with the utilities performing the marginal cost studies".[c]

A third advantage to such calculations is that they avoid unnecessary duplication of effort. Not every calculation is subject to dispute in a typical rate case. There are often broad areas of agreement between the different parties in a rate proceeding. If the reporting utilities perform certain calculations, State commissions and intervenors can focus their more limited resources on controversial and disputed areas.

The fourth advantage is that other users of the information will have a better opportunity to understand the unique circumstances of the particular utility. The calculation of time differentiated rates, based on either accounting or marginal costs, is a relatively new area for both the industry and State regulatory commissions. We have tried to draft regulations that would accommodate calculation of time differentiated costs based on any one of the several principal approaches. Each utility's particular circumstances will suggest the selection of one approach as

[a] See comments of the Public Service Company of New Hampshire at the Cambridge public conference.

[b] Comments of the Florida Public Service Commission.

[c] Comments of the Environmental Defense Fund. The contrary view was advanced by several representatives of low-income interests and by ELCON.

[d] Comments of Detroit Edison Company. See also the comments of Ernst and Ernst.

preferable to another. After they have performed such calculations "utilities will be in an excellent position to suggest improvements." [7]

One commentator strongly objected to requiring calculations and argued that:

> * * * an information gathering procedure which allows the utility to select marginal and embedded cost methodologies rather than providing raw information is necessarily inconsistent with the purposes of PURPA. First, it allows the utility to define and structure the raw materials for ratemaking proceedings to its own purposes. Intervenors will only be able to derive the raw information necessary to construct contrary positions by "unbundling" the utility cost study to get at its premises and raw data.[8]

A different commentator, representing low income residential customers, also objected to the calculation requirement, contending that it would only serve to cut off "a full review of the issues involved".[9] We disagree that the calculation requirement as provided would serve to cut off debate on controversial issues.

We do not intend that raw information be hidden within the cost calculations although it appears that the regulations as proposed might arguably have permitted such a possibility. (See §§ 290.501(d) and 290.502(d).) The final rules are specifically designed to emphasize that all of the accounting cost, marginal cost and load information (specified in Subparts B, C and D) must be provided separately from and in addition to whatever cost calculations are developed in compliance with Subpart E. Therefore, an intervenor wishing to dispute the Subpart E calculations will not have to "unbundle" any calculations to gain access to raw information. Utilities will have the discretion to choose whichever method they deem appropriate for their system. However, if an intervenor disagrees with the method selected, the information necessary to develop alternative calculations will also be available.

In summary, requiring the calculations will provide a common point from which all parties can commence an analysis of rate design issues. Requiring that the supporting raw information also be provided will assist those who wish to challenge the assumptions underlying the chosen cost methodology or to propose a different methodology.

[7] See the comments of Detroit Edison Company.

[8] See comments of Electrical Consumers Resource Council (ELCON).

[9] Several other organizations representing similar constituencies strongly supported requiring calculations. See, for example, the comments of Legal Aid of Missouri, Prairie State Legal Services, Inc. and the Ohio Association of Community Action Agencies.

The Commission recognizes that requiring both raw and calculated information imposes certain costs on the reporting utility, at least if it has not previously conducted marginal cost studies. At each of the public conferences we asked for estimates on the cost of supplying marginal cost data and on the cost of preparing a marginal cost study. The purpose was to provide the Commission with an informed basis to adjudge the reasonableness of any such requirement. The estimates of initial cost, as provided by utility managements, ranged from $40,000 to $856,000. Most estimates fell in the $50,000 to $150,000 range.[10] The average electric operating revenues in 1977 for the 258 utilities covered by section 133 of PURPA were approximately $248 million. This implies that the additional cost incurred to comply with Subparts B, C and E will typically range from 0.02 to 0.06 percent of electric operating revenues. The Commission believes that these costs are not unreasonable in light of the potential benefits to be gained in providing all sides—utilities, large industrial customers, residential users, *et al.*—with full opportunities to participate, on the basis of good information, in the consideration of electric rate issues.

In addition to the question of cost calculations proposed under Subpart E, we solicited comments as to whether we should require that utilities calculate marginal energy costs and annual carrying charge rates. With regard to the question of whether utilities should be required to report calculated marginal energy costs, as specified in § 290.303, or whether it is reasonably possible for users of the reported raw information to calculate those costs from the raw information, the comments followed essentially the same pattern as those regarding the calculations specified in Subpart E. With regard to whether or not utilities should be required to submit calculated annual carrying charge rates as specified in § 290.307, a majority of those responding indicated that they preferred that calculations be required. Most did not strenuously object to providing raw information to support those calculations.

For those reasons discussed regarding calculations in Subpart E, the Commission will require the calculation of marginal energy costs and annual carrying charge rates in the final rules.

[10] See the written comments of Utah Power and Light, Tampa Electric Company, Florida Power Corporation and City Public Service Board of San Antonio, Texas, Massachusetts Electric Co., Public Service of Colorado, Central Power and Light Co., Central and Southwest Corp., Pacific Gas and Electric Co., and Consumers Power Company.

These are necessarily rough estimates, subject to errors in both directions. For example, the estimates may be too low because some utilities may have simply estimated the cost of completing a marginal cost study without taking into account that Subpart B may require data that would not be used in their own marginal cost studies. On the other hand, some of the estimates are probably too high because the data requirements in the proposed version of Subpart B were more extensive than those which will be required in the final version of Subpart B. Furthermore, these are estimates of initial cost. The cost estimates for subsequent filings are, in almost all instances, as much as 50 percent lower.

Format for Collection of Raw Information

In the Notice of Proposed Rulemaking, the Commission solicited comments as to whether an entirely new form or a modified FERC Form 1, already required to be filed by a number of the utilities required to report under section 133, should be used for the submission of information.

Based upon comments[11] and its own evaluation, the Commission has chosen not to modify Form 1 but rather to create a new form. To the extent that information already required by FERC Form 1 is included in the filings required by section 133, the simple transfer of that information from Form 1 to the new form should be easily accomplished.

The Commission was concerned that modification of Form 1, which presently serves a useful accounting function, would create confusion for both utilities and potential users of the information submitted under section 133. In addition, many utilities indicated that modification of Form 1 would require substantial modification of programs designed to comply with its present requirements.

Subpart A—Coverage, Compliance and Definitions

§ 290.101 *Coverage.*

The language of both the proposed and the final rule tracks the statutory

[11] Most of the commenting parties expressing a preference for utilization of a modified Form 1 cited a concern over the burden of providing duplicative information. The parties favoring modification were: Indianapolis Power and Light, Northern States Power Co., Texas Power and Light Co., Central Illinois Public Service Co., United Illuminating Co., Kansas Gas and Electric Co., Massachusetts Electric Co. and Narragansett Electric Co., Texas Electric Service Co., Carolina Power and Light Co., Climax Molybdenum Co., Northeast Utilities, Florida Power and Light Co., Arkansas Power and Light Co., U.S. Office of Consumer Affairs, El Paso Electric Company.

The commenting parties opposing a modification of Form 1 were: Middlewest Service Company, Florida Public Service Company, West Texas Utilities, Puerto Rico Water Resources Authority, Pacific Power and Light Co., Publicly-Owned Systems, American Public Power Association, Middlewest Services Co., Georgia Power Co., Seattle City Light, Pennsylvania Power and Light Co., Central Louisiana Electric Co., and National Rural Electric Cooperative Association.

language of section 102 of PURPA in designating what utilities will be required to report under Part 290. A utility would be required to report beginning in the first even-numbered calendar year not less than two years following the first year (after December 31, 1975) in which it had the requisite volume of retail sales but no earlier than 1980. Such utility will also be required to report biennially for all future years even if its volume of sales in those years falls below the statutory threshold. Although the Secretary of the Department of Energy is required under section 102(c) of PURPA to publish a list of the covered utilities, omission from this list will not relieve a utility covered under § 290.101 from the reporting requirements of Part 290.

A number of smaller utilities stated that 500 million kilowatt-hours annual retail sales is too low a threshold for coverage. They argued that the cost of compliance is unfairly burdensome to smaller utilities, and is proportionately higher for them than for large utilities.[12] In addition, some municipal utilities and rural electric cooperatives argued that the administrative ratemaking procedure applicable to them is such that the information required under the proposed rules would serve neither the purposes of section 133 nor any other useful purpose.[13]

The coverage of section 133, as a part of Title I of PURPA, is stated in section 102 of the Act. The Commission does not have authority to change that coverage. We observe further that the purpose of section 133[14] is equally applicable to large and small utilities. We are concerned, however, about the effect of immediately imposing this new reporting requirement on small utilities. Therefore, we have included a special two year extension for utilities having annual retail sales of less than one billion kilowatt-hours. Such utilities will be relieved from reporting now or at any future date that information which they would otherwise be required to report in 1980. We expect that in this two year period before the first filing is required, these small utilities will be able to make the managerial and technical preparations required to meet the requirements of this part as economically as possible. We also expect that the two year period will provide an opportunity for some small utilities to establish joint load research programs so as to reduce the costs of compliance for each participant. This extension is granted for such good cause and is contained in § 290.102(d).

Several utilities[15] argued that no useful purpose will be served by applying the requirements in Part 290 to them. The Commission has granted such generic extensions and exemptions in this part as it deems necessary and would expect such utilities to seek any additional relief through the exemption and extension procedures provided in Subpart F.

The Tennessee Valley Authority suggested "a special reporting procedure whereby an electric power supplier, such as TVA, which is both a covered electric utility within the meaning of PURPA and the sole source of power at wholesale for an integrated system of other electric utilities subject to the reporting requirements of section 133, may file a consolidated report for itself and for its covered distributing utilities. Such a provision would be especially appropriate in cases in which the wholesale supplier designs the resale rates applied by the distributing utilities."[16] The Commission accepts this suggestion and has embodied it in § 290.102(c) of the final rule.

§ 290.102 Compliance.

The proposed rule established when and for what periods of time information specified in Subparts B, C, D and E were to be reported and the manner in which information was to be provided to the public.

§ 290.102(a) Information gathering and filing.

Comments were received from a number of utilities objecting to the burden of providing copies of filings for public inspection at their own offices, and suggesting that State regulatory agencies or this Commission perform this function. Other utilities requested that the rule state that they would not be required to bear the cost of providing copies to requesting parties.[17]

We believe that public access to the information in filings under this rule is as important as the quality of the information reported. Although providing for public inspection and copying may require additional public information resources for some utilities, we believe this is well justified by the importance of the information. Therefore, we continue to require that copies be available at each utility's principal offices. We agree with the comments regarding cost of reproduction, and have made such modification in the final rule.

§ 290.102(b) Time of filing and reporting period.

There were many comments on this paragraph of the proposed rule. Most recommended changes to either the filing dates or the six-month staleness limitation so as to encourage or at least permit use of the most recent calendar year as the reporting period.[18] We have adopted this approach in § 290.103(b) of the final rule and have further provided in § 290.103(c) for the case in which a utility has recently gathered information in connection with a retail rate proceeding. If information so gathered is based on a reporting period reasonably near the "most recent calendar year," it serves no interest to require the utility to do additional data gathering and calculations to comply with our requirements. We will, therefore, permit the alternative submission of the equivalent information.

We have changed the biennial filing date from November 1 to May 31 for filings after that required in 1980 so as to improve the currency of the calendar year data in each filing.

§ 290.102(c) Filing of information at the time of application for a rate change.

The proposed rule included a requirement for gathering and filing information specified in Subparts B, C, D and E at the time of making an application or proposal for a rate increase. A number of commentators[19] objected to this requirement on the grounds that it is either not required or prohibited by section 133 of PURPA. The Commission agrees that section 133 does not specifically require gathering and filing of cost information more frequently than every two years. However, the Commission clearly was given the authority in the first sentence of section 133(c) to require such additional filings if it deemed them appropriate. Considering the purposes of section 133, it may be reasonable to

[17] See, for example, comments of Puget Sound Power and Light Company.

[18] See, for example, comments of the Detroit Edison Company and of the Florida Public Service Commission. Approximately twenty other utilities and commissions made this same suggestion.

[19] See comments of the NRI, Part II, Inc., Reed, Lamb, Lesby and MacRae and others.

expect that the greatest need for the cost information by regulators and others will occur at the time of a proposal for a rate change. If a concurrent gathering and filing is not required, the question arises as to the usefulness, in the rate proceeding, of the most recent cost information filed pursuant to these rules. With regard to this, it seems clear that the needs most likely to be met by information filed under these rules will relate to consideration of rate structure rather than rate level. The currency of data is certainly an essential factor in addressing questions of rate level, but tends to be less important in considering rate structure, because the relationships among costs tend to persist over longer periods of time even though the overall level of costs may change significantly. A regular biennial filing requirement will permit utilities to schedule resources for this task on a regular basis, integrated with related reporting requirements, so as to avoid costly variations in data-related workload.

There is no doubt that the rate increase filing requirement as stated in the proposed rule would have added a significant reporting burden to the requirement that utilities make information filings every two years. On balance, the Commission concludes that it will not require a separate gathering and filing of the data specified in Subparts B, C, D and E at the time of a proposed rate increase. The purposes of section 133 will be served adequately by the biennial filing prescribed in the final rule. The Commission believes that the public access provisions of § 290.102 are sufficient so that no additional publication is necessary at the time of any rate increase application.

The issue of what information is needed at the time of application for a rate increase is one that the Commission will continue to review as a part of the ongoing effort to improve these rules.

§ 290.103 Form of the information.

The question of whether to use Form 1 or other existing forms as vehicles for submissions under this rule has previously been discussed. It is the Commission's intention to provide suitable standard forms for certain items of data required under this rule and to prescribe the general acceptable forms of presentation for the remainder. The rule as proposed has been retained and appears in § 290.102(b).

Additional Provisions

The Commission has added several additional provisions to this subpart:

§ 290.102(c) Consolidated reporting by certain wholesale suppliers.

§ 290.102(d) Extension for small utilities.

§ 290.104 Cost of compliance.

§ 290.105 Definitions.

Sections 290.102(c) and 290.102(d) have been discussed above. The question of proper accounting for the costs utilities incur in the gathering and filing of information under these rules was not addressed in the proposed rule. The Commission has considered this question and has determined that, since the information collected involves only retail service, the corresponding costs should be treated as an expense of regulation to be recovered through retail revenue. Accordingly, as indicated in § 290.104 of the final rule, these expenses will not be allowed by the Commission in establishing wholesale rates.

In comments on the proposed rule, a number of parties requested more complete definition of certain terms. Others comments pointed out the possible misapplication of the rule as proposed, particularly with respect to jurisdictional questions. Section 290.105 has been added to the rule and provides definitions for the following:

State Regulatory Authority. The definition of this term is taken directly from paragraphs 15, 16 and 17 in section 3 of PURPA.

Retail Regulatory Jurisdiction. This definition is included in response to comments [20] indicating that separate reporting for each State regulatory authority as defined above would have been overly burdensome because original jurisdiction is assigned to municipalities in the State of Texas by the laws of that State. The definition identifies those subdivisions of regulatory authority for which separate reporting will be required for certain items of information, particularly load data.

It was not intended in the proposed rule that separate reporting of load or other data would be required relative to operations in political subdivisions smaller than states. The definition implements this limitation on separate reporting.

Predominant Retail Regulatory Jurisdiction. Several comments [21] suggested that a more complete definition was needed for this term, which is used in several sections of this part. For example, it is used in § 290.307(a)(1) to specify what method is to be used for the calculation of annual carrying charge rates.

Voltage Level. Both the proposed rule and the final rule require reporting of certain data by voltage level. A separate definition of this term has now been provided. [22]

Typical Day Costs and Loads. This definition was originally included in Subpart D on Load Data, and is discussed below.

Subpart B—Accounting Cost Information

General

As proposed the rule required the submission of the following information in order to develop fully allocated cost of service studies: rate base information including plant, depreciation, prepayments, accumulated deferred income tax, materials and supplies, electric plant held for future use, nuclear fuel material and construction work in progress data; operating expense information including operation and maintenance expense and tax data; and rate of return information. This accounting cost information coupled with the load information is intended to permit the development of fully allocated accounting cost of service studies under a variety of methods currently in use.

About one third of the parties submitting comments on the proposed rule made specific comments on Subpart B. In general, the comments were of a technical nature. The only policy matter raised was the concern of a number of publicly owned utilities that the account structure (the FERC Uniform System of Accounts) on which Subpart B is based is not completely applicable to them, and that they should be permitted to report information based on their own account structure. [23] The data in Subpart B have been referenced to the FERC Accounts in order to achieve as much uniformity as possible in reporting. It is recognized that publicly owned systems do not keep their books in accordance with the FERC Uniform System of Accounts. The rule requires the public systems to follow FERC accounts only to the extent practicable.

§ 290.201 Rate base information.

Section 290.201 of the proposed rule required balances to be reported at the beginning and end of the reporting period together with the average of the thirteen monthly balances, if available.

---

[20] See, for example, the comments of the Public Utility Commission of Texas.

[21] See the comments of the Public Service Company of Colorado.

[22] See the comments submitted on behalf of Appalachian Power Co., *et al.*

[23] See the comments of Publicly Owned Systems.

Various comments [34] were received stating that the utilities do not close their books at the end of each month and that such a requirement would be costly and burdensome. Additional commentators [35] indicated that only end of reporting period data should be shown or that the data should be reported in a manner consistent with the rate base requirements of the State regulatory authority. The reporting of beginning and end of year balances appears to provide sufficient information to allow flexibility in preparing cost of service studies when coupled with a requirement that the average of the thirteen monthly balances be provided if required by the State regulatory authority. Accordingly, the regulations have been revised to require averaging of the thirteen monthly balances only if required by the State regulatory authority.

Section 290.201(a) of the proposed rule required plant data to be provided for various specified accounts and for any sub-accounts. Numerous comments were received questioning what was meant by sub-accounts. These comments indicated that a wide variety of sub-accounts are available for both plant accounts and operating and maintenance accounts. The comments [36] stated that the sub-accounts are utilized for such things as internal accounting cost controls and argued that the requirement to report such sub-accounts would be unduly burdensome without countervailing benefits unless specific sub-accounts were named for which information would be required. The requirement for sub-account data was originally proposed for added flexibility in preparing fully allocated cost of service studies. Such data may be of assistance in the functionalization, classification and allocation of costs, and the Commission originally intended to require detailed information in the event that a complete "raw data" approach was adopted. Since the final rule requires detailed calculated cost of service data in Subpart E, with appropriate supporting backup information, the amount of detailed "raw data" required in Subpart B is no longer as great. Submission of sub-account data is not now considered necessary in order to perform an independent cost of service review of the utility's analysis submitted in Subpart E, and the rule has been revised accordingly by deleting the reference to sub-accounts.

Section 290.201 (a)(2), (a)(3) and (a)(4) of the proposed rule required: A functional breakdown of distribution plant into demand and customer related components and an explanation of the functional allocation used; a breakdown of demand related transmission or distribution plant assigned different service levels and an explanation of this allocation; and a breakdown of all plant directly assigned to customer classes. Various comments [37] indicated that such information is not directly available from accounting records and that such information must necessarily be calculated or estimated. Although Subpart B of the proposed rule was entitled "Accounting Cost Information," the Commission realizes that some of the requested data will have to be derived from data in the books of the reporting utilities. In developing fully allocated cost of service studies, some calculations and manipulation of accounting cost data are necessary, and, as numerous non-utility respondents indicated, these initial calculations are best done by the reporting utilities. At least one commentator suggested that distribution costs be broken down in even greater detail. Upon reconsideration, these particular data requirements are probably most logically placed in § 290.501(b) of Subpart E. Accordingly, the rule has been so revised, leaving it to the utility to develop support for the costs assigned to various classifications, functionalizations and voltage levels.

Section 290.201(b) and (c) of the proposed rule required depreciation data by plant account. Many commentators [38] correctly pointed out that the depreciation accounts are not kept in this manner. These comments state that such reporting would require a substantial revision of current accounting practices or would require the calculation of estimated amounts. Substantial modification of current accounting practices should not be necessary for the purpose of gathering sufficient information to develop fully allocated cost of service studies. The rule has been revised to require depreciation data to be shown by primary function as currently required under the FERC Uniform System of Accounts.

Section 290.201(d) of the proposed rule required certain cash working capital information. Although this section has not been changed, it has been moved to § 290.501(b) of Subpart E because it is more logically related to the utility's method of developing its calculated accounting costs.

Section 290.210(e) of the proposed rule required various information with respect to construction work in progress for each project under construction. Several utilities stated that the data requirement was too extensive in that a great number of projects are under construction from time to time, many of which are relatively small. Various commentators [39] suggested that, if retained, the data be limited to major production and transmission projects. Others commented that the data be combined into functional groups or that dollar thresholds be established. These suggestions are incorporated in the final rule. The detailed information is required only for the major generation and transmission projects, whereas the remaining projects may be grouped by primary function and the account balances reported for each of the primary functions. Other comments suggested that CWIP be reported only if permitted to be included in rate base by the State regulatory authority. Since the data requirement as modified should be readily available, it has been retained to permit flexibility in the development of cost of service studies. The comments indicated that § 290.201(j) inadvertently omitted certain of the nuclear fuel accounts. This has been corrected in § 290.101(f) of the final rule.

§ 290.202 Operating Expense Information.

Section 290.202 (a)(2), (a)(3) and (a)(4) of the proposed rule required various functional and classification breakdowns of operating and maintenance expenses similar to the plant accounting data. Consistent with the treatment of those items indicated above, this data requirement has been transferred to Subpart E.

Section 290.202(a)(5) of the proposed rule required the utility to estimate the monthly fuel expense for each of the costing periods determined in § 290.308 in Subpart C. Various comments [40] indicated that such data are not readily available from accounting records. A few comments indicated that more extensive data are necessary for these estimations such as hourly average fuel expense for all hours of the year and the costs of purchased power. This data requirement is similar in some respects to that contained in § 290.303 of the final rule regarding marginal energy costs.

---

[34] See comments of the New York State Electric and Gas Co. and Central Hudson Gas and Electric Co.

[35] Comments of the Pennsylvania Power and Light Co.

[36] For example, comments of the Philadelphia Electric Co.

[37] For example, comments of Georgia Power Co. and Public Service Electric and Gas (NJ).

[38] For example, Pennsylvania Power and Light Co., and Arizona Public Service Co.

[39] For example, Iowa-Illinois Gas and Electric Co.

[40] For example, Houston Lighting and Power Co.

The section has been amended in a similar manner. The utility will be required to report estimated hourly average energy costs (including both generation and purchased power) per kilowatt-hour for total retail load and for all firm wholesale load for a typical weekday, a typical weekend day and the system peak day for each month of the reporting period. Although this will not require data for all hours of the year, it will permit the reconciliation to average monthly or annual energy costs and permit the development of time-of-day rates. Since estimated data are all that are required, substantial changes in the accounting for fuel expenses will not be required.

§ 290.203 Income and revenue related tax information.

Section 290.203 of the proposed rule required the utility to collect certain information to permit the calculation of income and sales taxes in costs of service. Various comments[31] requested clarification as to what was intended by the term "sales" tax. The reference to "sales" has been deleted from the final rule and has been replaced with the term "revenue related." This makes clear that the information required concerns those taxes which are based on the utility's revenue and not those taxes paid for "sales" in connection with utility purchases of goods or services. Some respondents requested clarification as to whether gross receipts or franchise taxes should be included. Gross receipts are clearly revenue related. Franchise taxes should only be reported if they are computed based on revenue.

§ 290.204 Rate of return information.

Section 290.204 of the proposed rule required the reporting of rate of return information averaged for the reporting period. Some comments indicated that only end of year data should be used. Other comments stated that the data should be consistent with State regulatory authority requirements. One comment [32] stated that this section should follow exactly the format provided in 18 CFR 35.13 (filing requirements for wholesale rate increase applications). There were also comments suggesting that a requirement should be added for reporting the estimated cost of common equity and the book value of common equity. Several publicly owned utilities commented on the need for recognizing their financial structure in relation to this section. The rule has been revised to require both beginning and end of year balances. This will permit the use of end of year data or permit the calculation of average reporting year requirements, if appropriate, in the particular jurisdiction. The requirements of § 35.13 have not been used because those data relate to the Commission's wholesale jurisdiction. The publicly owned systems will be free to conform their reporting to their financial structure. Like other portions of the accounting cost section, it is recognized that the publicly owned systems will be required to conform to the specified FERC Uniform System of Accounts only to the extent practicable, recognizing their separate accounting conventions. The accounting cost section does not include the estimated cost of common equity because such information is more appropriately solicited in Subpart E as backup for the utility's calculated costs.

A new § 290.205 has been added to Subpart B, which parallels § 290.306 for marginal costs. It requires the utility to design and report costing periods which group together contiguous hours of similar accounting costs in an administratively feasible manner.

Some comments [33] requested additional information in order to permit more accurate cost of service analyses, such as allowance for funds used during construction or the operation of fuel adjustment clauses. Because these data items were substantially incorporated in the proposed rule, we do not believe that any further modification in the final rule is necessary.

Subpart C—Marginal Cost Information

One general objection raised against the collection of marginal cost information was that it "would lead to anti-competitive price differentials". One respondent [34] argued that our "proposed rule fails to consider the serious anti-competitive impact that could result from the piecemeal application of marginal cost based rates by electric utilities throughout the United States."

While we are sympathetic to concerns about "anti-competitive price differentials," we have difficulty following the line of reasoning presented. Section 133 requires the establishment of rules for the collection of cost information. We have responded by requiring both accounting and marginal cost information. Neither section 133 nor any other part of PURPA gives us authority to establish retail rates. That authority lies firmly with State regulatory commissions and non-regulated utilities. Imposition of certain data requirements in these regulations does not require that the commissions or non-regulated utilities employ a specific methodology in setting retail rates.

Even if a State commission or non-regulated utility were to adopt time differentiated rates based on the marginal cost information produced by the section 133 regulations, it does not follow that the establishment of such rates will necessarily lead to "anti-competitive price differentials." Much would depend on the particular circumstances. Among the factors to be considered would be whether there is competition for the loads of customer groups subject to the different rates and whether the partial availability of time differentiated rates based on marginal costs was not cost justified. For example, it is quite possible that time differentiated marginal cost based rates may be initially offered only to one customer group because the metering costs of general implementation would be too high. In that situation, the partial implementation of these rates would probably be cost justified. None of these issues was addressed in the comments; nor do we see how they could be addressed without reference to the specific circumstances of a particular utility.

The concern expressed is more appropriately directed toward time differentiated rates in general, and not just at time differentiated rates based on marginal costs. As the respondent noted, it is "incorrect and misleading" to associate "time-of-use rates and rates based on marginal cost as being synonymous." Time of use rates may be based on either marginal or embedded costs. It appears that once marginal cost rates are adjusted for the total revenue constraints they may look very similar to time differentiated rates based on accounting costs. One would then need to consider, among other factors, whether the potential for "anti-competitive price differentials" resulted from the sequential availability of time of use rates rather than from the cost calculations that were used to produce such rates.

Six utilities [35] expressed concern that some of the information required by the

[32] See comments of Houston Lighting and Power Co., General Public Utilities Service Corp. and Alabama Power Co.

[33] See comments of U.S. Office of Consumer Affairs.

[34] See comments of EEI and Middle South Services Corp. at the New Orleans hearing.

[35] See comments of El Paso Electric Company, Gulf States Utilities Company and joint Comment of Public Service Company of Oklahoma, Central Power and Light Company, Southwestern Electric Power Company and West Texas Utilities Company.

proposed rule might expose publicly held utilities to legal liability under the Federal securities statutes. Two concern appear to be involved. The first is that some of the material elicited by the proposed rule may be more conjectural and more speculative than is normally permissible under the securities laws. The other is that the public release of information of this sort may engender special difficulties when public offerings registered under the Securities Act of 1933 are being made or are about to be made.

These concerns stem from the commentators' interpretations of certain past pronouncements by the Securities and Exchange Commission (SEC). However, it is hard to imagine that those pronouncements were ever intended to suggest that compliance with one Federal law would result in the violation of another. Moreover, the comments in question are flawed by their failure to take account of the Securities and Exchange Commission's present position with respect to projections and related topics.

That position is stated in *Guides for Disclosure of Projections of Future Economic Performance*, Securities Act Release No. 5992, Securities Exchange Act Release No. 15305 (November 7, 1978), which points out that filings of the type here involved are compatible with the securities laws but that an affected issuer must, of course, be always mindful of its "obligation to assure the material facts concerning its financial conditions are promptly and fully disclosed and that the information submitted does not become misleading by virtue of subsequent events." [26]

The above-mentioned release also states that the SEC's prior position that section 5 of the Securities Act "would prevent issuers in registration from making projections or including them in their filings * * * is superseded.

What has thus far been said does not mean that the Commission regards the commentators' concerns as frivolous. The securities statutes embody basic public policies, but the policies can easily be reconciled with those reflected in PURPA and in this regulation.

To effect that reconciliation, the Commission suggests that filings made with it and with the Securities and Exchange Commission make appropriate note of the limitations of the material filed in response to the requirements of Part 290.

The Commission notes that the SEC is in accord with this view. Attention is directed to footnote 27 in that agency's aforementioned release of November 7, 1978 which reads:

> In this regard, issuers may wish to consider the appropriateness of clearly distinguishing such information from any projections already made, or clearly indicating that the information should not be considered as a projection for any purpose other than consideration by the requesting authority. In this connection, issuers may also wish to consider the appropriateness of filing a report on form 8-K, 17 CFR 249.308, under item 5, in which the furnishing of this information could be disclosed and the purpose of its submission and nature of its use clarified.

§ 290.301 General instructions for reporting marginal cost information.

The proposed regulations required that estimates of future costs be reported in constant year dollars. Two private utilities [27] requested that the regulations provide the option of reporting future costs in either constant (base year) or in current (expenditure year) dollars. They contended that many utilities produce estimates of future operating and investment costs only in current year dollars and that it would be uneconomical for them to revise their planning and budgeting procedures just for purposes of section 133 reporting. We found their argument persuasive and, therefore, have adopted a modified version giving utilities the option of providing future costs in either base year or current year dollars. However, under either option, it will be necessary to indicate the inflation factors used in producing the cost estimates.

One utility [28] observed that the § 290.301(b) requirement that "[a]ll historic costs shall be as recorded" was inconsistent with § 290.306(b)(1) requiring that "extraordinary and non-recurring" expenses be adjusted to typical levels. In light of this comment, this section now requires that historic costs be reported as recorded "except when an adjustment is specifically required."

§ 290.302 Generation cost information.

The proposed regulations required that data on certain cost and operating characteristics be provided for each existing generating unit and for each generating unit that is expected to come on-line during the next ten years. At least five utilities [29] indicated that some of the data items were generally available only on a plant basis. Several utilities [30] urged that the regulations be revised to allow for reporting at a more aggregated level. The data collected in paragraphs (a) and (b) are intended to be used principally in production costing models. Such models can be used to produce estimates of marginal energy costs and marginal generation capacity costs. Our review of these models indicates that cost and operating data are generally not needed on individual units and that reasonably accurate estimates of system marginal costs can be produced from data relating to groups of units with similar operating characteristics. Therefore, revised regulations allow for the reporting of aggregated information on "groups of generating units with similar operating characteristics." It should be noted that the regulations do not require that the units comprising a group be located at the same site. Where similar units are located at the same site, it may be possible to report the required information on a plant basis.

Several privately owned utilities [31] commented that the proposed regulations seemed to require that the data items listed in paragraphs (a) and (b) be supplied for each year of the ten years following the reporting period. It was argued that such a requirement was unnecessary and burdensome. We have tried to clarify this point in the final regulations. The data for existing generating units will be required only for the reporting period. The data for planned generating units will be required only for the first full year of commercial operation. In the case of existing units, § 290.302(c)(1) requires utilities to describe any changes expected at the time of filing, in engineering, regulatory, or economic conditions (apart from general inflation) that would significantly affect the values of any of the reported data items during the next five years.

More than 15 commentators, including utilities, State commissions and consumer groups, [32] filed detailed

technical comments on specific items in paragraphs (a) and (b). The comments pointed out that terms such as "normalized" and "typical operating conditions" were unclear. Some comments cited instances where the wording in the proposed regulation was inconsistent with definitions commonly used in the industry. In response to these comments, a number of technical changes have been made. These changes are described below.

Both a consulting firm and a consulting economist,[42] urged that the number of hours that a unit was connected to load be required as a data item. The consulting firm also suggested that the kilowatt-hour output of each unit be provided. We have adopted both suggestions because such data would provide useful information about a utility's dispatching procedures. We have also adopted the Department of Energy's recommendations for information on start-up costs and fuel use because such information allows for an independent analysis of unit dispatching. This is important because the actual or planned pattern of unit dispatching can significantly affect marginal cost calculations.

We have also added a requirement in § 290.302(c)(2) that the reporting utility provide a description of any economic, engineering or regulatory factors that interfered with merit order dispatching during the reporting period and that are likely to continue to do so in the future. This item was added because we saw evidence that the data items listed in paragraphs (a) and (b) were, by themselves, inadequate to allow someone outside the utility to simulate its operations for costing purposes.[44]

One utility [45] recommended that we limit the data submission on hydroelectric units to peaking hydroelectric units since only peaking units would be relevant to the calculation of marginal capacity cost. We did not adopt this recommendation since it was not intended that the data required in paragraphs (a) and (b) would be used only for the calculations of marginal generation capacity costs. As noted earlier, the information in these two paragraphs might also be used by intervenors to produce independent estimates of marginal energy costs. One commentator [46] urged that the fuel saving component of each planned addition be itemized. We did not adopt this suggestion because there was no indication that the value of this information exceeded the costs that would be incurred in collecting it.

The final regulations contain a new data requirement in § 290.302(e) which requires utilities to list "any publicly available reports, documents and forms containing information about the utility's planned additions to generating or transmission capacity which were supplied within the previous 18 months to regional reliability councils and to State or Federal regulatory agencies." This requirement was included so that intervenors and State commission staffs would be informed of other sources of information that could be useful in making marginal cost calculations.

Paragraph (e) of the proposed regulations requested cost information for a hypothetical minimum cost generating unit. Of the more than ten organizations [47] commenting on this paragraph, almost all indicated that they were uncertain as to what was being requested and, therefore, would have difficulty in complying with the requirement. In the final regulations we have clarified the meaning of this paragraph by using a modified version of suggested alternative language submitted by an economic consulting firm. [48] The suggested version would have required estimates of the net annual cost of expanding capacity for five different types of generating units. In our view, this requirement would be too burdensome. Instead, we have modified the suggestion to require that the net annual cost be estimated only for the generating facility or facilities most likely to be installed by the utility to meet increases in peak demand.

§ 290.303 Energy cost information.

Paragraph (a) of the proposed rules would have required utilities to report hourly marginal energy costs for the reporting year and for each of the next five years: in effect, more than 50,000 data items. Opposition to this requirement was virtually unanimous among the thirty seven utilities and State regulatory commissions commenting on this requirement. One State commission [49] recommended requiring data for typical days. Three utilities [50] made similar recommendations. Most of those who commented [51] took the position that good estimates of marginal energy costs by costing period could be derived from a much smaller data base. We concur with that judgment. The regulations have been modified to require estimates of hourly marginal energy costs for certain typical days for the reporting period and for the five following years. The regulations require, in addition, that if a utility has calculated marginal energy costs or system lambdas for hours other than those reported for the typical days, this information be made available upon request. At the request of several commentators,[52] the definition of marginal energy costs have been clarified.

Paragraph (c) of the proposed regulations allowed utilities to provide pool marginal energy costs as an alternative to specific company estimates of marginal energy costs. NARUC and three other commentators [53] all recommended that this information be required in addition to the company's own marginal energy costs. Two utilities [54] indicated that pool marginal energy costs may not always be readily available. We have adopted the NARUC recommendation. It seems clear to us that as more and more utilities move into centrally dispatched pools, the pool operating costs may become the relevant basis for determining company marginal costs. If a pool is centrally dispatched, it is not clear to us how the dispatching can take place in the absence of numbers that equal or approximate marginal energy costs.

Paragraph (f) of the proposed rule required the reporting utility to indicate "hours in which the marginal energy

[54] Consolidated Edison and Baltimore Gas and Electric.

cost is likely to be determined by the price paid for purchased power * * *." Two utilities objected to this requirement because of the difficulty in estimating when such hours will occur. Recognizing that such estimates cannot be made with certainty we had included in paragraph (f) the phrase, "likely to be determined," to indicate that the estimates will necessarily be informed guesses. We see no reason to modify this paragraph in the final regulations.

One utility [46] also urged that the energy adjustments required in paragraph (i) be expanded to specify how losses may vary by the location of the customer within the utility's service area. We view this suggestion as a possible refinement to energy loss calculations and note that there is nothing in our regulations to prevent a utility from making these additional calculations if it believes that such calculations are necessary for estimating marginal energy costs. The same comment applies to any other suggested refinements to data request. Our data requirements were designed to provide a core of information for marginal cost calculations. If a utility believes that better cost estimates can be produced using additional information or refinements to the required information we see nothing in our regulations that would preclude filing such information as supplementary material but see no necessity for further refinement in the regulations themselves.

§ 290.304 Transmission cost information.

Several major objections were raised to the proposed transmission cost information requirements. More than a dozen utilities [47] objected to the requirement that transmission investment, both historic and prospective, be estimated separating out replacement investments. They indicated that in many instances it is difficult to determine if a particular installation constitutes a new or a replacement investment. Recognizing that some utilities would have difficulty with this calculation, we have revised the regulation to give utilities the option of reporting transmission investment with or without replacement investments.

A second objection concerned our requirements for estimates of transmission investments projected ten years into the future. Many utilities [47] indicated that their planning horizon for transmission investments typically is limited to five years and that any information given beyond five years would simply be a trended extrapolation. We have, therefore, revised our regulations to require only five years of projections. These five years of prospective data combined with the ten years of historic data should be sufficient to permit estimates of marginal transmission capacity costs.

A third major objection concerned the requirement that a system map be provide showing existing and proposed generation sites and transmission facilities. Several utilities [48] objected that disclosure of such information would raise acquisition costs. If this is true, it would be an undesired and unintended consequence of our regulations. To minimize the likelihood of such a result, we have modified our regulations so that a utility need not show the specific location of a planned generating or transmission facility, if it believes that the disclosure of such information would raise acquisition costs.

A fourth objection concerned the requirement that project transmission operation and maintenance expenses be reported by account number. Several utilities pointed out that these projections are usually made by functional area and not by account number. Since in most instances the relevant marginal costs can be calculated from changes in aggregates, we have modified the regulations to allow utilities to report projected operating and maintenance expenses by totals rather than by account number.

A consulting economist [49] recommended that certain additional items of informations be collected: Additions to the transmission system by mile of line and size of line; separation of transmission investment into a demand and energy component; the calculation of payments received from other utilities for transmission services on a cents per kilowatt-hour basis; and the separating out of the AFUDC or CWIP components of transmission investment outlays. We have adopted two of these recommendations. Utilities will be required to report pole miles added at each principal transmission voltage level and to separate out AFUDC. It is our view that this information will be useful in making adjustments to marginal transmission capacity cost calculations. The other recommendations were not accepted because they were either method specific or refinements that go beyond basic data needs.

§ 290.305 Distribution and customer cost information.

Several major objections were made to the proposed distribution and customer cost information requirements. These objections generally parallel those that were made with respect to the transmission cost requirements. More than ten utilities [50] objected to the requirement that the replacement component of distribution plant investment be separated from overall distribution investment, both historically and prospectively. Most utilities pointed out that their records do not show such a separation and that this calculation would require a costly review of thousands of work orders. While information on the non-replacement component of distribution investment may be more useful for marginal costs, it is clearly not worth the cost burden that calculating it would impose on most utilities. We have, therefore, rewritten the regulations to give utilities the option of reporting annual distribution investment without separating out the replacement component.

A second objection related to the requirement that utilities provide five years of prospective information. Almost all utilities commented that the typical planning horizon for distribution investment and distribution operation and maintenance expenses is two to three years. Because it is our impression that projections beyond three years will simply represent extrapolations of existing trends, the regulations have been changed to require only three years of projected data. Futhermore, the projections on distribution operation and maintenance expenses have been modified to allow reporting by totals rather than by individual account number.

The item in this section which generated the most controversy was the request in paragraph (a)(3) for an estimate of a minimum distribution system. Some utilities expressed doubts as to whether such a calculation was relevant for a marginalist approach. One association [51] observed that the concept may be inappropriate for a system with

[51] APPA.

a substantial amount of underground equipment. Two commentators[62] objected that the calculation was specific to a certain method and asserted that the Commission should not endorse that method by including this item as a data requirement. As we indicated in the preamble of the proposed regulations, we believe that Congress did not intend that the Commission adopt or endorse a particular costing method in promulgating regulations under section 133. However, we do not think our inclusion of this item in any way represented an endorsement of a particular approach. The Commission has dropped this item from the regulations on the basis that, at this time, it does not wish to impose this reporting burden on the utilities. The Commission re-emphasizes that this action in no way precludes a utility from performing this calculation if the utility believes that the minimum distribution system concept is relevant to its costing exercise.

Paragraph (a)(5) of the proposed regulations required that estimates be made of the current cost of connecting a new customer to the distribution system for each customer class. Three commentators, including the Department of Energy,[63] argued that these estimates would be too aggregated to be of much use. The regulations have now been modified to elicit somewhat more detailed information.

§ 290.306 Other cost information to be reported.

Several minor changes have been made in the final regulations as a result of comments received on this section. At the suggestion of one group of utilities,[64] paragraph (b) has been modified to require separation of sales expenses "that can be attributed to specific customers or customer classes. In paragraph (d), a transposition in account numbers has been corrected.

§ 290.307 Annual carrying charge rates.

The proposed regulation required that the carrying charge rate reflect only four types of cost: Depreciation, return, income and property-related taxes, and insurance. Comments indicated that certain cost components should be dropped and other cost components added. One utility[65] advised that the regulations be written to provide more discretion to the reporting utilities. We have taken that advice and have given utilities considerable discretion regarding the calculation of carrying charge rates in the final regulation while requiring that they document in a clear manner the procedures and assumptions employed in deriving the carrying charge rates.

One commentator[66] inquired as to which agency is the "predominant regulatory authority" when a Federal and State commission are both involved. The term "predominant retail regulatory jurisdiction," which is the term now used in this section, excludes a regulatory body of the Federal government.

§ 290.308 Costing periods.

The proposed regulation required that costing periods be developed that could be used to implement "time differentiated pricing." One industrial consumer advocate[67] claimed that by including this phrase the Commission had overstepped its statutory mandate by moving from costing to ratemaking. We have removed the term from the final regulations. It should be recognized, however, that the periods used for costing will, in most instances, be the same as the periods used for pricing. At the suggestion of one economic consulting firm,[67a] we have added a sentence indicating that costing periods should be designed so as to group together hours of similar cost. We view this as a reasonable general prescription. By including this language, we hope to indicate that seasonal or daily differentials may not be justified when the cost differentials are insignificant.

Subpart D—Load Data

General

Comments on Subpart D of the proposed regulations were plentiful and very constructive, and many changes were made in this subpart to reflect those comments. The changes made were primarily to ease the burden of load research on utilities.

Costs of Load Research

The Commission, from the outset, expressed concern with the costs of compliance with the regulations promulgated pursuant to section 133. The item of major concern was the expenses associated with load research. Consequently, meter manufacturers were specifically invited to participate in the informal public conference held on December 4, 1978. The Commission was interested in obtaining information as to whether the manufacturers would be able to meet additional demand for meters in a time frame which would allow covered utilities to comply with a November 1980 filing date, the state of the art in technology, and the cost of meters and associated equipment. An informative presentation was provided by a representative of one manufacturer.[68]

In addition, in the course of the four public hearings, the Commission solicited from various utility representatives, comment as to the cost of conducting load research to meet the requirements of the proposed regulation. The cost figures provided ranged from $250,000 [69] to $4.5–$6.5 million.[70] Therefore, we have undertaken to minimize these costs, while simultaneously attempting to adhere to the Congressionally prescribed requirements for load data.

The two major changes were made in § 290.403(a), concerning for which electric customer classes load data would be required, and in § 290.403(c), concerning the accuracy standard for sample metering.

Customer groups to be reported

Section 290.403(a) of the proposed rule required load data collection for "each customer class for which there is a separate rate". Several utilities [71] commented that this requirement would require the collection of load data for too many rate classes. Conversely, several consumer groups [72] urged the Commission to require a more extensive breakdown of load data by income and usage levels within rate classes.

The rule as revised in § 290.404 requires in paragraph (a) that utilities report load data on a best estimate basis in 1980 and in each subsequent reporting period for residential, commercial and industrial use classes and for any rate class to which 10 percent or more of the system's retail kilowatt-hour sales are

made for any month during the reporting period, other than a group composed in whole or in part of residential, commercial or industrial users. Because data on master metered buildings composed of customers in more than one major customer class would not be useful to the determination of the loads for a single major customer class, the final rule requires utilities to exclude the loads in master metered mixed use buildings from the estimates for major customer class loads.

Paragraph (d) of the final rule specifies certain end uses for which load data are proposed to be required and indicates that the list of end uses will not take effect until the Commission makes a determination either to implement the list as proposed or to modify it. Under paragraph (c), utilities having separate rates for all or some of the specified end uses on December 31, 1980, would be required to report load data for any such rates on a sample metered basis beginning in 1982. Utilities having several separate rates for a single specified end use would be permitted to combine for reporting purposes all rates charged for that single end use, as in the case of a utility that charges different rates to communities because of differences in customer charges or in the initial block.

Utilities that do not have a separate rate applicable to one of the specified end uses would be required to report load data for each of the specified end uses on a best estimate basis in 1982 and on a sample metered basis beginning in 1984, since some time must be given for the utility to survey its customers served under a more general rate and separate out for sampling purposes the specified end-use customers.

The end-use groups for which the Commission proposes to require sample metering are:

(1) Residential space heating.
(2) Residential water heating.
(3) All electric residences.
(4) Commercial space heating.
(5) Commercial space cooling.
(6) All electric office buildings.
(7) Master metered multiple dwellings.
(8) Agricultural or industrial uses of process heat.
(9) Large (over 1,000 kilowatts) electric drive motors used in industry, such as in steel rolling mills.
(10) Irrigation.

The Commission has tentatively selected these end-use categories for separate reporting on a sample metered basis because: They have daily and seasonal variations that might be unpredictable without the aid of load research; they comprise a major portion of a system's on-peak loads; they represent uses frequently served under separate rates (and that presumably represent uses with distinct costs); or they cover the principal loads within each major retail customer class. Comments are specifically requested on whether the end uses identified satisfy these criteria sufficiently well to merit implementation, and, if not, for what other end uses separate reporting should be implemented. Recognizing that utilities must know as soon as possible what groups of end-use customers will require sample metering, the Commission, based on comments received on these categories, will determine by the end of August 1979, if the list of end-use categories to be metered should be implemented as proposed or should be modified in response to information supplied in the comments.

Where only best estimates are required either under paragraph (a) or under paragraph (c), utilities must base such estimates on any sample metering they may have conducted for all or a portion of the customer group.

The Commission has granted an extension in paragraph (e) of § 290.404 until January 1, 1985, for the gathering and reporting of load data on all customer groups not specified as major customer classes or end use categories in § 290.404, to the extent that such data are required to be collect under section 133. Section 290.404 is referenced in several other subparts of the rule specifying what cost calculations shall be made for specific customer groups. The Commission has also granted an extension in paragraph (e) until January 1, 1985, for the gathering and reporting of cost information for all customer groups not specified in § 290.404 and for which section 133 requires the collection of cost information.

The Commission believes that good cause exists to grant such extensions. The Congress was explicit in its mandate to the Commission in section 133. Section 133(a)(1) directs the Commission to collect information on costs of serving each electric consumer class, "including costs of serving different consumption patterns within such class * * *." The Commission interprets this statutory language to mean that cost information must be collected for subgroups of customers within a customer class if these subgroups have different consumption patterns, such as electric space heating within the broad residential class. In order to determine the costs of serving such consumption patterns, the utility must collect load data regarding those subgroups.

Section 133(a)(2) directs the Commission to collect load data for each electric consumer class "for which there is a separate rate. * * *" We believe this means that load data are to be collected both for customers served under a separate, distinct rate schedule as well as for customers served under a distinct rate block within a rate schedule. These data could be used, presumably, to test the cost justification of separate and distinct retail rates and to disclose any cross-subsidies between rate schedules or rate blocks.

In granting the extension in paragraph (e), the Commission is attempting to balance the strict requirements of the statute with the problems inherent in meeting the statutory deadlines for collecting and reporting cost and load information.

The Commission has received many comments concerning the expenditures of time and money which will be necessary for conducting that load research required under section 133 and has been advised that it takes several years to initiate and complete such load research and to analyze load and cost data for reporting purposes. The comments assert that costs of meter equipment and of computer hardware and software, and costs of training personnel are high. We understand that new meter technology is being developed that will utilize solid state mechanisms and that will considerably reduce the expense of sample metering for load research. Because of the advent of this new technology, the Commission is reluctant to impose data requirements which may require heavy investments in existing load research meters that may soon be obsolete. On the other hand, new technology will reduce the costs of billing under time of day rates and make them more cost effective. Thus, it is important to begin to collect load data now as a guide to designing time of day rates for the near future. The Commission feels that the extension in § 290.404(e) represents the best accommodation between these conflicting realities and grants such extension for good cause shown. However, Congress contemplated that the Commission would review and revise its regulations as future conditions such as that rate reform contemplated by Title I of PURPA require. We intend to re-examine these extensions and will make such modifications as such future conditions may warrant.

The Commission considers that collection of sample load data for

customer groups served on time of day rates is not likely to carry out the purposes of section 133 and, accordingly, has exempted utilities from gathering and reporting such information. The Commission wishes to permit flexibility in the gathering of such information and will impose only cost reporting requirements for those customer groups.

The Commission has already provided an opportunity for comment on the issue of exemptions for customer groups served under time of day rates in accordance with the requirements of section 133(b) of PURPA. (See discussion of comments regarding § 290.404(g) of the proposed rule.) However, the Commission is now soliciting additional comments on this portion of the final rule and will determine, by the end of August 1979, whether to alter it.

As with all other data requirements in Subparts B, C, D and E, State regulatory authorities are not pre-exempted by this federal action from requiring other data with regard to providing electric service. Utilities also should consider whether they, on their own initiative, should gather more extensive information than is called for by the Commission at this time in order to justify the rates that they apply to different groups of consumers.

Accuracy standard

The second major change from the proposed rule concerns the accuracy standard used for conducting load research. Section 290.403(c) of the proposed rule established a standard of plus or minus ten percent at a ninety-five percent confidence level to be met for each hour of the sample period. Almost every respondent commented on this accuracy standard.[73] Critics indicated that it was too stringent because it would be applied to load data collection for every hour of the year and could be used as the basis for rejecting load data if the standard were not met. There were also objections to the confidence level. As proposed, we believe that the accuracy standard would have required heavy investments in recording meters and translating equipment.

Section 290.403(b) of the final rule makes the three following changes designed to ease the reporting burdens and maintain consistency with standard industry practice for conducting load research:

(1) The accuracy level is now a target to be achieved in determining sample size rather than a standard that could be used for the rejection of load data.

(2) The target applies only to measurement of loads at time of system and customer group peaks rather than for each hour.

(3) The accuracy level has been lowered to plus or minus ten percent at a ninety percent confidence level.

The final rule requires utilities to file a sampling plan along with the initial filing of best estimate load data. If the sampled load data do not reach the target level of accuracy in subsequent filings, utilities will be required to provide an explanation for the deficiency.

§ 290.401(a) Hourly load information.

The proposed rule specified that load data be reported as total sixty minute integrated demands for each hour of a twenty-four hour period. Several respondents[74] suggested that the data be reported on a fifteen minute or thirty minute integrated basis since these time intervals are generally used for load data collection. The final rule allows the utility the option to report load data on whatever basis it chooses, so long as the pool, system, and class loads are reported using the same integration interval. One comment[75] suggested that utilities be given the option of supplying these data on punched cards or in a computer printout. Since it is the Commission's intention at a later date to prescribe the form in which all of these data are to be reported, no change has been made in the proposed regulations on this particular point.

§ 290.401(b) Separate jurisdictional loads.

This section in the proposed rule required utilities to report customer class loads separately for each jurisdiction. Several respondents[76] indicated that the reporting should be done only on a state-wide jurisdictional basis. Since it was not the intention of the proposed rule to require separate data for small municipalities having original jurisdiction, such as those that exist in Texas and Ohio, this section was changed to make it clear that the data are to be reported separately by state-wide retail regulatory jurisdictions.

Section 290.404(f) of the proposed rule provided an automatic waiver of the separate reporting requirement, with the consent of the State regulatory agency. Several comments[77] suggested that exemptions be made for separate jurisdictional reporting based on the amount of business done in the jurisdictions, the homogeneity of the classes in the jurisdictions, and the similarity of rates for the two or more jurisdictions.

Section 290.401(b) of the final rule is designed to ease the burden of separate jurisdictional reporting of customer group load data by treating monthly group load data differently from hourly group load data. Under paragraph (b)(2) hourly group load data specified in § 290.403(a)(4) are not to be reported separately by retail regulatory jurisdiction unless at least one of the retail regulatory jurisdictions or unless other parties request the separation. If the retail regulatory jurisdiction requests the separation, it is automatically required; if other parties request it, they must demonstrate that the benefits of the separate jurisdictional reporting outweigh the costs.

Under paragraph (b)(1) monthly load data specified in § 290.403 (a)(1), (a)(2) and (a)(3), are required to be reported by separate retail regulatory jurisdiction unless all of the jurisdictions involved waive the separate reporting requirement. Opportunity for comment on the waiver request will be allowed prior to Commission action. Under paragraph (c) applications for the waiver or for the separate reporting of group load data are to be filed at least two years before the time the data would be required to allow sufficient time for Commission action on the application and to permit utilities required to report by separate jurisdictions time to gather the data. For the 1980 reporting, paragraph (d) permits utilities the option of reporting both the monthly and hourly class load data on either a system-wide or a separate jurisdictional basis.

§ 290.401(c) Master metering.

The proposed rule defined customers as meters and required separate reporting under § 290.406 for the number of customers served under master meters. Several utilities[78] indicated that identification of those customers served under master meters would create a

[75] General Public Utilities Service Corp.

[76] NARUC, the California Public Utilities Commission and several utilities commented on the jurisdictional reporting requirement. Particularly, the utilities in Texas and the State PUC and Attorney General pointed out that primary retail rate jurisdiction lies with municipals in the State. See Subpart A for further discussion on this point.

[77] For example, General Public Utility Service Corp. and Pacific Power and Light Co.

[78] For example, Houston Lighting and Power, Public Service of Colorado.

tremendous burden since separate records are not kept for master metered customers. One comment [79] accurately pointed out that the proposed regulations required no separate load data for master metered customers. The final regulations retain the definition of customers as meters in § 290.403(a)(2), and retain the requirement to report separately the customers served under master meters but only if information as to the number of those customers is available. To the extent that master-metered multiple dwellings remain as a category for which load research is required, the number of these customers will be required to be reported.

§ 290.401(d) Typical day loads.

The proposed rule required that typical day loads for the system and individual classes be determined by averaging hourly loads for each hour of the week, day or weekend day in each month. One commentator [80] suggested that holidays be excluded from the data to avoid distortion. This suggestion was adopted in the final rules. Several other commentators [81] indicated that the concept of typical day and average day loads needed further definition. The final regulations indicated that either the mean or mode of the hourly loads can be used in determining the typical hourly loads. This change should make it clear that the typical day loads are to be an arithmetic average of the measured loads, rather than an arbitrarily selected "typcial day". In the final rules, this section has been moved to the definition section, § 290.105(e), since the typical day concept is used for cost calculations as well as load data reporting.

§ 290.402 Load information for the total of all customer classes (system load information).

Paragraph (a) of the proposed rule defines the kilowatt load on the system to be reported by utilities. Several comments [82] suggested that adjustments be made to this requirement, particularly to correct for reciprocal supply arrangements between utilities or for wheeling loads. Since the definition would require that interchange power, as well as any temporary deliveries of emergency power be netted out, no further changed has been made in the definition. Firm loads of the reporting utility would and should be included since system costs are affected by all firm loads. Wheeling loads would not affect *net* generation, so no correction to the definition needs to be made for these loads.

§ 290.402(b) Pool load information.

In the proposed rule, this section required utilities that are members of a power pool to report load data for the pool as well as for the utility. Several comments suggested that this requirement be eliminated either because it served no purpose or because such information is already filed monthly.[83] The requirement has been retained because marginal costing may be based on pool bulk power facilities rather than on the system bulk power facilities, in which case, load data for the pool will be needed for determining costing periods. Although some historic data are reported on pools, the detail needed for costing, and thus required under these regulations, is not generally available historically.

The proposed rule allowed one utility to report pool load data for all of the other utilities in the pool. That provision has been deleted from the final rule and each utility will now be required to report the load data for its pool. This approach is consistent with the Commission's intent that each of these reports be self contained, and that parties using these data not be required to go elsewhere for the required information.

§ 290.402(c) Historic peak loads.

The proposed regulation required the annual system peak loads to be reported for each of the previous ten years for the system but not for power pools. Although, as one commentator pointed out,[84] this information is already reported in Form 1, the requirement to report is repeated here consistent with the policy of making reports under section 133 self-contained. Two comments [85] indicated that reporting should be done for winter and summer peaks separately. That suggestion has been incorporated into the final rule. One comment [86] suggested that reporting should be done for power pool as well as system peaks because some marginal costing methods use the growth in pool-wide peak demand rather that system peak demand. Although that is true, marginal generation costing methods tend to use projected rather than historic peaks loads. The projected peak loads on a pool basis are required by § 290.402(a). Although historic peak loads are used to normalize the marginal transmission cost data, marginal transmission costs are not calculated on a pool-wide basis.

§ 290.402(d) Reporting period loads.

This section indicates what load data are to be reported for the pool or system in the reporting period.

§ 290.402(d)(1) Hourly loads

In the proposed rule, this section required the reporting of hourly loads for each clock hour of each day. Several utilities [87] suggested that this section should be eliminated since only typical hourly loads as required in paragraph (d)(2) would be needed. Since paragraph (d)(2) is an alternative to (d)(1) and since a reporting utility has the option of supplying one or the other, both paragraphs have been retained in the final rule.

§ 290.402(d)(3) Actual and weather normalized monthly peak loads.

§ 290.402(d)(4) Actual and weather normalized summer and winter peak loads.

In the proposed rule these sections required the monthly reporting of pool or system peaks with a separate indication of the summer and winter peaks, and required both actual and weather normalized data to be reported. Many comments [88] indicated that no information should be required for weather normalized peaks because of unreliability of estimates, costs of obtaining the estimates, lack of use, and lack of a consensus regarding normalization methods. Other comments [89] pointed out that the requirements in pararaphs (d)(3) and (d)(4) were redundant.

The final regulations have been changed in two ways. First, the requirement for separate reporting of summer and winter peak loads has been eliminated since these data would be included in the monthly peak reporting. Secondly, monthly peaks are now to be normalized for weather or for other factors affecting loads only if the reporting utility uses normalizing techniques for its own purposes.

§ 290.402(d)(5) Maximum demand at primary and secondary distribution voltages.

This section in the proposed rule required utilities to provide information on the maximum demand on the distribution system at the primary and secondary voltage levels. Quite a few of the comments[80] indicated that requiring the collection of such data is inadvisable if not impossible because of the costs of extensive metering, the impossibility of measuring such data accurately, and the lack of necessity for gathering such information. Other comments[81] criticized the vagueness of the regulation as written. The final regulations eliminate this reporting requirement, primarily because of the costs associated with measuring the maximum demands on the distribution system. It is the Commission's view that marginal distribution costs can be estimated without requiring the collection of these load data.

§ 290.402(e) Projected load information.

This section of the proposed rule specified projected pool or system load data to be supplied for each of the next ten years. Several general suggestions were made[82] regarding projected load data: Changing the time period from ten years to five years or to the planning period used by the utility; and requiring such data only for the seasonal peak day hourly loads, seasonal average week day and weekend loads. In the final rule projected load data must be supplied for each of the next five years and for the tenth year.

One comment[83] suggested that this section require the utility to describe the process by which the forecasted load data are determined. Growth rates for kilowatt-hour sales, summer peak and winter peak load are required as part of the reporting; the Commission is reluctant to expand the requirement to require any additional, more detailed explanation of projection methodologies at this time.

§ 290.402(e)(1) Projected load duration curves.

The proposed rule required that utilities supply the annual projected load duration curves and the duration of the loads in hours at 100, 80, 60, 40 and 20 percent of the peak load. Several comments[84] were received on this section requesting that it be either deleted or modified. Several comments[85] suggested that either load duration curves only, or hours of load only, or load curves only be required. The final rule requires reporting of both the load duration curve and the duration of load. Although an outside party could read the duration of load off the load duration curve, the reporting utility would have more accurate data than could be obtained by reading from the curves. One commentator[86] suggested that load duration curves are no longer used in the industry for capacity planning since the advent of modern digital computers and simulation programs. Although this may be true for some utilities, many small utilities reporting under these final regulations still rely on less sophisticated estimating techniques. These requirements are intended to be minimum reporting requirements; any reporting utility having more detailed or computerized projections of load and profiles is encouraged to file such information in satisfaction of this requirement.

Several comments[87] suggested that the duration of load in hours be expanded between 100 percent and 80 percent of the peak load, since it is important to know with some specificity what the variations are around the peak. In response to these comments, the final rule includes the requirement that utilities supply duration of load at 98, 95 and 90 percent of the peak load, as well as the percentages originally required in the proposed rule.

§ 290.402(e)(2) Growth rates for load duration curve.

This section of the proposed rule required reporting of the growth rates implied by the projected load duration curves specified in paragraph (e)(1) for total kilowatt hour sales, summer peak load and winter peak load. One comment[88] suggested that the Commission require a description of the reliability which the system planners use to project peak loads. Since any projections are done with varying degrees of reliability, it is not necessary to require such detailed information.

§ 290.402(e)(4) Projected maximum demand on the distribution system.

The proposed rule would have required utilities to project maximum demands on the distribution system at the primary and secondary voltage levels. Because § 290.402(d)(5) of the proposed rules has been eliminated, this section has also been eliminated. This change is consistent with the requests of several utilities[89] that this section be eliminated because such data are almost impossible to obtain.

§ 290.403 Load information for individual customer classes.

In addition to commenting on the number of customer classes for which load data should be collected, several commentators[90] suggested additional information which should be gathered for each customer group, however defined. That information included the sum by class of each customer's maximum individual demand during the year, during each month, and during the on peak period of each month. Commentators argued that this information could be used to compute diversity factors for the purposes of translating demand costs into demand rates. The Commission has not adopted this suggestion since such data may be needed for pricing but are not needed for costing. If these data are required for determining retail rates, the utilities would be able to supply the raw information from which these sums could be calculated and the State regulatory authority would probably have the power to require these sums in individual cases. In conjunction with those changes discussed earlier on what customer groups are to be reported, the word "class" in this section has been changed to "group" when referring to customer categories for which load data are required. Under § 290.404 load data must be reported for major customer classes as well as certain end-use customers. The wording change in this section is intended to be a generic identification for both of these customer categories.

§ 290.403(a)(1) Class maximum demands.

The proposed rule required the utility to report the class maximum demand, in kilowatts noncoincidental with the system peak. Several comments[91]

pointed out that the phrase "noncoincidental with the system peak" would require reporting class loads for the next peak hour if those class loads were indeed co-incident with the peak. The final regulations require the maximum demand for the group without further elaboration; thus maximum demands, either coincident or noncoincident with the system peak would be reported.

§ 290.403(a)(2) Class contributions to jurisdictional peak.

The proposed regulations required the utility to report the class contribution to the monthly jurisdictional maximum demand. Several comments [105] indicated that this requirement should be deleted because generation and transmission resources serve the entire system not just a particular retail jurisdiction. Although this comment is correct, group contributions to jurisdictional maximum demands may be used to separate costs between jurisdictions for the purposes of determining the group revenue requirements. Therefore, this requirement is retained in the final regulations.

§ 290.403(a)(4) Hourly class loads.

The proposed regulations would have required the utility to report hourly class loads for a typical week day, weekend day, the class peak day, the jurisdiction peak day and system peak day. Several comments [106] were received on this section, primarily concerning the definition of "typical" and the need for clarification. Since typical days are now defined in § 290.105(e), the only change that was made in this section of the final rule was to delete the requirement for reporting hourly class loads for the jurisdiction peak day. Under § 290.401(b)(2) a utility would not be required to report these hourly loads by separate jurisdictions unless the Commission approved an application for separate jurisdictional reporting. This change is discussed more completely under § 290.401(b) above.

§ 290.403(b) (1), (2) and (3) Use of estimated information.

This section in the proposed rule permitted utilities to report class load information through the use of estimation techniques that could be based on sample metering, except where load estimates with comparable accuracy could otherwise be made. The purpose of this section had been to make clear that sample metering, not universal sampling, was required, except in those cases where estimates of loads could be made without metering. In the final regulations, this section has been eliminated. The final regulations require, on a best estimate basis, load data for major customer classes. Sample metering is required only for specified end uses. Estimates of loads are allowed as part of the "best estimate" of major class loads and need not be separately provided for further in the rules. An extension until 1985 has been provided for the collection and reporting of load data for rate classes not falling within the specified end-use categories or within the definition of major customer class. Thus estimates of loads for these groups are not longer needed. Paragraph (b)(3) of the proposed regulation had required a description of the sampling method used by the utility. This requirement is retained in § 290.403(c) of the final regulation.

§ 290.403(c) Accuracy standard.

In the final regulation, this section has been changed to 290.403(b). The substance of the changes has been discussed above.

§ 290.403(d) Load research conducted every 5 years.

The proposed rule allowed utilities to use historic test load data in reporting estimated load data for the current period. The historic test load data could be collected during any period as long as the data were no older than five years. Several utilities [107] commented that the regulation was beneficial because it allowed rotational metering for measuring loads. Other commentators, including one public utility commission, [108] criticized the regulation because, in encouraging rotational metering, it would have discouraged ongoing load research. Several consumer groups [109] objected to the regulation because load research as old as four to five years would be stale and would not reflect any customer response to a rate change that had taken place in the interim.

The Commission believes that rotational metering may serve a useful purpose, especially for smaller utilities that do not have the capability for purchasing meters for each customer group for which load data are required. Therefore, the final regulation allows rotational metering for any utility with less than one billion annual kilowatt-hour retail sales. For these utilities, actual test data need not be gathered for any particular customer group any more frequently than once every five years. This means that for such utilities reporting in May 1982, group load data collected in any year over the period 1977 to 1981 could be used as the basis for 1981 load estimates. Similarly, for the 1984 filing, load data collected in any year from 1979 to 1983 could be used as the basis for the 1983 load estimates.

Several comments [107] indicated that the regulations improperly imposed the class load factor methodology for translating test load data into current estimated load data. The final regulations delete that specified methodology and leave the choice of estimating technique to the reporting utility.

§ 290.404 Certain exemptions from reporting load information by individual customer classes.

This section in the proposed rule provided five blanket exemptions and two applied-for exemptions from the requirements that load data be provided for "each customer class for which there is a separate rate." These exemptions were designed to ease the burden of sampling each and every rate class that a utility might have. Since the final rule requires that data be reported on a sample metered basis only for a limited number of specified end uses, many of the exemptions provided for in this section have been eliminated.

Other than the provision for use of borrowed data in 1980, § 290.405 of the final rules provides that the remaining exemptions in this section will now be allowed only after application under § 290.601. Other exemptions may also be requested under the procedures specified in § 290.601.

§ 290.404(a) Combined reporting of class load information.

The proposed rule allowed the utility to combine two classes for the purposes of reporting customer class load data so long as the load imposed by at least one of these classes was less than five percent of the system's daily or annual peak and so long as the two classes being combined were not both major retail classes. The purpose of this exemption was to eliminate the requirement for separate sample metering of non-major, small rate

[107] For example, Carolina Power and Light, AIEC.

classes. Several commentators[108] noted that a utility could not determine which classes imposed loads of less than five percent until load research had been conducted and suggested that the limitation be expressed in terms of kilowatt-hours of consumption rather than demand. One comment[109] indicated that the exemption should not be extended to fast growing classes. Others suggested that the exemption either be further limited or eliminated. For instance, two comments[110] suggested that combinations should only be permitted for classes with similar voltage levels and load pattern characteristics and that the exemption should not be a blanket exemption. The extension granted in § 290.404(e) of the final rule until 1985 for all customer groups not specified in § 290.404 (b) or (d) covers many of the groups which had been covered by the exemption in § 290.404(a) of the proposed rule. Absent a showing under Subpart F, the Commission has determined that information on the groups not covered by the extension should be reported. Thus the blanket exemption has been eliminated from the final rules.

§ 290.404(b) Exemption for hourly load information.

This exemption, included in the proposed regulations but eliminated in the final regulations, would have exempted utilities from reporting hourly class load data for any class combined under the proposed exemption in § 290.404(a). Again, since the final regulations grant an extension for reporting load data for many of these rate classes, this exemption would be meaningless if retained.

§ 290.404(c) (1) and (2) Provisions for exemption from accuracy standard.

§ 290.404(d) Support for borrowed information.

§ 290.404(e) Applicability of borrowed information.

In the proposed regulations, the exemption in § 290.404(c) from the accuracy standard applied if a particular customer class load could be determined from methods not dependent on direct measurement or sampling. Since the accuracy standard has been changed to an accuracy target, this exemption has been eliminated in the final rule.

The second portion of this blanket exemption allowed a utility to borrow load data from a similarly situated utility for purposes of determining its own load data. Sections 290.404(d) and 290.404(e), described what support the utility would be required to supply for the borrowed load data and what adjustments the utility would have to make to the borrowed load data to insure its applicability to its own class loads. Several commentators[111] endorsed the concept of this blanket exemption. Others[112] indicated that borrowing data is not a viable alternative to gathering load data for a specific system. Several comments[113] suggested that rigorous analysis of transferred data would be necessary prior to use of this exemption, and that the burden of evaluating comparability should be borne by the utilities using the data, not intervenors. Section 290.405(a) of the final regulation allows the use of borrowed load data only for the initial filing in November 1980, which is to be made on a best estimate basis. A utility may not use borrowed load data in any subsequent filing absent an exemption for use of borrowed load data granted pursuant to the procedures in § 290.601.

§ 290.404(f) Waiver of reporting requirement for retail jurisdictional loads.

The proposed regulations allowed retail jurisdictions to waive the requirement for separate jurisdictional reporting of class load data. Several comments[114] suggested that granting of this blanket exemption not be made contingent on concurrence by the State regulatory authority or, in the alternative, that concurrence be required only if the total retail sales in the jurisdiction for the reporting year are less than 500 million kilowatt-hours or do not exceed five percent of the system's daily annual peak. One commentator[115] suggested that those State regulatory authorities consenting to the waiver should be required to specify the allocations that would be used among jurisdictions for splitting the revenue requirements. Another commentator[116] suggested that safeguards be included to assure an opportunity for interested parties to be heard before any waiver of jurisdictional reporting of load data was allowed. Since section 133 does not require separate jurisdictional reporting, an exemption to the statute is not needed and this blanket exemption has been eliminated in the final regulations. Waivers to that separate jurisdictional reporting required by these final regulations will be permitted under those conditions specified in § 290.401(b), discussed above.

§ 290.404(g) Exemption based on extension of time.

The proposed regulations granted a one year exemption from filing hourly class load information if the utility applied for a rate increase during the one year extension period provided in § 290.405 of the proposed regulations. Since filing of load and cost data is not mandated in section 133 at the time of a rate increase and has not been required under the final rule, this exemption is unnecessary and has been eliminated in the final rules.

§ 290.404(h) No exemptions for major classes on time of use rates.

The proposed rule allowed no exemptions for any rate class served under a time of use rate. Almost all of the utilities[117] commenting on this section felt that this exception to the general blanket exemptions was inadvisable. Some were concerned that it could present a disincentive to utilities to engage in time of use pricing. The final regulation eliminates this section of the proposed rule. It should be noted, however, that the Commission intends to further consider by the end of August, 1979, whether the utilities having customer groups served under time of day rates are exempted from collecting load data by sample metering. (See the general discussion at the beginning of this subpart.)

§ 290.404(i) Exemption if the customer class is to be changed.

The proposed regulation exempted utilities from separately reporting any rate class that was to be combined with another class of customers or was to be otherwise drastically altered. The single comment[118] on this section suggested that it be eliminated because it removes the requirement that necessary data be gathered concerning similarity of load characteristics for the rate classes to be consolidated. Since the Commission has required in the final regulation that load information be collected for specified end uses, whether or not there is a separate rate, this exemption has been deleted.

[115] National Retail Manufacturers Association.
[116] Department of Energy.
[117] For example, Texas Electric Service Co., Consolidated Edison of New York.
[118] Texas Public Utilities Commission.

§ 290.404(j) Exemption for joint load research.

The proposed regulations allowed any group of utilities intending to engage in joint load research to apply to the Commission for an exemption from the requirement that each utility report system and class load data separately. Several comments[119] suggested that the Commission require evidence of comparability of class loads before granting this exemption. Other comments[120] suggested that the Commission conduct a major research study to determine load characteristics of retail loads that could be used by other utilities or establish joint regional committees to conduct joint load research. One commentator[121] indicated that the exemption should apply to generation and transmission cooperatives and their member distribution rural electric cooperatives. Several comments[122] were received suggesting that the TVA be permitted to undertake joint research for all of its distributors and to report such information in a consolidated report. (See the discussion concerning § 290.102(c).) This provision has been retained in § 290.405(b) of the final rule. As in the proposed rule, this provision is not a blanket exemption but must be applied for under § 290.401 on a case-by-case basis.

§ 290.405 Extension for reporting hourly load information by individual customer classes.

This section in the proposed rule provided for an automatic one year extension beyond November 1980 for the reporting of hourly class load data if the utility certified that it had not commenced a program for the collection of hourly class load data by means of sample metering and had not been ordered to collect such data by any other regulatory authority at the time PURPA was enacted. Several suggestions[123] were made changing the time frame from two years to five years to "a reasonable time". Several comments[124] suggested that the extension should apply even if the State regulatory authority had not ordered the utility to conduct load research; i.e., even if the utility had already begun to conduct such research on its own. Other commentators[125] suggested that the term "commenced a program" was unclear. The extension has been eliminated from the final regulations since no new load research will be required in 1980 for reporting of the best estimate loads for the major customer classes.

§ 290.406 Other information to be reported.

This section required additional information to be reported on customer classes, loss factors, and on other items affecting load data collection.

Two comments[126] suggested that a new paragraph be added to this section to require submission of bill frequency data in order to permit development of block rates and to determine the effect of these rates on the distribution of revenue responsibilities by class, by tariff schedule and by individual customers or groups of customers within a tariff schedule. It is the Commission's view that these data would generally be available from the reporting utility in any rate design proceeding, and the suggestion has not been adopted in the final regulation.

§ 290.406(a) Assumptions used and description of weather normalization techniques.

The proposed regulations required the utility to describe the parameters used for weather normalization as reported under §§ 290.402 and 290.403. In the final regulations, weather normalization or normalization of loads for other factors is required only if the utility already makes those calculations for peak loads. If normalization techniques are used, a description and demonstration of the technique are required under § 290.402(d)(3) of the final regulations. Therefore, separate reporting of this information is not required as a general matter, and this paragraph has been eliminated.

§ 290.406(b) Information on individual customer classes.

Paragraph (b)(1) of the proposed regulations required utilities to provide information on energy sales for each month in the reporting period for each customer class for which load data were collected under § 290.403(a). One commentator[127] suggested that a new section be added requesting energy sales for given time periods and voltage levels so that average costs by time of use could be assigned. Since a requirement has been added to Subpart B, Accounting Cost Information, for the utility to calculate average energy costs by time of use, collection of these data here would not be necessary, and the final rule has not been changed in this regard. Another commentator[128] suggested that the requirement include data for each of the previous nine years as well as for the reporting period. Since the load data by customer groups would only cover the reporting period, customer group information has similarly been limited to the reporting period. The data to be collected under this section refer to customer groups identified in §§ 290.404 (b) and (d). This section is now § 290.406(a).

§ 290.406(b)(2) Number of customers.

This section required reporting of the number of customers at the end of the reporting period. One commentator[129] suggested that both number of customers as well as monthly energy sales should be supplied by voltage level. Since loss factors for energy sales are required under § 290.406(b) of the final regulations and since the number of new customers by principal delivery voltages is required under § 290.406(a)(3) of the final regulations, the number of customers and sales by voltage level could be calculated and further reporting of the number of customers or energy sales by voltage level would be unnecessary. The number of customers is to be reported in § 290.406(a)(2) of the final regulations.

§ 290.406(b)(3) New customers by voltage level.

This section of the proposed rule required utilities to report the number of new customers by primary, secondary and transmission voltage levels for the reporting period and for each of the previous five years. Several commentators[130] indicated that information on new new customers could not be supplied since those data currently were unavailable, that the burden of obtaining them would be onerous, and that, especially for historical information, the number of new customers would be practically impossible to reconstruct. The final regulations have been changed to reflect these comments and to require the reporting of the number of new customers only if available. Net change in customers is required under § 290.406(a)(3) of the final regulations if

[128] Ernst and Ernst.

[129] ELCON.

[130] For example, City Public Service Board of San Antonio, Texas and United Illuminating.

data on new customers are not available.

§ 290.406(c) Loss factors.

In the proposed regulations, this section required the utility to report the estimated loss factors both for energy and demand resulting from the transmission of electricity to principal delivery voltage levels. Several comments [121] indicated that the regulation was too burdensome. Nevertheless, the requirement is retained in the final regulations since these loss factors may be estimated by the reporting utility and do not have to attain a level of accuracy that would require metering at various points on the transmission and distribution systems.

§ 290.406(d) Effective date of rate changes.

In the proposed regulations, this section required the utility to report the effective date of a rate change and the approximate date on which bills were first received under the new rate. A similar requirement was imposed if an automatic adjustment clause resulted in a rate adjustment of more than ten percent of the previous month's rate. Several commentators [122] indicated they have no information on when bills were received because they bill cyclically. Others indicated that the requirement regarding automatic adjustment clauses was irrelevant. Although it would be useful for parties using the load data to have some information concerning price changes during the period in which load data were being collected, this information can be obtained by other means and the provision has been deleted from the final regulations.

§ 290.406(e) Shifts on and off daylight saving time.

This section required that utilities report the hour, day and month of shifts on and off daylight saving time and the time zones in which the retail loads are located. No comments were received on this section.[123] The final regulations retain the requirement as § 290.406(c).

Subpart E—Calculated Costs

This subpart required utilities to calculate both accounting costs and marginal costs by costing period, customer class, and voltage level in summary tables similar to those included in the regulation. The proposed rule required that such tables be completed for each jurisdiction in which the utility operated unless the utility could show that the jurisdictional cost variation was not significant. If a method for calculating either marginal or accounting costs has been specified by State law or the State regulatory authority, the regulations required that the calculation method used by the utility be consistent with that method. The regulations also required that the reporting utility describe the method used for the calculations and provide a copy of any cost study upon which the calculations in the table were based. As an alternative to completing the tables, the proposed rule provided that the utility may provide a recent cost of service study (fully allocated and marginal) provided that such study included all the information specified in the tables and in Subparts B and C, respectively.

§ 290.501 Accounting cost calculations.

The alternative for providing a cost of service study has been eliminated from paragraph (d) of both § 290.501 and § 290.502 of the final rule. Provisions for alternate submissions of information are now contained in § 290.103(c) of the final rule. The only major change in § 290.501 has been the inclusion in paragraph (b) of accounting cost requirements previously contained in Subpart B.

§ 290.502 Marginal cost calculations.

The proposed regulations required utilities to estimate the marginal costs of providing service by costing period, customer class and voltage level for each State jurisdiction in which the utility operated, unless it could be shown that the jurisdictional variation was not significant. One utility [124] urged us to allow for the reporting of costs on a system wide basis, without a prior showing that jurisdictional variation was insignificant. One commentator [124a] concurred, arguing that the regulation incorrectly presumed that marginal costs will typically vary by jurisdiction and observing that, "[t]he real economic (marginal) costs of providing service are incurred at the system (or the pool) level and are the same at the margin for all jurisdictions at the same point in time. What will vary among jurisdictions is the allowed rate base, expenses and rate of return, thus leading to differences in total revenue constraints." We have reviewed a number of marginal cost studies and found that jurisdictional boundaries were generally deemed irrelevant for the calculation of marginal costs. Therefore, the regulations have been changed to require the calculation of marginal costs for the "system as a whole".

One commentator [125] recommended that Table 2 should also include an estimate of the total amount of revenue that would be generated if the calculated cost components were implemented as billing determinants. We did not adopt this proposal for two reasons. First, it might lead to the false impression that marginal costs can be directly translated into time differentiated rates. We think it is clear that requiring marginal cost calculations does not necessarily imply that prices should be equivalent to marginal cost. A second consideration is that the adoption of this recommendation would extend the regulations unnecessarily into the sphere of ratemaking whereas the regulations should more properly focus on cost data. We recognize that calculations such as those proposed will eventually have to be performed but we do not think such calculations should be required under the regulations implementing section 133.

NARUC and several other commentators [126] observed that the illustration table conveyed the impression that "off-peak" hours could not carry any marginal capacity costs. This was an oversight on our part. Table 2 has been revised to show that off-peak hours do have the potential for carrying some capacity costs.

Subpart F—Exemptions and Extensions

§ 290.601 Exemptions.

The proposed rule required that utilities submit exemption applications one year prior to the time the filing is required. The Commission deemed this period necessary for allowing time for notice, comment, analysis, and Commission action but now feels that an additional six months lead time is required if utilities denied an exemption are to have adequate time to supply the necessary information. It should be clarified that a utility need submit only one application for each filing year for which it seeks a partial or total exemption.

The proposed rule also required that utilities seek review of such applications by State regulatory authorities and permitted State regulatory authorities to apply for exemptions for utilities under their jurisdiction. NARUC suggested an alternative to the proposed procedure

[122] For example, Louisiana Power and Light Co., Northern State Power Co.

[123] In this regard, this section is unique.

[124] Houston Power and Light Co.

[124a] Department of Energy.

[125] EEI.

[126] See, for example, comments of Massachusetts Electric Co., Wisconsin Electric Power Co.

that would involve a compliance plan to be developed by utilities and approved by State regulatory authorities prior to its submission to the Commission for approval. [137] The Commission has considered this suggestion carefully. Although the final rule does not explicitly include this suggestion, the State regulatory authority will have an opportunity to review any request for exemption and to comment on it to the Commission. The final rule contains a specific provision requiring applications for exemption to be filed with this Commission and with the State regulatory authority no less than eighteen months prior to the time the information would otherwise be required to be filed. A State regulatory agency may, on its own authority, require a utility to provide the application for exemption to it at an earlier time than that required in the regulation. Also a State regulatory authority may, under State law, continue to require information to be filed with it even though the Commission grants an exemption.

There were several comments suggesting that authority to grant exemptions to the filing requirements be delegated to State regulatory authorities. [138] We do not believe that the statute gives the Commission authority to make such a delegation. However, the various State regulatory agencies can provide a very important contribution by evaluating applications for exemptions. The rule acknowledges this function by requiring utilities to submit applications for review at the State level. Through this requirement we intend to place principal reliance for such evaluation on the State regulatory authorities.

We have amplified on the specific information necessary to support applications for exemption. We believe this expansion is an improvement on the proposed rule in that it makes certain distinctions among basis for exemptions, and indicates the nature of the information that the Commission will require in reviewing each type of exemption.

A large number of small utilities submitted comments that were really requests for exemption. These requests were based either on the size of the utility or on the utility's receiving all of its power through purchase from another utility. [139] The Commission considers these requests to be premature and has not considered their merits relevant to each applicant. If these utilities seek exemptions from provisions of the final rule, they must file new applications in accord with the requirements of the final rule. It should be noted that a number of the utilities that requested exemption on the basis of size will qualify for the special extension for small utilities provided in § 290.102(d) of the final rule.

Both the Department of Agriculture, Rural Electrification Administration (REA), and the National Rural Electric Cooperative Association suggested that specific exemptions be established for REA borrowers because these cooperative utilities already file substantial cost information with REA. The Commission finds that the cost information required under this rule is substantially different from that filed with REA by its borrowers. Therefore, the utilities' compliance with REA requirements is not an adequate substitute for filing the cost information required here. However, there may be other reasons for exempting certain of the cooperative utilities from the requirements of these regulations which will be considered upon application pursuant to the exemption provisions of the final rule. Meanwhile, many of these cooperatives will qualify for the special extension provided in § 290.102(d).

§ 290.602 Extensions.

The proposed rule provided an application procedure for extensions. No substantial comments were received on this section distinct from those concerning the exemption provisions which have already been discussed. The final rule includes changes in this section only to the extent necessary to parallel changes made in § 290.601 governing exemptions. In granting extensions either through the mechanism established in this section or in such blanket extensions as are embodied in the final rule, the Commission intends that a utility not be required to file at any later time the information which it would otherwise have been required to report during the extension period. The Commission's extension authority under section 133 is limited by section 133(b)(2) to extensions of the initial two year period following the date of enactment.

Subpart G—Enforcement

§ 290.701 Enforcement provisions.

This section states that any person who violates the requirements of Part 290 shall be subject to a civil penalty of not more than $2,500 for each violation and that any person who willfully violates those requirements shall be fined not more than $5,000 for each violation. This section corresponds to the enforcement provisions in section 12 of the Energy Supply and Environmental Coordination Act of 1974 (ESECA).

Several comments [140] indicated that all sanctions should be limited to willful violations. Two of these commentators [141] indicated that sanctions should not apply to *de minimis* violations. Section 133(d) requires that any violation of section 133 of PURPA be treated as a violation of a provision of ESECA, enforcible under section 12 of that Act. The regulations as promulgated in proposed form adhere to this statutory mandate and will not be amended. In enforcing the requirements of Part 290, the Commission will invoke such sanctions as it deems appropriate.

Written Comments

Although these regulations are being issued in final form, the Commission has specifically requested comments on §§ 290.404(d) and 290.404(f). The substantive provisions of these sections will not become effective absent further determination by the Commission. The Commission intends to act in this regard by the end of August, 1979.

Interested parties are invited to submit written comments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. Comments should reference Docket No. RM79-6 on the outside of the envelope and on all documents submitted to the Commission.

Fifteen (15) copies should be submitted. All comments and related information received by the Commission before July 15, 1979, will be retained and considered by the Commission prior to any further action on these final regulations.

(Public Utility Regulatory Policies Act of 1978, Pub. L. 95-617, Energy Supply and Environmental Coordination Act, 15 U.S.C. 791 *et seq.*, Federal Power Act, as amended 16 U.S.C. 792 *et seq.*, Department of Energy Organization Act, Pub. L. 95-91, E.O. 12009, 42 FR 46267).

In consideration of the foregoing, the Commission amends Chapter I of Title 18, Code of Federal Regulations, as set forth below, effective July 15, 1979.

By the Commission.

Kenneth F. Plumb,

Secretary.

1. Chapter I of Title 18 is amended by adding new Subchapter K, Part 290 to read as follows:

SUBCHAPTER K—REGULATIONS UNDER THE PUBLIC UTILITY REGULATORY POLICIES ACT OF 1978

PART 290—COLLECTION OF COST OF SERVICE INFORMATION UNDER SECTION 133 OF THE PUBLIC UTILITY REGULATORY POLICIES ACT OF 1978

Subpart A—Coverage, compliance and definitions

Sec.

290.101 Coverage.
290.102 Compliance.
290.103 Time of filing and reporting period.
290.104 Costs of compliance.
290.105 Definitions.

Subpart B—Accounting cost information

290.201 Rate base information.
290.202 Operating expense information.
290.203 Income and revenue related tax information.
290.204 Rate of return information.
290.205 Costing period.

Subpart C—Marginal cost information

290.301 General instructions for reporting marginal cost information.
290.302 Generation cost information.
290.303 Energy cost information.
290.304 Transmission cost information.
290.305 Distribution and customer cost information.
290.306 Other cost information.
290.307 Annual carrying charge rates.
290.308 Costing periods.

Subpart D—Load data

290.401 General instructions for reporting load data.
290.402 Load data for the total of all customers (system and pool load data).
290.403 Load data for certain customer groups.
290.404 Customer groups to be reported.
290.405 Certain exemptions from reporting requirements.
290.406 Other information.

Subpart E—Calculated costs

290.501 Accounting cost calculations.
290.502 Marginal cost calculations.

Subpart F—Exemptions and extensions

290.601 Exemptions.
290.602 Extensions.

Subpart G—Enforcement

290.701 Enforcement provisions.

Authority: Public Utility Regulatory Policies Act of 1978, Pub. L. 95-617, 92 Stat. 3117 (16 U.S.C. 2601 et seq.).

Subpart A—Coverage, Compliance and Definitions

§ 290.101 Coverage.

This part shall apply to each electric utility, in any calendar year, if the total sales of electric energy by such utility for purposes other than resale exceeded 500 million kilowatt-hours during any calendar year beginning after December 31, 1975, and before the immediately preceding calendar year.

§ 290.102 Compliance.

Each utility covered under this part shall gather and report information specified in Subparts B, C, D and E of this part as follows:

(a) *Information gathering and filing.* Each electric utility shall gather and report such information in accordance with § 290.103 and shall file an original and one copy of the information with the Federal Energy Regulatory Commission (Commission) and an additional copy of the information with any State regulatory authority that has ratemaking authority for such utility. The utility shall retain additional copies of such information for a period of 5 years from the date of filing with the Commission, shall make copies of such information available for public inspection at the principal offices of the utility and shall provide copies to the public at the cost of reproduction.

(b) *Form of the information.* Such information shall be submitted on suitable standard forms prescribed by the Commission or in any form otherwise determined by the Commission. With regard to specific items of cost information, if an account number from the FERC [1] Uniform System of Accounts is specified in Subparts B and C of this part, public utilities under the Federal Power Act shall file in accordance with the specified accounts. Any utility covered by section 133 of the Public Utility Regulatory Policies Act (PURPA) but not required to keep its books by the FERC Uniform System of Accounts may provide this information in accordance with the system of accounts presently employed, so long as all required individual items of information are fully defined and expressed in the same degree of detail as that required in the FERC Uniform System of Accounts.

(c) *Consolidated reporting by certain wholesale suppliers.* Consolidated reporting of such information shall be permitted as follows:

(1) Any electric power supplier qualifying under paragraph (c)(4) of this section may file a consolidated system report for the integrated system as a whole in lieu of individual reports for itself and its distributors which would otherwise be required under this part, if the distributors agree in writing to participate in the consolidated reporting and such written agreement is filed with the Commission at least 1 year prior to the date that such information is required to be reported. Where appropriate, information such as master metering practices and sales and property taxes shall be reported separately for each distributor.

(2) The electric power supplier and each distributor shall retain copies of such consolidated report for a period of 5 years from the date of filing with the Commission, shall make copies of such filing available for public inspection at its principal offices and shall provide copies to the public at the cost of reproduction.

(3) Any exemption or extension granted under Subpart F of this part to such electric power supplier shall be deemed to apply to all utilities which are a part of the integrated system and which are subject to reporting requirements under this part.

(4) In order to qualify for the consolidated reporting provisions of this section an electric power supplier must:

(i) Be a sole-source wholesale supplier to an electrically integrated system of distributors, some or all of which are also utilities subject to the reporting requirements of this part.

(ii) Have a direct role in establishing the specific resale rates charged by such distributors.

(d) *Extension for small utilities.* Each utility covered under § 290.101 but having total sales of electric energy for purposes other than resale of less than 1 billion kilowatt-hours in each of the calendar years 1976, 1977, and 1978 is granted an extension for the November 1, 1980 filing and shall not be required to make a filing pursuant to paragraph (a) of this section until May 31, 1982.

§ 290.103 Time of filing and reporting period.

Each electric utility shall gather and report information specified in Subparts B, C, D and E of this part as follows:

(a) *Biennial filing.* Information required under § 290.102 shall be filed biennially in even-numbered years beginning in 1980. The filing in 1980 shall made on or before November 1 of that year. Filings in 1982 and in each subsequent filing year shall be made on or before May 31 of that year.

(b) *Reporting period.* Except as specified in paragraph (c) of this section,

[1] FERC accounts refer to FPC accounts so numbered.

the reporting period covered by the information shall be the calendar year immediately preceding the filing year. Information for previous years and projected information for future years, as required in Subparts C, D and E of this part, shall be reported on a calendar year basis.

(c) *Alternate reporting period.* Use of an alternate reporting period shall be permitted as follows:

(1) Except as provided in paragraph (c)(2) of this section, if a utility has gathered all of the information specified in Subparts B, C, D, and E of this part and has filed such information with its State regulatory authority in connection with a rate proceeding, the utility may file such information with the Commission in fulfillment of the filing requirements of paragraph (a) of this section if the reporting period covered by the information is a 12 month period the end date of which does not precede January 1 of the filing year by more than 6 months.

(2) If the information gathered and filed with the State regulatory authority is incomplete with respect to any of the specifications of Subparts B, C, D, and E of this part, the utility shall not be permitted to filed under this paragraph unless it files the additional information specified in such subparts using the same reporting period as specified under paragraph (c)(1) of this section.

§ 290.104 Costs of compliance.

The cost of complying with the reporting requirements of this part shall not be allowed by the Commission in establishing rates for the sale of electric energy at wholesale under Part II of the Federal Power Act.

§ 290.105 Definitions.

The following definitions shall apply to this part:

(a) State regulatory authority. State regulatory authority is defined as any State agency which has ratemaking authority with respect to the sale of electric energy by any electric utility (other than such State agency) and, in the case of an electric utility with respect to which the Tennessee Valley Authority has ratemaking authority, such term means the Tennessee Valley Authority. The term State agency means a State, political subdivision thereof, and any agency or instrumentality of either. The term State means a State, the District of Columbia and Puerto Rico.

(b) *Retail regulatory jurisdiction.* Retail regulatory jurisdiction is defined as a jurisdiction or authority with jurisdiction not less than state-wide in area.

(c) *Predominant retail regulatory jurisdiction.* Predominant retail regulatory jurisdiction is defined as the retail regulatory jurisdiction in which the utility has its largest amount of total retail sales of electric energy, measured in dollars of revenue.

(d) *Voltage level.* Voltage level is defined as any of the several ranges of nominal voltage used on a given utility system for transmission and distribution of electric power, the levels to be separately identified to the extent necessary to account for significant differences in such cost factors as investment and losses attributable to providing service at the different levels. For most utilities, the levels of "transmission voltage," "primary distribution voltage," and "secondary distribution voltage" will provide adequate load and cost differentiation.

(e) *Typical day costs and loads.* For historic or reporting period information, typical day costs and loads shall be reported as the mean or mode of the hourly costs and loads for each hour for each weekday or weekend day in each month. For projected information, the typical day shall be any day in the month which the utility believes is representative of cost incurrence. Holidays shall be excluded from weekday determinations and the utility shall specify whether the mean or mode is reported.

Subpart B—Accounting Cost Information

§ 290.201 Rate base information

Except as otherwise specified in this section, the utility shall report the balances at the beginning and end of the reporting period (and, if required by the retail regulatory jurisdiction, the average of the 13 monthly balances) for the following:

(a) *Plant accounts.* The balances in each account, by account (FERC Accounts 301 through 399).

(b) *Depreciation reserve.* The depreciation reserve (FERC Account 108) associated with each primary function; i.e., steam production, nuclear production, hydroelectric production—conventional, hydroelectric production—pumped storage, other production, transmission, distribution, general and common—electric.

(c) *Depreciation expense.* The depreciation expense (FERC Account 403) associated with each primary function; i.e., steam production, nuclear production, hydroelectric production—conventional, hydroelectric production—pumped storage, other production, transmission, distribution, general and common—electric.

(d) *Construction work in progress.* For construction work in progress:

(1) For each generation and transmission project under construction, which the utility considers major, the end of period account balance in FERC Account 107 and the following:

(i) A description of plant including appropriate functionalization; i.e., production, transmission, distribution, general, comm[illegible] and other.

(ii) The star[illegible]truction date.

(iii) The exp[illegible]mpletion date and estimated cost [illegible]ted in-service date.

(2) For the re[illegible]ning projects and construction, the end of period account balance in FERC Account 107, grouped by primary function.

(e) *Prepayments.* A breakdown of the components of all prepayments (FERC Account 165).

(f) *Accumulated deferred income tax.* The amount of accumulated deferred income taxes, by account (FERC Accounts 281, 282 and 283).

(g) *Materials and supplies.* The amounts for materials and supplies (FERC Accounts 151 through 163).

(h) *Electric plant held for future use.* The amount for electric plant held for future use, itemized as to land and other, and functionalized (FERC Account 105).

(i) *Nuclear fuel materials.* The amounts for nuclear fuel materials (FERC accounts 120.1 through 120.5).

(j) *Common utility plant and expenses.* Information as reported in FERC form 1, *Annual Report*,[2] page 351, for Class A and B utilities.

§ 290.202 Operating expense information.

For operating expenses for the reporting period, the utility shall report the following:

(a) *Operating & maintenance expense accounts.* The balances in each account, by account, for operating and maintenance expenses (FERC Accounts 500 through 598 and 901 through 932). Additionally, the estimated hourly average energy costs (in cents per kilowatt-hour) incurred to supply all retail customers and those wholesale customers that are served under firm contracts shall be reported for a typical weekday, a typical weekend day, and the system peak day for each month of the reporting period. Such average energy cost shall include variable operating and maintenance expense, fuel expense and the energy portion of purchased power expense.

---

[2] FERC Form 1, *Annual Report* refers to FPC Form 1, *Annual Report*.

(b) *Payroll.* The payroll associated with each operating and maintenance expense account, by account.

(c) *Taxes.* For taxes:

(1) All property taxes, payments in lieu of taxes, and other non-income and non-revenue related taxes (FERC Account 408.1).

(2) Income and revenue related taxes (FERC Accounts 408.1 and 409.1).

§ 290.203 Income and revenue related tax information.

If applicable to the reporting period, the utility shall report the following information necessary to calculate income and revenue related taxes for the reporting period:

(a) *Tax rates.* The applicable income tax rates and revenue related tax rates.

(b) *Differences in income items and deductions.* A specification of the differences in income items and deductions for Federal and State income taxes.

(c) *Itemized deductions.* An itemization of the Federal income tax deductions in addition to those contained in §§290.201 and 290.202; i.e., interest, tax depreciation above book depreciation, etc.

(d) *Adjustments to taxes.* Federal and State adjustments for such items as provisions for deferred income taxes, income taxes deferred in previous years, and investment tax credits, including the amortization and reporting period amounts.

§ 290.204 Rate of return information.

The utility shall report the following for the reporting period:

(a) *Capitalization.* Beginning and end of year balances for various components of total capitalization.

(b) *Costs of capital.* Costs of capital, including interest costs and book values of the various issues of debt and preferred stock book value and dividends for the various issues of preferred stock.

§ 290.205 Costing periods.

The utility shall design and report costing periods which group together contiguous hours of similar cost in an administratively feasible manner.

Subpart C—Marginal Cost Information

§ 290.301 General instructions for reporting marginal cost information.

The utility shall report all marginal cost information in accordance with the following general instructions:

(a) *Estimates of future costs and inflation factors used.* Except as otherwise specified, all estimates of future costs may be reported either in constant (base year) dollars or in current (expenditure year) dollars, and the assumed inflation factors shall be indicated.

(b) *Historic costs.* Except where an adjustment is specifically required, all historic costs shall be as recorded.

(c) *Designation of estimations.* All estimated historic and reporting period information shall be designated "Est."

(d) *Information not applicable.* All requested information not applicable to the utility's operations shall be designated "Not Applicable."

§ 290.302 Generation cost information.

For generation costs the utility shall report the following:

(a) *Production planning information for existing generating plants.* For the reporting period for each generating unit (or for each group of generating units with similar operating characteristics):

(1) Plant-unit identification. (If two or more units are reported as a group, identify each unit.)

(2) If jointly owned, the percent ownership of the unit's total capability.

(3) The kind of unit (steam, internal combustion, gas turbine, nuclear, conventional hydroelectric, pumped storage, or other).

(4) Estimated retirement date.

(5) Primary and secondary fuel types.

(6) Net dependable capacity (in kilowatts).

(7) Fixed operating and maintenance expenses (in dollars per kilowatt per year).

(8) Cost of fuel per kilowatt-hour of net generation at full load; i.e., when the unit is run at 100 percent of net dependable capacity (in cents per kilowatt-hour).

(9) Average cost of fuel per million Btu's burned.

(10) Average heat content of fuel burned (in Btu's per unit of fuel measure).

(11) Heat rates at 100, 75 and 50 percent of net dependable capacity (in Btu's per kilowatt-hour).

(12) Non-fuel variable operating and maintenance costs per kilowatt-hour of net generation (in cents per kilowatt-hour).

(13) Planned maintenance requirements (in days of maintenance per year).

(14) Equivalent forced outage rate (in percent).

(15) Minimum loading under normal operating conditions (in kilowatts).

(16) Time required to achieve full load from:

(i) A cold start.

(ii) A hot start.

(17) Start-up costs from a cold start (in dollars).

(18) Number of hours connected to load.

(19) Net generation, exclusive of plant use.

(20) If the unit is hydroelectric, the following information for each month of the reporting year:

(i) Net capability under average or median flow conditions (in kilowatts).

(ii) Net capability under adverse flow conditions (in kilowatts).

(iii) Monthly energy output under average or median flow conditions (in kilowatt-hours).

(iv) For hydroelectric units having storage capability, the usable storage capacity (in acre-feet or equivalent megawatt-hours).

(21) Capital costs, on an undepreciated original cost basis, as follows:

(i) Land and land rights, if such costs are incurred for the unit.

(ii) Structures and improvements.

(iii) Equipment.

(iv) Total capital costs.

(v) Cost per kilowatt of installed capacity.

(b) *Production planning information for planned additions to generating capacity.* For the first full year of commercial operation for each generating unit (or for each group of generating units with similar operating characteristics) which is planned to go into operation during the next 10 years:

(1) Plant-unit identification. (If two or more units are reported as a group, identify each unit.)

(2) If to be jointly owned, the planned percent ownership of the unit's expected capability.

(3) Kind of unit (steam, internal combustion, gas turbine, nuclear, conventional hydroelectric, pumped storage, or other).

(4) Planned date of commercial operation.

(5) Estimated earliest possible date of commercial operation.

(6) Estimated unit life.

(7) Primary and secondary fuel types.

(8) Expected net dependable capacity (in kilowatts).

(9) Annual estimated expenditures up to planned date of commercial operation, separating out AFUDC.

(10) Estimated fixed operating and maintenance expenses (in dollars per kilowatt per year).

(11) Estimated cost of fuel per kilowatt-hour of net generation at full load; i.e., when the unit is run at 100 percent of net dependable capacity (in cents per kilowatt-hour).

(12) Estimated average cost of fuel per million Btu's burned.

(13) Expected average heat content of fuel to be burned (in Btu's per unit of fuel measure).

(14) Estimated heat rates at 100, 75 and 50 percent of net dependable capacity (in Btu's per kilowatt-hour).

(15) Estimated non-fuel variable operating and maintenance costs per kilowatt-hour of net generation (in cents per kilowatt-hour).

(16) Expected planned maintenance requirements (days of maintenance per year).

(17) Expected annual equivalent forced outage rate (in percent).

(18) Expected minimum loading under normal operating conditions (in kilowatts).

(19) Expected time required to achieve full load from:

(i) A cold start.

(ii) A hot start.

(20) Estimated start-up costs form a cold start (in dollars).

(21) Expected number of hours connected to load.

(22) Expected net generation, exclusive of plant use.

(23) If the unit is hydroelectric, the following information for each month of the first full year of operation:

(i) Expected net capability under average or median flow conditions (in kilowatts).

(ii) Expected net capability under adverse flow conditions (in kilowatts).

(iii) Expected monthly energy output under average or median flow conditions (in kilowatt-hours).

(iv) For hydroelectric units having storage capability, the expected usable storage capacity (in acre-feet or equivalent megawatt-hours).

(24) Estimated capital costs as follows:

(i) Land and land rights, if such costs will be incurred for the unit.

(ii) Structures and improvements.

(iii) Equipment.

(iv) Total capital cost.

(v) Cost per kilowatt of installed capacity.

(c) *Factors affecting existing generating units.* For the existing generating units specified in paragraph (a) of this section, the following additional information:

(1) A description of any changes in engineering, regulatory or economic conditions (apart from general inflation) that are expected to affect significantly, during the next 5 years, values of any of the data items reported.

(2) A description of any economic, engineering or regulatory factors that interfered during the reporting period with merit order dispatching of the specified generating units and an assessment of the likelihood that those factors will continue to limit merit order dispatching during the next 10 years.

(d) *Planning method used.* A description of the system planning method or model used to determine the pattern of generating capacity additions specified in paragraph (b) of this section.

(e) *Other sources of information.* A list of any publicly available reports, documents and forms containing information about the utility's planned additions to generating or transmission capacity which were supplied within the previous 18 months to regional reliability councils or to State or Federal regulatory agencies.

(f) *Ten year resource projection.* For each of the next 10 years, estimates of the following at the time of each summer and winter peak:

(1) The net dependable capacity available from system plants.

(2) The total capacity available through firm purchase agreements.

(3) The total firm obligations of capacity to other systems.

(4) The total system net dependable capacity (paragraphs (f)(1) plus (f)(2) of this section minus paragraph (f)(3)).

(5) The total system reserve capacity required.

(6) The total reserve capacity available from other systems through interchange or emergency agreements.

(7) The reserve capacity to be supplied by system plants (paragraph (f)(5) of this section minus paragraph (f)(6)).

(8) The net assured system capacity (paragraph (f)(4) of this section minus paragraph (f)(7)).

(g) *Net annual cost of the generating unit or units that will be installed to meet increases in peak demand.* The estimated net annual cost (in dollars per kilowatt) of the generation unit or units most likely to be installed by the utility during the next 10 years to meet increases in peak demand. The net annual cost shall be defined as the additional carrying charges for the unit less any fuel savings that may occur as a result of the unit's addition. The calculation should take into account the life cycle costs of the equipment being analyzed. As an alternative to supplying information on the specific generation facility selected, the utility may provide the estimated net annual cost of a 50 or 100 megawatt facility of the capacity type selected.

§ 290.303 Energy cost information.

For energy costs, the utility shall report the following:

(a) *Typical hourly marginal energy costs.* Hourly marginal energy costs (in cents per kilowatt-hour) for a typical weekday, a typical weekend day, and the system peak day for each month of the reporting period and for each month of the next 5 years. Marginal energy cost at any hour shall be defined, for purposes of fulfilling the reporting requirements of this part, as the cost of fuel and variable operating and maintenance expenses incurred in producing an additional kilowatt-hour of electricity to supply all retail customers and those wholesale customers that are served under firm contracts. Marginal energy costs shall be equivalent to the fuel and variable operating and maintenance costs of the most expensive machine on line use of which will be increased or decreased in response to additional changes in demand. If increments or decrements to such retail and wholesale load are supplied by purchased power, the marginal energy cost shall be defined as the cost of that purchased power.

(b) *Other information on marginal energy costs.* If the utility has calculated marginal energy costs or system lambdas for any hours other than those reported in paragraph (a) of this section, this additional information, upon request.

(c) *Pool hourly marginal energy costs.* If the utility is a member of a centrally dispatched power pool, hourly marginal energy costs (in cents per kilowatt-hour) for a typical weekday, a typical weekend day, and the pool peak day for each month of the reporting period and for each month of the next 5 years.

(d) *Procedures and models used.* A general description of the procedures and models used in estimating hourly marginal energy costs.

(e) *Hydroelectric units.* If a hydroelectric unit is used to meet a marginal load, the assumptions and procedures used in valuing the electricity produced from the hydroelectric source.

(f) *Effect of purchased power costs.* The following information on purchased power costs:

(1) The hours in the typical days of the reporting period specified in paragraph (a) of this section when the marginal energy cost was determined by the price paid for purchased power, with citations to contracts, tariffs or agreements then in effect.

(2) The hours in the projected typical days specified in paragraph (a) of this section in which the marginal energy

cost is likely to be determined by the price paid for purchased power, with citations to contracts, tariffs or agreements currently in effect and likely to determine the hourly marginal energy costs specified in paragraph (a) of this section.

(g) *Marginal energy costs by costing period and by year.* Estimates of the average hourly marginal energy cost (in base year cents per kilowatt-hour) by costing period for the reporting year and for each of the next 5 years using the costing periods specified in § 290.308. For example, if 4 costing periods are specified in § 290.308, 24 items would be reported.

(h) *Calculated marginal energy costs by costing period.* A single marginal energy cost calculated for each of the costing periods specified in § 290.308, using the information specified in paragraph (g) of this section, and a description of the assumptions and procedures used in making these calculations. For example, if 4 costing periods are specified in § 290.308, 4 items would be reported based on the 24 items reported in paragraph (g) of this section.

(i) *Effect of energy loss.* The estimated marginal energy costs by voltage level for the different costing periods specified in § 290.308 using the estimates of energy loss factors specified in § 290.408(b).

§ 290.304 Transmission cost information.

For transmission costs the utility shall report the following:

(a) *Plant information.* For transmission plant:

(1) The expenditures for additions to transmission plant by principal voltage levels for the reporting year and for each of the previous 10 years separating out AFUDC. If available, expenditures for replacements shall be separated out and labeled accordingly.

(2) The estimated expenditures for additions to transmission plant by principal voltage levels for each of the next 5 years, separating out expected AFUDC. If available, expenditures for replacements shall be separated out and labeled accordingly.

(3) An estimate of the cost of additional transmission investment (in base year dollars) that would be required for the installation of the generation facility or facilities described in § 209.302(g); i.e., the cost required to establish a connection from the high voltage side of the step-up transformer at the generation facility through the switch connection to the transmission grid, plus such other expenditures as may be necessary to strengthen the transmission system to accommodate the unit or units.

(4) For paragraphs (a)(1) and (a)(2) of this section, payments received and an estimate of payments to be received from other utilities for use of the additional transmission capacity.

(5) A system map showing the following, except that a utility need not identify the specific site of a planned facility if it believes that disclosure of such information will raise acquisition costs:

(i) Existing generation and transmission facilities.

(ii) Generation facilities planned to go into commercial operation during the next 10 years.

(iii) Transmission facilities planned to go into commercial operation during the next 5 years.

(b) *Operating and maintenance expense.* For operating and maintenance expenses (FERC Accounts 560 through 573):

(1) The transmission operating and maintenance expenses, by account where applicable, for the reporting year and for each of the previous 10 years, adjusting to typical levels any expenses which the utility believes were extraordinary or likely to be non-recurring.

(2) The estimated transmission operating and maintenance expenses for each of the next 5 years. This information may be provided in the form of estimated totals for each of the next 5 years and need not be given by account number.

(3) The operating and maintenance expenses associated with the installation of the additional transmission plant specified in paragraph (a)(3) of this section.

(4) For paragraphs (b)(1) and (b)(2) of this section, the following:

(i) Dispatch expenses related to pool or interchange operations.

(ii) Any fixed payments, such as rental payments.

§ 290.305 Distribution and customer cost information.

For distribution and customer costs the utility shall report the following:

(a) *Plant information.* For distribution plant:

(1) The expenditures for additions to distribution plant for the reporting year and for each of the previous 5 years. If available, expenditures for replacements shall be separated out and labeled accordingly.

(2) The expected expenditures for additions to distribution plant for each of the next 3 years. If available, expenditures for replacements shall be separated out and labeled accordingly.

(3) An estimate of the current cost of connecting a new customer to the distribution system for each customer group specified in § 290.404 (b) and (d). This estimate should show, if practicable, the current cost of the following:

(i) An additional distribution line for the average addition.

(ii) an additional kilovolt-ampere of line transformer for the average addition.

(iii) The service drop for the average addition.

(iv) The meter used for the average addition.

(v) The labor required to connect a new customer.

(b) *Operating and maintenance expense.* For operating and maintenance expenses (FERC Accounts 580 through 598):

(1) The distribution operating and maintenance expenses, by account where applicable, for the reporting year and for each of the previous 5 years, adjusting to typical levels any expenses which the utility believes were extraordinary or likely to be non-recurring.

(2) The estimated distribution operating and maintenance expenses for each of the next 3 years. This information may be provided in the form of estimated totals for each of the next 3 years and need not be provided by account number.

§ 290.306 Other cost information.

For each of the previous 5 years, the utility shall report the following:

(a) *Customer expenses.* Customer account expenses, by account (FERC Accounts 901 through 910).

(b) *Sales expenses.* Sales expenses, by account (FERC Accounts 911 through 916), indicating separate amounts that can reasonably be attributed to each customer group specified in § 290.404 (b) and (d).

(c) *Administrative and general expenses.* Administrative and general expenses, by account (FERC Accounts 920 through 932).

(d) *Certain taxes.* Social security and unemployment taxes (FERC Account 408.1).

(e) *Electric plant in service.* Electric plant in service, end of the year (FERC Account 101).

(f) *General plant.* General plant, by account, end of the year (FERC Accounts 389 through 399).

(g) *Materials and supplies.* Materials and supplies, by account, end of the

year (FERC Accounts 151 through 157 and 163).

(h) *Prepayments.* Prepayments, end of the year (FERC Account 165).

§ 290.307 Annual carrying charge rates.

For annual carrying charge rates the utility shall report the following:

(a) *Estimates.* Estimates of current annual carrying charge rates for generation, transmission, and distribution facilities based on annual revenue requirement calculations for a hypothetical $1000 investment. These calculations shall be made in accordance with the following rules:

(1) The calculations shall correspond to the regulatory prescriptions of the predominant retail regulatory jurisdiction.

(2) Publicly owned systems shall present carrying charge rates calculated with reference to the cost factors relevant to their system planning.

(3) The rate of return component shall be based on the utility's expected capital structure and marginal costs of debt, preferred and common equity and customer contributed capital.

(b) *Worksheets.* Worksheets showing how the calculations specified in paragraph (a) of this section were made.

§ 290.308 Costing periods.

The utility shall design and report costing periods which group together contiguous hours of similar cost in an administratively feasible manner.

Subpart D—Load Data

§ 290.401 General instructions for reporting load data.

The utility shall report load data in accordance with the following general instructions:

(a) *Hourly load data.* Kilowatt loads shall be reported for a 24-hour period, beginning at 12:01 a.m. and ending at 12:00 midnight, local time, using an interval of integration of the reporting utility's choice, so long as such time interval is no longer than 60 minutes. Pool, system and customer group loads shall be reported using the same integration interval. If loads are metered on a different basis from that reported, the time interval of integration for metered loads and the factor which converts metered loads to reported loads shall be specified.

(b) *Load data by retail regulatory jurisdiction.* Each utility that serves at retail in more than one retail regulatory jurisdiction shall report load data specified in § 290.403 as follows:

(1) By separate retail regulatory jurisdiction for data specified in § 290.403 (a)(1) and (a)(2) and (a)(3), unless all such jurisdictions waive the separate reporting requirement. Opportunity for comment on the waiver request shall be allowed prior to Commission action on the waiver.

(2) For the system as a whole, for data specified in § 290.403(a)(4), unless 1 or more retail regulatory jurisdictions requests separate reporting by jurisdiction, in which case such separate reporting shall be required. If a party other than a retail regulatory jurisdiction requests that hourly customer group load data be reported separately, that party must demonstrate that the benefits of reporting such loads by separate jurisdictions outweight the costs of reporting such loads by separate jurisdictions.

(c) *Applications for waiver or separate reporting.* Applications under paragraph (b) of this section for waiver or for separate reporting of customer group load data shall be filed with the Commission at least 2 years prior to the time the data would otherwise be required to be reported.

(d) *Option for 1980 filing.* In complying with the filing requirement for November, 1980, the utility may choose whether to report the customer group load data specified in § 290.403 (a)(1), (a)(2), (a)(3) and (a)(4) for the system as a whole or on a separate jurisdictional basis.

(e) *Master metering.* For purposes of reporting data in § 290.406, "customers" shall be defined as meters. A utility with master metered loads shall report the number of master meters separately, if available, and identify the groups of customers served under master meters, if available.

§ 290.402 Load data for the total of all customers (system and pool load data).

The utility shall report system and pool load data as follows:

(a) *General.* The kilowatt load shall be measured by the sum of the coincident net generation and purchases, plus or minus net interchange, minus temporary deliveries (not interchange) of emergency power to another system. These data shall be consistent with the monthly coincident peak kilowatt loads as reported in FERC Form 1, *Annual Report*, page 431, column (b).

(b) *Pool load data.* If the utility is a member of a power pool that centrally dispatches or a power pool that plans future bulk power facilities as a pool, load data as specified in this section shall be reported for the pool as well as the utility, unless otherwise specified.

(c) *Historic peak loads.* For each of the previous 10 years, the summer and winter peak loads on the system (in kilowatts) shall be reported and the date, day of the week and time of day for each peak shall be indicated. These data are not required for power pool reporting.

(d) *Load data for the reporting period.* For the reporting period, the following data shall be reported:

(1) Kilowatt load for each clock hour of each day. A utility that provides the Edison Electric Institute with "Load Diversity Studies" may provide these data in computer compatible form to satisfy this reporting requirement.

(2) As an alternative to paragraph (d)(1) of this section, hourly system loads for a typical weekday, a typical weekend day and the system peak day for each month in the reporting period, if the utility certifies that it will make the information specified in paragraph (d)(1) of this section available upon request.

(3) Monthly peak (maximum coincident kilowatt) load for each month, indicating the date, day of the week and time of day for each peak. If monthly peaks are normalized for weather or for other factors affecting loads, the utility shall report these data, along with a description and demonstration of the normalizing techniques used.

(e) *Projected load data.* For each of the next 5 years and for the tenth year, the following shall be reported:

(1) The projected annual load duration curves and the duration of load (in hours) at 100, 98, 95, 90, 80, 60, 40 and 20 percent of the peak load and an indication as to whether these data were used as the basis for the planned capacity additions reported under § 290.302(b).

(2) For each of the next 5 years and for the period between the fifth and tenth year, the average annual growth rates implied by the projected load duration curves specified in paragraph (e)(1) of this section for total kilowatt-hour sales, summer peak load, and winter peak load.

(3) Hourly loads for a typical week day, a typical weekend day and the system peak day for each month, or for each group of months for which there is no variation in hourly load.

§ 290.403 Load data for certain customer groups.

The utility shall report load data for each customer group for which data are required to be reported under § 290.404 as follows:

(a) *General.* For each month in the reporting period and for each such customer group:

(1) The group maximum demand (in kilowatts).

(2) The group contribution (in kilowatts) to the monthly jurisdictional maximum demand.

(3) The group contribution (in kilowatts) to the monthly system maximum coincident demand.

(4) Hourly group loads for a typical week day, a typical weekend day, the group peak day, and the system peak day.

(b) *Accuracy level.* If sample metering is required, the sampling method and procedures for collecting, processing, and analyzing the sample loads, taken together, shall be designed so as to provide reasonably accurate data consistent with available technology and equipment. An accuracy of plus or minus 10 percent at the 90 percent confidence level shall be used as a target for the measurement of group loads at the time of system and customer group peaks.

(c) *Sampling plan.* The utility shall file a sampling plan and description of any current sample at the time of making its first filing under this part and, if the load data are required to be collected on a sample metered basis but the data collected do not realize the target level of accuracy specified in paragraph (b) of this section, the utility shall explain why that target was not met.

(d) *Load research conducted every 5 years.* If load data are required to be collected on a sample metered basis, such research need not be conducted more frequently than every 5 years for any utility that had total sales of electric energy for purposes other than resale of less than 1 billion kilowatt-hours annually in the three-calendar-year period 2 years prior to the reporting period. The kilowatt demands obtained from sample metering shall be updated in each reporting period to reflect current kilowatt-hour sales, customers and other consumption determinants and a description and example of the estimation technique and underlying data used for such updating shall be provided.

§ 290.404 Customer groups to be reported.

Subject to the provisions of paragraphs (e) and (f) of this section, the utility shall gather and report the load data specified in § 290.403 for each of the following customer groups. Best estimates shall be based on any sample metered data collected for all or part of the group and may also be based on borrowed data to the extent provided in § 290.405(a).

(a) *By major customer class.* The utility shall report load data in 1980 and in each subsequent reporting period on a best estimate basis for each major customer class as defined in paragraph (b) of this section.

(b) *Definition of major customer class.* Major customer class is defined as residential use (domestic), commercial use (office buildings, stores, shopping centers, etc.) and industrial use (factories, etc.) and any other rate class to which 10 percent or more of the system kilowatt-hour sales at retail are made for any month during the reporting period (other than a rate class composed in whole or in part of residential, commercial or industrial users). Estimates for each major customer class shall exclude master meters serving more than one major customer class.

(c) *By certain end use.* Subject to the provisions of paragraph (c)(3) of this section, the utility shall report load data in 1982 and in each subsequent reporting period for those major end uses specified in paragraph (d) of this section, as follows:

(1) If the utility has a separate rate for any of the specified end uses as of December 31, 1980 the utility shall report load data for such rate class on a sample metered basis in 1982 and in each subsequent reporting period, except that the utility may combine for reporting purposes any such rate classes which apply to a single specified end use.

(2) If the utility does not have a separate rate for a specified end use, the utility shall report load data for such specified end use on a best estimate basis in 1982 and on a sample metered basis in 1984 and in each subsequent reporting period.

(3) The list of items in paragraph (d) of this section shall not take effect until the Commission makes a determination that such list or a modification thereof shall become effective.

(d) *Definition of major end use.* Mayor end use is defined as:

(1) Residential space heating.

(2) Residential water hearing.

(3) Single family or individually metered multifamily dwelling units using at least 15,000 kilowatt-hours annually or using only electricity for heating, cooling, cooking, water-heating and all other domestic uses.,

(4) Commercial space heating.

(5) Commercial space cooling.

(6) Office building using only electricity for heating, cooling, water-heating and all other uses.

(7) Master metered multiple dwellings.

(8) Electric heat used in agricultural or industrial processes.

(9) Large (over 1000 Kilowatts) electric drive motors (e.g., steel rolling mills).

(10) Irrigation.

(e) *Extension for all other customer groups.* Each utility covered under § 290.101 is granted an extension until January 1, 1985 for the gathering and reporting of separate cost and load data for any electric consumer class for which there is a separate rate and for any different consumption pattern within a class if information on such class or consumption pattern is not required to be reported as a customer group under this section.

(f) *Exemption for customer groups served under time of day rates.* Each utility covered under § 290.101 is granted an exemption from collecting load data by sample metering for any customer group served under time of day rates but shall be required to submit all information which is required to be reported in §§ 290.305(a)(3), 290.306(b), 290.406, 290.501 and 290.502 for each customer group specified in paragraphs (b) and (d) of this section. This section shall not take effect until the Commission makes a determination that such exemption or a modification thereof shall become effective.

§ 290.405 Certain exemptions from reporting requirements.

Exemptions from the reporting requirements of this subpart are provided as follows:

(a) *Borrowed load data.* The utility may use borrowed load data as support for its best estimate of loads submitted for the November, 1980 filing only and may use borrowed data in any subsequent filing, only if granted such an exemption under § 290.601.

(b) *Joint load research.* If a group of utilities intends to engage in joint load research for the purpose of fulfilling the reporting requirements of §§ 290.402 and 290.403, the group may apply to the Commission under § 290.601 for an exemption from the requirement that each utility in the group separately report such data.

§ 290.406 Other information.

The utility shall report additional information as follows:

(a) *Information on customer groups.* For each customer group specified in § 290.404 (b) and (d), the following information shall be reported:

(1) The monthly energy sales (in thousand kilowatt-hours) for each month of the reporting period.

(2) The number of customers at the end of the reporting period.

(3) For the reporting period and for each of the previous 5 years, the number

of new customers, if available, by voltage level. If this information on new customers is not available, the utility shall report instead the net change in customers.

(b) *Loss factors.* The utility shall report the estimated loss factors, both for energy (kilowatt-hours) and demand (kilowatts), resulting from the transmission of electricity from the system's source to the voltage levels at which sales are made. If different loss factors apply to peak and off-peak losses, both sets of loss factors shall be provided.

(c) *Shifts on and off daylight saving time.* The utility shall report the hour, day and month of shifts on and off daylight saving time, if applicable, and the time zone in which the retail load is located.

Subpart E—Calculated Costs

§ 290.501 Accounting cost calculations.

The utility shall calculate accounting costs as follows:

(a) *Calculated accounting costs of providing service.* The utility shall calculate the accounting costs of providing service by costing period and by voltage level for each customer group specified in § 290.404 (b) and (d) and shall provide a summary of this information by completing Table 1. The table shall be completed for each retail regulatory jurisdiction in which the utility operates, unless the utility can show that the jurisdictional cost variation is not significant. If a method for calculating accounting costs has been specified by State law or by the retail regulatory jurisdiction, the calculation method used by the utility shall be consistent with such method. In the case of a non-regulated utility, the calculation method used shall be consistent with any applicable legal constraints upon such utility.

(b) *Description of method used.* The utility shall describe the method used for the calculations specified in paragraph (a) of this section as well as the following:

(1) For plant:

(i) A functional breakdown of distribution plant into demand and customer related components and an explanation of the functional allocation used.

(ii) A breakdown of demand related transmission or distribution plant by voltage levels and an explanation of this allocation.

(iii) A breakdown of all plants directly assigned to each customer group specified in § 290.404 (b) and (d), if such assignment is appropriate based on prior precedents of the retail regulatory jurisdiction.

(2) Estimates of cash working capital required, including an explanation of the computation. Sufficient information shall be submitted to enable a calculation employing those methods specified by the retail regulatory jurisdiction or those methods chosen by the non-regulated electric utility. If the estimated cash working capital requirement is based on a lead lag study, a summary of the study shall also be filed.

(3) For operating and maintenance expenses:

(i) A functional breakdown of distribution operating and maintenance expenses into demand and customer related components and an explanation of the functional allocation made.

(ii) A breakdown of demand related transmission and distribution operating and maintenance expenses by voltage level and an explanation of the allocation method used.

(iii) A breakdown of all operating and maintenance expenses directly assigned to each customer group specified in § 290.404 (b) and (d) of such assignment is appropriate based on prior precedents of the retail regulatory jurisdiction.

(iv) For accumulated deferred income tax an explanation of the method of functionalization used.

(c) *Cost study.* The reporting utility shall provide a copy of the cost study upon which the information entered in summary Table 1 is based, or certify that such study has been conducted and will be made available upon request. This provision shall not relieve the utility from reporting any information specified in Subparts B, D and E of this part.

§ 290.502 Marginal cost calculations.

The utility shall calculate marginal costs as follows:

(a) *Calculated marginal costs of providing service.* The utility shall calculate for the system as a whole the marginal costs of providing service by costing period and by voltage level for each customer group specified in § 290.404 (b) and (d) and shall provide a summary of this information by completing Table 2. The calculations shall be made as follows:

(1) The marginal costs shall be shown without any adjustments for revenue constraints. This requirement shall in no way prevent the utility from presenting an additional table showing how time differentiated rates could be developed from the information developed in summary Table 2.

(2) If a method for calculating marginal costs has been specified by the predominant retail regulatory jurisdiction or by State law in that jurisdiction, the calculation method used by the utility shall be consistent with such method. In the case of a non-regulated electric utility, the calculation method used shall be consistent with any applicable legal constraints upon such utility.

(b) *Description of method used.* The utility shall describe the method used for the calculations specified in paragraph (a) of this section as well as the following:

(1) A listing of the different components of demand related costs (marginal generation, transmission, and distribution capacity costs) and how such costs were calculated.

(2) A description of how demand related costs were determined for different costing periods.

(3) A description of how the marginal energy costs specified in § 290.303 were calculated.

(4) A listing of the different components of customer costs and how such costs were calculated.

(c) *Cost study.* The utility shall provide a copy of the cost study upon which the information entered in summary Table 2 is based or certify that such a study has been conducted and will be made available upon request. This provision shall not relieve the utility from reporting any information specified in Subparts C, D and E of this part.

Table 1.—*Illustrative Summary of Accounting Costs by Costing Period, Customer Group and Voltage Level*

Customer group and voltage level	Costing period				Annual customer cost
	Peak hours		Off-peak hours		
	I	II	III	IV

Transmission	$/kW	$/kW	$/kW	$/kW	
Distribution	$/kW	$/kW	$/kW	$/kW	
Energy Costs	¢/kWh	¢/kWh	¢/kWh	¢/kWh	
Customer Group B:					
Voltage Level 1					$/customer.
Demand Costs:					
Generation	$/kW	$/kW	$/kW	$/kW	
Transmission	$/kW	$/kW	$/kW	$/kW	
Distribution	$/kW	$/kW	$/kW	$/kW	
Energy Costs	¢/kWh	¢/kWh	¢/kWh	¢/kWh	

N.B.—Both the number and designation of the costing periods, customer groups, and voltage levels shown in this table are illustrative. They are not intended to suggest any constraint on the reporting utility's choice of the specifications most appropriate to its operations. The costing periods, customer groups, and voltage levels chosen, however, should be clearly specified either in the table headings or in footnotes. In most circumstances the cost components shown in this table would require adjustments in order to be used for billing under time differentiated rates.

Subpart F—Exemptions and Extensions

§ 290.601 Exemptions.

Applications for exemptions shall be made as follows:

(a) *Application.* A utility may apply for an exemption from all or part of the requirements set forth in this part by filing an application with the Commission no less than 18 months prior to the time the information would otherwise be required, and by November 1, 1979, for the 1980 filing. The application shall contain the following information:

(1) The name and location of the applicant.

(2) The time of filing for which each exemption is sought.

(3) The nature of each exemption sought, including a list of the requirements set forth in Subparts B, C, D and E of this part from which the exemption is sought and information explaining why the gathering of such information will not be likely to carry out the purposes of section 133 of PURPA. Such information shall include the following:

(i) If the exemption is based on the nature of the utility or on the type or extent of service provided, the application shall contain information specifically relating such factors to the nature of the exemption sought.

(ii) If the exemption is based on alternate compliance with the requirements of section 133 of PURPA, the application shall contain a showing, with respect to the specific utility, that the purposes of section 133 have been and will continue to be served by use of such alternate procedures.

(iii) If the exemption is based on plans for deferred compliance with the reporting requirements of this part, the application shall contain information on economic, technical, or other factors which prevent timely compliance, and shall contain a plan of compliance stating the schedule of actions to be taken by the utility to achieve full compliance.

(4) A statement of any action taken by a State regulatory authority in response to an application submitted to such State regulatory authority under paragraph (b) of this section, together with the statement of concurrence by the State regulatory authority, if any.

(b) *State regulatory authority review of applications for exemption.* A utility regulated by a State regulatory authority and applying for an exemption under this section shall submit such application to any State regulatory authority which has ratemaking authority for such utility for review prior to or concurrent with filing the application with the Commission.

(c) *Requests by a State regulatory authority.* A State regulatory authority may act on behalf of 1 or more utilities subject to its regulation in requesting a total or partial exemption. Such requests shall be filed at least 18 months prior to the time the information would otherwise be required and shall contain the following information:

(1) The name and location of the utility for which the exemption is sought.

(2) The time of filing for which the exemption is sought.

(3) The nature and duration of the exemption sought including a list of the requirements set forth in Subparts B, C, D and E of this part for which each exemption is sought and information explaining why the gathering of such information will not be likely to carry out the purposes of section 133 of PURPA. Such information shall include that information specified in paragraph (a)(3) (i), (ii) and (iii) of this section.

(d) *Public notice and comment.* (1) Within 15 days following receipt of the completed application for exemption submitted in accordance with paragraphs (a) or (c) of this section:

(i) The application shall be noticed in the Federal Register.

(ii) The utility shall apply to each State regulatory authority by which it is regulated to have such application

published in any official State publication in which rate change applications are usually noticed.

(iii) The utility shall have such application published in a sufficient number of newspapers of general circulation in the affected jurisdiction so as to give widest practicable notice to interested parties.

(2) A period of 45 days shall be permitted for receipt of written information, views, arguments, or other comments on the application, which period shall commence at the time all requirements imposed in paragraph (d)(1) of this section have been fulfilled.

(3) Additional information required for purposes of review and evaluation of the application shall be supplied if requested by Commission Staff or by the State regulatory authority.

(4) Within 15 days following the conclusion of the comment period, the applicant may file reply comments.

(e) *Scope of exemption.* A utility shall submit a separate application for each filing year for which it seeks a partial or total exemption. An exemption granted by the Commission shall apply only to the next filing required under § 290.102, unless otherwise specifically provided by the Commission.

§ 290.802 Extensions.

Applications for extensions shall be made as follows:

(a) *Applications.* A utility may apply for an extension of the November, 1980, deadline for all or part of the requirements set forth in this part by filing an application with the Commission on or before May 1, 1980, which application shall contain the following information:

(1) The name and location of the applicant.

(2) A description of the information requirements for which the extension is sought, including the length of the proposed extension.

(3) A showing of good cause for the extension sought.

(4) A statement describing plans for application for, or proposal of, any rate increase during the period covered by the extension.

(5) A statement of any action taken by a State regulatory authority in response to an application submitted to such State regulatory authority under paragraph (b) of this section, together with the statement of concurrence by the State regulatory authority, if any.

(6) A plan of compliance setting forth the steps that the utility will take to comply fully with the reporting requirements of this part and indicating the time when the information will be supplied.

(b) *State regulatory authority review of application for extension.* A utility regulated by a State regulatory authority and applying for an extension under this section shall submit such application to any State regulatory authority which has ratemaking authority for such utility for review prior to or concurrent with filing the application with the Commission.

(c) *Additional information.* Additional information required for purposes of review and evaluation of the application shall be supplied if requested by Commission Staff or by the State regulatory authority.

(d) *Comments by interested parties.* The Commission may seek comments from interested parties on applications for extensions.

Subpart G—Enforcement

§ 290.701 Enforcement provisions.

Pursuant to section 133(d) of PURPA, any person that violates a requirement of this part shall be subject to the following sanctions:

(a) *Violations.* Whoever violates any provision of this part shall be subject to a civil penalty of not more than $2,500 for each violation.

(b) *Willful violations.* Whoever willfully violates any provision of this part shall be fined not more than $5,000 for each violation.

(c) *Civil action by Attorney General.* Whenever it appears to the Commission or to its designee that any individual or organization has engaged, is engaged, or is about to engage in acts or practices constituting a violation of this part, the Commission or its designee may request the Attorney General to bring a civil action to enjoin such acts or practices, and upon a proper showing, a temporary restraining order or a preliminary or permanent injunction shall be granted without bond. In such action, the court may also issue mandatory injunctions commanding any person to comply with any provision, the violation of which is prohibited by this section.

(d) *Civil action by private party.* Any person suffering legal wrong because of any act or practice arising out of any violation of this part may bring a civil action for appropriate relief, including an action for a declaratory judgment or writ of injunction. United States district courts have jurisdiction of actions under this paragraph without regard to the amount in controversy. Nothing in this paragraph shall authorize any person to recover damages.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 153

[T.D. 79-166]

Antidumping; Certain Carbon Steel Plate From Taiwan

AGENCY: U.S. Treasury Department.

ACTION: Finding of Dumping.

SUMMARY: This notice is to inform the public that investigations conducted under the Antidumping Act, 1921, as amended, by the U.S. Treasury Department and the U.S. International Trade Commission, respectively, have resulted in a determination that carbon steel plate from Taiwan produced by China Steel Corporation is being sold at less than fair value and that these sales are injuring an industry in the United States. On this basis, a finding of dumping is being issued and, generally, all unappraised entries of this merchandise will be liable for the possible assessment of special dumping duties.

EFFECTIVE DATE: June 13, 1979.

FOR FURTHER INFORMATION CONTACT: David Mueller, Operations Officer, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, N.W., Washington, D.C. 20229 (202-566-5492).

SUPPLEMENTARY INFORMATION: Section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)) (referred to in this notice as "the Act"), gives the Secretary of the Treasury responsibility for determining whether imported merchandise is being sold at less than fair value. Pursuant to this authority, the Secretary has determined that carbon steel plate from Taiwan produced by China Steel Corporation is being sold at less than fair value within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)). (Published in the Federal Register of February 14, 1979 (44 FR 9639).)

Section 201(a) of the Act (19 U.S.C. 160(a)) gives the United States International Trade Commission responsibility for determining whether, by reason of such sales at less than fair value, a domestic industry is being or is likely to be injured. The Commission has determined, and on May 14, 1979, it notified the Secretary of the Treasury

that an industry in the United States is being injured by reason of the importation of carbon steel plate from Taiwan that is being sold at less than fair value within the meaning of the Act. Notice of this determination was published in the **Federal Register** of May 22, 1979 (44 FR 29734).

On behalf of the Secretary of the Treasury, I hereby make public these determinations which constitute a finding of dumping with respect to carbon steel plate from Taiwan produced by China Steel Corporation.

For purposes of this notice, the term "carbon steel plate" refers to hot rolled carbon steel plate, not coated or plated with metal and not clad, other than black plate, not alloyed, and other than in coils. This merchandise is classified under item 608.8415 of the Tariff Schedules of the United States Annotated.

§ 153.46 [Amended]

Accordingly, § 153.46 of the Customs Regulations (19 CFR 153.46) is being amended by adding the following to the list of findings of dumping currently in effect:

Merchandise	Country	Treasury decision
Carbon Steel Plate produced by China Steel Corporation.	Taiwan	79-166

(Sec. 201, 407, 42 Stat. 11, as amended, 18 (19 U.S.C. 160, 173).)

Robert H. Mundheim,
General Counsel of the Treasury.

SUPPLEMENTARY INFORMATION: Section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)) (referred to in this notice as "the Act"), gives the Secretary of the Treasury responsibility for determining whether imported merchandise is being sold at less than fair value. Pursuant to this authority, the Secretary has determined that sugar from Belgium, France and the Federal Republic of Germany is being sold at less than fair value within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)). (Published in the **Federal Register** of February 12, 1979 (44 FR 8949).)

Section 201(a) of the Act (19 U.S.C. 160(a)) gives the United States International Trade Commission responsibility for determining whether, by reason of such sales at less than fair value, a domestic industry is being or is likely to be injured. The Commission has determined, and on May 16, 1979, it notified the Secretary of the Treasury that an industry in the United States is being injured by reason of the importation of sugar from Belgium, France and the Federal Republic of Germany that is being sold at less than fair value within the meaning of the Act. Notice of this determination was published in the **Federal Register** of May 23, 1979 (44 FR 29932).

On behalf of the Secretary of the Treasury, I hereby make public these determinations which constitute a finding of dumping with respect to sugar from Belgium, France and the Federal Republic of Germany.

For purposes of this notice, the term "sugar" refers to raw and refined sugar provided for in item numbers 155.20 and 155.30 of the Tariff Schedules of the United States (TSUS).

§ 153.46 [Amended]

Accordingly, § 153.46 of the Customs Regulations (19 CFR 153.46) is being amended by adding the following to the list of findings of dumping currently in effect:

Merchandise	Country	Treasury decision
Sugar	Belgium, France, The Federal Republic of Germany	79-167

(Sec. 201, 407, 42 Stat. 11, as amended, 18 (19 U.S.C. 160, 173).)

Antidumping; Viscose Rayon Staple Fiber From Italy

AGENCY: U.S. Treasury Department.
ACTION: Finding of Dumping.

SUMMARY: This notice is to inform the public that separate investigations conducted under the Antidumping Act, 1921, as amended, by the U.S. Treasury Department and the U.S. International Trade Commission, respectively, have resulted in determinations that viscose rayon staple fiber from Italy is being sold at less than fair value and that these sales are injuring an industry in the United States. On this basis, a finding of dumping is being issued and, generally, all unappraised entries of this merchandise will be liable for the possible assessment of special dumping duties.

EFFECTIVE DATE: June 13, 1979.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5492).

SUPPLEMENTARY INFORMATION: Section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)) (referred to in this notice as "the Act"), gives the Secretary of the Treasury responsibility for the determination of sales at less than fair value. Pursuant to this authority, the Secretary has determined that viscose rayon staple fiber from Italy is being sold at less than fair value within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)). (Published in the **Federal Register** of February 27, 1979, 44 FR 11137).

Section 201(a) of the Act (19 U.S.C. 160(a)) gives the United States International Trade Commission responsibility for determining whether, by reason of such sales at less than fair value, a domestic industry is being or is likely to be injured. The Commission has determined, and on May 22, 1979, it

notified the Secretary of the Treasury that an industry in the United States is being injured by reason of the importation of viscose rayon staple fiber from Italy that is being sold at less than fair value within the meaning of the Act. Notice of this determination was published in the Federal Register of May 31, 1979 (44 FR 31327).

On behalf of the Secretary of the Treasury, I hereby make public these determinations, which constitute a finding of dumping with respect to viscose rayon staple fiber from Italy.

For purposes of this notice, the term "viscose rayon staple fiber" means viscose rayon staple fiber, except solution dyed, in noncontinous form, not carded, not combed, and not otherwise processed, wholly of filaments (except laminated filaments and plexiform filaments). This term includes both commodity fiber and specialty fiber.

§ 153.46 [Amended]

Accordingly, § 153.46 of the Customs Regulations (19 CFR 153.46) is being amended by adding the following to the list of findings of dumping currently in effect.

Merchandise	Country	Treasury decision
Viscose rayon staple fiber.	Italy	T.D. 79-168

(Sec. 201, 407, 42 Stat. 11, as amended, 18 (19 U.S.C. 160, 173).)

POSTAL SERVICE

39 CFR Part 111

Minimum Mail Size Standards and Nonstandard Mail Surcharge

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The final rule establishes July 15, 1979, as the effective date for the minimum size standards for all mail matter and for a surcharge to be applied to all nonstandard mail. This rule is intended to provide notice of the changes in postal regulations which implement the decisions of the Postal Service establishing the July 15, 1979, effective date.

EFFECTIVE DATE: July 15, 1979.

FOR FURTHER INFORMATION CONTACT: Skip McGill, Office of Mail Classification, (202) 245-4749.

SUPPLEMENTARY INFORMATION:

Minimum Mail Size Standards

On January 18, 1978, the Postal Service filed a request, pursuant to 39 U.S.C. 3623, with the Postal Rate Commission for a recommended decision which, among other things, would establish minimum size standards for all mail matter and a surcharge for non-standard letter size mail. On April 15, 1978, the Postal Rate Commission issued its recommended decision to the Governors of the Postal Service in that mail classification case. The Commission's decision recommended the establishment of both the minimum size requirements and a classification of nonstandard letter size mail.

On June 2, 1978, the Governors, acting on the Commission's recommendation pursuant to 39 U.S.C. 3625, established the following minimum size standards:

a. All mailing pieces must be at least 0.007 of an inch thick, and

b. All mailing pieces (other than keys and identification devices) which are ¼ of an inch thick or less must be:

(1) Rectangular in shape,

(2) At least 3½ inches high, and

(3) At least 5 inches long.

The effective date of the implementation of these standards was postponed so that the public would have ample time to adjust to the new size requirements.

On April 3, 1979, the Board of Governors of the Postal Service, by resolution issued pursuant to 39 U.S.C. 3625(f), ordered that the minimum size standards become effective at 12:01 A.M. on July 15, 1979. In order to implement those decisions, the Postal Service adopts a new Part 129 of the Postal Service Manual setting forth the minimum size standards and their effective date. In addition, the Postal Service also adopts conforming amendments to sections 131.2, 131.3 and 134.3 of the Postal Service Manual.

Nonstandard Mail Surcharge

In addition to the establishment of minimum size standards for all mail matter, the Governors' decision of June 2, 1976 declared that First-Class Mail weighing less than one ounce and single piece rate third-class mail weighing less than two ounces, are nonstandard and subject to a surcharge unless they meet the following size standards:

a. Length not greater than 11.5 inches, and

b. Height not greater than 6.125 inches, and

c. Thickness not greater than .25 inches, and

d. An aspect ratio (ratio of height to length) between 1:1.3 and 1:2.5 inclusive.

These regulations are incorporated in sections 131.34 and 134.33 of the Postal Service Manual. The application of a surcharge on nonstandard mail was also postponed in order to afford mailers a transition period in which to adapt to the new standards.

In April, 1978, the Potal Service, pursuant to 39 U.S.C. § 3622, requested from the Postal Rate Commission a recommended decision on a proposal to apply a surcharge, in addition to the applicable postage and fees, on nonstandard size mail. After public hearings on the proposal, the Commission, on February 28, 1979, transmitted its recommended decision to the Governors of the Postal Service to establish the surcharge at 7 (seven) cents per piece.

On April 3, 1979, the Governors, pursuant to 39 U.S.C. § 3625, approved the Commission's recommended decision, and the Board of Governors, by resolution issued pursuant to 39 U.S.C. § 3625(f), ordered the surcharge implemented at 12:01 A.M. on July 15, 1979. In order to implement those decisions, the Postal Service adopts conforming amendments to sections 131.13, 131.34 and 134.33 of the Postal Service Manual.

For the above reasons, the Postal Service hereby adopts the following amendments to the Postal Service Manual:

1. Add a new Part 129 to read as follows:

PART 129—MINIMUM SIZES

Effective July 15, 1979, the following minimum size standards will be applicable:

a. All mailing pieces must be at least 0.007 of an inch thick.

b. All mailing pieces (other than keys and identification devices mailed pursuant to 134.13) which are ¼ of an inch thick or less must be:

(1) Rectangular in shape,

(2) At least 3½ inches high, and

(3) At least 5 inches long.

Note.—Effective July 15, 1979, mailing pieces which do not meet these minimum size standards will be prohibited from the mails.

PART 131—FIRST CLASS

2. In 131.1 amend .13 to read as follows:

131.1 Rates

* * * * *

.13 Nonstandard Surcharge

Effective July 15, 1979, a surcharge of 7 (seven) cents will be assessed on each

piece of nonstandard mail as defined in 131.34.

3. Add statements at the end of 131.222 (a) and (b) as follows:

.222 Post cards

* * * * *

a. * * *

Effective July 15, 1979, post cards may not be smaller than 3½ by 5 inches. (See 129.)

b. * * *

Effective July 15, 1979, the thickness of post cards may not be less than 0.007 of an inch.

4. Add the following statement at the end of 131.33:

.33 Shape, ratio, and sealing for envelopes, cards, and self-mailers.

* * * * *

Note.—Effective July 15, 1979, all first-class mailing pieces which are ¼ of an inch thick or less must be rectangular in shape, at least 3½ inches high, and at least 5 inches long. All first-class mailing pieces must also be at least 0.007 of an inch thick, effective July 15, 1979. (See 129.)

5. In 131.34 amend .342 and add .343 to read as follows:

.34 Nonstandard First-Class Mail

* * * * *

.342 Nonstandard mail often results in delays or damage to mail because it does not lend itself to machine processing. For this reason, mailers are encouraged to avoid mailing nonstandard First-Class Mail.

.343 Effective July 15, 1979, a surcharge of 7 (seven) cents will be assessed on each piece of nonstandard First-Class Mail.

PART 134—THIRD CLASS

6. Add the following statement at the end of 134.32:

.32 Size, Shape, and Ratio

* * * * *

Note.—Effective July 15, 1979, all third-class mailing pieces (other than keys and identification devices mailed pursuant to 134.13) which are ¼ of an inch thick or less must be rectangular in shape, at least 3½ inches high, and at least 5 inches long. All third-class mailing pieces must also be at least 0.007 of an inch thick, effective July 15, 1979. (See 129.)

7. In 134.33 amend .333 to read as follows:

.33 Nonstandard Third-Class Mail

* * * * *

.333 Effective July 15, 1979, a surcharge of 7 (seven) cents will be assessed on each piece of nonstandard third-class single piece rate mail.

These changes will be included in the Domestic Mail Manual when it is published this summer. These changes will be published in the Federal Register as provided in 39 CFR 111.3.

(39 U.S.C. 401(2))

W. Allen Sanders,
Acting Deputy General Counsel.

39 CFR Part 257

Stamp Accountability at Philatelic Outlets

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This change in postal regulations authorizes a postmaster to maintain postage stock (includes stamps, stationery, and other philatelic products) of up to $125,000 at each philatelic outlet. Postage stock in excess of the above amount, up to $250,000, may be authorized upon approval at the regional level and with Headquarters' concurrence. Existing regulations do not provide a specific limit on the total dollar amounts of philatelic items authorized, and provide no method for requesting approval of philatelic items in excess of $125,000.

EFFECTIVE DATE: July 13, 1979.

FOR FURTHER INFORMATION CONTACT: Jo Elaine Anderson, 245-4434.

In 39 CFR 257.3 revise paragraph (e)(3)(v) to read as follows:

§ 257.3 Distribution and sale of stamps, postal stationery and philatelic products.

* * * * *

(e) Sales Policies * * *

(3) Philatelic Outlets * * *

(v) Stamp Credit (Accountability).

(A) Philatelic outlets should maintain a good working level of stamp stock, stationery, and philatelic products to encourage philatelic interest and to meet the needs of collectors. Therefore, postmasters may maintain a postage stock of up to $125,000 for each philatelic outlet at their office. This stock may be in excess of normal authorized stock limits.

(B) If operating requirements necessitate postage stock in excess of $125,000, written notification must be submitted to the appropriate Regional Retail Branch requesting special authorization. The Regional Retail Branch, with concurrence of the Regional Chief Postal Inspector, may authorize postage stock up to $250,000. If approved at the regional level, the request should be forwarded for Headquarters' concurrence to the Philatelic Marketing Division, Office of Consumer Marketing, Customer Service Department.

(C) The total amount of annual sales at the philatelic outlet must be included with any request for authorization to maintain a postage stock in excess of $125,000 for that outlet. Such requests will be approved only when the total sales justify the increase in stock level.

(D) All clerks working in philatelic outlets will be fully accountable for their own stamp credit. It is the responsibility of the postmaster to provide adequate security equipment for secure storage of these credits at all times. This paragraph (e)(3)(v) of this section does not apply to the Philatelic Sales Branch.

(39 U.S.C. 401, 404.)

W. Allen Sanders,
Acting Deputy General Counsel.

BILLING CODE 7710-12-M

POSTAL RATE COMMISSION

39 CFR Ch. III

[Order No. 284 Docket No. RM79-2]

Improving Government Regulations; Order of the Commission Amending Rules of Practice

June 7, 1979

AGENCY: Postal Rate Commission.

ACTION: Final Rules.

SUMMARY: Pursuant to its final plan for implementing Executive Order 12044, the Postal Rate Commission proposed two amendments to its rules of practice, one establishing procedures governing the Commission's *in camera* orders, the other changing the description of a costing report that the Postal Service is required to file periodically with the Commission. Public comment concerning these proposed amendments was solicited in an Advance Notice of Proposed Rulemaking (44 FR 2006, January 12, 1979) and a Notice of Proposed Rulemaking (44 FR 22479, April 16, 1979). No comments were received, and we have decided to adopt these amendments as initially published.

EFFECTIVE DATE: These amendments shall become effective July 13, 1979.

FOR FURTHER INFORMATION CONTACT: David F. Stover, Assistant General Counsel (Regulation), Suite 500, 2000 L Street, N.W., Washington, D.C. 20268; telephone 202-254-3630.

SUPPLEMENTARY INFORMATION: Executive Order 12044 (43 FR 12664, March 24, 1978) sets forth the President's

program for clarifying and improving government regulations. The Postal Rate Commission's final plan for implementing that executive order includes a procedure for annual review of its rules of practice. As the first step in that procedure, the Commission published an Advance Notice of Proposed Rulemaking in the Federal Register (44 FR 2808, January 12, 1979), inviting public comments on specific amendments proposed by the Commission governing voting procedures for final acts of the Commission, *in camera* orders, and a technical amendment to our rules concerning the costing reports that the Postal Service is required to file periodically with the Commission.

Subsequently, we severed the proposed amendment relating to voting requirements and adopted that proposal as a final rule (44 FR 7695, February 7, 1979). With respect to the two remaining proposed amendments, the Commission issued a Notice of Proposed Rulemaking Bearing Docket No. RM79-2 (44 FR 22479, April 16, 1979), inviting a second round of public comment. No comments were received in response to either notice. The Commission has decided, therefore, to adopt these two proposed amendments as initially published. Accordingly, pursuant to 39 U.S.C. 3603 and 5 U.S.C. 552a, it is ordered that the Commission's rules of practice and procedure (39 CFR 3001) be amended as follows, effective 30 days after publication of this notice in the Federal Register.

Part 3001 of 39 CFR is amended by adding the following new section:

§ 3001.31a In camera orders.

(a) *Definition.* Except as hereinafter provided, documents and testimony made subject to *in camera* orders are not made a part of the public record, but are kept confidential, and only authorized parties, their counsel, authorized Commission personnel, and court personnel concerned with judicial review shall have access thereto. The right of the presiding officer, the Commission, and reviewing courts to disclose *in camera* data to the extent necessary for the proper disposition of the proceeding is specifically reserved.

(b) *In camera treatment of documents and testimony.* Presiding Officers shall have authority, but only in those unusual and exceptional circumstances when good cause is found on the record, to order documents or oral testimony offered in evidence whether admitted or rejected, to be placed *in camera.* The order shall specify the date on which *in camera* treatment expires and shall include: (1) A description of the documents and testimony; (2) a full statement of the reasons for granting *in camera* treatment; and (3) a full statement of the reasons for the date on which *in camera* treatment expires. Any party desiring, for the preparation and presentation of the case, to disclose *in camera* documents or testimony to experts, consultants, prospective witnesses, or witnesses, shall make application to the presiding officer setting forth the justification therefor. The presiding officer, in granting such application for good cause found, shall enter an order protecting the rights of the affected parties and preventing unnecessary disclosure of information. *In camera* documents and the transcript of testimony subject to an *in camera* order shall be segregated from the public record and filed in a sealed envelope, bearing the title and docket number of the proceeding, the notation "*In Camera* Record under § 3001.31a," and the date on which *in camera* treatment expires.

(c) *Release of in camera information. In camera* documents and testimony shall constitute a part of the confidential records of the Commission and shall be subject to the provisions of § 3001.42 of this chapter. However, the Commission, on its own motion without notice to any affected party, may make *in camera* documents and testimony available for inspection, copying, or use by any other governmental agency.

(d) *Briefing of in camera information.* In the submittal of proposed findings, briefs, or other papers, counsel for all parties shall make a good faith attempt to refrain from disclosing the specific details of *in camera* documents and testimony. This shall not preclude references in such proposed findings, briefs, or other papers to such documents or testimony including generalized statements based on their contents. To the extent that counsel consider it necessary to include specific details of *in camera* data in their presentations, such data shall be incorporated in separate proposed findings, briefs, or other papers marked "confidential," which shall be placed *in camera* and become a part of the *in camera* record.

The first sentence of paragraph (b) of § 3001.42 is amended to read as follows:

§ 3001.42 Public information and requests.

* * * * *

(b) *Public records.* Except as provided in § 3001.31a of this chapter, the public records of the Commission include:

39 CFR 3001.102(a)(2) is amended to read as follows:

§ 3001.102 Filing of reports.

(a) * * *

(1) * * *

(2) Cost Segments and Components.

By the Commission.

David F. Harris,

Secretary.

[FR Doc. 79-18379 Filed 6-12-79; 8:45 am]

BILLING CODE 7715-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 65

[FRL 1238-5]

Delayed Compliance Order for Sun Oil Company of Pennsylvania

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: By this rule, the Administrator of U.S. EPA issues a Delayed Compliance Order to Sun Oil Company of Pennsylvania (Sun Oil). The Order requires the Company to bring air emissions from its marketing terminals at Cleveland, Dayton, Akron, Columbus and Toledo, Ohio into compliance with certain regulations contained in the federally approved Ohio State Implementation Plan (SIP). Sun Oil's compliance with the Order will preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act (Act) for violations of the SIP regulations covered in the Order.

DATE: This rule takes effect on June 13, 1979.

FOR FURTHER INFORMATION CONTACT: Pierre Talbert, Attorney, United States Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, Telephone (312) 353-2082.

SUPPLEMENTARY INFORMATION: On January 25, 1979, the Regional Administrator of U.S. EPA's Region V Office published in the Federal Register (44 FR 5160) a notice setting out the provisions of a proposed Federal Delayed Compliance Order for Sun Oil. The notice asked for public comments and offered the opportunity to request a public hearing on the proposed Order. No public comments and no request for a public hearing were received in response to the notice.

Therefore, a Delayed Compliance Order effective this date is issued to Sun Oil by the Administrator of U.S. EPA pursuant to the authority of Section

113(d)(1) of the Act, 42 U.S.C. 7413(d)(1). The Order places Sun Oil on a schedule to bring its marketing terminals at Cleveland, Columbus, Dayton, Akron and Toledo into compliance as expeditiously as practicable with Regulation AP-5-07, a part of the federally approved Ohio State Implementation Plan. Sun Oil is unable to immediately comply with this regulation. The Order also imposes interim requirements which meet Sections 113(d)(1)(C) and 113(d)(7) of the Act, and emission monitoring and reporting requirements. If the conditions of the Order are met, it will permit Sun Oil to delay compliance with the SIP regulation covered by the Order until July 1, 1979.

Compliance with the Order by Sun Oil will preclude Federal enforcement action under Section 113 of the Act for violations of the SIP regulation covered by the Order. Citizen suits under Section 304 of the Act to enforce against the source are similarly precluded. Enforcement may be initiated, however, for violations of the terms of the Order, and for violations of the regulation covered by the Order which occurred before the Order was issued by U.S. EPA or after the Order is terminated. If the Administrator determines that Sun Oil is in violation of a requirement contained in the Order, one or more of the actions required by Section 113(d)(9) of the Act will be initiated. Publication of this notice of final rulemaking constitutes final Agency action for the purposes of judicial review under Section 307(b) of the Act.

U.S. EPA has determined that the Order shall be effective upon publication of this notice because of the need to immediately place Sun Oil on a schedule for compliance with the Ohio State Implementation Plan.

Authority—42 U.S.C. 7413(d), 7601.

Dated: June 5, 1979.

Douglas Costle,

Administrator.

In consideration of the foregoing, Chapter 1 of Title 40 of the Code of Federal Regulations is amended as follows:

Part 65—Delayed Compliance Orders

1. By adding the following entry to the table in Section 65.400:

Section 65.400 Federal Delayed Compliance Orders issued under Section 113(d)(1), (3), and (4) of the Act.

65.400 Federal Delayed Compliance Orders

Proposed Rules

Federal Register
Vol. 44, No. 115
Wednesday, June 13, 1979

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

[10 CFR Part 2]

Study of Nuclear Power Plant Construction During Adjudication; Request for Public Comments

AGENCY: Nuclear Regulatory Commission.

ACTION: Request for comments.

SUMMARY: The Nuclear Regulatory Commission's Advisory Committee on Construction During Adjudication is studying several aspects of the Commission's licensing procedures. The Advisory Committee is seeking the views of the public on the Commission's "immediate effectiveness" rule (10 CFR 2.764). That rule provides that a construction permit can be issued on the basis of an initial decision of an Atomic Safety and Licensing Board even though that decision is subject to further review within the Commission. The Committee believes that the views of the public on the rule would be of help to it in evaluating the rule's operation and impact and in assessing possible changes for improving the licensing procedures.

DATES: Comments must be received by July 6, 1979.

ADDRESS: Send comments to: Secretary of the Commission, Nuclear Regulatory Commission, Washington, D.C. 20555, ATTN: Docketing and Service Branch.

Copies of all comments received may be examined in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. 20555.

FOR FURTHER INFORMATION CONTACT: Stephen S. Ostrach, Office of the General Counsel, Nuclear Regulatory Commission, Washington, D.C. 20555, (202) 634-3224.

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission's Advisory Committee on Construction During Adjudication is seeking the views of the public on the Commission's "immediate effectiveness" rule [10 CFR 2.764]. The views of those who have participated in licensing proceedings in which the rule was significant are of particular interest. In addition to general views, the group wishes public comment on a number of specific questions about the rule. Comments must be received by July 6, 1979, and should be submitted to the Secretary of the Commission, Nuclear Regulatory Commission, Washington, D.C. 20555, ATTN: Docketing and Service Branch. Copies of all comments received may be examined in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. 20555. Further information may be obtained from Stephen S. Ostrach, Office of the General Counsel, Nuclear Regulatory Commission, Washington, D.C. 20555, (202) 634-3224.

The Nuclear Regulatory Commission has established an Advisory Committee on Construction During Adjudication. The Committee is studying several aspects of the Commission's licensing procedures including, in particular, the Commission's "immediate effectiveness" rule (10 CFR 2.764). That rule provides that a construction permit can be issued on the basis of an initial decision of an Atomic Safety and Licensing Board even though that decision is subject to further review within the Commission.

The Committee believes that the views of the public on the rule would be of help to it in evaluating the rule's operation and impact and in assessing possible changes for improving the licensing process. The views of those who have actually participated in nuclear licensing proceedings in which the rule played a significant role are of particular interest to the group. The questions given below have been provided principally as an aid to those persons with actual experience in licensing proceedings, but they may be answered by any person. The group desires the views of parties associated with each of the different interests in licensing cases.

If each viewpoint on the rule is presented fully by these comments, the Committee will be able to formulate its recommendations to the Commission with confidence that it has taken into account a fair balance of all viewpoints. The questions concerning which respondents views are desired are as follows:

1. In a general way, how were the proceedings in which you participated affected by the rule permitting construction during agency appellate review? If there had been no such rule during appellate review, how would the proceedings have been different?

2. Was the appellate resolution of any issue which you appealed prejudiced by ongoing construction during the pendency of the appeal?

3. If so, please state the case, issue and elaborate the details, citing specific references (i.e., briefs, decisions, transcripts, etc.) which you believe indicate such prejudice.

4. In these proceedings, how long after the issuance of a limited work authorization or a construction permit did the principal environmental impact of construction occur? How did the timing of this impact affect the proceeding? Should consideration be given to changing the order in which issues are decided (currently NEPA and site suitabilitiy first, safety second)?

5. Was a stay of construction sought pending appeal? Did construction during the pendency of the stay request affect the proceeding? If so, how? Was an evidentiary hearing held on the stay request? Did such hearing (or the lack thereof) affect the disposition of the request?

6. Was interlocutory review (certification or referral) sought during the proceeding? If interlocutory review had been available, would that review have improved the proceeding? Should consideration be given to adopting a standard for interlocutory review which would facilitate an early appellate decision on the inclusion or exclusion of issues in the proceeding?

7. The following are some possible alternatives to the present rules. What effect would these alternatives have had if they had applied to the proceedings in which you participated? Do you believe, based on your experience, that any of these alternatives should be adopted?

a. Delay effectiveness of Licensing Board decisions:

1. By 10 or 15 days, to allow parties to prepare stay motions for the Appeal Board.

2. Until the Appeal Board rules on any stay motion before it.

3. Until the Commission rules on a stay.

4. Until the Appeal Board rules on the merits.

5. Until the Commission rules on the merits.

[This last suboption would in effect *repeal* the immediate effectiveness rule.]

b. Restrict effectiveness to certain cases, in which immediate effectiveness is less likely to create problems. The following are examples:

1. The case is uncontested.

2. The decision is unanimous.

3. Applicant requests immediate effectiveness and no good is shown to delay.

4. Applicant shows urgency and no good cause is shown to delay.

5. The design is an approved standard design.

6. For custom plants, design definition is well along toward final design (meeting design status criteria which would be specified).

7. The case involves a subsequent unit for a site already approved for at least one unit.

8. The site has been reviewed and received final Commission approval.

c. Restrict the amount of work the applicant may do in reliance upon the Licensing Board's decision:

1. Up to some dollar limit on:

—total commitments, or

—site-dependent commitments.

2. To certain kinds of work (e.g., items which require long lead-time, or have low impact).

3. To exclude certain items, either because they would have high or irreparable environmental impact, or because they depend upon resolution of contested issues.

d. Allow initial decisions to become immediately effective only if the authorization or permit has certain conditions attached. For examples:

1. A requirement to restore the site if the favorable Board decision is ultimately reversed.

2. Conditions on the construction sequence or schedule (to limit environmental damage during appellate review and to safeguard against an applicant rushing to build up a sunk-cost case against later reversal).

e. Alter stay standards while leaving the immediate effectiveness rule in place. Following are examples of alternative standards:

1. Alter the burden or proof on stays.

2. Grant a stay when the Appeal Board confirms the existence of an important policy or legal issue appropriate for Commission review.

3. Make stay standards vary according to the issue on which appeal is taken:

(a) Environmental as contrasted with safety issues.

(b) Site-related issues.

f. Change appellate procedures so as to permit the Commission or the Appeal Board to reach certain issues earlier. Following are examples of such changes:

1. Allow interlocutory appeals for issues (such as siting) which require decision.

2. Certify questions more frequently to the Appeal Board and the Commission.

3. Establish a mechanism for the Commission to monitor proceedings of lower boards.

4. Expedite decisions on issues affected by construction during adjudication.

8. It would also be helpful to have the public's views on aspects of the immediate effectiveness or stay rules which the above questions may not specifically address. If you are in favor of the present rules as they are now written, please give us your reasons. Also, please discuss any alternatives to or changes in the present immediate effectiveness rule (§ 2.764) or stay criteria (§ 2.788) which you feel may be appropriate.

Dated at Washington, D.C. this 8th day of June 1979.

Gary Milhollin,

Chairman.

BILLING CODE 7590-01-M

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 125]

Procurement Assistance; Assistance to Small Business in Federal Contracting Programs

AGENCY: Small Business Administration.

ACTION: Proposed Rules.

SUMMARY: This proposed rule implements the Small Business Act as amended by Pub. L. 95–507 with respect to programs rendering assistance to small businesses in Federal prime and subcontracting. Additionally, it is designed to eliminate obsolete functions an unnecessary regulations while at the same time updating, simplifying, and clarifying the functions and activities currently operational in the various programs to assist small businesses pursuing and engaged in Federal contracting, other than that covered in Part 124 (The Small Business and Capital Ownership Development Program).

DATES: Comments must be received on or before August 13, 1979.

ADDRESSES: Comments, submitted in duplicate are to be addressed to the Associate Administrator for Procurement Assistance, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Edward N. Odell, Deputy Director, Office of Procurement and Technical Assistance, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416, telephone (202) 653–6332.

SUPPLEMENTARY INFORMATION: Previously 13 CFR Part 124 contained rules and regulations covering programs designed to render management, technical, and procurement assistance. The latter included the business development program for companies owned and controlled by socially or economically disadvantaged individuals. To be in consonance with the organizational changes mandated by Pub. L. 95–507 amending the Small Business Act as well as to reflect internal administrative reorganizations, 13 CFR Part 124 was used to cover the business development program cited above. Management and some technical assistance programs regulatory coverage was designated as 12 CFR Part 129. Procurement Assistance is now being presented as 13 CFR Part 125.

The provisions contained in Part 124.8(b) 1 and 2 are now covered in Part 125.4, 6, 8 and 10. Part 124.8(b)3 has been eliminated as obsolete. Part 124.8(b)4 through 12 (excepting 124.8(b)6) are now contained in Part 125.6 through .9. Part 124.8(b)6 is properly part of the Size Standard Regulation and is covered in Part 121. The matter covered by Part 124.8–3 dealing with management assistance is properly located under Part 129. Part 124–5 and 6 have been eliminated as obsolete while Part 124.8–4, is now to be found under Part 125.6. Part 124.8–7 is covered in Part 129 entitled Management Assistance Part 124.8–7 through 17 is now contained in Parts 125–5 through 10. What was previously entitled "Part 125—Research and Development Assistance" is now covered under part 125.10. "Part 126—Defense Production Pools" is presented now under 125.7 "Part 127—Joint Set Asides" is covered in Part 125.6 and .8.

Notice is hereby given that pursuant to the authority contained in Section 5(b)(6) of the Small Business Act, 15 U.S.C. 634, it is proposed to delete § 124.8–3 through § 124.8–17 from 13 CFR Part 124; to delete 13 CFR Parts 126 and

127 in their entirety; and to revise Part 125 of Chapter I, Title 13 of the Code of Federal Regulations, as set forth below.

Dated June 6, 1979.

William H. Mauk, Jr.,
Acting Administrator.

Revision 1

PART 125—PROCUREMENT ASSISTANCE

Sec.
125.1 Policy.
125.2 Definitions.

Procurement Assistance

125.3 Introduction.
125.4 Statutory Provisions.

Office of Procurement and Technical Assistance

125.5 Certificate of Competency.
125.6 Prime Contracts Assistance.
125.7 Defense Production Pools.
125.8 Property Sales Assistance.
125.9 Subcontracting Assistance.
125.10 Technology Assistance

Authority: Sec. 5, Small Business Act, 15 U.S.C. 634.

§ 125.1 Policy.

It is the policy of the United States that small concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals shall have the maximum practicable opportunity to participate in the performance of contracts let by any Federal agency. The Small Business Administration will aid, counsel, and assist, insofar as is possible, small business concerns to insure that a fair proportion of the total purchases and contracts or subcontracts for property and services for the Government (including but not limited to contracts or subcontracts for equipment, materials and supplies; maintenance, repair, construction and architect-engineer services; research, development, test and evaluation) are placed with small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals to insure that a fair proportion of the total sales of Government property be made to such enterprises; and to maintain and strengthen the overall economy, well-being and security of the Nation.

§ 125.2 Definitions.

For purposes of this part:

(a) "Administrator" means the Administrator of the Small Business Administration.

(b) "SBA" means the Small Business Administration.

(c) "Small business" means a business which qualifies as a small business under the small business size standards requirements, Part 121 of this chapter, and includes small concerns owned and controlled by socially and economically disadvantaged individuals under the definition thereof in Part 124 of this chapter.

(d) The terms "procurement" and "acquisition" are used interchangably throughout.

(e) The term "Federal agency" as used herein does not include the U.S. Postal Service or the General Accounting Office.

(f) The term "Government procurement contract" means any contract for the procurement of any goods or services by any Federal agency.

Procurement Assistance

§ 125.3 Introduction.

The regulations in this part implement the Procurement Assistance Programs of the Small Business Administration. The Office of the Associate Administrator for Procurement Assistance establishes SBA policy for and issues directives to carry out the nationwide operation of (currently) five major programs: Certificate of Competency; Prime Contracts Assistance; Property Sales Assistance; Subcontracting Assistance; and Technology Assistance. The five programs are involved in aiding small business firms to obtain a fair share of Federal Government procurement contracts and subcontracts and Federal Government resources.

§ 125.4 Statutory Provisions Summarized.

SBA Procurement Assistance is authorized, as of the date of this regulation, under Sections 8(b) (15 U.S.C. 637(b)); 8(d) (15 U.S.C. 637(d)); 9 (15 U.S.C. 638); 11 (15 U.S.C. 640); (15 U.S.C. 643); 15 (15 U.S.C. 644); 222 (41 U.S.C. 405(a)); (40 U.S.C. 401 note); and 223(a) (15 U.S.C. 637(b)) of the Small Business Act, as amended.

(a) Section 8(b) authorizes the SBA—

(1) To provide procurement and technical assistance to small business concerns by advising and counseling on matters in connection with Government procurement (including certain Federal prime contractor procurements) and property disposal, and on policies, principles, and practices of Federal Government acquisition;

(2) To obtain from any Federal department, establishment or agency engaged in procurement, or in the financing of procurement or production, or in the disposal of Federal property, such reports concerning the letting of and compliance with contracts and subcontracts, solicitations of bids or proposals, time of sale, or otherwise as it may deem appropriate in carrying out its functions under the Small Business Act, as amended;

(3) To certify to Government procurement officers, and officers engaged in the sale and disposal of Federal property with respect to all elements of responsibility, including but not limited to the competency, capability, capacity, credit, integrity, perseverance and tenacity, of any small business concern or group of such concerns to perform a specific Government contract;

(4) To review a Government procurement officer's finding that an otherwise qualified small business concern may be ineligible due to the provisions of Section 35(a) of Title 41, United States Code (the Walsh-Healey Public Contracts Act);

(5) To make a complete inventory of all productive facilities of small business concerns or to arrange for such inventory to be made by any other Governmental agency which has the facilities; and

(6) To assist small business concerns to obtain Government contracts for research and development; to assist small business concerns to obtain the benefits of research and development performed under Government contracts or at Government expense; to provide technical assistance to small business concerns to accomplish this purpose; and to insure that a fair proportion of Government contracts for research and development be placed with small business concerns.

(b) Section 8(d) authorizes the SBA—

(1) To review solicitations requiring the submission of subcontracting plans to determine the maximum practicable opportunity for small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals to participate as subcontractors in the performance of any contract resulting from any solicitation, and submit findings which shall be advisory in nature to the appropriate Federal agency;

(2) To assist Federal agencies and businesses in complying with their subcontracting responsibilities (Section 8(d) of the Small Business Act, as amended) including the formulation of subcontracting plans for contracts to be let pursuant to the negotiated method of procurement;

(3) To obtain reports from Federal prime contractors and subcontractors demonstrating the extent of compliance with the contract provisions for small and disadvantaged subcontracting; and

(4) To evaluate compliance with subcontracting plans, either on a contract-by-contract basis, or in the case of contractors having multiple contracts, on an aggregate basis.

(c) Section 8(d) provides—

(1) That each Government procurement prime contract and any amendment or modification thereto, and each subcontract let thereunder, which may exceed $1,000,000 in the case of construction projects or $500,000 in every other case, except those which (i) will be performed entirely outside of any state, territory or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico; (ii) are for personal services; or (iii) are awarded to small business concerns; shall contain a mandatory provision for timely submission by the apparent successful bidder or offeror of an acceptable subcontracting plan that reflects maximum practicable opportunities for participation by and utilization of, to the fullest extent consistent with efficient contract performance, small and small disadvantaged business concerns to perform subcontracts to be let thereunder;

(2) That any contractor or subcontractor who fails to comply in good faith with the mandatory subcontracting provisions of a Government procurement contract or subcontract thereunder shall be found in material breach of such contract or subcontract.

(d) Section 9 authorizes the SBA—

(1) To consult with and make recommendations to all Government agencies for the purpose of providing small business concerns assistance, including technical assistance, to obtain (i) Government contracts for research and development, and (ii) the benefits of research and development performed under Government contracts or at Government expenses; and to conduct studies, with the cooperation of Government agencies, of Government procurement or funding of research and development effort;

(2) To assist and encourage small business concerns to jointly undertake programs for research and development through such corporate or other mechanism appropriate for the purpose and to approve, after consultation with the Chairman of the Federal Trade Commission and with prior authorization of the Attorney General, any agreement between small business firms providing for such a joint program.

(e) Section 11 provides that small business concerns may be authorized and encouraged, if found to be in the public interest as contributing to the national defense, to enter into voluntary agreements and programs to form Defense Production Pools for the purpose of furthering the objectives of the Small Business Act.

(f) Section 14 authorizes the SBA to make a fair charge for the use of Government-owned property as and to the fullest extent it deems practicable, and to make and let contracts on a basis that will result in recovery of the direct costs which it incurs in so doing.

(g) Section 15 provides—

(1) That small business concerns shall be awarded any Government procurement contract, or any part thereof, and any contract for the sale of Government property, as to which it is determined by the SBA and the procurement or disposal contracting agency to be in the interest of (1) maintaining or mobilizing the Nation's full productive capacity, (2) war or national defense programs, (3) assuring that a fair proportion of the total purchases and contracts for property and services for the Government are placed with small business concerns, or (4) assuring that a fair proportion of the total sales of Government property be made to small business concerns; and that any failure of the SBA and contracting agency to reach agreement shall cause the SBA Administrator to submit the matter to the Secretary or head of the appropriate department or agency for determination;

(2) That the head of each Federal agency will provide the SBA a report at the conclusion of each fiscal year on the extent of participation by small business concerns, and by small disadvantaged business concerns in procurement contracts, which report shall contain the rationale and justification for any failure by the Federal agency to meet established goals for review, consolidation and submission to the Select Committee on Small Business of the Senate and the Committee on Small Business of the House of Representatives;

(3) That separate goals for the participation by small business concerns and small disadvantaged business concerns in Government procurement contracts shall be established annually by the head of each Federal agency following consultation with the SBA, and that the Administrator of the Office of Federal Procurement Policy shall establish the goal whenever there is disagreement between a Federal agency head and the SBA;

(4) That exclusive small business set-asides are authorized for Government procurements or architect and engineering services, and research, development, test and evaluation;

(5) That each Government contract for procurement of goods or services which has an anticipated value of less than $10,000 and is subject to small purchase procedures shall be set aside exclusively for small business concerns unless the contracting officer is unable to obtain competitive offers from at least two small business concerns;

(6) That a method of prompt payment to contractors which also minimizes paperwork shall be employed whenever circumstances permit for Government procurement contracts effected under small purchase procedures;

(7) That an "Office of Small and Disadvantaged Business Utilization" shall be established in each Federal agency having procurement powers, and that management of such office shall be vested in an employee of each such agency who shall be known as the "Director of Small and Disadvantaged Business Utilization" and who shall—

(i) Be appointed by the head of such agency, and be responsible only to, and report directly to, the head of such agency or to his deputy;

(ii) Be responsible for implementation and execution of the Federal agency's functions and duties under Sections 8 and 15 of the Small Business Act as amended, and have supervisory authority over such agency personnel to the extent of their functions and duties thereunder;

(iii) Cooperate and consult on a regular basis with the SBA relative to carrying out the Federal agency's functions and duties under Sections 8 and 15 of the Small Business Act, as amended; and

(iv) Assign to each acquisition activity within such Federal agency to which the SBA has a procurement center representative assigned, a small business technical advisor (A) who shall be a full-time employee of the activity and well-qualified, technically trained, and familiar with the supplies or services purchased at the activity, and (B) whose principal duty shall be to assist the assigned SBA procurement center representative in carrying out his duties and functions relating to Sections 8 and 15 of the Small Business Act, as amended.

(h) Section 222 of Pub. L. 95-507 provides—

(1) That in formulating Federal procurement procedures which govern the acquisition process for all Government procurement requirements, the Administrator of the Office of Federal Procurement Policy shall, in consultation with the SBA, conduct

analyses of the impact on small business concerns;

(2) That the forthcoming Federal Acquisition Regulation directed by Public Law 93-400 incorporate revised Government procurement regulations which provide for simplified bidding, contract administration, and contract performance procedures for small business concerns.

(i) Section 223(a) of Pub. L. 95-507 provides that any small business concern shall be provided upon its request, in connection with any Government procurement contract to be let by any Federal agency, except in the case of a contract which will be performed entirely outside any state, territory or possession of the United States, the District of Columbia or the Commonwealth of Puerto Rico, or which is for personal services—

(1) The applicable bid set and specifications;

(2) The name and telephone number of an employee of such agency to answer questions with respect to such contract; and

(3) Adequate citations to each major Federal law or agency rule with which small business concerns must comply in performing such contract.

Office of Procurement and Technical Assistance

§ 125.5 Certificate of competency program.

The Certificate of Competency (COC) Program is authorized under Sections 8(b)(7)(A), (B), and (C) of the Small Business Act. A COC is a written instrument issued by SBA to a Government contracting officer, certifying that a small concern (or group of such concerns) named therein possesses the responsibility to perform a specific Government procurement (or sale) contract.

(a) Government procurement officers and officers engaged in the sale and disposal of Federal property, upon determining and documenting that a small business lacks certain elements of responsibility, including but not limited to competency, capability, capacity, credit, integrity, perseverance, and tenacity, notify SBA of such determination. Award is withheld by the contracting officer for a period of up to 15 working days following the date of receipt by SBA of notice of such determination (with appropriate documentation) in order to permit SBA to investigate the elements referred and certify as to the bidder's responsibility with respect to the elements referred.

(b) Upon receipt of this notification, SBA personnel then contact the company concerned to inform it of the impending decision and to offer an opportunity to apply to SBA for a COC. A concern wishing to apply to SBA for a COC advises the SBA regional office for the geographic area within which the concern is located. Upon timely receipt of required documentation, a team of SBA personnel is sent to the firm to investigate the responsibility of the applicant as to the specific elements of responsibility referred to SBA and make recommendations to the regional director.

(c) If the regional director's decision is negative, the COC is denied and both the firm and procuring activity are notified. If the regional director's decision is affirmative and the procurement is less than $500,000, the regional director issues a COC. For procurements in excess of $500,000, if the regional directoir recommends issuance of the certificate, the Associate Administrator for Procurement Assistance, SBA Central Office, causes a review to be made and either issues or denies the certificate. If the Associate Administrator's decision is negative, the firm and procuring activity are so informed; if affirmative, a letter, certifying the responsibility of the firm as to the elements of responsibility referred (the Certificate of Competency) is sent to the procuring activity and the applicant informed of such issuance by the regional office. By terms of the Small Business Act, as amended, the COC is conclusive as to responsibility. Contracting officers are directed to award a contract without requiring the firm to meet any other requirement with respect to responsibility.

(d) The notification to an unsuccessful applicant concern will briefly state the reason for denial and inform the applicant that a meeting may be requested with the appropriate SBA regional personnel to discuss the reasons for denial. Upon receipt of a request for such a meeting, the appropriate regional personnel will confer with the applicant and explain fully the reasons for SBA's action. However, such conference will be for the sole purpose of enabling the applicant to improve or correct deficiencies and will not constitute a basis for reopening the case in which the certificate was denied.

(e) After a COC is awarded for capacity or credit and the contract is let to the applicant, SBA keeps a close watch on the progress. Monthly checks are made by SBA field personnel who report directly to the Central Office on the status of the contract. In this way SBA technical assistance is constantly available to the contractor.

(f) A manufacturing, construction or service concern shall not be eligible for a COC unless it performs a significant portion of the contract with its own facilities and personnel to assure SBA that the bidder is a manufacturing, construction or service concern.

(g) An independent small business dealer, distributor or wholesaler shall be eligible for a COC only when it is responding in its own name to a non-set-aside procurement, and the items to be furnished under the contract will be manufactured in the United States, and the small non-manufacturer alone bears the responsibility for success or failure in supplying those products. In the event of a tie bid, preference shall be given to the concern supplying the product of a small business. Should the product of a large business be supplied, that product and the responsibility of the manufacturer must be acceptable to the procuring activity. The responsibility of the small business dealer is ceritifed, not the manufacturer.

(h) A Government procurement officer documenting that a small concern is ineligible due to the provisions of Section 35(a) of Title 41, U.S.C. (the Walsh-Healey Public Contracts Act) notifies SBA of such determination. SBA may certify that the concern is eligible for the specific contract or concur with the finding of ineligibility and refer the matter to the Secretary of Labor for final disposition. Brokers are not eligible for a COC.

(i) SBA by law issues a certification on the basis that officers of the Government having procurement or property disposal powers are directed to accept such certification as conclusive, and shall let the contract to such concern without requiring it to meet any other requirement of responsibility or eligibility.

§ 125.6 Prime contracts assistance.

In accordance with specific provisions of the Small Business Act, as amended, the Small Business Administration, develops, establishes and implements programs to increase the share of Government prime contracts awarded to small business concerns, including small business concerns owned and controlled by socially and economically disadvantaged individuals; to assist those small busjness firms having procurement and contract administration problems involving the Federal acquisition agencies; and to assist such concerns to form small business production or research and

development pools. Federal acquisition regulations and instructions serve as the procedural vehicle for implementation of the Government's small and small disadvantaged business acquisition policy as declared in the Small Business Act. The effort to increase prime contract awards to small and small disadvantaged business concerns is concentrated in the early stages of the procurement cycle. The SBA has procurement center representatives stationed at Federal installations which have major buying programs. SBA procurement center representatives accomplish their mission in coordination with small business specialists, and with small business technical advisers assigned to Federal acquisition activities, whose principal duties include responsibility for assisting SBA procurement center representatives in the performance of all prime contracting assistance duties and functions emanating from the Small Business Act, as amended. The SBA Prime Contracts Assistance Program is designed to cause the procurement center representatives to carry out the following functions in connection with the acquisition of Federal procurement requirements:

(a) Represents the SBA in all Prime Contracts Assistance matters at Federal acquisition installations;

(b) Screen proposed Government procurements which the acquisition agencies' contracting officials and small business specialists or small business technical advisors do not recommend, including those recommended initially but later withdrawn, for small business set-asides, and small business labor surplus area set-asides, as appropriate, for possible set-aside action, either partial or total, by the SBA. In appropriate instances, appeal SBA initiated set-asides denied by the heads of acquisition activities to the secretary of the department or head of the agency through the Associate Administrator for Procurement Assistance, SBA Central Office;

(c) Representes the entire small business community to the Federal acquisition agencies and initiate activities necessary to provide an optimum climate for participation in the Government's contracting system;

(d) Review regulations and instructions of Federal acquisition agencies and activities for potential impact on small and small disadvantaged business concerns involved in Government procurement, and make recommendations through the Associate Administrator for Procurement Assistance for resolutions of provisions deemed prejudical to small or small disadvantaged business concerns at the highest necessary levels of the acquisition agencies;

(e) Review and evaluate the small business programs of individual Federal acquisition actitities, and make recommendations either directly to the activities or through the Offices of Procurement and Technical Assistance, SBA Central Office, to the Federal department or agency which, when implemented, improve program effectiveness and results;

(f) Recommend potential small and small disadvantaged business sources for the contracting agencies' use in their procurement solicitations;

(g) Assist the acquisition agencies and activities in establishment of goals for awards to small business concerns and to small business concerns owned and controlled by socially and economically disadvantaged individuals, and periodically report progress toward attainment thereof to the Associate Administrator for Procurement Assistance, SBA Central Office;

(h) Sponsor and participate in conferences and training courses, public and Government, designed to provide information and counsel to increase small and small disadvantaged business participation in Government procurement;

(i) Establish local operating procedures at and in conjunction with individual acquisition activities, within policy guidelines and direction of the Associate Administrator for Procurement Assistance, SBA Central Office, designated to efficiently and effectively utilize Federal agency small business technical advisors in the discharge of their statutory responsbility and performance of their principal duty to assist SBA procurement center representatives in achieving the congressional objective of providing maximum procurement opportunities for small and small disadvantaged business concerns;

(j) Advise, counsel and assist small and small disadvantaged business concerns which are having procurement or contracting problems with an acquisition or contract administration activity;

(k) Advise and guide small and small disadvantaged businesses in doing business with the Government;

(l) Counsel small and small disadvantaged businesses on how to prepare and submit bids and proposals, and obtain prime contracts and subcontracts;

(m) Assist small and small disadvantaged businesses in getting their names placed on bidders' lists, and in obtaining drawings and specifications for proposed purchases, and offer related services, which include supplying leads on research and development projects;

(n) Review terms, conditions and specifications of solicitations for bid or proposal offerings to ascertain, insofar as possible, that maximum contract and subcontract opportunities are afforded to small and small disadvantaged business concerns as required by the Small Business Act, as amended;

(o) Coordinate, as possible, with contracting officials in determining acceptability of proposed subcontracting plans to provide maximum practicable opportunities for small and small disadvantaged businesses; and advise the head of the acquisition activity and the Associate Administrator for Procurement Assistance, SBA Central Office, in cases of disagreement with contracting officials;

(p) Identify procurement requirements for potential 8(a) contracting action by officials of the Associate Administrator for Minority Small Business and Capital Ownership Development as a result of screening Government procurement requisitions.

§ 125.7 Defense production pools.

(a) Defense Production Pools, which involve the voluntary pooling of small business concerns, are authorized for the purpose of furthering the objectives of the Small Business Act. Such pools, if their pooling agreements are approved, enjoy certain immunities from the antitrust laws and the Federal Trade Commission.

(b) An approved pool is treated the same as any other bidder or contractor for procurement purposes. A member company of a pool is not precluded from submitting bids or proposals on other procurements but its bid or proposal will not be considered if it has participated in a bid or proposal submitted by its pool. However, the existence of a production pool agreement may affect the responsibility of a pool member company in the consideration of its individual bid or proposal.

(c) To qualify as a pool, the group members must:

(1) Associate for the purpose of procuring contracts—or to effectuate the purposes of the Small Business Act;

(2) Enter into a pool agreement controlling their organization, relationship and procedures;

(3) Secure approval under either the Defense Production Act or the Small Business Act

(d) Bids or proposals of an approved pool may be submitted by the pool in its

own name or by an individual member if the bid or proposal specifies that it is made on behalf of the pool. If a bid is not so submitted, it is not eligible for award. Contracting officers may rely upon a copy of the SBA notification of approval as proof of such approval.

(e) Unincorporated pools, before award of a contract, must furnish a certified copy of a Power of Attorney from each member who is to participate in the performance of the contract. The Power of Attorney must designate an agent to execute the bid, proposal, or contract for the member.

(f) Any group of small business concerns which wishes to form a pool should request the SBA district office to arrange a meeting. The names and addresses of all such concerns which are considering participation in the pool shall be provided to SBA along with information as to the kinds of businesses in which they are engaged, and the name of a representative of each participant who should be invited to the initial meeting to be held at the SBA district office. The purpose of the meeting is to explore, with the SBA representative, the desirability of forming a pool, the proposed plan of operation and related matters.

§ 125.8 Property sales assistance.

The Property Sales Assistance Program is authorized under Sections 2(a), 8(b), 10(f), and 15 of the Small Business Act.

(a) Pursuant to the statutory requirements of the Small Business Act, the Small Business Administration is charged to insure that small business concerns obtain a fair share of all Federal real and personal property which qualifies for sale or other competitive disposal action. The basic purpose of the program is:

(1) To insure small business concerns obtain a fair share of Government property sales/leases to include, where necessary, small business set-asides;

(2) To provide aid, counsel and other available assistance to small business concerns on all matters pertaining to Government sales/leases.

(b) The Property Sales Assistance Program and its implementation were designed to assure small business the opportunity to bid competitively on Government property being sold or leased. Interagency agreements have been formalized with the Departments of Agriculture, Interior and Defense, and the General Services Administration to provide for cooperative effort in setting aside certain sales of Government property for exclusive bidding by small business concerns.

(c) Specific areas of Government property included in the Property Sales Assistance Program are:

(1) Timber and related forest products;

(2) Strategic material from national stockpiles;

(3) Royalty oil and leases involving rights to minerals, oil, gas, vegetation; and

(4) Excess and surplus real and personal property primarily from GSA and DOD sources.

(d) The Property Sales Assistance Program is directed by Central Office staff management and assigned industrial specialists with posts of duty at key geographic locations throughout the United States. SBA property sales industrial specialists are charged with the specific, primary responsibility to monitor all Federal timber sales and to require, if necessary, joint set-asides as proposed timber sales to insure a "fair proportion" of sales are offered to small businesses. Specific procedures for determining a "fair proportion" are in accordance with appropriate interagency agreements. Guidelines pertaining to timber sales are further outlined in § 121.3–9. To insure that set-aside timber is processed by small business, the provisions of § 121.3–9(b) require that the purchasers of preferential Government timber sales agree to the following:

(1) If the timber is being purchased for resale, that it will not sell more than 30 percent (50 percent in Alaska) of the preferential timber to concerns not meeting SBA's small business size standard; and

(2) If the timber is being purchased for manufacture, that it will do so with its own facilities or those of concerns that qualify as small business.

(e) At the time the contract for the sale of Federal timber is executed, the selling agency requires execution of SBA Form 723, "Small Business Certification Required on all Preferential Sales of Set-Aside Timber," which becomes a part of the sales contract.

(f) A concern that violates the provisions of a preferential set-aside sale agreement may be subject to:

(1) Cancellation of timber sale contract or contracts that have been breached;

(2) Debarment from participating in future Federal timber sales;

(3) Disqualification from participating in future Federal timber sales set aside for small business; and

(4) Criminal proceedings.

(g) When it brought to the attention of SBA that a purchaser of set-aside timber or logs has appeared to violate the 30 percent (50 percent in Alaska) clause in the size standard for disposal of timber or sawlogs, the industrial specialist, when necessary, shall investigate the circumstances immediately. The purpose of the investigation shall be to ascertain whether said person or concern sold set-aside logs to other than small business in excess of the 30 percent allowable under the size standard regulations.

(h) The program's past efforts have stressed small business involvement primarily in the timber and royalty oil areas. Under the expanded, more fully developed Property Sales Assistance Program, increased emphasis is placed on the following key areas:

(1) Closer definition of small business constituency which qualify for assistance, and establishement of an inventory of related firms and their capabilities;

(2) Expanded negotiations with various Federal departments and agencies involved to establish specific small business set-aside programs, and to develop mutual operating procedures, as necessary, to monitor set-aside implementation and progress; and

(3) Increased development of energy information relating to mineral leasing and set-asides and access thereto as required for counseling, programming and other assistance to small concerns involved or contemplating involvement in the energy field.

§ 125.9 Subcontracting assistance program.

The Subcontracting Assistance Program is authorized under Sections 2(a), 8(b)(2), 8(b)(3), 8(b)(5), 8(c), 8(d)(1) through 8(d)(11), and 10(f) of the Small Business Act, as amended.

(a) Pursuant to statutory authorities and requirements of the Small Business Act, as amended, it is the policy of the United States that small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals, shall have the maximum practicable opportunity to participate in the performance of contracts let by any Federal agency. Participation in performance is defined to mean subcontracted goods or services under Federal agency prime contracts.

(b) The Small Business Administration has subcontract specialists throughout the Nation who may assist small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals in subcontracting opportunities. Federal prime contracts in excess of $10,000 shall contain the clause entitled "Utilization of Small Business Concerns

and Small Business Concerns Owned and Controlled by Socially and Ecohomically Disadvantaged Individuals."

(c) Federal agency prime contracts in excess of $1,000,000 for construction and $500,000 for all others which offer subcontracting possibilities must contain a subcontracting plan. Small business prime contractors are excluded. Each subcontracting plan required shall include:

(1) Percentage goals (expressed in terms of total planned subcontracting) for the utilization as subcontractors of small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals;

(2) The name of an individual within the employ of the offeror or bidder who will administer the subcontracting program of the offeror or bidder and a description of the duties of such individuals;

(3) A description of the efforts the offeror or bidder will take to assure that small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals will have an equitable opportunity to compete for subcontracts;

(4) Assurances that the offeror or bidder will include the clause entitled "Utilization of Small Business Concerns and Small Business Concerns Owned and Controlled by Socially and Economically Disadvantaged Individuals" in all subcontracts which offer further subcontracting opportunities, and that the offeror or bidder will require all subcontractors (except small business concerns) who receive subcontracts in excess of $1,000,000 in the case of a contract for construction of any public facility, or in excess of $500,000 in the case of all other contracts, to adopt a plan meeting the basic requirements of the prime contractor's subcontracting plan;

(5) Assurances that the offeror or bidder will submit such periodic reports and cooperate in any studies or surveys as may be required by the Federal agency or the Small Business Administration in order to determine the extent of compliance by the offeror or bidder with the subcontracting plan; and

(6) A recitation of the types of records the successful offeror or bidder will maintain to demonstrate procedures which have been adopted to comply with the requirements and goals set forth in this plan, including the establishment of source lists of small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals; and efforts to identify and award subcontracts to such small business concerns.

(d) The failure of contractor or subcontractor to comply in good faith with the clause entitled "Utilization of Small Business Concerns and Small Business Concerns Owned and Controlled by Socially and Economically Disadvantaged Individuals" or any required subcontracting plan in its contract or subcontract shall be a material breach of such contract or subcontract.

(e) The Small Business Administration is authorized to assist Federal agencies and businesses in complying with their responsibilities under subcontracting plans. The SBA may review any solicitation for any contract to be let, which would require a subcontracting plan, to determine the maximum practicable opportunity for small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals to participate as subcontractors in the performance of any contract resulting from any solicitation, and submit its findings, which shall be advisory in nature, to the appropriate Federal agency.

(f) The Small Business Administration will evaluate compliance with subcontracting plans, either on a contract-by-contract basis, or in the case of contractors having multiple contracts on an aggregate basis. In the case of aggregate evaluation of contract plans, a statistical sampling of contracts will be performed to determine compliance or non-compliance. All cases of non-compliance will be referred by SBA regional offices with recommendations for Central Office final decision. Evaluation for compliance will be based upon the complete terms of the contract subcontracting plan. Due to the length of the contract, performance periods and the point of evaluations, compliance or non-compliance may either be interim or final.

(g) At the conclusion of each fiscal year, SBA shall submit to the Senate Select Committee on Small Business and the Committee on Small Business, House of Representatives, a report on subcontracting plans found acceptable by any Federal agency which SBA determines do not contain maximum practicable opportunities to participate in the performance of the contract. In addition, the report will furnish information concerning subcontracting plans found to be in non-compliance.

(h) *Program Operation.* To carry out the Subcontracting Assistance Program, SBA subcontracting specialists are located in regional and district officers throughout the Nation.

(1) Program assistance directly available to small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals from SBA personnel is as follows:

(i) Counseling representatives of firms interested in and capable of supplying Government procurement requirements on a subcontract basis;

(ii) Information and assistance on how to develop subcontract opportunities, and in obtaining currently available projects;

(iii) Information concerning subcontract opportunities for selected items, equipment and services being procured by the Government through large business prime contractors and major subcontractors;

(iv) Information and assistance on qualifications required to become eligible for inclusion on potential source listings of large business firms for future subcontract requirements;

(v) Names, addresses and telephone numbers of large business procurement representatives.

(2) SBA subcontract specialists perform the following additional duties:

(i) Assist large business, Government prime contractors and subcontractors, if requested and to the extent of available resources, in the compliance and formulation of contractually required subcontracting plans through the furnishing of potential sources;

(ii) Review subcontracting plans submitted by large business firms to Government contracting officials for approval and inclusion in major prime contracts and subcontracts;

(iii) Evaluate compliance by large business concerns with subcontracting lans incorporated into and made a material part of major prime contracts and subcontracts;

(iv) Evaluation of compliance by all concerns in their adherence to the clause entitled "Utilization of Small Business Concerns and Small Business Concerns Owned and Controlled by Socially and Economically Disadvantaged Individuals";

(v) Recommend potential small and disadvantaged business sources to large business firms and to Government officials for performance of subcontract requirements under major Government contracts and subcontracts;

(vi) Maintain liaison with and visit large business Government prime contractors and subcontractors to assist, where requested and possible with available resources, in long term

procurement plans for the purpose of encouraging increased utilization of small and disadvantaged business concerns as subcontractors;

(vii) Review and evaluate subcontracting regulations, procedures, policies, and instructions for impact on small and disadvantaged business;

(viii) Participate in conferences and training courses, public and Government, which provide information and counsel directed at increased small and disadvantaged business participation in subcontracting for Federal procurement requirement.

(3) The Associate Administrator for Procurement Assistance monitors performance, evaluates effectiveness and issues directives to implement the Subcontracting Assistance Program field operations. Management of the program is accomplished through:

(i) Establishment of program policy and procedural guidance and direction of SBA subcontracting specialists for daily interface with Government and industry officials at the field level to accomplish program objectives;

(ii) Studies and surveys conducted of the methods and practices employed by large business Government prime contractors and subcontractors;

(iii) Review and analysis of subcontracting plan compliance evaluation reports developed by SBA subcontracting specialists and reported to the Associate Administrator for Procurement Assistance; and

(iv) Compile the required reports to Congress.

(i) *Procurement Automated Source System.*

The SBA maintains an active Procurement Automated Source System (PASS) which is the primary basis for recommending potential small business concerns and small business concerns owned and controlled by socially and economically disadvantaged individuals as sources for both prime and subcontracting. The PASS is a nationwide computerized storage and retrieval bank. Concerns desirous of being included in the PASS should obtain SBA Form 1167, "PASS Company Profile," from the nearest SBA branch, district, or regional office. Instructions for filing are conveniently printed on form 1167. If assistance should be required, it can be obtained from SBA field offices. The computerized inventory of small and disadvantaged business concerns is used to make referrals for procurements to assist those concerns in being placed on appropriate bidders' lists and for mobilization purposes, if required. Potential procurement opportunities may be local or nationwide. Once registered in the system, the company must update its data once a year to remain in the system. Potential sources may be obtained by small and large business and Government agencies.

§ 125.10 Technology assistance program.

(a) Section 9(a) of the Small Business Act states: "Research and Development are major factors in the growth and progress of industry and the national economy. The expense of carrying on research and development programs is beyond the means of many small business concerns, and such concerns are handicapped in obtaining the benefits of research and development programs conducted at Government expense. These small business concerns are thereby placed at a competitive disadvantage. This weakens the competitive free enterprise system and prevents the orderly development of the national economy. It is the policy of the Congress that assistance be given to small business concerns to enable them to undertake and to obtain the benefits of research and development in order to maintain and strengthen the competitive free enterprise system and the national economy."

(b) Section 9(b) states: "It shall be the duty of the Administration (SBA), and it is hereby empowered—

"(1) To assist small business concerns to obtain Government contracts for research and development;

"(2) To assist small business concerns to obtain the benefits of research and development performed under Government contracts or at Government expense; and

"(3) To provide technical assistance to small business concerns to accomplish the purposes of this section."

(c) Section 9(c) states: "The Administration is authorized to consult and cooperate with all Government agencies and to make studies and recommendations to such agencies, and such agencies are authorized and directed to cooperate with the Administration in order to carry out and to accomplish the purposes of this section."

(d) *Research and Development (R&D) Procurement Assistance.* (1) SBA will identify and register the capabilities of small R&D firms interested in Government contract opportunities. The procedure for cataloging the pertinent information on these firms will be through registration in the PASS. PASS is a computerized system designed to be instantaneously responsive to the requests of Government agencies for the profiles of small firms that would be potential bidders on Government contracting opportunities. SBA will publish an annual directory of R&D firms contained in the PASS, and make appropriate distribution of this directory. SBA will periodically convene conferences with small R&D firms and other Federal agencies for the purpose of increasing the share of Government R&D contracts awarded to small business.

(2) *Procedure.* Small business concerns desiring to register in the PASS program should contact the nearest SBA field office and request a PASS Company Profile Form. The completed profile should be forwarded to the cognizant SBA regional office as described in the registration instructions. Registration in the PASS program is a no-charge service for participating firms.

(e) *Technology Transfer.* (1) SBA, within existing resources, will assist small firms by identifying and transferring applicable and available technology for purposes which may include product development, process improvement, problem-solving, or state-of-the-art information.

(2) *Procedures.* (a) Small business firms may request technology assistance at any SBA district or regional office. The majority of requests come from small business firms as a result of SBA information flyers which describe the services available. The Reader Service portion of the information flyer is completed by the small firm and forwarded to SBA for action.

(b) SBA will make every effort to respond initially to these requests within 30 days. Whenever possible, this response will be in the form of personal or telephone contact with the appropriate individual at the requesting firm.

(c) Where necessary SBA will assist the firm to clearly and adequately define the problem or request for technical information.

(d) SBA will locate the requisite technology and provide it to the requesting firm.

[FR Doc. 79-18294 Filed 6-12-79; 8:45 am]
BILLING CODE 8025-01-M

DEPARTMENT OF STATE

[22 CFR Part 6a]

[Docket No. SD-146]

Privacy Act Policies and Procedures

AGENCY: Department of State.

ACTION: Proposed rule.

SUMMARY: The Department of State proposes to amend Part 6a of Title 22 of the Code of Federal Regulations by exempting portions of a record system from certain provisions of the Privacy Act of 1974 (5 U.S.C. 552a). In addition to a previously-published amendment to exempt the records of the Special Assignments Staff, the Department finds it necessary to also exempt the records of the Command Center, both of which are described in the Security Records (STATE–36), from the provisions of subsection (c)(3); (d); (e)(1); (e)(4)(G), (H), (I); and (f).

DATES: Comments must be received on or before July 13, 1979.

ADDRESS: Send comments to the Chief of the Privacy Staff, Room 1239, Department of State, 2201 C Street NW., Washington, D.C. 20520.

FOR FURTHER INFORMATION CONTACT: Sharon B. Kotok, (202) 632–1267.

SUPPLEMENTARY INFORMATION: The Department has found it necessary to exempt from disclosure records compiled and maintained by the Special Assignments Staff, previously published in the Federal Register (SD–138, 43 FR 48046, October 5, 1978). Records compiled and maintained by the Command Center, which are included among the Security Records (STATE–36), should also be exempt from certain provisions of the Act. Pursuant to subsection (j)(2) of the Privacy Act, the Department intends to exempt the records of the Special Assignments Staff in order to assure effective investigative and judicial proceedings in criminal cases. The Special Assignments Staff conducts criminal and counterintelligence investigations, as well as investigations to determine suitability for continued employment. The Department also intends to exempt the records of the Command Center under subsection (j)(2). This will assure the Department's ability to provide adequate protection to the Secretary of State and his family, high-ranking U.S. Government officials, and visiting foreign dignitaries. The Department's Command Center coordinates all activities of the protective branch of the Office of Security. In addition, the Command Center maintains records concerning domestic and foreign terrorist activities, as well as individuals and organizations which may pose a threat to the Department's protectees. If the records of the Special Assignments Staff and Command Center were not exempt from disclosure under the provisions of the Privacy Act, the Department's ability to provide investigative and protective services would be seriously impaired. The Department of State therefore proposes to amend its Privacy Act regulations as set forth below.

1. In § 6a.6, paragraph (h) will be amended to read as follows:

§ 6a.6 Exemptions.

* * * * *

(h) Records originated by another agency when that agency has determined that the record is exempt under 5 U.S.C. 552a(j). Also, pursuant to section (j)(2) of the Act, records compiled by the Command Center, the Passport and Visa Fraud Branch, and the Special Assignments Staff, all of which are components of the Office of Security, may be exempt from the requirements of any part of the Act, except subsections (b); (c)(1) and (2); (e)(4)(A) through (F); (e)(6), (7), (9), (10), and (11); and (i), to the extent necessary to assure the effective completion of the protective, investigative, and judicial processes.

* * * * *

(Sec. 4 of the Act of May 26, 1949, as amended (63 Stat. 111; 22 U.S.C. 2658); Pub. L. 93–579 (88 Stat. 1894); (5 U.S.C. 552a))

Dated: June 7, 1979.

For the Secretary of State.

Ben H. Read,

Under Secretary for Management.

BILLING CODE 4710–06–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[24 CFR Part 1917]

[Docket No. FI–5519]

Proposed Flood Elevation Determinations for the Township of Chatham, Morris County, N.J., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Township of Chatham, Morris County, New Jersey.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at Municipal Building, Southern Boulevard, Chatham, New Jersey.

Send comments to: Honorable Dorothy A. Willis, Mayor, Township of Chatham, Municipal Building, Southern Boulevard, Chatham, New Jersey 07928.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Township of Chatham, New Jersey, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Proposed Flood Elevation Determinations for the Town of Ellery, Chautauqua County, N.Y., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Ellery, Chautauqua County, New York.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the office of the Town Clerk, Jamestown, New York. Send comments to: Mr. Arden Johnson, Town Supervisor of Ellery, Box J, Bemus Point, New York 14712.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of Ellery, Chautauqua County, New York in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet national geodetic vertical datum
Chautauqua Lake	Shore Line	1,310
Bemus Creek	Confluence of Chautauqua Lake.	1,310
	Main Street (Upstream)	1,316
Dutch Hollow Creek	Confluence of Chautauqua Lake.	1,310
	Old Route 17 (Upstream)	1,328
Maple Springs Creek	Confluence of Chautauqua Lake.	1,310
	Chautauqua Avenue Upstream.	1,315
	Route 17 Upstream	1,325

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963.)

Proposed Flood Elevation Determinations for the City of Trotwood, Montgomery County, Ohio, Under the National Flood Insurance Program; Correction

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Correction of proposed rule.

SUMMARY: This document corrects a proposed rule on base (100-year) flood elevations that appeared on page 44 FR 6940 of the Federal Register of February 5, 1979.

EFFECTIVE DATE: February 5, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

The following:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Tributary A	500 feet upstream from mouth.	850
Dry Run	East-West corporate limit	836
Tributary G	Limit of flood 250 feet upstream of northern corporate limit.	867

Should be corrected to read:

Tributary A	500 feet upstream from mouth.	848
Dry Run	2,575 feet upstream of the confluence of Tributary E.	836
Tributary G	250 feet upstream of northern corporate limit.	867

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator 44 FR 20963).

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Township of East Manchester, York County, Pennsylvania.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the East Manchester Township Building. Send comments to: Mr. John Brown III, Chairman of the Township of East Manchester, R. D. 1, Mount Wolf, Pennsylvania 17347.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 425–8872, Room 5270, 451 Seventh Street, SW, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Township of East Manchester, York County, Pennsylvania in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Susquehanna River	Downstream Corporate Limits.	276
	Upstream Corporate Limits	281
West Conewago Creek.	Flood Channel	281
	Confluence of Little Conewago Creek.	290
Little Conewago Creek.	Confluence with West Conewago Creek.	290
	Locust Point Road Bridge	321
	Interstate 83 crossing	324
Codorus Creek	L. R. 66152 crossing	276
	L. R. 66020 crossing	343
	Upstream Corporate Limits	347
hartman Run	L. R. 66153 and Conrail crossing.	320
	Mount Wolf-East Manchester boundary.	351
	Township Route 945 crossing.	434

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator 44 FR 20963)

Proposed Flood Elevation Determinations for the Borough of Fairview, Erie County, Pa., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Borough of Fairview, Erie County, Pennsylvania.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Borough Hall, Fairview, Pennsylvania. Send comments to: Mr. William E. Walker, President of the Council of Fairview, 44 Walker Avenue, Fairview, Pennsylvania 16416.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Borough of Fairview, Erie County, Pennsylvania in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Proposed Flood Elevation Determinations for the Township of Hellam, York County, Pa., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selection locations in the Township of Hellam, York County, Pennsylvania. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Hellam Township Building. Send comments to: Mr. Michael Loucks, Chairman of the Township of Hellam, Hellam Township Office, R. D. 24, P.O. Box 62, Wrightsville, Pennsylvania 17406.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755-5581 or Toll Free Line (800) 424-8872, Room 5270, 451 Seventh Street, SW, Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Township of Hellam, York County, Pennsylvania in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 [Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)], 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Susquehanna River	Downstream Corporate Limits.	238
	U.S. Route 30 (Upstream)	244

Proposed Flood Elevation Determinations for the Township of Marshall, Allegheny County, Pa., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Township of Marshall, Allegheny County, Pennsylvania.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the residence of the Township Secretary, by appointment. Send comments to: Mr. Thomas W. Frank, Chairman of the Township of Marshall, P.O. Box 194, Warrendale, Pennsylvania 15086.

[1] The functions of the Federal Insurance Administration Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Township of Marshall, Allegheny County, Pennsylvania in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Brush Creek	Downstream Corporate Limits	1,022
	Upstream Thorn Hill Road	1,032
	Upstream Perry Highway	1,052
	Upstream Northgate Drive	1,069
	Upstream Sewage Plant Entrance	1,062
	Upstream Corporate Limits	1,072

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator 44 FR 20963.)

Proposed Flood Elevation Determinations for the Borough of Paxtang, Dauphin County, Pa., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 18, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Borough of Paxtang, Dauphin County, Pennsylvania.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Municipal Building, Paxtang, Pennsylvania.

Send comments to: Honorable J. Calvin Neill, Mayor of Paxtang, Municipal Building, Derry Street, Paxtang, Pennsylvania 17111.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Borough of Paxtang, Dauphin County, Pennsylvania in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Parkway Creek	Downstream Corporate Limits.	373
	Derry Street (Upstream)	373
	Brisben Street (Upstream)	373
	Upstream Corporate Limits	380
Spring Creek	Downstream Corporate Limits.	363
	Lower 'Garrlec' Bridge	364
	Upstream Corporate Limits	365

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator 44 FR 20963).

Issued: June 1, 1979.

Proposed Flood Elevation Determinations for the Township of Shaler, Allegheny County, Pa., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solocited on the proposed base (100-year) flood elevations listed below for selected locations in the Township of Shaler, Allegheny County, Pennsylvania.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Municipal Building, 300 Wetzel Road, Glenshaw, Pennsylvania.

Send comments to: Mr. Thomas E. Dunmyre, President of the Commission of Shaler, 742 Center Avenue, Pittsburgh, Pennsylvania 15215.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Township of Shaler, Allegheny County, Pennsylvania in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Allegheny River	Downstream Corporate Limits.	734
	Upstream Corporate Limits	735
Pine Creek	Downstream Corporate Limits.	751
	Shopping Center Bridge	760
	Pennview Street	764
	Maple Avenue	769
	Spencer Lane	782
	Butler Plank Road	809
	Burchfield Road	839
	Upstream Corporate Limits	859
Girtys Run	Downstream Corporate Limits.	764

[1] The functions of the Federal Insurance Administration Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3 of 1978 (43 FR 41943, September 18, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
	Evergreen Road	804
	Dravo Street Extension	829
	Upstream Corporate Limits	840
Little Pine Creek West	Downstream Corporate Limits	791
	Private Drive	818
	Walnut Road	860
	Clair Street	873
	Upstream Corporate Limits	877
Little Pine Creek East	Confluence with Pine Creek	757
	Kaye Street	757
	Saxonburg Boulevard	786
	Private Drive	798
	Upstream Corporate Limits	798

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367, and delegation of authority to Federal Insurance Administrator 44 FR 20963).

Issued: June 1, 1979.

Proposed Flood Elevation Determinations for the Borough of Turtle Creek, Allegheny County, Pa. Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Borough of Turtle Creek, Allegheny County, Pennsylvania.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Borough Building, 125 Monroeville Avenue, Turtle Creek, Pennsylvania.

Send comments to: Mr. John Rettger, Council President of Turtle Creek, 125 Monroeville Avenue, Turtle Creek, Pennsylvania 15145.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Borough of Turtle Creek, Allegheny County, Pennsylvania in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)). 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, National geodetic vertical datum
Turtle Creek	Confluence of Thompson Run.	732
	Upstream Corporate Limits	736
Thompson Run	Conrail	732
	Conrail	734
	Penn Avenue	738
	Conrail	739
	Tri-borough Expressway	745
	Church Street	749
	Union Railroad	749
	Factory Entrance	756
	James Avenue	758

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator 44 FR 20963).

Proposed Flood Elevation Determinations for the City of Castle Dale, Emery County, Utah, Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Castle Dale, Emery County, Utah.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at City Hall, 61 East First North, Castle Dale, Utah.

Send comments to: Honorable Bert Oman, Mayor, City of Castle Dale, City Hall, 61 East First North, Castle Dale, Utah 84513.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Castle Dale, Utah, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Cottonwood Creek	Downstream Corporate Limits.	5626
	Upstream Corporate Limits	5656

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963).

Proposed Flood Elevation Determinations for the Town of Chester, Windsor County, Vt., Under the National Flood Insurance Program; Correction

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Correction of proposed rule.

SUMMARY: This document corrects a proposed rule on base (100-year) flood elevations that appeared on page 44 FR 26757 of the Federal Register of May 7, 1979.

EFFECTIVE DATE: May 7, 1979.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood

[1] The functions of the Federal Insurance Administration, Department of Housing and Urban Development, were transferred to the newly established Federal Emergency Management Agency by Reorganization Plan No. 3, of 1978 (43 FR 41943, September 19, 1978) and Executive Order 12127 (44 FR 19367, April 3, 1979).

Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

The following:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Williams River	Approximately 850 feet downstream of the confluence of Kingdom Valley Brook.	565
	Just upstream of Duttonsville Gulf Road.	771
Middle Branch Williams River.	610 feet downstream of the first crossing of Joe Sweet Road.	655
	Just downstream of the first crossing of Joe Sweet Road.	662
	1,400 feet upstream of the first crossing of Joe Sweet Road.	690
	Approximately 3,000 feet downstream of the second crossing of Joe Sweet Road.	702
	30 feet downstream of the second crossing of Joe Sweet Road.	739
	Just upstream of the second crossing of Joe Sweet Road.	743
	1,220 feet upstream of the second crossing of Joe Sweet Road.	760
South Branch Williams River.	Approximately 120 feet upstream of State Route 55.	681
	775 feet downstream of Ethan Allen Road.	1,370
Lovers Lane Brook	500 feet upstream of Church Street.	620
Andover Branch	2,780 feet upstream of Potash Brook Road.	906

Should be corrected to read:

Source of flooding	Location	Elevation in Feet, national geodetic vertical datum
Williams River	Approximately 850 feet downstream of the confluence of Kingdom Valley Brook.	565
	Just upstream of Duttonsville Gulf Road.	769
Middle Branch Williams River.	610 feet downstream of the first crossing of Joe Sweet Road.	655
	Just downstream of the first crossing of Joe Sweet Road.	662
	1,400 feet upstream of the first crossing of Joe Sweet Road.	690
	Approximately 3,000 feet downstream of the second crossing of Joe Sweet Road.	702
	30 feet downstream of the second crossing of Joe Sweet road.	739
	Just upstream of the second crossing of Joe Sweet Road.	743
	1,220 feet upstream of the second crossing of Joe Sweet Road.	750
South Branch Williams River.	Approximately 120 feet upstream of State Route 55.	682
	775 feet upstream of Ethan Allen Road.	1,370
Lovers Lane Brook	500 feet downstream of Church Street.	620
Andover Branch	2,500 feet upstream of Potash Brook Road.	906

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963.)

Proposed Flood Elevation Determinations for the Town of Remington, Fauquier County, Va., Under the National Flood Insurance Program

AGENCY: Office of Federal Insurance and Hazard Mitigation, FEMA.[1]

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Remington, Fauquier County, Virginia.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Municipal Building, Remington, Virginia.

Send comments to: Honorable Wynant Hoffman, Mayor of Remington, P.O. Box 123, Remington, Virginia 22734.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line (800) 424–8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of Remington, Fauquier County, Virginia in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by Section 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Tripot Run	Route 651 Bridge	277
	Route 655 Bridge	277
	Upstream Corporate Limit	277

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator, 44 FR 20963.)

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 1246-6]

Approval and Promulgation of Implementation Plans; California Plan Revision: Santa Barbara County Air Pollution Control District and the Ventura County Air Pollution Control District

AGENCY: Environmental Protection Agency.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Santa Barbara County Air Pollution Control District (APCD) submitted Regulation VII, "Emergencies" on July 19, 1974; October 23, 1974; and April 21, 1976 and the Ventura County APCD submitted Regulation VIII, "Emergency Action" on July 19, 1974; January 10, 1975; and November 3, 1975 to the Environmental Protection Agency (EPA). The purpose of these regulations is to provide an emergency episode contingency plan in accordance with 40 CFR 51.16 that will prevent ambient air pollutant concentrations from reaching levels which could cause significant harm to public health and to abate such concentrations should they occur. These rules have been submitted to EPA by the California Air Resources Board (ARB) as a revision to the California State Implementation Plan (SIP). The purpose of this rulemaking is to approve part of the SIP revisions, to take no action on part of the revisions, and to propose replacement regulations to correct deficiencies in the revised plans. EPA invites written public comment concerning this proposed rulemaking. Those wishing to comment or request a public hearing may do so by writing EPA at the address listed below.

DATES: Comments or requests for a public hearing may be submitted up to August 13, 1979.

ADDRESSES: Comments or requests for a public hearing may be sent to: Regional Administrator, Attn: Air and Hazardous Materials Division, Air Technical Branch, Technical Analysis Section (A–4–3), Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, CA 94105.

The EPA has established a rulemaking Docket, 9A–79–4 containing all the information on which the proposed rulemaking relies, which is available for public inspection during normal business hours at the EPA Region IX Office at the above address and at the EPA Central Docket Section at the following address: EPA Central Docket Section, Waterside Mall, Room 2903 B, 401 "M" Street, S.W. Washington, DC 20460.

Additionally, copies of Regulations VII and VIII and EPA's "Evaluation Report and Technical Support Document" for the appropriate agency's plan are available for public inspection during normal business hours at the following locations:

Ventura County Air Pollution Control District, 800 South Victoria Avenue, Ventura, CA 93001.

Santa Barbara County Air Pollution Control District, 4440 Calle Real, Santa Barbara, CA 93110.

California Air Resources Board, 1102 "Q" Street, P.O. Box 2815, Sacramento, CA 95814.

FOR FURTHER INFORMATION CONTACT: Charlotte Hopper, Acting Chief, Technical Analysis Section, Air Technical Branch, Air and Hazardous Materials Division, Environmental Protection Agency, Region IX (415) 556–2002.

SUPPLEMENTARY INFORMATION:

Background

Section 110(a) of the Clean Air Act required that a SIP contain air pollution emergency episode plans, and 40 CFR 51.16 "Prevention of Air Pollution Emergency Episodes," specifies the minimum requirements for the content of these plans, including provisions for taking any emission control actions necessary to prevent ambient pollutant concentrations from reaching levels which could cause significant harm to the health of persons. The original SIP submitted by the State of California on February 21, 1972 failed to meet the requirements specified in 40 CFR 52.16. Therefore, on May 31, 1972 (37 FR 10851) EPA disapproved the emergency plan portion of the California SIP.

In November 1973, the State of California adopted a revised episode plan, which was submitted to EPA on February 6, 1974. EPA proposed conditional approval of this SIP revision on June 26, 1974 (39 FR 23060), but this proposal was never finalized.

In March 1975, the California Lung Association and others commenced a citizen suit against EPA and the ARB requesting the U.S. District Court fot the Central District of California to order EPA to promulgate and enforce an emergency episode plan for the South Coast Air Basin (SCAB) of California *(California Lung Association et al. v. Train,* Civil No. 75–1044–WPG). According to an agreed upon schedule, EPA and the ARB worked together towards Federal approval of an emergency episode plan for the SCAB.

On April 12, 1976 (41 FR 15237) EPA approved, as a revision to the SIP, California's October 21, 1975 Air Pollution Emergency Plan for three pollutants: photochemical oxidants, sulfur dioxide, and carbon monoxide. Although required by 40 CFR 51.16, provision for nitrogen dioxide, particulate matter, and sulfur dioxide and particulate matter combined were missing from this revised plan. On June 27, 1977, pursuant to plaintiff California Lung Association's motion, the Court ordered EPA to certify that the emergency episode plan approved on April 12, 1976 was fully adequate under the law in all respects (i.e., contained episode plans for all six pollutants), or to withdraw such approval *(California Lung Association et al. v. Costle* Civil No. 75–1044–WPG).

The EPA Administrator responded to this order with an affidavit dated July 6, 1977, which stated that since the Agency's April 12, 1976 approval of the plan applied only to the three pollutants specifically set forth therein, EPA

concluded in accordance with the Court's order, that the plan was not fully complete. Consequently, on August 11, 1977 (42 FR 40695), EPA rescinded the prior approval, reinstating the disapproval of the emergency episode plan portion of the California SIP.

On March 24, 1977, the ARB adopted a revised Air Pollution Emergency Plan (State guideline) which was submitted to EPA as a revision to the SIP on June 1, 1977. On August 8, 1977, the EPA Administrator submitted a second affidavit as required by the Court, concerning the recent submittal, stating that EPA intended to approve most of the State guideline for use by the Air Pollution Control Districts in developing episode plans. Subsequently, EPA developed a supplement to the State guideline to correct deficiencies noted in that document (43 FR 60929).

The August 8, 1977 affidavit was then followed by a Joint Stipulation of Settlement, signed on December 5, 1977 by counsels for the Administrator and for the California Lung Association. Among other things this Stipulation contained an agreement that by June 8, 1980, EPA would review the emergency episode regulations of the Air Pollution Control Districts in the State of California, approving or promulgating regulations as necessary. This proposed rulemaking and its associated documents carry out part of the actions called for in the December 5, 1977 Joint Stipulation of Settlement, relating to the Santa Barbara County APCD and the Ventura County APCD emergency episode plans.

The California Air Resources Board submitted the following rules and regulations to the EPA for the Santa Barbara County APCD and the Ventura County APCD on the following dates:

Santa Barbara County APCD

Rules 150–159 and 161–164—July 19, 1974
Rule 160—October 23, 1974
Rule 63—April 21, 1976

Ventura County APCD

Rules 150–159 and 161–164—July 19, 1974
Rule 160—January 10, 1975
Rule 153—November 3, 1975

Summary of Regulation VII, "Emergencies" and Regulation VIII, "Emergency Action"

In general, Regulations VII and VIII establish the procedures which are to be taken by industry, commerce, business, government, and the public to prevent ambient pollutant concentrations from reaching levels which could cause significant harm to public health. For example, whenever it is determined that any episode level specified in Regulations VII or VIII is predicted to be attained, is being attained, or has been attained, and is predicted to remain at such levels for 12 or more hours, the episode stage is declared, the appropriate persons are notified, and the abatement actions for that particular stage are implemented. The abatement actions are designed to reduce the pollutant level into the next lower stage or level and to prevent pollutant concentrations from reaching levels which could cause significant harm to public health. To accomplish this, the abatement actions become more stringent as an episode is predicted to progress or progresses from one stage to the next.

EPA's Proposed Actions

EPA evaluated Regulations VII and VIII by comparing each Regulation to 40 CFR 51.16 which sets forth the minimum requirements for an emergency episode contingency plan. This comparison is presented in an "Evaluation Report and Technical Support Document." Based upon the comparison of the regulations to 40 CFR 51.16, EPA proposes to approve those portions of the revisions which meet the requirements of 40 CFR 51.16, take no action on part of the revisions, and propose replacement regulations to correct deficiencies in the revised plans with respect to the requirements of 40 CFR 51.16.

The Rules that EPA is proposing to approve for inclusion into the California SIP are as follows:

Ventura County APCD

Rule 150—Source and Receptor Areas
Rule 151—Air Monitoring Stations
Rule 152—Air Monitoring Summaries
Rule 153—Episode Criteria
Rule 154—Episode Notifications
Rule 155—Plans
Rule 156—Communication Network
Rule 157—First Stage Episode Actions
Rule 158—Second Stage Episode Actions
Rule 159—Third Stage Episode Actions
Rule 160—Interdistrict Coordination
Rule 161—Enforcement
Rule 162—Termination of Episodes
Rule 163—Advisory Committee
Rule 164—Emergency Action Board

Santa Barbara County Air Pollution Control District

Rule 63—Episode Criteria
Rule 150—General
Rule 151—Air Monitoring Stations
Rule 152—Air Monitoring Summaries
Rule 154—Episode Notifications
Rule 155—Plans
Rule 156—Communication Network
Rule 157—First Stage Episode Actions
Rule 158—Second Stage Episode Actions
Rule 159—Third Stage Episode Actions
Rule 160—Interdistrict Coordination
Rule 61—Enforcement
Rule 162—Termination of Episodes
Rule 163—Scientific Committee
Rule 164—Emergency Action Committee

The following discusses those rules which EPA is proposing to approve and to take no action on. EPA is also proposing replacement regulations to correct deficiencies in both plans:

Rule 63, Episode Criteria, for the Santa Barbara County APCD: EPA is proposing to approve part of Rule 63, take no action on part of Rule 63, and is proposing the following replacement regulations:

1. Rule 63 of Regulation VII specifies 1- and 12-hour average carbon monoxide (CO) episode criteria levels. EPA has specified significant harm levels for 1-, 4-, and 8-hour averaging periods for CO. The 1-hour CO criteria level in Regulation VII is consistent with EPA requirements; however, the regulation does not provide for either a 4- or an 8-hour CO criteria level. EPA is therefore proposing 4- and 8-hour CO criteria levels to supplement the existing 1-hour level specified in Rule 63 and is taking no action on the 12-hour CO criteria level. EPA is also proposing that the episode actions which apply to the 1-hour CO criteria level in Rule 63 also apply to the 4- and 8-hour criteria levels.

Rule 155, Plans, for the Santa Barbara County APCD and the Ventura County APCD: EPA is proposing to approve Rule 155 but also proposes to add the following replacement regulations:

1. Rule 155 for the Ventura County APCD and the Santa Barbara County APCD does not provide for a time schedule for the Air Pollution Control Officers to initiate the call for the submittal of individual abatement plans. EPA's proposed regulations call for the submittal and approval of the necessary abatement plans within a specified time limit.

2. The requirements specified in Rule 155 for the content of the abatement plans are not sufficiently specific to ensure that adequate plans will be submitted. EPA is therefore proposing criteria for the content of such plans, following the requirements specified in the California Air Resources Board, Air Pollution Emergency Plan (State guideline) (March 24, 1977) and EPA's Supplement to the State guideline (43 FR 60929).

Rule 158, Second Stage Episode Actions and Rule 159, Third Stage Episode Actions, for the Santa Barbara County APCD and the Ventura County APCD: EPA is proposing to approve Rules 158 and 159 but also proposes to add the following replacement regulations:

1. Both regulations do not provide adequate emission control actions to prevent the significant harm levels of the Priority I pollutants from being reached. EPA intends to correct this deficiency by proposing mandatory emission control actions to be taken at each stage.

In addition to the above approvals and deficiencies the Ventura County APCD and the Santa Barbara County APCD omitted certain requirements specified by 40 CFR 51.16. The omissions, and a discussion of EPA's proposed regulations to correct those omissions, are as follows:

1. The Ventura County APCD and the Santa Barbara County APCD are required to provide for a particulate matter (TSP) emergency episode contingency plan. Both districts, however, do not provide for this type of plan, as required by 40 CFR 51.16. EPA is therefore proposing a 24-hour TSP criteria level. EPA is also proposing that the episode actions which apply to the 1-hour CO and photochemical oxidants (O_x) criteria levels also apply to the 24-hour TSP criteria level.

Santa Barbara County is divided into two planning areas: The Santa Barbara non-Air Quality Management Area (AQMA) and the Santa Barbara AQMA. The Santa Barbara non-AQMA is Priority III for all pollutants (40 CFR 52.221) and, as such, an emergency episode plan is not required for this planning area.

Amendments to 40 CFR 51.16 were published on March 20, 1979 in the Federal Register (44 FR 16911). Under these amendments, the Administrator may exempt attainment or unclassifiable areas from the requirements for future emergency episode plan development.

The Santa Barbara AQMA planning area is classified as Priority I for total suspended particulate matter (TSP), nitrogen dioxide (NO_2), carbon monoxide (CO), and photochemical oxidants (O_x), and as Priority II for sulfur dioxide (SO_2) (40 CFR 52.221). On March 3, 1978 (43 FR 8962) EPA designated the Santa Barbara AQMA as nonattainment for TSP, O_x, and CO, as unclassifiable for SO_2, and as attainment for NO_2. As such, the Administrator has exempted the Santa Barbara AQMA planning area for NO_2 and SO_2 from episode plan requirements.

Ventura County is classified as Priority I for NO_2, CO, TSP, and O_x, and Priority II for SO_2. In the above-mentioned March 3, 1978, Federal Register (43 FR 8962), Ventura County was designated as nonattainment for TSP and O_x, as unclassifiable for SO_2, and as attainment for NO_2 and CO. As such, the Administrator has exempted Ventura County for CO, SO_2, and NO_2 from episode plan requirements.

EPA's proposed regulations are based on 40 CFR 51.16 requirements, air quality data, emissions data, Regulations VII and VIII and the evaluation of the control strategies contained in Regulations VII and VIII.

The evaluation of the control strategies is presented in an "Evaluation Report and Technical Support Document." Incorporated into the document is a report by Pacific Environmental Services, Inc., prepared for Region IX EPA to develop background information for emergency episode abatement strategies applicable in Ventura County and the Santa Barbara AQMA planning area.

In proposing regulations, EPA used Regulations VII and VIII as a procedural guide to translate the "Evaluation Report and Technical Support Document" into regulations. Thus, the general detail and terminology proposed in this notice is consistent with Regulations VII and VIII.

Miscellaneous Information

Under Section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations submitted as revisions to the SIP. The Regional Administrator hereby issues this notice setting forth these revisions as proposed rulemaking and advises the public that interested persons may participate by submitting written comments to the Region IX Office. Additionally, anyone wishing to request a public hearing may do so by writing EPA at the Region IX office. Comments or requests for a public hearing received on or before August 13, 1979, will be considered. Also, comments received will be available for public inspection at the EPA Region IX Office and the EPA Central Docket Section.

(Secs. 110, 301(a), Clean Air Act as amended (42 U.S.C. 7410 and 7601(a)).)

Dated: June 4, 1979.

Paul de Falco, Jr.,

Regional Administrator.

Proposed Rulemaking

It is proposed to amend Part 52 of Chapter I, Title 40, of the Code of Federal Regulations as follows:

Subpart F—California

1. Section 52.220 is amended by adding paragraphs (c)(24)(x)(C), (c)(24)(xi), (c)(25)(vi), (c)(28)(xviii), (c)(29)(vi)(B), and (c)(31)(vii)(C) as follows:

§ 52.220 Identification of plan.

* * * * *

(c) * * *

(24) * * *

(x) * * *

(C) Rules 150 to 159 and 161 to 164, except those portions that pertain to nitrogen dioxide, sulfur dioxide and carbon monoxide.

(xi) Santa Barbara County Air Pollution Control District.

(A) Rules 150 to 159 and 161 to 164, except those portions pertaining to nitrogen dioxide, sulfur dioxide and the 12-hour carbon monoxide criteria level.

* * * * *

(25) * * *

(vi) Santa Barbara County Air Pollution Control District.

(A) Rule 160, except those portions pertaining to nitrogen dioxide, sulfur dioxide and the 12-hour carbon monoxide criteria level.

* * * * *

(28) * * *

(xviii) Ventura County Air Pollution Control District.

(A) Rule 160, except those portions pertaining to nitrogen dioxide, sulfur dioxide and carbon monoxide.

* * * * *

(29) * * *

(vi) * * *

(B) Rule 153, except those portions pertaining to nitrogen dioxide sulfur dioxide and carbon monoxide.

* * * * *

(31) * * *

(vii) * * *

(C) Rule 63, except those portions pertaining to nitrogen dioxide, sulfur dioxide and the 12-hour carbon monoxide criteria level.

* * * * *

2. Section 52.274 is amended by adding paragraphs (a)(5), (a)(6), (m), (n), (o), and (p) as follows:

§ 52.274 California air pollution emergency plan.

(a) * * *

(5) Ventura County Air Pollution Control District.

(6) Santa Barbara Air Quality Management Area portion of the Santa Barbara County Air Pollution Control District.

* * * * *

(m) The requirements of § 51.16 of this chapter are met in the Ventura County Air Pollution Control District with the following exceptions: (1) There is no time schedule to initiate the call for the submittal of individual abatement plans;

(2) the requirements for the content of the abatement plans are not sufficiently specific to ensure that adequate plans are submitted; (3) adequate mandatory emission control actions are not provided for; (4) there are no episode criteria levels, declaration procedures, notification procedures, source inspection procedures, emission control actions, or episode termination procedures for particulate matter episodes.

(n) *Regulation for prevention of air pollution emergency episodes—preplanned abatement strategies, mandatory emission control actions, and a particulate matter emergency episode contingency plan.* (1) The requirements of this paragraph are applicable in the Ventura County Air Pollution Control District.

(2) For the purposes of this regulation the following definitions apply:

(i) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(ii) "ug/m^3" means micrograms per cubic meter.

(iii) "Major National Holiday" means a holiday such as Christmas or New Year's.

(3) Stationary source curtailment plans and traffic abatement plans shall be prepared by business, commercial, industrial, and governmental establishments in Ventura County as follows:

(i) The owner or operator of any business, commercial, industrial, or governmental facility or activity listed below shall submit to the Administrator plans to curtail or cease operations causing stationary source air contaminants is such activity:

(A) Stationary sources which emit 25 tons per year or more of hydrocarbons, nitrogen oxides, or particulate matter.

(ii) The plans required by subpargraph (3)(i)(A) of this paragraph shall include the following information:

(A) The information requested by the California Air Resources Board, Air Pollution Emergency Plan (March 24, 1977).

(B) The total number of employees at the facility during each shift on a normal weekday and on a Major National Holiday.

(C) The amount of energy (gas, fuel oil and electricity) used on a normal weekday and on a Major National Holiday.

(D) For first-stage episodes, the measures to voluntarily curtail equipment operations that emit air pollutants specific to the type of episode and in the case of oxidant episodes, the equipment operations that emit hydrocarbons and nitrogen oxides.

(E) For second-stage episodes:

(*1*) The measures to curtail as much as possible, equipment operations that emit air pollutants specific to the type of episode and in the case of oxidant episodes, the equipment operations that emit hydrocarbons and nitrogen oxides.

(*2*) The measures to postpone operations which can be postponed until after the episode.

(*3*) For fossil fuel-fired combustion sources, including electric utilities, with a heat input greater than 50 million BTU per hour the measures to burn natural gas.

(*4*) For electric utilities the measures, in addition to those in subparagraph (E)(3), to:

(*i*) Shift oil burning power generation to non-source areas to the maximum extent consistent with the public health, safety, and welfare.

(*5*) For refineries and chemical plants, the measures to be taken to reduce emissions by 20 percent by curtailing equipment operations that emit air pollutants specific to the type of episode and in the case of oxidant episodes, the equipment operations that emit hydrocarbons and nitrogen oxides without jeopardizing the public health or safety, without causing an increase in the emissions of other air contaminants, and without damaging production by more than 20 percent.

(*6*) The measures in subparagraph (3)(ii)(D) of this paragraph.

(F) For third-stage episodes:

(*1*) A list of equipment, with permit numbers if applicable, which can be shut down without jeopardizing the public health or safety, and an estimate of the resultant reductions in hydrocarbons, nitrogen oxides and particulate matter emissions.

(*2*) A list of all equipment, with permit numbers if applicable, which must be operated to protect the public health or safety, and an estimate of the hydrocarbons, nitrogen oxides and particulate matter emissions from such equipment.

(*3*) The measures for chemical plants, petroleum refineries and electric utilities to reduce emissions by 33 percent by curtailing equipment operations that emit air pollutants specific to the type of episode and in the case of oxidant episodes the equipment operations that emit hydrocarbons and nitrogen oxides, without damaging the equipment or increasing the emissions of other air contaminants.

(*4*) The measures described in subparagraph (3)(ii)(E) of this paragraph.

(*5*) The measures for stationary sources which emit 25 tons per year or more of air contaminants to eliminate emissions specific to the type of episode and in the case of oxidant episodes, the measures to eliminate hydrocarbons and nitrogen oxides by starting no new batches, by ceasing feed of new materials, and by phasing down as rapidly as possible without damage to the equipment.

(iii) The owner or operator of any industrial, business, commercial, or governmental facility or activity listed below shall submit to the Administrator plans to curtail or cease operations causing air contaminants from vehicle use:

(A) Operators of 50 or more fleet vehicles.

(B) Industrial, business, commercial or governmental establishments employing more than 100 persons per shift at one business address.

(iv) The plans required by subparagraph (3)(iii)(A) and (B) of this paragraph shall include the following information:

(A) The information requested in the California Air Resources Board, Air Pollution Emergency Plan (March 24, 1977).

(B) The total number of employees at the facility during each shift.

(C) The total number of motor vehicles and vehicle miles traveled for motor vehicles operated:

(*1*) By the company on company business on a normal weekday and a Major National Holiday.

(*2*) By employees commuting between home to the place of business on a normal weekday and a Major National Holiday.

(*3*) The minimum number of motor vehicles to be operated that are neccessary to protect public health or safety.

(4) A copy of the stationary source curtailment and/or traffic abatement plans approved in accordance with the provisions of this paragraph shall be on file and readily available on the premises to any person authorized to enforce the provisions of this paragraph.

(5) The owner or operator of any governmental, business, commercial, or industrial activity or facility listed in subparagraph (3) of this paragraph shall submit a stationary source curtailment plan and/or traffic abatement plan to the Administrator within 60 days after promulgation of final rulemaking.

(6) The plans submitted pursuant to the requirements of this paragraph shall be reviewed by the Administrator for approval or disapproval according to the following schedule:

(i) For sources with emissions of hydrocarbons, nitrogen oxides or particulate matter greater than or equal to 454 metric tons (500 tons) per year, or for establishments employing 400 or more employees per shift, within 45 days after receipt.

(ii) For sources with emissions of hydrocarbons, nitrogen oxides, or particulate matter greater than or equal to 91 metric tons (100 tons) per year and less than 454 metric tons (500 tons) per year, or for establishments employing more than 200 and less than 400 employees per shift, within 90 days after receipt.

(iii) For sources with emissions of hydrocarbons, nitrogen oxides, or particulate matter less than 91 metric tons (100 tons) per year, or for establishments employing 100 to 200 employees per shift, within 180 days after receipt.

(7) The owner or operator of any industrial, business, governmental or commercial establishment required to submit a plan by this paragraph shall be notified by the Administrator or his authorized representative within 30 days after the plan has been evaluated, if the plan is disapproved. Any plan disapproved by the Administrator shall be modified to overcome the disapproval and resubmitted to the Administrator within 30 days of receipt of the notice of disapproval.

(8) Any source that violates any requirement of this regulation shall be subject to enforcement action under Section 113 of the Act.

(9) All submittals or notifications required to be submitted to the Administrator by this regulation shall be sent to:

Regional Administrator, Attn: Air and Hazardous Materials Division, Air Technical Branch, Technical Analysis Section (A-4-3), Environmental Protection Agency, 215 Fremont Street, San Francisco, CA 94105.

(10) For the purposes of this regulation the following episode criteria shall apply to particulate matter episodes:

Pollutant	Averaging time	Stage 1	Stage 2	Stage 3
Particulate matter	24 hours	375 $\mu g/m^3$	625 $\mu g/m^3$	875 $\mu g/m^3$

(11) The provisions of the Ventura County Air Pollution Control District's Regulation VIII, as submitted on July 19, 1974 and January 10, 1975, relating to episodes for carbon monoxide and photochemical oxidants averaged over 1 hour shall apply to particulate matter episodes averaged over 24 hours except that the Administrator shall insure that declaration procedures, notification procedures, source inspections, and termination of such episodes occur.

(12) The following abatement actions shall augment those abatement actions contained in Regulation VIII, Rule 158, Part B of the Ventura County Air Pollution Control District as submitted on July 19, 1974:

(i) Postpone construction and demolition.

(13) The Administrator shall insure that the following actions will be taken in Ventura County in the source and receptor areas on the declaration of a Stage 1, Stage 2 or Stage 3 episode for particulate matter or photochemical oxidants episodes:

(i) For a Stage 1 or Stage 2 episode:

(A) Persons operating any facility or activity named in subparagraph (3) of this paragraph shall implement the appropriate plans submitted in accordance with subparagraph (3) of the declared Stage 1 or Stage 2 episode for the appropriate air contaminant(s).

(ii) For a Stage 3 episode:

(A) The general public, schools, industrial, business, commercial, and governmental activities throughout the District shall operate as though the day were a Major National Holiday.

(c) The requirements of § 51.16 of this Chapter are met in the Santa Barbara Air Quality Management Area with the following exceptions: (1) There is no time schedule to initiate the call for the submittal of individual abatement plans; (2) the requirements for the content of the abatement plans are not sufficiently specific to ensure that adequate plans are submitted; (3) adequate mandatory emission control actions are not provided for; (4) there are no episode criteria levels, declaration procedures, notification procedures, source inspection procedures, emission control actions, or episode termination procedures for particulate matter episodes; (5) there are no episode criteria levels, declaration procedures, notification procedures, source inspection procedures, emission control actions, or episode termination procedures for carbon monoxide episodes based on 4- and 8-hour averaging times for the Santa Barbara Air Quality Management Area.

(p) *Regulation for prevention of air pollution emergency episodes—preplanned abatement strategies, mandatory emission control actions, a particulate matter emergency episode contingency plan, and 4- and 8-hour carbon monoxide criteria levels.* (1) The requirements of this paragraph are applicable in the Santa Barbara Air Quality Management Area.

(2) For the purposes of this regulation the following definitions apply:

(i) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(ii) "ppm" means parts per million by volume.

(iii) "$\mu g/m^3$" means micrograms per cubic meter.

(iv) "Major National Holiday" means a holiday such as Christmas or New Year's.

(3) For the purposes of this regulation, the following episode criteria levels shall apply to carbon monoxide episodes:

Pollutant	Averaging time	Stage 1	Stage 2	Stage 3
Carbon monoxide	4 hours	25 ppm	45 ppm	60 ppm
	8 hours	15 ppm	30 ppm	40 ppm

(4) The provisions of the Santa Barbara County Air Pollution Control District's Regulation VII, as submitted on July 19, 1974, October 23, 1974 and April 21, 1974, relating to carbon monoxide episodes averaged over 1 hour shall apply to carbon monoxide episodes averaged over 4 and 8 hours except that the Administrator shall insure that declaration procedures, notification procedures, source inspections, and termination of such episodes occur.

(5) Stationary source curtailment plans and traffic abatement plans shall be prepared by business, commercial, industrial, and governmental

establishments in the Santa Barbara Air Quality Management Area as follows:

(i) The owner or operator of any business, commercial, industrial, or governmental facility or activity listed below shall submit to the Administrator plans to curtail or cease operations causing stationary source air contaminants in such activity:

(A) Stationary sources which can be expected to emit 100 tons per year or more of hydrocarbons, nitrogen oxides, carbon monoxide or particulate matter.

(ii) The plans required by subparagraph (5)(i)(A) of this paragraph shall include the following information:

(A) The information requested by the California Air Resources Board, Air Pollution Emergency Plan (March 24, 1977).

(B) The total number of employees at the facility during each shift on a normal weekday and on a Major National Holiday.

(C) The amount of energy (gas, fuel oil and electricity) used on a normal week and on a Major National Holiday.

(D) For first-stage episodes, the measures to voluntarily curtail equipment emitting air pollutants.

(E) For second-stage episodes:

(*1*) The measures to curtail as much as possible, equipment operations that emit air pollutants specific to the type of episode and in the case of oxidant episodes, the equipment operations that emit hydrocarbons and nitrogen oxides.

(*2*) The measures to postpone operations which can be postponed until after the episode.

(*3*) The measures described in subparagraph (5)(ii)(D) of this paragraph.

(F) For third-stage episodes:

(*1*) A list of equipment, with permit numbers if applicable, which can be shut down without jeopardizing the public health or safety, and an estimate of the resultant reductions in hydrocarbons, nitrogen oxides, carbon monoxide, and particulate matter emissions.

(*2*) A list of all equipment, with permit numbers if applicable, which must be operated to protect the public health or safety, and an estimate of the hydrocarbons, nitrogen oxides, carbon monoxide, and particulate matter emissions from such equipment.

(*3*) The measures described in subparagraph (5)(ii)(E) of this paragraph.

(iii) The owner or operator of any industrial, business, commercial, or governmental facility or activity listed below shall submit to the Administrator plans to curtail or cease operations causing air contaminants from vehicle use:

(A) Operators of 50 or more fleet vehicles.

(B) Industrial, business, commercial or governmental establishments employing more than 100 persons per shift at one business address.

(iv) The plans required by subparagraph (5)(iii) (A) and (B) of this paragraph shall include the following information:

(A) The information requested in the California Air Resources Board, Air Pollution Emergency Plan (March 24, 1977).

(B) The total number of employees at the facility during each shift.

(C) The total number of motor vehicles and vehicle miles traveled for motor vehicles operated:

(*1*) By the company on company business on a normal weekday and a Major National Holiday.

(*2*) By employees commuting between home to the place of business on a normal weekday and a Major National Holiday.

(*3*) The minimum number of motor vehicles to be operated that are necessary to protect public health or safety.

(6) A copy of the stationary source curtailment and/or traffic abatement plans approved in accordance with the provisions of this paragraph shall be on file and readily available on the premises to any person authorized to enforce the provisions of this paragraph.

(7) The owner or operator of any governmental, business, commercial, or industrial activity or facility listed in subparagraph (5) of this paragraph shall submit a stationary source curtailment plan and/or traffic abatement plan to the Administrator within 60 days after promulgation of final rulemaking.

(8) The plans submitted pursuant to the requirements of this paragraph shall be reviewed by the Administrator for approval or disapproval according to the following schedule:

(i) For sources with emissions of hydrocarbons, carbon monoxide, nitrogen oxides or particulate matter greater than or equal to 454 metric tons (500 tons) per year, or for establishments employing 400 or more employees per shift, within 45 days after receipt.

(ii) For sources with emissions of hydrocarbons, nitrogen oxides, carbon monoxide or particulate matter greater than or equal to 91 metric tons (100 tons) per year and less than 454 metric tons (500 tons) per year, or for establishments employing more than 200 and less than 400 employees per shift, within 90 days after receipt.

(iii) For sources with emissions of hydrocarbons, nitrogen oxides, carbon monoxide or particulate matter less than 91 metric tons (100 tons) per year, or for establishments employing 100 to 200 employees per shift, within 180 days after receipt.

(9) The owner or operator of any industrial, business, governmental or commercial establishment required to submit a plan by this paragraph shall be notified by the Administrator or his authorized representative within 30 days after the plan has been evaluated, if the plan is disapproved. Any plan disapproved by the Administrator shall be modified to overcome the disapproval and resubmitted to the Administrator within 30 days of receipt of the notice of disapproval.

(10) Any source that violates any requirement of this regulation shall be subject to enforcement action under Section 113 of the Act.

(11) All submittals or notifications required to be submitted to the Administrator by this regulation shall be sent to:

Regional Administrator, Attn.: Air and Hazardous Materials Division, Air Technical Branch, Technical Analysis Section (A-4-3), Environmental Protection Agency, 215 Fremont Street, San Francisco, CA 94105.

(12) For the purposes of this regulation the following episode criteria shall apply to particulate matter episodes:

Pollutant	Averaging time	Stage 1	Stage 2	Stage 3
Particulate matter	24 hours	375 $\mu g/m^3$	625 $\mu g/m^3$	875 $\mu g/m^3$

(13) The provisions of the Santa Barbara County Air Pollution Control Distict's Regulation VII, as submitted on July 19, 1974 and October 23, 1974, relating to episodes for carbon monoxide and photochemical oxidants averaged over 1 hour shall apply to particulate matter episodes averaged over 24 hours except that the Administrator shall insure that declaration procedures, notification

procedures, source inspections, and termination of such episodes occur.

(14) The Administrator shall insure that the following actions will be taken in the Santa Barbara Air Quality Management Area in the source and receptor areas on the declaration of a Stage 1, Stage 2 or Stage 3 episode for particulate matter, carbon monoxide or photochemical oxidants episodes:

(i) For a Stage 1 or Stage 2 episode:

(A) Persons operating any facility or activity named in subparagraph (5) of this paragraph shall implement the appropriate plans submitted in accordance with subparagraph (5) of the declared Stage 1 or Stage 2 episode for the appropriate air contaminant(s).

(ii) For a Stage 3 episode:

(A) The general public, schools, industrial, business, commercial, and governmental activities throughout the Santa Barbara Air Quality Management Area shall operate as though the day were a Major National Holiday.

BILLING CODE 6560-01-M

[40 CFR Part 65]

[FRL 1233-1]

Notice of Proposed Approval of an Administrative Order Issued by the Pennsylvania Department of Environmental Resources to the Pennsylvania Power and Light Company, Montour Units 1 and 2

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rule.

SUMMARY: EPA proposes to approve an administrative order issued by the Pennsylvania Department of Environmental Resources (DER) to the Pennsylvania Power and Light Company (PP&L). The order requires the company to bring air emissions from its Montour Steam Electric Station Units 1 and 2 in Derry Township, Pennsylvania into compliance with certain regulations contained in the federally approved Pennsylvania State Implementation Plan (SIP) by July 1, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before July 13, 1979.

ADDRESSES: Comments should be submitted to Director, Enforcement Division, EPA, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, Pennsylvania 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Mr. Gary Gross, Air Enforcement Branch (3EN12) at the above address or telephone 215/597-8007.

SUPPLEMENTARY INFORMATION: PP&L operates a steam electric generating station at Derry Township, Pennsylvania. The order under consideration addresses emissions from boiler units 1 and 2 at the facility, which are subject to Section 123.11 of Title 25 of the Pennsylvania Code. The regulation limits the emissions of particulate matter and is part of the federally approved Pennsylvania State Implementation Plan. The order requires final compliance with the regulation by July 1, 1979 through installation of a sulfur trioxide (SO_3) flue gas conditioning system as well as mechanical and electrical modifications to the existing electrostatic precipitators. PP&L has consented to the terms of the order.

Because this order has been issued to a major source of particulate emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under Section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection. Based on a preliminary review of the order, EPA presently believes it is approvable as a delayed compliance order.

If the order is approved by EPA, source compliance with its terms would preclude federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the order would also constitute an addition to the Pennsylvania SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the Federal Register the Agency's final action on the order in 40 CFR Part 65.

(Authority: 42 U.S.C. 7413, 7601.)

Dated: April 6, 1979.

Jack J. Schramm,

Regional Administrator, Region III.

BILLING CODE 6560-01-M

[40 CFR Part 65]

[FRL 1246-7]

State and Federal Administrative Enforcement of Implementation Plan Requirements After Statutory Deadlines; Proposed Delayed Compliance Order for Whitehead Brothers Co. Dividing Creek, N.J.

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rule.

SUMMARY: The EPA proposes to issue an administrative Order pursuant to Section 113(d)(3) of the Clean Air Act, as amended, 42 U.S.C. 7401 *et seq.* ("the Act"), requiring the Whitehead Brothers Company ("Whitehead") to bring a sand producing facility located at Dividing Creek, New Jersey, into compliance with certain regulations contained in the federally-approved New Jersey State Implementation Plan ("SIP"). The proposed Order would establish a final compliance date by Whitehead of July 1, 1979 because of the inability of this source to comply with these regulations at this time. Source compliance with this Order would preclude suits under the federal enforcement and citizen suit provisions of the Act for violation of the SIP regulations covered by this Order. The purpose of this notice is to invite public comment and to offer an opportunity to request a public hearing on EPA's proposed issuance of this Order.

DATES: Written comments and requests for a public hearing must be received on or before July 13, 1979. All requests for a public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary of any proposed testimony to be offered at the hearing. If there is significant public interest in a hearing, it will be held after thirty days notice of

the date, time, and place of the hearing has been given in this publication.

ADDRESSES: Comments and requests for a public hearing should be submitted to: Meyer Scolnick, Director, Enforcement Division, U.S. Environmental Protection Agency, Region II, 26 Federal Plaza, New York, New York 10007.

Material supporting this Order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Samuel P. Moulthrop, Attorney General Enforcement Branch, Enforcement Division, U.S. Environmental Protection Agency, Region II, 26 Federal Plaza, New York, New York 10007, (212) 264–5695.

SUPPLEMENTARY INFORMATION: The Whitehead Brothers Company owns and operates a plant which produces foundry sand in Dividing Creek, New Jersey. The Order under consideration concerns emissions from the Number 3 cooling unit, which are subject to the requirements of Title 7, Chapter 27, Subchapter 6 of the New Jersey Administrative Code. This regulation limits the emission of particulate matter and is part of the federally-approved State Implementation Plan for the Air Quality Control Region in which the source is located.

Whitehead has proposed to comply with the emission limitation by terminating the production of foundry sand and the operation of the cooling unit at the Dividing Creek plant. The Order requires that the operation of the cooling unit cease no later than July 1, 1979. As a condition of the issuance of the Order, Whitehead has posted a bond in the amount of $98,000.00, which shall be forfeited if Whitehead fails to terminate the operation of the cooling unit. The amount of the bond is equal to the cost of actual compliance by the plant plus the economic value which would accrue to Whitehead by reason of failure to comply. The source has consented to the issuance of the Order and to its terms.

The proposed Order Satisfies the applicable requirements of Section 113(d) of the Act. If the Order is issued, source compliance would preclude further EPA enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the Order during the period the Order is in effect. Enforcement against the source under the citizen suit provisions of Section 304 of the Act would be similarly precluded.

Comments received by the date specified above will be considered in determining whether EPA should issue these Orders. Testimony given at any public hearing concerning the Orders will also be considered. After the public comment period and any public hearing, the Administrator of the EPA will publish in the **Federal Register** the Agency's final action on the Order in 40 CFR Part 65.

Dated: April 20, 1979.

Eckardt C. Beck,

Regional Administrator, Region II.

1. The text of the Order reads as follows:

U.S. Environmental Protection Agency, Region II

In the matter of Whitehead Brothers Company (Dividing Creek, New Jersey).

Consent Order: Index No. 70104

Findings

1. Whitehead Brothers Company (Whitehead) is a New Jersey Corporation located at 60 Hanover Road, Florham Park, New Jersey. Whitehead owns and operates a sand manufacturing facility at Dividing Creek, New Jersey.

2. On November 11, 1976 the United States Environmental Protection Agency (EPA) issued a Notice of Violation, pursuant to Section 113(a)(1) of the Clean Air Act, as amended, 42 U.S.C. § 7401 *et seq.* (the Act), to Whitehead. The Notice of Violation was issued upon a finding that emissions from Whitehead's facility at Dividing Creek, New Jersey were in violation of N.J.A.C. 7:27–6.2(a) and Section 52.1577 of Title 40 of the Code of Federal Regulations. Specifically, emissions from the facility's Number 3 Cooler cyclones were found to be in violation of the particulate emission limitations of N.J.A.C. 7:27–6.2(a). The finding of violation was based upon stack tests conducted by the New Jersey Department of Environmental Protection in 1971 and admissions by Whitehead that the violation was not corrected. A conference between EPA and Whitehead was held on March 15, 1977 in accordance with Section 113(a)(4) of the Act.

3. In June, 1978 Whitehead conducted a stack test of the emissions from the Number 3 Cooler cyclones at said Dividing Creek facility. The test results indicated that the emissions continued to violate N.J.A.C. 7:27–6.2(a).

4. Said regulation is a part of the federally-approved New Jersey State Implementation Plan (NJSIP) applicable to the Air Quality Control Region in which said Dividing Creek facility is situated.

5. The EPA finds that Whitehead's Dividing Creek facility (Number 3 Cooler cyclones) is presently in violation of the above-mentioned regulation and will be unable to comply until July 1, 1979.

6. Whitehead has acknowledged the above-mentioned violations and has notified the EPA in writing that it intends to terminate emissions from the Number 3 Cooler by July 1, 1979 by ceasing the production of foundry sand at the Dividing Creek facility.

7. In conformance with Section 113(d)(3) of the Act Whitehead has posted a bond in the amount of ninety-eight thousand dollars ($98,000.00), an amount equal to the cost of actual compliance by the facility and any economic value which may accrue to Whitehead since August 7, 1977 (effective date of the Act) by reason of its noncompliance. Section 113(d)(3) authorizes EPA to issue an order, specifying compliance later than the final SIP compliance date without an interim schedule of compliance, only if the source owner posts such a bond.

8. The EPA has determined that Whitehead has acted in good faith and that it can, by meeting the terms of this Order, be in final compliance by July 1, 1979. The EPA has determined that the schedule embodied herein will provide for compliance as expeditiously as is practicable.

9. The EPA has determined that there exist no interim control measures which are practicably available to the Company to minimize air emissions during the period of delayed compliance at its Dividing Creek facility permitted by the terms of this Order.

10. Public notice, opportunity for a public hearing and thirty days notice to the State of New Jersey have been provided.

Order

Based upon the foregoing, after consideration of public comment, and pursuant to Section 113(d) of the Act, IT IS HEREBY ORDERED:

I. That Whitehead shall terminate all emissions from the Number 3 Cooler at its Dividing Creek, New Jersey facility and shall terminate the use of said Cooler no later than July 1, 1979.

II. That, no later than five days after the above-mentioned compliance date, Whitehead shall notify the EPA, Region II in writing of the status of its compliance. Said notice shall be directed to: Mr. Kenneth Eng, Chief, Air and Environmental Application Section, Status of Compliance Branch, Enforcement Division, U.S. Environmental Protection Agency, 26 Federal Plaza, New York, New York 10007.

III. Nothing herein shall affect the responsibility of Whitehead to comply with state or local regulations. This Order shall be terminated in accordance with Section 113(d)(8) of the Act if the Administrator (or his delegate) determines on the record, after notice and hearing, that an inability to comply with N.J.A.C. 7:27–6.2(a) no longer exists.

IV. Violation of any requirement of this Order shall result in one or more of the following actions:

A. Forfeiture of the bond posted by Whitehead in accordance with Section 113(d)(3) of the Act and the terms of the bond. The Administrator has no discretion under the Act to modify this Order or to compromise the bond.

B. Enforcement of such requirement pursuant to Section 113(a), (b) or (c) of the Act, including possible judicial action for an injunction or criminal prosecution.

C. Revocation of this Order, after notice and opportunity for a public hearing, and subsequent enforcement of N.J.A.C. 7:27–6.2(a) in accordance with the preceding paragraph.

D. If such violation continues beyond July 1, 1979, notice of noncompliance and subsequent action pursuant to Section 120 of the Act.

So Ordered, Effective Immediately

Douglas M. Costle,

Administrator, U.S. Environmental Protection Agency.

Date: ————

Consent

The undersigned, having full authority to represent the Whitehead Brothers Company in these proceedings, has read the foregoing Order and believes it to be reasonable, and consents to both its issuance and to its terms. Furthermore, the undersigned acknowledges that the Whitehead Brothers Company's facility at Dividing Creek, New Jersey has been and continues to be in violation of the requirements of N.J.A.C. 7:27–6.2(a). The undersigned recognizes that Whitehead is subject to all remedies provided in Section 113 of the Act for failure to comply with the terms of the foregoing Order.

(Name of Officer)
For Whitehead Brothers Company

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service, Center for Disease Control

[42 CFR Part 51g]

Health Education-Risk Reduction Grants

AGENCY: Center for Disease Control, PHS, HEW.

ACTION: Notice of Decision to Develop Regulations.

SUMMARY: The Center proposes to develop regulations which will be applicable to Health Education-Risk Reduction programs under Section 1703 of the Public Health Service Act. The regulations will establish procedures and requirements for awarding project grants to State and local health agencies to assist them in initiating or strengthening existing activities to help the agencies become the focal point for health risk reduction programs within their jurisdiction. The grants will encourage coordination of efforts by all agencies interested in this area. These grants will also serve as the nucleus for lifestyle activities by these agencies, with the final objective being a decrease in premature and unnecessary morbidity and mortality. These programs will target activities at youth and at specific population groups with increased risk of premature morbidity and mortality related to adverse personal choice behavior.

FOR FURTHER INFORMATION CONTACT: Mr. Billy G. Griggs, Deputy Director, Bureau of Health Education, Center for Disease Control, PHS, HEW, Atlanta, Georgia 30333. Telephone: (404) 329–3111 or FTS: 236–3111.

Dated: May 22, 1979.

Julius B. Richmond,

Assistant Secretary for Health.

Health Services Administration

[42 CFR Part 55a]

Program Grants for Coal Miners' Respiratory Clinics

AGENCY: Health Services Administration, PHS, HEW.

ACTION: Notice of Decision to Develop Regulations.

SUMMARY: HSA is proposing to develop amendments to the regulations governing program grants for Coal Miners' Respiratory Clinics. This grant program is authorized by the Federal Mine Safety and Health Act of 1977. HSA is considering an amendment which would delete certain restrictions on grantee eligibility. Present regulations limit eligibility to certain entities receiving grants from the Appalachian Regional Commission (ARC) or entities which are designated by the Governor of the State.

Other amendments under consideration would be made to (1) conform the regulations with recent advances in therapeutic care of patients with chronic obstructive pulmonary disease, (2) reflect changes that have occurred since 1974 in the diagnostic procedures required by the black lung disability benefits program, and (3) make technical conforming amendments in response to legislation which has been enacted since the promulgation of 42 CFR Part 55a in 1974.

FOR FURTHER INFORMATION CONTACT: Mr. James J. Corrigan, Director, Division of Policy Development, Bureau of Community Health Services, HSA, 5600 Fishers Lane, Rockville, Maryland 20857, telephone 301–443–1034.

Dated: May 14, 1979.

Charles Miller,

Acting Assistant Secretary for Health.

FEDERAL MARITIME COMMISSION

[46 CFR 537]

[Docket No. 79–60]

The Filing With the Commission of Cargo Statistics Compiled by Various Conferences of and Rate Agreements Between, Common Carriers by Water in the Foreign Commerces

AGENCY: Federal Maritime Commission.

ACTION: Proposed Rulemaking.

SUMMARY: The Federal Maritime Commission hereby proposes the promulgation of a rule which would require the filing with the Commission annually of certain cargo statistics compiled by conferences of, and rate agreements between, common carriers by water engaged in the various foreign commerces of the United States.

DATE: Comments due on or before August 13, 1979.

ADDRESSES: Comments (original and fifteen copies) to:
Secretary, Federal Maritime Commission, Room 11101, 1100 L. Street NW., Washington, D.C. 20573.

FOR FURTHER INFORMATION CONTACT: Francis C. Hurney, Secretary, Federal Maritime Commision, Room 11101, 1100 L. Street NW., Washington, D.C. 20573, (202) 523–5725.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Federal Maritime Commission is considering the promulgation of the proposed rule set forth below which would require the filing with the Commission annually of certain cargo statistics compiled by conferences of, and rate agreements between, common carriers by water engaged in the various foreign commerces of the United States. As envisaged by the Commission, nothing more than three copies of a final work product need be filed. Such information will not be made routinely available for public inspection and, to the extent that it is considered confidential, the Commission will make all efforts to preserve its confidentality. Notice is given hereby, however, that nothing herein shall preclude the Commission from furnishing such statistical information in response to any legal process issued under the authority of any court or administrative tribunal, or of any officer or agent of the Government of the United States, or of any State, territory, district, or possession thereof, in the exercise of his powers and in the prosecution of his duties.

The reasons for the promulgation of this rule are several. First, the Commission is charged with the duty of maintaining a continuing surveillance of the activity of those persons subject to the Shipping Act, 1916 (the Act), and particularly those whose activity has been immunized from the antitrust laws pursuant to section 15. Section 15 of the Act requires the Commission to determine that any agreement is not unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, detrimental to the commerce of the United States, contrary to the public interest or in any way violative of the Shipping Act, 1916, not only prospectively at the time of the Commission's initial approval, but actually during any term of that, finite or indefinite. Second, this obligation is not discharged fully unless the Commission is aware, somehow, of the impact upon our commerces of what it approved under section 15 of the Act. Minutes of meetings of the conferences' carriers now required to be filed pursuant to 46 CFR 537 are helpful but their value is diminished considerably if they cannot be reviewed by the Commission within some frame of reference. Third, many of the more significant agreements submitted for the Commission's approval by the various conferences usually require some sort of statistical evaluation to facilitate the Commission's determination as to whether or not, in the overall, they begin to meet the criteria required by section 15 of the Act of any approval. Fourth, the Commission has noticed that what would be submitted here is often sought by opponents of significant agreements in formal hearings, or is advanced by their proponents in furtherance of their justification. Thus, the ready availability of this information should serve to expedite formal hearings and, as significantly, should materially assist the Commission in determining whether formal hearings of particular matters are required at the outset, or whether something less than that will suffice in the particular circumstances. Fifth, the Commission has become aware of the fact that many conferences and ratemaking agreements presently compile statistics for their own purposes.

Accordingly, pursuant to section 4 of the Administrative Procedures Act (5 USC 553(b)) and sections 15, 21 and 43 of the Shipping Act, 1916 (46 USC 814, 820, and 841A) respectively; the Commission intends to expand upon 46 CFR 537—*Conference Agreement Provisions Relating to Concerted Activities*, by adding another section, § 537.5 Filing of statistical information, to read as follows:

§ 537.5 Filing of statistical information.

(1) *Definitions.*—(1) *Conferences.* Conferences of, or ratemaking agreements between, common carriers by water engaged in the foreign commerces of the United States.

(2) *Statistics.* Compilations of all cargoes transported port-to-port, point-to-port, and point-to-point by member lines of a conference whether compiled by the conference's secretariat or by any of the conference's member lines but excluding statistics compiled by any member line solely for its own use and without distribution to or with the cooperation of any other member line.

(b) *Filing requirements.* (1) By April 30 annually, each conference which has compiled statistics for all or part of the preceding calendar year shall file three (3) copies of those statistics with the Director, Bureau of Ocean Commerce Regulation, Federal Maritime Commission. This filing shall cover the activity of its member lines for the preceding calendar year and its format shall be that as regularly compiled by the conference. In the event the statistics are incomplete, the conference's chairman or secretary shall submit an accompanying statement explaining the extent of, and reasons for, the deficiency.

(2) By April 30 annually, each conference which has not compiled statistics for all of the preceding calendar year shall file a statement to that effect, signed by the conference's chairman or secretary, with the Director, Bureau of Ocean Commerce Regulation, Federal Maritime Commission.

(c) *Status of filings and confidentiality.* (1) Copies of all statistics received shall be presumed correct by the Commission unless corrected subsequently by the filing conference.

(2) Copies of all statistics filed shall not be available for public inspection.

(3) Statistical information received pursuant to this rule may be used in any formal proceeding before the Commission provided it receives that protection afforded objected materials upon order of an administrative law judge of the Commission as set forth in Rule 167 of the Commission's Rules of Practice and Procedure (46 CFR 502.167).

(4) Statistical information received pursuant to this rule may be used with respect to any matter undertaken by the Commission or its staff. If the statistical information should in any way serve to support any Commission action, as reflected in an appropriate order, then such statistical information shall be distributed to parties of interest only to the same extent, and under the same protection, as is afforded objected material in Rule 167 of the Commission's rules of practice and procedure (46 CFR 502.167). Any claim to confidentiality is waived if a conference submits the data encompassed by this rule as justification for, or in support of, any Commission action.

Interested parties may participate in this rulemaking proceeding by filing

with the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before August 13, 1979, an original and 15 copies of their views or arguments pertaining to the proposed rules. All suggestions for changes in the text as set out above should be accompanied by drafts of the language thought necessary to accomplish the desired change and should be supported by statements and arguments relating to the proposed change. Bearing in mind that what the Commission anticipates receiving annually in compliance with this rule are three copies of a final work product, each interested person submitting comment and in a position to do so will provide the Commission with an estimate of the total financial burden which will be incurred annually by the promulgation of this rule, as well as an estimate of the number of employee hours to be allocated annually.

The Federal Maritime Commission, Bureau of Hearing Counsel, shall participate in the proceeding. Bureau of Hearing Counsel shall file Reply to Comments on or before August 27, 1979 by serving an original and 15 copies on the Federal Maritime Commission and one copy on each party who filed written comments. Answers to Hearing Counsel's replies shall be submitted to the Federal Maritime Commission on or before September 7, 1979.

By the Commission.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 17]

Endangered and Threatened Wildlife and Plants; Review of the Status of Ten Birds and Two Mammals From Guam

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Extension of Comment Period.

SUMMARY: In the Federal Register of Friday, May 18, 1979 (44 FR 29128), the Service requested that all pertinent comments on its status review of ten birds and two mammals from Guam be received before June 17, 1979. The service now feels that this allows too short a time frame within which to adequately respond to the review notice and has therefore extended the comment period.

DATE: The comment period is extended to August 16, 1979.

ADDRESS: All comments should be sent to Director (OES), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: John L. Spinks, Jr., (703) 235–2771.

Dated: June 7, 1979.

Lynn A. Greenwalt,

Director, Fish and Wildlife Service.

[FR Doc. 79-18508 Filed 6-12-79; 8:45 am]

BILLING CODE 4310-55-M

[50 CFR Part 70]

National Fish Hatcheries

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed Rulemaking.

SUMMARY: This proposal would amend Part 70 by changing cross-references to the National Wildlife Refuge System contained therein in order that such references accurately cite the appropriate parts of the National Wildlife Refuge System regulations. Additionally, the proposal would apply the administration provisions for the National Wildlife Refuge System to national fish hatchery areas; such provisions are presently unaddressed.

DATES: Comments on these proposed regulations must be received on or before July 13, 1979.

ADDRESSES: The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments, suggestions, or objections regarding the proposed revision. Comments should be addressed to the Director (FWS/LE), U.S. Fish and Wildlife Sevice, P.O. Box 19183, Washington, D.C. 20036, and should refer to the file number, REG 70–02–2.

Comments received will be available for public inspection during normal business hours at the Service's Divison of Law Enforcement, Suite 600, 1612 K Street, N.W., Washington, D.C. 20006.

FOR FURTHER INFORMATION CONTACT: Robert W. Thoesen, Chief, Division of National Fish Hatcheries, telephone: 343–2197.

SUPPLEMENTARY INFORMATION: For some time prior to the 1977 revision of Title 50, Code of Federal Regulations, sections of the National Fish Hatcheries regulations found in Part 70 of Title 50, CFR, have contained inaccurate references to corresponding sections in Parts 25–31 of Title 50, CFR. This proposal would correct these references and would add a further cross-reference that would incorporate the administrative provisions of Part 25 in the national fish hatcheries regulations. Such provisions would provide regulations for public notice, permits, appeals, fees, concessions, safety, and closing national fish hatcheries.

The Department of the Interior has determined that this document is not a significant rule and does not require a regulatory analysis under Executive Order 12044 and 43 CFR Part 14.

Note.—The Service has determined that this proposed rulemaking is not a major Federal action which would significantly affect the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969.

The primary author of this proposed rulemaking is Richard A. Stephan, Legal Specialist, Fish and Wildlife Service.

Accordingly, it is hereby proposed to revise Part 70 of Title 50, Code of Federal Regulations, to read as set forth below.

SUBCHAPTER E—MANAGEMENT OF FISHERIES CONSERVATION AREAS

PART 70—NATIONAL FISH HATCHERIES

Sec.

70.1 Purpose.
70.2 Administrative provisions.
70.3 State cooperation in national fish hatchery area management.
70.4 Prohibited acts.
70.5 Enforcement, penalty, and procedural requirements for violations of Parts 25, 26, and 27.
70.6 Public entry and use.
70.7 Land-use management.
70.8 Range and feral animal management.
70.9 Wildlife/species management.

Authority.—Sec. 4, 48 Stat. 402, as amended, sec. 4, 76 Stat. 654; 5 U.S.C. 301, 16 U.S.C. 664; 460k; sec. 2, 80 Stat. 926; 16 U.S.C. 668bb.

§ 70.1 Purpose.

All national fish hatchery areas are maintained for the fundamental purpose of the propagation and distribution of fish and other aquatic animal life and managed for the protection of all species of wildlife.

§ 70.2 Administrative provisions.

The provisions and regulations set forth in Part 25 of this chapter are equally applicable to national fish hatchery areas.

§ 70.3 State cooperation in national fish hatchery area management.

State cooperation may be enlisted in management programs including public

hunting, fishing, and recreation. The details of these programs shall be mutually agreed upon by the Secretary and the head of the appropriate State agency in cooperative agreements executed for the purpose. Persons entering upon a national fish hatchery area shall comply with all regulations issued by the State agency under the terms of the cooperative agreement.

§ 70.4 Prohibited acts.

(a) The prohibited acts enumerated in Part 27 of this chapter are equally applicable to national fish hatchery areas.

(b) Fishing, taking, seining, or attempting to fish, take, seine, any fish, amphibian, or other aquatic animal on any national fish hatchery area is prohibited except as may be authorized under the provisions of Part 71 of this chapter.

(c) Hunting, killing, capturing, taking, or attempting to hunt, kill, capture, or take any animal on any national fish hatchery area is prohibited except as may be authorized in the provisions of Part 71 of this chapter.

(d) Disturbing spawning fish or fish preparing to spawn in ponds, raceways, streams, lakes, traps, and below traps, ladders, fish screens, fishways and racks is prohibited.

§ 70.5 Enforcement, penalty, and procedural requirements for violations of Parts 25, 26, and 27.

The enforcement, penalty, and procedural requirement provisions set forth in Part 28 of this chapter are equally applicable to national fish hatchery areas.

§ 70.6 Public entry and use.

The public entry and use provisions set forth in Part 26 of this chapter are equally applicable to National fish hatchery areas.

Note.—For Federal Register citations to special regulations issued under § 70.6, see the List of CFR Sections Affected.

§ 70.7 Land-use management.

The land-use management provisions set forth in Part 29 of this chapter are equally applicable to national fish hatchery areas.

§ 70.8 Range and feral animal management.

The range and feral animal management provisions set forth in Part 30 of this chapter are equally applicable to national fish hatchery areas.

§ 70.9 Wildlife species management.

The wildlife species management provisions set forth in Part 31 of this chapter are equally applicable to national fish hatchery areas with exception of § 31.15, relating to hunting and fishing, which are treated separately in this Part.

Dated: May 30, 1979.

Lynn A. Greenwalt,

Director.

BILLING CODE 4310-55-M

ENDANGERED SPECIES SCIENTIFIC AUTHORITY

[50 CFR Part 810]

Export Findings for American Alligator; Public Hearing on July 10, 1979

AGENCY: Endangered Species Scientific Authority.

ACTION: Notice of Public Hearing.

SUMMARY: The Endangered Species Scientific Authority (ESSA) will hold an informal public hearing on July 10, 1979. The hearing will concern information needed to satisfy the ESSA that export will not be detrimental to the survival of American alligator or to the survival of other species of crocodilians included in the appendices of the Convention on International Trade in Endangered Species of Wild Fauna and Flora. The ESSA published proposed findings on May 31, 1979 (44 FR 31584), with a comment period open until July 30, 1979. The hearing is one of several steps being taken by the ESSA to ensure maximum public input for its determinations.

DATE: The hearing will be held from 10 a.m. until 6 p.m. on Tuesday, July 10, 1979, at the following address: Room 8070 (Penthouse), Main Interior Building, 18th and C Streets, NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Dr. Peter C. Escherich, (202) 653-5948.

SUPPLEMENTARY INFORMATION: Statements should be limited to information and analysis relevant to ESSA findings on export of this species and to the potential effect of its export on this and other species of crocodilians. Appointments to speak may be made with the Office of the Executive Secretary, Endangered Species Scientific Authority, 18th and C Streets, NW., Washington, D.C. 20240 (202-653-5948). Participants without prior appointments will be given opportunity to speak, but only to the extent that time allows following speakers with appointments.

Dated: June 8, 1979.

William Y. Brown,

Executive Secretary, Endangered Species Scientific Authority.

BILLING CODE 4310-55-M

Notices

Federal Register
Vol. 44, No. 115
Wednesday, June 13, 1979

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Foster Grandparent and Senior Companion Programs; Income Eligibility Levels

This notice revises the schedule of income eligibility levels for individuals and families for the Foster Grandparent Program and the Senior Companion Program published in the Federal Register of January 8, 1979 (44 FR 1768). The revised schedule is based on the Community Services Administration (CSA) Income Poverty Guidelines effective June 6, 1979 and by the addition, through the Comprehensive Older Americans Act Amendments of 1978, of a new Subsection (f) to Section 211 of the Domestic Volunteer Service Act of 1973 to extend the eligibility for participation in the Foster Grandparent/Senior Companion Programs to individuals with an income not greater than 125% of the poverty level. Income eligibility levels are further increased in certain states in the amounts by which individual states have supplemented the Federal Supplemental Security Income (SSI) Summary dated October 1, 1978. The Director of ACTION has determined that the addition of such amounts to the SSI Summary is an existing poverty guideline within the meaning of Section 421(d) of the Domestic Volunteer Service Act of 1973 (42 U.S.C., 5061(d)), and that persons whose income is at or below the supplemented SSI level are "poor" or "low income" persons within the meaning of such section, and are eligible to participate in the Foster Grandparent and Senior Companion programs.

These ACTION programs are authorized pursuant to Section 211 of the Domestic Volunteer Service Act of 1973, Pub. L. 93–113, 87 Stat. 402.

Pursuant to Section 421 (4) of Pub. L. 93–113, 87 Stat. 414, the income eligibility levels are determined by the currently applicable guideline published by CSA pursuant to Section 625 of the Economic Opportunity Act of 1964, as amended (42 U.S.C. 2971 (a)), and increased by the amounts individual States supplement the Federal Supplemental Security Income, permitting ACTION, in accordance with Section 421 (4) of Pub. L. 93–113, to take into consideration existing poverty guidelines as appropriate to local situations. Section 625 of the Economic Opportunity Act of 1964 permits the CSA poverty guidelines to be adjusted for cost-of-living changes.

The income eligibility levels will be reviewed at least once a year, and similar schedules will be prepared to reflect any changes required as a result of that review.

This policy will become effective on June 6, 1979.

Schedule of Income Eligibility Levels—Foster Grandparent and Senior Companion Programs

[Effective date June 6, 1979]

State	Individuals	Family of two	Family of three
Alabama	$4,250	$5,840	$7,215
Alaska	5,730	8,125	10,540

BILLING CODE 3410-11-M

Soil Conservation Service

Oil Creek Watershed, Pa.; Intent To Prepare an Environmental Impact Statement

Pursuant to Section 102(c)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is being prepared for the Oil Creek Watershed, Crawford, Erie, Warren, and Venango Counties, Pennsylvania.

The environmental assessment of this federally-assisted action indicates that the action may cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Graham T. Munkittrick, State Conservationist, has determined that the preparation and review of an environmental impact statement is needed for this action.

The action concerns a plan for watershed protection and flood prevention. The planned works of improvement already installed consist of accelerated land treatment measures. Planned project features to be installed include three single-purpose floodwater retarding dams with a combined controlled drainage area of approximately 47 square miles.

A draft environmental impact statement will be prepared for the entire project and circulated for review by agencies and the public. The SCS invites participation of agencies and individuals with expertise or interest in the preparation of the draft environmental impact statement. The draft environmental impact statement will be developed by Mr. Graham T. Munkittrick, State Conservationist, Soil Conservation Service, Federal Building and U.S. Courthouse, 228 Walnut Street, Harrisburg, Pennsylvania 17108, telephone number (717) 782-2202.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program—Public Law 83-566, 16 U.S.C. 100-1008)

Dated: June 5, 1979.

Joseph W. Haas,

Assistant Administrator for Water Resources.

[FR Doc. 79-18307 Filed 6-12-79; 8:45 am]

BILLING CODE 3410-16-M

Tesnatee Creek Watershed, Ga.; Intent Not To File an Environmental Impact Statement for Deauthorization of Federal Funding

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the deauthorization of Federal funding of the Tesnatee Creek Watershed, Lumpkin and White Counties, Georgia.

The watershed was planned in 1966 and 1967 and approved for operations in 1969. None of the planned structural measures, consisting of 11 miles of channel modification, 5 single-purpose floodwater retarding structures, 1 multipurpose structure for flood prevention and municipal water supply, and 1 multipurpose structure for flood prevention and recreation development, have been installed. The sponsoring local organizations made the decision not to implement the project.

The environmental assessment of this action indicates that deauthorization of Federal funding will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Dwight M. Treadway, State Conservationist, has determined that an environmental impact statement is not needed for the proposed deauthorization.

The basic data acquired during the development of the plan and environmental assessment may be reviewed at the Soil Conservation Service, 355 East Hancock Avenue (P.O. Box 832), Athens, Georgia 30603 (telephone: 404-546-2275).

The notice of intent not to file an environmental impact statement, and an environmental impact appraisal, have been forwarded to the Environmental Protection Agency as well as other interested agencies and organizations. A limited number of copies of the environmental impact appraisal are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until August 13, 1979.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program, Public Law 83-566, 16 U.S.C. 1001-1008)

Dated: May 30, 1979.

Joseph W. Haas,

Assistant Administrator for Water Resources, Soil Conservation Service.

BILLING CODE 3410-16-M

Willow Creek Watershed, Wis.; Intent Not To File an Environemntal Impact Statement for Deauthorization of Federal Funding

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil

Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for deauthorization of Federal funding of the Willow Creek Watershed, Richland and Sauk Counties, Wisconsin.

The environmental assessment of this action indicates it will not cause significant adverse local, regional, or national impacts on the environment. As a result of these findings, Mr. J. C. Hytry, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this action.

The project concerns a plan for watershed protection, flood prevention, and enhancement of fish and wildlife resources. The planned works of improvement include seven singly-purpose floodwater retarding structures and 2 miles of trout stream improvement.

The notice of intent not to file an environmental impact statement has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment is on file and may be reviewed by interested parties at the Soil Conservation Service, 4601 Hammersley Road, Madison, Wisconsin 53711. An environmental impact appraisal has been prepared and sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the environmental impact appraisal is available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until August 13, 1979.

BILLING CODE 3410-16-M

CIVIL AERONAUTICS BOARD

[Order 79-6-19; Docket 34242]

Florida Airlines, Inc. Fitness Investigation

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order 79-6-19, Docket 34242, *Florida Airlines, Inc. Fitness Investigation.*

SUMMARY: The Board is proposing to grant the application of Florida Airlines, Inc. for a certificate of public convenience and necessity under section 401(b) of the Federal Aviation Act of 1958, as amended, authorizing it to provide interstate air transportation between the following points: Atlanta, Ga., Brunswick, Ga., St. Simons Island, Ga., Waycross, Ga., Hilton Head Island, S.C., Jacksonville, Fla., Tampa, Fla., Sarasota, Fla., Ft. Myers, Fla., Miami, Fla., and Ft. Lauderdale, Fla. The grant would be contingent upon a finding that the carrier is fit, willing and able to perform properly the proposed transportation and to conform to the provisions of the Act and the Board's applicable rules and regulations, and, for certain markets, contingent on the outcome of the *Elorida Service Case*, Docket 33091. The order accordingly institutes the *Florida Airlines, Inc. Fitness Investigation.* The complete text of the order is available as noted below.

DATES: All interested persons having objections to the Board issuing the proposed authority shall file, and serve upon all persons listed below, a statement of objections, together with a summary of the testimony, statistical data and other material expected to be relied upon to support the stated objections;

(a) Where the objections are on grounds other than fitness, no later than July 9, 1979.

(b) Where the objections are on fitness grounds, by such time as shall be designated by the administrative law judge assigned to the case. Comments on the evidence request for this proceeding shall be filed no later than June 25, 1979. An example of our standard evidence request appears at 44 FR 33135 June 8, 1979.

ADDRESSES: All objections should be filed in Docket 34242, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

FOR FURTHER INFORMATION CONTACT: Ava Scheinman, B-72, Bureau of Domestic Aviation, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428 (202) 673-5842.

SUPPLEMENTARY INFORMATION: Objections should be served upon Florida Airlines, Inc.

The complete text of Order 79-6-19 is available from our Distribution Section, Room 516, 1825 Connecticut Avenue, N.W., Washington, D.C. Persons outside the metropolitan area may send a postcard request for Order 79-6-19 to the Distribution Section, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: June 8, 1979.

Phyllis T. Kaylor,

Secretary.

Wild Card Route Case; Prehearing Conference

Notice is hereby given that a prehearing conference in the above-entitled matter is assigned to be held on June 28, 1979, at 9:30 a.m. (local time) in Room 1003, Hearing Room D, Universal Building North, 1975 Connecticut

Avenue NW., Washington, D.C., before Administrative Law Judge William H. Dapper.

In order to facilitate the conduct of the conference, parties are instructed to submit one copy to each party and three copies to the Judge of (1) proposed statements of issues; (2) proposed stipulations; (3) proposed requests for information and for evidence; (4) statements of positions; and (5) proposed procedural dates. The Bureau of International Aviation will circulate its material on or before June 18, 1979, and the other parties on or before June 22, 1979. The submissions of the other parties shall be limited to points on which they differ with the Bureau of International Aviation, and shall follow the numbering and lettering used by the Bureau to facilitate cross-referencing.

Dated at Washington, D.C., June 8, 1979.

William H. Dapper,
Administrative Law Judge.

COMMISSION ON CIVIL RIGHTS

Connecticut Advisory Committee; Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U. S. Commission on Civil Rights, that a planning meeting of the Connecticut Advisory Committee SAC of the Commission will convene at 7:00 pm and will end at 10:00 pm, on July 26, 1979, at the hotel Sheraton, 315 Trumbull Street, Hartford, Connecticut.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the New England Regional Office of the Commission, 0/0 of 26 Federal Plaza, Room 1639, New York, New York 10007.

The purpose of this meeting is to discuss program planning.

This meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C. June 8, 1979.

John I. Binkley
Advisory Committee Management Officer.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

National Marine Fisheries Service; Modification of Permit

Notice is hereby given that, pursuant to the provisions of § 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), the Scientific Research Permit No. 93 issued to Dr. William W. Dawson and Mr. Nicholas R. Hall, University of Florida, College of Medicine, Gainesville, Florida 32610, on May 8, 1975 (40 FR 21507), as modified February 16, 1978 and June 2, 1978, is further modified as follows:

1. Section B is modified by deleting Section B–3 and substituting therefor the following:

"The animals shall be maintained at the Marine Mammal Foundation, South Pasadena, Florida, or Clearwater Marine Science Center, Clearwater Beach, Florida, for the purpose of conducting the research as described in the application. However, no dolphins shall be maintained at the Clearwater Marine Science Center until the facility has been inspected by a duly authorized representative of the National Marine Fisheries Service and approved in writing by the Assistant Administrator for Fisheries."

This modification is effective June 13, 1979.

The permit, as modified, and documentation pertaining to the modification, is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and Regional Director, National Marine Fisheries Service, Southeast Region, 9450 Koger Boulevard, Duval Building, St. Petersburg, Florida 33702.

Dated: May 23, 1979.

Winfred H. Meibohm,
Associate Director,
National Marine Fisheries Service.

[FR Doc. 79-18283 Filed 6-12-79; 8:45 am]
BILLING CODE 3510-22-M

National Marine Fisheries Service; Issuance of Permit

On April 24, 1979, Notice was published in the Federal Register (44 FR 24120), that an application had been filed with the National Marine Fisheries Service by Zoogesellschaft Osnabruck E.V., Am Waldzoo 2/3, 45 Osnabruck, Federal Republic of Germany, to take four (4) California sealions (*Zalophus californiinus*) for the purpose of public display.

Notice is hereby given that on June 1,1979, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the National Marine Fisheries Service issued a public display permit for the above taking to Zoogesellschaft Osnabruck, subject to certain conditions set forth therein.

The Permit is available for review in the following offices: Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C; and Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: June 1, 1979.

Winfred H. Meibohm,
Executive Director, National Marine Fisheries Service.

[FR Doc. 79-18285 Filed 6-12-79; 8:45 am]
Billing Code 3510-22-M

National Marine Fisheries Service; Modification of Permit No. 42

Notice is hereby given that pursuant to the provisions of Sections 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), Permit No. 42 issued to the Northwest Fisheries Center, National Marine Fisheries Service, Seattle, Washington 98112, on September 5, 1974 (39 FR 33388).

Sections A.1 and A.2 have been changed to read:

A. *Number and kind of marine mammals.*—1. Bowhead whales *(Balaena mysticetus)* may be taken, in that such whales or parts of such whales may be collected for the purposes stated in the application. There is no restriction

on the number of specimens which may be collected.

2. Gray whales *(Eschrichtius robustus)* may be taken in that such whales or parts of such whales may be collected for the purposes stated in the application. There is no restriction on the number of specimens which may be collected.

This modification makes Permit No. 42 consistent with its counterpart which was issued under the Endangered Species Act on May 27, 1975. The Permit as modified and documentation pertaining to the modification are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW, Washington, D.C.; and
Regional Director, National Marine Fisheries Service, Northwest Region, 1700 Westlake Avenue North, Seattle, Washington 98109.

Dated: May 31, 1979.

Winfred H. Meibohm,

Associate Director, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Office of the Secretary

[Dept. Organization Order 20-6]

Office of Investigations and Security; Functions and Organization

EFFECTIVE DATE: May 17, 1979.

This order effective May 17, 1979 supersedes the materials appearing at 38 FR 34134 of December 11, 1973 and 39 FR 43565 of December 16, 1974.

Section 1. Purpose

.01 This Order prescribes the functions and organization of the Office of Investigations and Security.

.02 This revision provides for new responsibilities in connection with security of foreign and domestic intelligence liaison. It reflects the transfer to the Office of the Inspector General the responsibility for the investigation of violations of the United States Code and the performance of contractors or grantees, including alleged violations of law or improprieties by such parties as well as inspections relating to the conduct and performance of Department personnel dealing with such parties. It also authorizes the Office of Investigations and Security to act as the final repository for all investigative files and reports of investigation of Department of Commerce applicants, employees, or former employees.

Section 2. Status and Line of Authority

.01 The Office of Investigations and Security (OIS), a Departmental office, shall be headed by a Director who shall report and be responsible to the Assistant Secretary for Administration (the "Assistant Secretary"). The Director shall be assisted by a Deputy Director who shall perform the functions of the Director during the latter's absence, and exercise day-to-day supervision over the documentary security and physical security functions of OIS, as set forth in section 3. of this Order.

.02 The Director, OIS, may redelegate the authority, as prescribed by this Order, to appropriate personnel of OIS and to operating units of the Department, subject to such conditions as the Director may prescribe.

Section 3. Responsibilities and Functions.

Pursuant to the authority vested in the Assistant Secretary by Department Organization 10-5, and subject to such policies and directives as the Assistant Secretary may prescribe, OIS shall conduct investigations in accordance with paragraph 3.01 of this Order, serve as the focal point for personnel security matters within the Department, establish policies and procedures for documentary security and physical security throughout the Department, advise the Assistant Secretary on all security matters, represent the Department as appropriate on security matters, and carry out physical protection assignments, as prescribed herein. To implement these responsibilities, OIS shall perform the functions enumerated in the following paragraphs.

.01 *Investigations.* OIS shall: a. As requested, conduct investigations of job applicants and employees regarding personnel security (in accordance with E.O. 10450 and Federal Personnel Manual, Chapter 736), and personnel suitability (in accordance with orders and regulations of the Department and of the Office of Personnel Management.

b. As requested by appropriate authority, conduct investigations of complaints of discrimination under, e.g., E.O. 11478, the Equal Employment Opportunity Act of 1972 and implementing regulations, and other administrative and civil matters as permitted by law.

c. As requested, provide investigative services to Departmental programs requiring National Agency Checks, special name checks and inquiries to ascertain the integrity of contractors, grantees and other financial assistance applicants and recipients, as well as advisory committee members.

d. As requested by the Inspector General, conduct investigations of matters under the Inspector General's jurisdiction.

.02 *Personal Security.* OIS shall: a. Develop and recommend policies and procedures for personnel security matters within the Department.

b. Develop and supervise programs for the training and indoctrination of employees in personnel security and the maintenance of security discipline.

c. Receive and review reports of investigation of Department employees and job applicants and, as appropriate, channel the information to the responsible operating unit official for suitability determination.

d. Receive from the Office of the Inspector General notifications of investigations and inspections concerning employee misconduct for appropriate review, evaluation and action under the provisions of E.O. 10450 as amended and E.O. 12065.

e. Receive and process from the various operating units requests for security clearances concerning prospective employees to be assigned to positions that require access to classified information, material, or restricted areas; and review and determine the security status of personnel cases which involve the appraisal of derogatory information in connection with the issuance of certificates of personnel security clearance, the imposition of security restrictions on individual employees, and other decisions affecting personnel security considerations.

f. Take action, as appropriate, on withholding or withdrawing the security clearance of a job applicant, employee, potential contractor, or grantee, and with respect to employees, recommend action under the provisions of 5 U.S.C. §§ 7531-32 and E.O. 10450, as amended.

.03 *Documentary Security.* OIS shall: a. Establish appropriate security policies, procedures, and minimum requirements for the Department's safeguarding of classified documents, information, and materials in accordance with E.O. 12065.

b. Develop and supervise programs for the training and indoctrination of Department personnel in documentary security.

.04 *Physical Security.* OIS shall: a. Develop and prescribe, in accordance with E.O. 12065, necessary measures for the protection of classified and

restricted areas, and for the control of access to such areas.

b. In conjunction with GSA's Federal Protective Service and in accordance with GSA regulations, establish and enforce policies and procedures for controlling access of visitors to unclassified areas, including access by employees during periods of civil disturbance or emergency.

.05 *Intelligence Security.* OIS shall: a. Provide security advice and guidance to the Departmental Office of Intelligence Liaison (OIL) and throughout the Department with full authority to implement and require compliance with security measures established by the Memorandum of Understanding on the Security of Foreign Intelligence between the Department of Commerce and the Member Agencies of the National Foreign Intelligence Board.

b. Provide guidance for the physical security and transmittal of foreign intelligence material, both collateral and compartmented.

c. In cooperation with OIL, concur in the selection of foreign intelligence primary control centers and officers for Department facilities not located in the Main Commerce Building, which are to receive foreign intelligence reports and materials, and provide, as required, guidance and coordination of their activities.

d. In coordination with OIL, concur in the selection of foreign intelligence secondary control centers and officers in the Department, which are to receive foreign intelligence reports and materials through the registry or a primary control center, and provide, as required, guidance and coordination of their activities.

e. OIS and OIL shall coordinate on sensitive compartmented information security clearance matters.

f. In conjunction with the Departmental Office of Procurement and ADP Management and OIL, review and approve all existing uses and proposals for the use of any ADP equipment (including computers, word processing devices, and related equipment) in the processing of classified foreign intelligence.

g. Serve as the focal point for the security of designated intelligence matters, foreign and domestic, between the Department and the intelligence community.

h. Provide the Department's observer to the National Foreign Intelligence Board Security Committee and subcommittees.

.06 *Advice and Representation.* OIS shall: a. Serve as the principal adviser within the Department to the Assistant Secretary and other officials on security matters.

b. Serve as the Department's point of liaison with agencies of Federal, State, and local governments in security matters, including administrative investigations, physical protection, and intelligence security.

c. Represent the Department, as requested, on interagency committees dealing with security.

.07 *Physical Protection Assignments.* OIS shall, at the request of the Assistant Secretary or other appropriate authority, provide physical protection for the Secretary of Commerce, visiting foreign officials and official guests, and Department functions. This may involve assignment of OIS personnel as special Deputy U.S. Marshals and the use of firearms and arrest powers provided in 18 U.S.C. 3053. (See section 4. of this Order.)

.08 *General Security.* OIS shall: a. Serve as the focal point within the Department for the receipt, review, and processing of security matters which require Departmental action.

b. Devise and carry out periodic tests of the adequacy of security within the Department.

Section 4. Specified Authority.

.01 To assist in their carrying out the physical protection functions assigned to OIS, the Director, OIS, and certain members of the OIS staff, under a special deputation from the United States Marshal, have been authorized to carry firearms and make arrests.

.02 Also, the Director, OIS, has been specifically designated by the Secretary of Commerce, under the provisions of Section 5-404, E.O. 12065, "to ensure effective implementation" of E.O. 12065, effective December 1, 1978. Concurrently, the Secretary established the Department of Commerce Information Security Program Committee and appointed the Director, OIS, as its chairperson.

Section 5. Savings Provisions.

Nothing in this Order shall have the effect of or be construed as an exception to the responsibility and authority of the Department General Counsel under DOO 10-6 for policy and operating guidance on legal matters. With respect to such matters the Director, OIS, shall consult the General Counsel, or a designee of the General Counsel.

Guy W. Chamberlin, Jr.,
Acting Assistant Secretary for Administration.

BILLING CODE 3510-17-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Import Restraint Levels for Certain Cotton and Man-Made Fiber Apparel From the People's Republic of China

Corrections

In FR Doc. 79-17774 appearing at page 32433 in the issue for Wednesday, June 6, 1979, on pages 32433 and 32434, the table in the third and first columns respectively should have read as set forth below:

Category	Twelve-month Level of Restraint
331	2,966,986 dozen pairs
339	535,658 dozen
340	256,613 dozen
347/348	1,088,632 dozen
645/646	334,836 dozen

BILLING CODE 3510-01-M

DEPARTMENT OF DEFENSE

Department of the Army

Intent To Prepare a Draft Supplement Environmental Impact Statement for the Proposed Burlington Dam Flood Control Project on the Souris River, N. Dak.

AGENCY: St. Paul District, U.S. Army Corps of Engineers.

ACTION: Notice of Intent to Prepare Draft Supplement I to the Burlington Dam Environmental Impact Statement (EIS).

SUMMARY: The project for flood damage reduction on the Souris River, North Dakota, recommended by the Chief of Engineers in House Document No. 321, 91st Congress, 2nd Session, provides for two major structural measures: channel modification through Minot, North Dakota and upstream reservoir development. The channel modification in Minot was approved by Senate and House Public Works Committees' resolutions adopted 25 June and 14 July 1970, respectively. The reservoir and related works were authorized later in the Flood Control Act approved 31 December 1970, Pub. L. 91-611. Construction of the Minot channel modifications, now completed, was authorized separately to provide limited

flood protection separately for the city at the earliest possible date.

The principal features of the reservoir project include a dam near Burlington on the Souris River; a raise of Lake Darling Dam, a diversion tunnel to carry flood flows on the Des Lacs River to the Souris River above Burlington Dam, levee improvements between Burlington and Minot and at Sawyer and Velva, and modifications to refuge dams in the Upper Souris and J. Clark Salyer National Wildlife Refuges.

In addition to the proposed action, the following reasonable alternatives have been identified:

1. *No Action*—The no action alternative is a viable alternative which represents no additional action on the part of the Corps of Engineers. Certain conditions are expected to occur in the future if none of the flood control measures that are discussed in this section are implemented. The no action alternative could include floodplain regulations, flood insurance, the existing channel modifications at Minot, flood warning and emergency protection, floodproofing, and rehabilitation of the Lake Darling Dam to meet current engineering standards for such a structure.

2. *Floodplain Evacuation*—This alternative involves the removal of all development in the 100-year Souris River floodplain between Burlington and the J. Clark Salyer Refuge.

3. *Boundary Diversion*—This alternative involves the diversion of the Souris River floodwaters immediately upon their entering the United States. The channel would parallel the Canadian border for a distance of about 45 miles.

4. *Flood Barriers*—This alternative would include upgrading existing emergency levees to current engineering standards for permanent levees in urban flood areas along the Souris River. These include nine subdivision areas between Burlington and Minot, and the cities of Minot, Logan, Sawyer and Velva.

5. *Minot Tunnel Diversion*—This alternative consists of:

a. Upgrading emergency levees at several residential areas between Minot and Burlington so that Souris River flows of 14,000 cfs could be passed with no flood damage.

b. A 2.2-mile diversion tunnel beneath Minot with a capacity of 9,000 cfs and 27 miles of channel modifications downstream of the tunnel.

c. Levees and channel modifications at Sawyer and Velva to provide a 100-year level of protection.

6. *Burlington Dam*—This alternative is identical to the recommended plan except that the Des Lacs diversion tunnel is not included.

7. *Lake Darling Dam*—This alternative is essentially a modification of the above alternative (i.e., the recommended plan without the Des Lacs diversion tunnel) in that the large reservoir storage structure would simply be located upstream at the site of the existing Lake Darling Dam.

8. *Confluence Dam*—This alternative has a dam located near Burlington below the confluence of the Souris and Des Lacs Rivers.

9. *Burlington Dam and Des Lacs Tributary Dams*—This alternative includes Burlington Dam as discussed in alternative no. 6, in combination with dams on 19 of the coulees tributary to the Des Lacs River.

10. *Recommended Plan*—See discussion under project summary.

11. *Lake Darling Dam and Des Lacs Diversion*—This alternative is similar to alternative no. 7 (i.e., Lake Darling Dam) with the addition of a diversion tunnel from the Des Lacs River to the Souris River dam site.

12. *Burlington Dam, Des Lacs Diversion, Gassman Coulee Dam*—This alternative is the same as the recommended plan with the addition of a dry dam at the mouth of Gassman Coulee.

13. *Lake Darling Dam and Minot Tunnel Diversion*—This plan is a combination of alternatives 5 and 7, with the exception that the size of the tunnel beneath Minot would be reduced to a 5,000 cfs capacity.

14. *Lake Darling Dam and Flood Barriers*—The features of this alternative are the same as alternative No. 13 except that the tunnel under Minot would be replaced by levees.

15. *Environmental Quality Plan (EQ Plan)*—The EQ alternative consists of the following items:

a. 14,000 cfs diversion tunnel under the city of Minot.

b. A low-head dam upstream of Minot to divert all flows above channel capacity into the diversion tunnel.

c. A low-head dam downstream of Minot to prevent backup of tunnel discharges.

d. Evacuation of the 100-year floodplain or floodproofing below Minot where flood stages are increased due to tunnel discharges, and evacuation of a mobile home park above Minot.

e. Local protection measures at Velva and at urbanized areas from Burlington to Minot.

f. Continuation of floodplain regulations downstream from Velva, and enactment of floodplain regulations at Sawyer.

g. Improvements to marsh impoundments on the Upper Souris National Wildlife Refuge (NWR) to permit more efficient refuge operations.

h. Operation of the rehabilitated (to current engineering standards) Lake Darling Dam for flood control.

16. *National Economic Development Plan (NED Plan)*—This alternative would include a dam at the Lake Darling site (alternative No. 7) providing 383,000 acre-feet of flood control storage to elevation 1,620, and levees in three of seven subdivision areas between Burlington and Minot and at Velva.

Copies of the Draft Environmental Impact Statement, which has been filed with the Environmental Protection Agency and noted in the Federal Register on November 4, 1977, were provided for coordination to all concerned Federal, State, and local agencies; affected Indian tribes; and private organizations and individuals. Copies of the Draft Supplement EIS will be provided to all those identified above. Anyone else who is interested in reviewing this supplement is invited to do so and should contact the St. Paul District, Corps of Engineers to assure that they are included on the mailing list. The Final EIS has been prepared and is currently undergoing a preliminary review at the Washington level. When the Final EIS is ready for public distribution, we will append the Draft Supplement to it. After comments on the Draft Supplement and the Final EIS have been received, we will prepare and distribute a Final Supplement.

Significant issues to be analyzed in the Draft Supplement EIS include:

1. A Section 404(b) Evaluation of the discharge into U.S. waters of dredged or fill material.

2. An assessment of the impacts on threatened or endangered species. This portion of the EIS supplement has been included to comply with Section 7 of the Endangered Species Act (Amendment 7C).

Our review of the project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, Council on Environmental Quality Regulations (40 CFR Parts 1500-1508), and applicable Corps of Engineers regulations and guidance.

A scoping meeting will not be held for the preparation of this supplement. Significant issues to be discussed in this supplement were identified through coordination with Federal, State, and local government agencies; interested citizens' groups; and individual citizens.

We estimate that the Draft Supplement EIS will be available to the public by July 1979.

Questions concerning the proposed action and the Draft Supplement EIS can be directed to:

Colonel William W. Badger,

District Engineer, St. Paul District, Corps of Engineers, 1135 U.S. Post Office and Custom House, St. Paul, Minnesota 55101.

Dated: June 1, 1979.

Walter L. Heme,

Lieutenant Colonel, CE, Acting District Engineer.

BILLING CODE 3710-CY-M

DEPARTMENT OF ENERGY

Clark Oil and Refining Corp.; Proposed Remedial Order

AGENCY: Department of Energy.

ACTION: Notice of Proposed Remedial Order to Clark Oil and Refining Corporation and Opportunity for Objection

Pursuant to 10 CFR 205.192(c), the Office of Special Counsel for Compliance of the Economic Regulatory Administration (ERA), Department of Energy, hereby gives notice that a Proposed Remedial Order was issued to Clark Oil and Refining Corporation (Clark), 8530 West National Avenue, Milwaukee, Wisconsin 53201, on April 30, 1979. The Proposed Remedial Order sets forth findings of fact and conclusions of law concerning Clark's overstatement of crude oil costs in violation of the Phase IV Petroleum Price Regulations formerly at 6 CFR Part 150, subsequently recodified at 10 CFR Part 212. The violation, in the amount of $82,500, resulted from Clark's failure to reduce its costs of crude oil purchased in the United States to reflect income received in connection with certain reciprocal crude oil purchase and exchange transactions, entered into by Clark to realize the value of its fee-free oil imports licenses. The subject transactions occurred between October 23, 1973 and December 31, 1973.

In accordance with 10 CFR 205.192(c), any person may obtain a copy of the Proposed Remedial Order, with confidential information, if any, deleted, from the ERA.

On or before June 28, 1979, any aggrieved person may file a Notice of Objection in accordance with 10 CFR 205.193. Such Notice should be filed with:

Office of Hearings and Appeals, Department of Energy, Room 8014, 2000 M Street, NW., Washington, D.C. 20461.

Copies of the Proposed Remedial Order may be obtained by written request addressed to:

Milton Jordan, Director, Division of Freedom of Information and Privacy Act Activities, Forrestal Building, Room GB-145, 1000 Independence Avenue, SW., Washington, D.C. 20585; Attention: George W. Young, Jr.

Copies of the Proposed Remedial Order may be obtained in person from:

Office of Freedom of Information, Reading Room, Forrestal Building, Room GA-152, 1000 Independence Avenue, SW., Washington, D.C. 20585.

Issued in Washington, D.C., June 7, 1979.

Paul L. Bloom,

Special Counsel for Compliance.

BILLING CODE 6450-01-M

Bonneville Power Administration

[DOE/EIS-0048-DS-1]

Availability of Draft Facility Location Supplement

Notice is hereby given that the Bonneville Power Administration (BPA), Department of Energy (DOE) has issued a draft facility location supplement to BPA's Final Fiscal Year 1976 Proposed Program Environmental Statement. This Draft Facility Location Supplement is issued pursuant to DOE's implementation of the National Environmental Policy Act of 1969. Entitled "Okanogan Area Service" this supplement assesses the environmental impacts of proposed transmission facility additions to serve the Okanogan Valley in Washington State. This EIS is a reissue of a previous location supplement filed as a draft with CEQ on April 15, 1975, and as a final on September 16, 1975.

Copies of the Okanogan Area Service Draft Facility Location Supplement are available for public inspection at designated Federal depositories (for locations, contact the Environmental Manager, BPA, P.O. Box 3621, Portland, OR 97208) and at DOE public document rooms located at:

Library, FOI—Public Reading Room GA-152, Forrestal Building, 1000 Independence Ave. SW., Washington, D.C.

BPA, Washington, D.C., Office, Federal Building, 12th & Pennsylvania Avenue NW., Room 3352, Washington, D.C.

Library, BPA Headquarters, 1002 NE., Holladay Street, Portland, OR.

And the following BPA Area and District Offices:

Spokane Area Office, U.S. Court House, Room 561, W. 920 Riverside Avenue, Spokane, WA.

Wenatchee District Office, U.S. Federal Building, Room 314, 301 Yakima Street, Wenatchee, WA.

This document is being furnished to various Federal, State, and local agencies with environmental expertise, or which are otherwise likely to be interested in, or affected by, the proposal. Copies of the document are also being furnished to State and local clearinghouses and to other interested groups and individuals.

A limited number of single copies are available for distribution by contacting the Environmental Manager, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon 97208 or the BPA Area and District Offices mentioned above.

Dated at Washington, D.C. this 5th day of June, 1979.

George E. Bell,

Assistant Administrator.

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Docket No. 79-CERT-001]

E. I. Du Pont de Nemours & Co.; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

Take notice that on May 1, 1979, E. I. du Pont de Nemours and Company (Du Pont), Wilmington, Delaware 18898, on behalf of its Chambers Works, Deepwater, New Jersey 08023; Newport Plant, James & Water Streets, Newport, Delaware 19804; and Old Hickory Plant, Old Hickory, Tennessee 37138, filed three separate applications with the Economic Regulatory Administration (ERA) pursuant to 10 CFR Part 595 (44 FR 20398, April 15, 1979) for certification of an eligible use of natural gas to displace fuel oil for each of the three facilities, all as more fully set forth in the applications, since all three applications pertain to the use of natural gas at Du Pont facilities, ERA, in the interest of administrative efficiency, will combine the applications into one proceeding under ERA Docket 79-CERT-001. Du Pont's three applications for certification are on file with the ERA and open to public inspection at the ERA, Docket Room 6317-B, 2000 M Street, N.W., Washington, D.C. 20461, from 8:00 a.m.-4:30 p.m., Monday through Friday, except Federal holidays.

In support of its applications, Du Pont presented the following data for the three plants:

Plant and location	Quantity of natural gas to be used (Mcf/day)	Quantity of fuel oil to be displaced (bbls/yr)	Sulfur content (percent)	Eligible seller	Interstate pipeline
Chambers Works, Deepwater, N.J.	Maximum 6,000	Maximum 347,000 of No. 6	1.5	Cabot Corp., Charleston, W. Va.	Tennessee Gas Pipeline Co., Houston, Tex. and Columbia Gas Transmission Co., Charleston, W. Va.
Newport Plant, Newport, Del.	Maximum 2,500	154,000 of No. 6	0.3	do	Same as above, plus Transcontinental Gas Pipe Line Co., Houston, Tex.
Old Hickory Plant, Old Hickory, Tenn.	Maximum 4,000	259,000 of No. 2	low	do	Tennessee Gas Pipeline Co., Houston, Tex. and Tennessee Natural Gas Lines, Inc., Nashville.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Room 6318, 2000 M Street NW., Washington, D.C. 20461, Attention: Mr. Finn K. Neilsen, on or before June 23, 1979.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest, and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines an oral presentation is required, further notice will be given to Du Pont and any persons filing comments, and filed in the Federal Register.

Issued in Washington, D.C., on June 8, 1979.

Doris J. Dewton,

Acting Assistant Administrator, Fuels Regulation, Economic Regulatory Administration.

Hughes & Hughes Oil and Gas; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives Notice of a Proposed Remedial Order which was issued to Hughes and Hughes Oil and Gas, 208 East Houston Street, Beeville, Texas 78102. This Proposed Remedial Order charges that Hughes and Hughes violated the Mandatory Petroleum Allocation Regulations connected with the termination of a crude oil supplier/purchaser relationship.

A copy of the Proposed Remedial Order, with confidential information deleted, may be obtained from Mr. William Miller, Program Manager, Department of Energy, Economic Regulatory Administration, Room 5002G, Washington, D.C. 20461, phone 202-632-8761. On or before June 28, 1979, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, 2000 M Street, N.W., Washington, D.C. 20461, in accordance with 10 CFR § 205.193.

Issued in Washington, D.C. on the 5th day of June 1979.

Barton Isenberg,

Assistant Administrator for Enforcement, Economic Regulatory Administration.

Concurrence: L. Feldman, Office of General Counsel.

June 7, 1979.

BILLING CODE 6450-01-M

R. W. Anderson; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Action taken and opportunity for comment on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces action taken to execute a Consent Order and provides an opportunity for public comment on the Consent Order and on potential claims against the refunds deposited in an escrow account established pursuant to the Consent Order.

DATES: Effective date: May 31, 1979. Comments by: July 13, 1979.

ADDRESS: Send comments to: Wayne I. Tucker, District Manager of Enforcement, Southwest District Office, Department of Energy, P.O. Box 35228, Dallas, TX 75235.

FOR FURTHER INFORMATION CONTACT: Wayne I. Tucker, District Manager of Enforcement, Southwest District Office, Department of Energy, P.O. Box 35228, Dallas, TX 75235 [phone] 214-749-7628.

SUPPLEMENTARY INFORMATION: On May 31, 1979, the Office of Enforcement of the ERA executed a Consent Order with R. W. Anderson of Delhi, Louisiana. Under 10 CFR 205.199J(b), a Consent Order which involves a sum of less than $500,000 in the aggregate, excluding penalties and interest, becomes effective upon its execution.

Because the DOE and R. W. Anderson wish to expeditiously resolve this matter as agreed and to avoid delay in the payment of refunds, the DOE has determined that it is in the public interest to make the Consent Order with R. W. Anderson effective as of the date of its execution by the DOE and R. W. Anderson.

I. The Consent Order

Hercules Petroleum Company, Inc., Choudrant, Louisiana, and Anderson Butane Service, Inc., Delhi, Louisiana, are entities engaged in the resale of petroleum products. Pursuant to 10 CFR 212.31 (6 CFR 150.31 prior to January 15, 1974), the DOE concluded these entities are a firm based on the fact that R. W. Anderson, President and a member of the Board of Directors of both entities, owns 75 percent of the outstanding stock of Hercules Petroleum Company, Inc., and 100 percent of the outstanding stock of Anderson Butane Service, Inc. As a firm engaged in the resale of petroleum products, the entities are subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR, Parts 210, 211, 212. To resolve certain civil actions which could be brought by the Office of Enforcement of the Economic

Regulatory Administration as a result of its audit of R. W. Anderson as a reseller-retailer of petroleum products, the Office of Enforcement, ERA, and R. W. Anderson entered into a Consent Order, the significant terms of which are as follows:

1. The period covered by the audit was August 17, 1973, through November 30, 1974, and it included sales of propane to five classes of purchaser and butane to one class of purchaser.

2. R. W. Anderson improperly applied the provisions of 10 CFR 212.93 (6 CFR 150.359 prior to January 15, 1974) when determining the prices to be charged for its petroleum products, and as a consequence certain of its customers were overcharged on some of their purchases.

3. R. W. Anderson agrees to refund to the DOE $160,000, including interest and penalties, on May 31, 1979, the date of execution of the Consent Order. An additional $90,235 was previously refunded on a voluntary basis resulting in a total refund of $250,235.

4. The provisions of 10 CFR 205.199J, including the publication of this Notice, are applicable to the Consent Order.

II. Disposition of Refunded Overcharges

In this Consent Order, R. W. Anderson agrees to refund, in full settlement of any civil liability with respect to actions which might be brought by the Office of Enforcement, ERA, arising out of the transactions specified in I. 1. above, the sum of $160,000 on the effective date of the Consent Order. Refunded overcharges will be in the form of a certified check made payable to the United States Department of Energy and will be delivered to the Assistant Administrator for Enforcement, ERA. These funds will remain in a suitable account pending the determination of their proper disposition.

The DOE intends to distribute the refund amounts in a just and equitable manner in accordance with applicable laws and regulations. Accordingly, distribution of such refunded overcharges requires that only those "persons" (as defined at 10 CFR 205.2) who actually suffered a loss as a result of the transactions described in the Consent Order receive appropriate refunds. Because of the Petroleum industry's complex marketing system, it is likely that overcharges have either been passed through as higher prices to subsequent purchasers or offset through devices such as the Old Oil Allocation (Entitlements) Program, 10 CFR 211.67. In fact, the adverse effects of the overcharges may have become so diffused that it is a practical impossibility to identify specific, adversely affected persons, in which case disposition of the refunds will be made in the general public interest by an appropriate means such as payment to the Treasury of the United States pursuant to 10 CFR 205.199I(a).

III. Submission of Written Comments

A. *Potential Claimants:* Interested persons who believe that they have a claim to all or a portion of the refund amount should provide written notification of the claim to the ERA at this time. Proof of claims is not now being required. Written notification to the ERA at this time is requested primarily for the purpose of identifying valid potential claims to the refund amount. After potential claims are identified, procedures for the making of proof of claims may be established. Failure by a person to provide written notification of a potential claim within the comment period for this Notice may result in the DOE irrevocably disbursing the funds to other claimants or to the general public interest.

b. *Other Comments:* The ERA invites interested persons to comment on the terms, conditions, or procedural aspects of this Consent Order.

You should send your comments or written notification of a claim to Wayne I. Tucker, District Manager of Enforcement, Southwest District Office, Department of Energy, P.O. Box 35228, Dallas, TX. You may obtain a free copy of this Consent Order by writing to the same address or by calling 214/749-7628.

You should identify your comments or written notification of a claim on the outside of your envelope and on the documents you submit with the designation, "Comments on R. W. Anderson Consent Order." We will consider all comments we receive by 4:30 p.m. local time, on July 13, 1979. You should identify any information or data which, in your opinion, is confidential and submit it in accordance with the procedures in 10 CFR 205.9(f).

Issued in Dallas, TX on the 4th day of June, 1979.

Wayne I. Tucker,

District Manager of Enforcement, Southwest District Office, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

Amerada Hess Corp.; Determination by a Jurisdictional Agency Under the Natural Gas Policy Act of 1978

June 1, 1979.

On May 2, 1979, the Federal Energy Regulatory Commission received notice of a determination pursuant to 18 CFR 274.104 of the Natural Gas Policy Act of 1978 applicable to:

Railroad Commission of Texas

FERC Control Number: JD79-6569
API Well Number: 42-165-31347
Section: 103
Operator: Amerada Hess Corporation
Well Name: Northrup & Carr B #2
Field: Hanford
County: Gaines
Purchaser: Phillips Petroleum Co.
Volume: 1 MMcf

The application for determination in this matter together with a copy or description of other materials in the record on which such determination was made is available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E. Washington, D.C. 20426.

Persons objecting to this final determination may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before June 28, 1979. Please reference the FERC Control Number in any correspondence concerning a determination.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

ARCO Oil and Gas Co.; Determination by a Jurisdictional Agency Under the Natural Gas Policy Act of 1978.

June 5, 1979.

On May 21, 1979, the Federal Energy Regulatory Commission received notice of a determination purusant to 18 CFR 274.104 of the Natural Gas Policy Act of 1978 applicable to:

United States Department of the Interior, Geological Survey, Louisiana

FERC Control Number: JD79-4971
API Well Number: 17721401330S1
Section: 102
Operator: ARCO Oil and Gas Company
Well Name: OCS-G-2938 Well No. D-10
Field: South Pass Block 61 17
County: Offshore, Louisiana
Purchaser: Southern Natural Gas Company
Volume: 400 MMcf.

The application for determination in this matter together with a copy or description of other materials in the record on which such determination was made is available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E. Washington D.C. 20426.

Persons objecting to this final determination may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before June 28, 1979. Please reference the FERC Control Number in any correspondence concerning a determination.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket Nos. ER78-516, E-8187, E-8700, ER76-203 and ER76-238]

Boston Edison Co.; Certification

June 6, 1979.

Take notice that the Honorable Jon G. Lotis, on May 18, 1979, certified to the Commission a proposed settlement agreement submitted by Boston Edison Company and New England Power Company covering proceedings in Docket Nos. ER78-516, E-8187, E-8700, ER76-203 and ER76-238.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before June 25, 1979. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

BILLING CODE 6450-01-M

[Docket No. CP79-321]

Colorado Interstate Gas Co.; Application

June 5, 1979.

Take notice that on May 21, 1979, Colorado Interstate Gas Company (CIG), P.O. Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP79-321 an application pursuant to Section 311(a)(1) of the Natural Gas Policy Act of 1978 for approval of a transportation service, on a best efforts basis, by CIG for Cheyenne Light, Fuel and Power Company (Cheyenne Light), all as more fully set forth in the application which is on file with the Commission and open for public inspection.

CIG states that it has entered into a gas transportation and exchange agreement dated November 21, 1978 with Montana-Dakota Utilities Company (MDU), Cheyenne Light, Fuel Resources Development Company (Fuelco) and Energetics, Inc. (Energetics). CIG further states that it is involved to the extent of providing a transportation service by receiving for and delivering gas to Cheyenne Light.

The term of the transportation service is effective on the date of the said agreement through April 1, 1983, and thereafter until terminated by any party upon one year's prior written notice and CIG anticipates the initial service under the said agreement would commence on December 1, 1979, the application indicates.

CIG contends that certain gas is to be produced by Energetics from acreage in Williams and McKenzie Counties, North Dakota and Fuelco has purchase rights to this gas which is to be processed through the Tioga Plant, operated by Aminoil USA, Inc., located in Williams County, North Dakota. CIG further asserts that Fuelco has assigned to Cheyenne Light, a local distribution company which is one of CIG's customers and an affiliate of Fuelco, its purchase rights to the residue gas on an annual basis during the months of December through March. MDU would purchase the residue gas during the months of April through November of each year.

CIG asserts that the volume of residue gas, expected to average up to 1,500 Mcf per day, (approximately 177,000 Mcf per year), is to be delivered to MDU at the tailgate of the Tioga Plant for the account of Cheyenne Light. MDU, in turn, would transport and deliver thermally equivalent volumes to CIG at existing interconnections between CIG and MDU. The subject gas, less fuel usage and lost or unaccounted-for volumes, CIG states, would be delivered to Cheyenne Light by CIG at an existing delivery point in Weld County, Colorado.

CIG states in the application that Cheyenne Light would reimburse it for redelivery volumes delivered at a rate to reflect CIG's transmission system cost of service, including a reasonable return on investment, but exclusive of the cost of service attributable to its gathering and storage system and exclusive of the cost of gas attributable to gas used in the operation and maintenance of CIG's transmission system. The current transportation rate is 24.91 cents per Mcf at a pressure base of 14.73 psia as filed in Docket No. RP79-59.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 28, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket Nos. RP75-86, et al., RP76-76, and RP77-105]

Colorado Interstate Gas Co.; Proposed Changes in FERC Gas Tariff

June 6, 1979.

Take notice that Colorado Interstate Gas Company (CIG) on May 30, 1979, tendered for filing certain changes to its FPC Gas Tariff, Second Revised Volume No. 1, FPC Gas Tariff, Third Revised Volume No. 2, and FERC Gas Tariff, Original Volume No. 1. These changes, which result from the Commission's Order issued March 16, 1979, approving the rate settlement in Docket Nos. RP75-86, et al., RP76-76, and RP77-105, adjust the base tariff rates on FPC Gas Tariff, Second Revised Volume No. 1, Sheet Nos. 5 and 6; adjust certain purchased gas stipulations on FPC Gas Tariff, Second Revised Volume No. 1, Sheet Nos. 64, 66, and 67 and FERC Gas Tariff, Original Volume No. 1, Sheet Nos. 58 and 59; adjust certain transportation charges on FPC Gas Tariff, Third Revised Volume No. 2, Sheet Nos. 198 and 282.

Revised Tariff Sheet Nos. 5 and 6 cover the period from October 1, 1975 to September 30, 1978, inclusive. Revised Tariff Sheet Nos. 198 and 282 cover the period from January 1, 1978 to September 30, 1978. Revised Sheet Nos. 66 and 67 are to be effective October 1, 1977; Revised Sheet Nos. 58 and 59 are to be effective January 1, 1979; and

Revised Sheet No. 64 is to be effective April 16, 1979.

Copies of the filing were served upon CIG's jurisdictional customers and certain other parties.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 21, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 79-18308 Filed 6-12-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. CI79-415]

Continental Oil Co.; Granting Intervention

June 5, 1979.

On May 21, 1979, Mobil Oil Corporation (Mobil), Nine Greenway Plaza, Suite 2700, Houston, Texas 77046, filed an untimely petition to intervene in Docket No. CI79-415.

Continental Oil Company has requested, in Docket No. CI79-415, that the Commission declare that certificates of public convenience and necessity are not required for sales from old offshore federal leases where such sales were not commenced and no certificate was issued prior to December 1, 1978, the effective date of the Natural Gas Policy Act of 1978. Mobil states that it is a substantial gas producer and seller from the Outer Continental Shelf and it has, therefore, substantial interests that will be affected by the determinations made in this proceeding which cannot be represented by any other party. Mobil, therefore, alleges that it has a direct and substantial interest in this proceeding which may be adversely affected by the Commission's findings and conclusions in this matter. Mobil further avers that it has a right to intervene herein and that its intervention is in the public interest, is not intended to and will not delay this proceeding and is necessary and appropriate to the administration of the Natural Gas Act and the Natural Gas Policy Act of 1978.

Pursuant to Section 3.5 (a)(5) of the Commissioner's Rules of Practice and Procedure (18 CFR § 3.5 (a)(5)) as promulgated in Docket No. RM 78-19 (issued August 4, 1978), Mobil Oil Corporation is permitted to intervene in Docket No. CI79-415 subject to the Commission's regulations. Participation shall be limited to matters affecting asserted rights and interests specifically set forth in Mobil's petition to intervene. The admission of the intervenor shall not be construed as recognition by the Commission that it may be aggrieved by any order entered in this proceeding.

Kenneth F. Plumb,

Secretary.

[FR Doc. 79-18303 Filed 6-12-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket Nos. RP71-15 and RP75-28]

East Tennessee Natural Gas Co.; Rate Filing Pursuant to Tariff Rate Adjustment Provisions

June 6, 1979.

Take notice that on May 31, 1979, East Tennessee Natural Gas Company (East Tennessee) tendered for filing Twenty-Ninth Revised Sheet No. 4 of Sixth Revised Volume No. 1 of its FERC Gas Tariff to be effective July 1, 1979.

East Tennessee states that the sole purpose of this tariff sheet is to reflect various rate adjustments as follows:

(1) A Current Purchased Gas Cost Rate Adjustment of positive 57.55 cents per Mcf determined in accord with Section 22.2.

(2) A negative Demand Surcharge for Amortizing the Unrecovered Purchased Gas Cost Account of 4.0 cents per Mcf determined in accord with Section 22.3.

(3) A negative Current Rate Adjustment of 1.16 cents per Mcf determined pursuant to Section 24.8 reflecting the recoupment of curtailment credits given its customers and the flow-through of the curtailment credits received by East Tennessee.

East Tennessee also states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure 918 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 22, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further petition. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 79-18307 Filed 6-12-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. CP79-224]

El Paso Natural Gas Co.; Amendment

June 5, 1979.

Take notice that on May 29, 1979, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP79-224 an amendment to its application filed in the instant docket pursuant to Section 7 of the Natural Gas Act so as to delete Applicant's request for authorization to sell in interstate commerce natural gas withdrawn from the Washington Ranch Field to Applicant's east-of-California (EOC) customers for use in protecting such EOC customers' Priority 1 and 2 requirements, all as more fully set forth in the amendment on file with the Commission and open to public inspection.

In its application filed in the instant docket, Applicant requests permission and approval to abandon certain existing pipeline facilities, with associated appurtenances, and a certificate authorizing the operation of certain existing facilities; the construction and operation of certain new facilities in Culberson County, Texas, and Eddy County, New Mexico, necessary to implement the Washington Ranch Storage Project; and the transportation and sale in interstate commerce of natural gas withdrawn from the Washington Ranch Field to Applicant's EOC customers for use in protecting such customers' Priority 1 and 2 requirements commencing with the 1981-82 winter heating season and during subsequent winter heating seasons.[1]

Applicant states that at various times it has filed for and received authorizations to sell various quantities of natural gas to its EOC customers, for resale, pursuant to certain service

[1] The instant application has been consolidated with the proceedings in Docket Nos. CP78-238, *et al.*

agreements between Applicants and such customers, in order that such customers may serve the needs of natural gas consumers in their respective service areas. Inasmuch as such service agreements have previously been approved by the Commission and their related sales authorization have previously been granted to Applicant, Applicant presently believes that additional authorization for the sale of natural gas withdrawn from the Washington Ranch Field to its existing EOC customers is not required in order to effectuate the proposed Washington Ranch Storage Project. Consequently, Applicant proposes to delete from its application its request to sell natural gas withdrawn from the Washington Ranch Field.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 28, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[Docket Nos. RP71-16 and RP74-29]

Midwestern Gas Transmission Co.; Filing Pursuant to Tariff Rate Adjustment Provisions

June 6, 1979.

Take notice that on May 31, 1979, Midwestern Gas Transmission Company (Midwestern) tendered for filing Twenty-Fifth Revised Sheet No. 5 and Eighth Revised Sheet No. 5A to its FERC Gas Tariff, Third Revised Volume No. 1, to be effective July 1, 1979. Midwestern states that the sole purpose of the revised tariff sheets is to reflect adjustments to its rates pursuant to rate adjustment provisions in Articles XVII, XVIII and XIX of the General Terms and Conditions of its tariff.

Midwestern states that as to the Southern System, Twenty-Fifth Revised Sheet No. 5 reflects (1) a Current Purchased Gas Cost Rate Adjustment pursuant to Section 2 of Article XVII which is based on rate changes reflected in the filing made by Tennessee Gas Pipeline Company, a Division of Tenneco Inc. on May 31, 1979 in Docket Nos. RP73-114, RP74-34 and RP74-73 and (2) a revised Surcharge for Amortizing the Unrecovered Purchased Gas Cost Account for the Southern System, consisting of a negative $0.05 per Mcf for Midwestern's demand rates and a negative 0.97 cents per Mcf for the commodity rates, pursuant to Section 3 of Article XVII. According to Midwestern, the revised tariff sheet also reflects a Rate Adjustment of a negative 3.81 cents per Mcf to reflect curtailment credits applicable to the Southern System pursuant to Section 9 of Article XIX.

Midwestern states that as to the Northern System, Eighth Revised Sheet No. 5A reflects (1) a Current Purchased Gas Cost Rate Adjustment pursuant to Section 2 of Article XVIII which is based on an increase, effective May 1, 1979, to $2.30 (U.S.) per MMBTU in the price which Midwestern is required by action of the Canadian Government to pay for gas to its Northern System supplier, TransCanada Pipelines, Limited and (2) a revised Surcharge for Amortizing the Unrecovered Purchased Gas Cost Account for the Northern System of a positive 0.50 cents per Mcf as specified in Section 3 of Article XVIII.

Midwestern states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 22, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further petition. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[Docket No. CP79-532]

Ozark Gas Transmission System; Request for Environmental Comments About a Proposed Natural Gas Transmission System

June 6, 1979.

This notice requests that environmental agencies and the public comment on anticipated environmental problems associated with the proposed project. These comments will be used by the staff of the Federal Energy Regulatory Commission (FERC) to prepare an environmental assessment and will aid in making the final determination of the project's environmental status.

The environmental assessment will address the application by Ozark Gas Transmission System (Ozark) in Docket No. CP79-532 for a certificate of public convenience and necessity. This certificate is requested pursuant to Section 7(c) of the Natural Gas Act and would authorize the construction and operation of pipeline facilities to be known as the "Ozark System." Natural gas would be obtained from natural gas reserves in the Arkoma Basin in Oklahoma and Arkansas which are presently developed, as well as reserves which will be developed in the immediate future, transported, or exchanged through the Ozark's System to an existing pipeline system and sold to the applicant's customers or their affiliates.

The Ozark System would consist of 285 miles of 20-inch diameter pipeline extending in a generally easterly direction from Pittsburg County, Oklahoma, to the proposed point of interconnection with an existing transmission system in White County, Arkansas. In addition to the main pipeline system, there would be approximately 170 miles of 4- to 10-inch diameter laterals, gas measuring stations, skid-mounted dehydration units, and compressor stations located as required along the pipeline system. The proposal would traverse Pittsburg, Latimer, Haskell, Sequoyah and Leflore Counties in Oklahoma and Crawford, Sebastian, Franklin, Logan, Johnson, Pope, Conway, Faulkner and White Counties in Arkansas.

To allow sufficient space for construction of the 20-inch diameter pipeline, a right-of-way width of 65 feet would be required. After construction, a 30-foot wide right-of-way would be maintained. A 50-foot wide right-of-way

for construction and a 25-foot wide permanent right-of-way would be required for the laterals. Approximately 225 miles of the total 455 miles of proposed pipeline would parallel existing righs-of-way.

Typical natural gas pipeline construction procedures would be followed. Construction is proposed to begin September 1, 1979, and be completed by the end of November 1979.

Alternatives which have been considered include utilizing existing pipelines and realigning the porposed Ozark System along existing rights-of-way.

Federal, state, and local agencies, private interest groups, and the public are encouraged to contribute comments within 30 days of the date of this notice by contacting Mr. Alan L. Barnett, Federal Energy Regulatory Commission, Office of Pipeline and Producer Regulation, Room 3309A, 825 North Capitol Street, Washington, D.C. 20426; telephone (202) 275–3963. Additional information about the proposal is available from Mr. Barnett.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Docket No. GP79-20]

South Texas Natural Gas Gathering Co.; Gas Tariff Filing

June 5, 1979.

Take notice that on May 11, 1979, South Texas Natural Gas Gathering Company (South Texas), Five Greenway Plaza East, Houston, Texas 77046, filed in Docket No. GP79-20 pursuant to Section 154.26 of the Commission Regulations under the Natural Gas Act (18 CFR 154.26) proposed Rate Schedule T-1 to its FERC Gas Tariff, original Volume No. 1, providing for the transportation of gas purchased by others pursuant to Section 311(b) of the Natural Gas Policy Act of 1978 (NGPA), all as more fully set forth in the gas tariff which is on file with the Commission and open for public inspection.

South Texas states that its tariff is proposed to be effective on June 15, 1979, and that the rate charged under Rate Schedule T-1 is the same as the settlement rate proposed for transportation service in Docket No. RP78-58.[1]

South Texas states that it has no customers for service under Rate Schedule T-1 and so includes no estimate of revenues required by Section 154.62(b)(2) of the regulations.

South Texas explains that because of its proximity to certain intrastate pipelines, it has been approached with inquiries concerning the transportation of gas purchased from intrastate pipelines by interstate pipelines and local distribution companies. South Texas goes on to say that it is presently providing transportation services for one intrastate pipeline pursuant to Sections 157.45, *et seq.*, of the Regulations (18 CFR 157.45) which explicitly permit an intrastate pipeline to transport emergency gas on behalf of another interstate pipeline without prior approval. South Texas states that it is its position that the NGPA authorizes transportation rendered pursuant to Rate Schedule T-1, without requiring a certificate of public convenience and necessity.

South Texas asserts that Section 311(b) of the NGPA provides for the sales by intrastate pipelines to interstate pipelines and local distribution companies. However, South Texas maintains that Section 311(a) of the NGPA authorizes transportation by interstate pipelines "on behalf of" intrastate pipelines and local distribution companies and that the Regulations promulgated in Part 284 track the NGPA language without clarifying whether interstate pipelines can contract with other interstate pipelines for transportation of Section 311(b) gas.

South Texas contends that it has specific authority to transport gas purchased by local distribution companies pursuant to Section 311, yet no explicit authorization to move gas for an interstate pipeline making a similar purchase.

South Texas asserts that the Commission's policy favoring self-executing regulations governing Section 311 transactions would be frustrated unless the Commission affirms the right of interstate pipelines to transport all Section 311 gas without a certificate.

A more restrictive reading of Section 311(a) would mean that the only interstate pipelines that can arrange expeditious delivery of gas purchased from the intrastate market are those directly connected to the selling intrastate pipeline, it is said. Alternatively, pipelines would have to structure their Section 311(a) transactions to insure that the intrastate pipeline is doing the contracting, it is further said.

South Texas contends that it is clearly allowed to contract with an intrastate pipeline selling gas pursuant to Section 311(b) and it should likewise be permitted to have contractual arrangements with the purchasing interstate pipeline, since the terms of the contract, refund obligations, and the gas itself, would be identical.

Further, South Texas states that there is support for its position independent of the NGPA, since Section 7(c) of the Natural Gas Act (15 USC 717(c)) provides that "temporary acts or operations" are exempt from certificate requirements and the limited term and interruptible nature of the service to be provided characterize these transactions as temporary acts.

Any person desiring to be heard or to make any protest with reference to said gas tariff filing should on or before June 20, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be

[1] Authorization pending before the Commission.

taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 79-18285 Filed 6-12-79; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. CP78-414]

Southern Natural Gas Co.; Petition to Amend

June 5, 1979.

Take notice that on May 18, 1979, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202, filed in Docket No. CP78-414 a petition to amend the Commission's order issued October 2, 1978 in said docket pursuant to Section 7(c) of the Natural Gas Act as implemented by § 157.7(b) of the Regulations thereunder (18 CFR 157.7(b)) by authorization of an increase in expenditures for gas purchase facilities by 43 percent and by expanding the definition of gas-purchase facilities, all as more fully set forth in the petition which is on file with the Commission and open for public inspection.

Southern asserts the requested 43 percent increase represents inflation in gas utility construction costs since January 1975, and the percentage figure is derived from the *Handy-Whitman Index of Public Utility Construction Costs.* Applying this factor, the total expenditure for facilities authorized in this docket would be increased to a total cost limitation not to exceed $17,160,000 and with no single onshore and offshore project to exceed $2,145,000 and $3,575,000, respectively, it is said.[1]

Southern states that it is pursuing an active program of gas acquisition and anticipates the need to construct additional gas purchase facilities in the next few months. Southern maintains that increased single and total project cost limitations may allow Southern to connect new sources of supply that might be lost to Southern if producers had to wait for individual certificate authorization and a later construction period before the movement of gas could commence.

Southern further asserts that the delay in attaching gas supplies which is inherent in the certification process may nullify the beneficial effect of the provisions of Part 284 of the Commission's Regulations under the Natural Gas Policy Act of 1978 (NGPA) whenever an interstate pipeline must construct and operate facilities to connect an intrastate pipeline to a producer's facilities or to receive gas sold or transported under Part 284. A similar difficulty exists when facilities must be constructed to connect Southern's system with that of another natural gas company authorized to transport gas for Southern, it is said.

Southern therefore contends that to eliminate this delay the Commission should expand the definition of budget-type gas purchase facilities authorized in Docket No. CP78-414 to include:

(1) facilities necessary to connect the facilities of an interstate or intrastate pipeline with Southern's interstate system or with the facilities of another natural gas company or intrastate pipeline authorized to transport gas for or exchange gas with Southern, for the purpose of receiving gas which is (a) transported by an intrastate pipeline for Southern's account pursuant to Section 311(a)(2) of the NGPA, (b) sold by an intrastate pipeline to Southern pursuant to Section 311(b) of the NGPA, (c) assigned to Southern by an intrastate pipeline pursuant to Section 312 of the NGPA or (d) transported by another natural gas company for the account of, or for exchange with Southern and

(2) facilities necessary to connect the facilities of an independent producer or other similar seller with the system of an intrastate pipeline authorized by Part 284 of the Commission's Regulations under the NGPA to transport gas for the account of Southern.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 28, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-01-M

[Project No. 2906]

Terra Bella Irrigation District; Application for Preliminary Permit

June 5, 1979.

Take notice that on January 18, 1979, Terra Bella Irrigation District filed an application for preliminary permit, [pursuant to the Federal Power Act, 16 U.S.C. Section 791(a)–825(r)], for a proposed waterpower project, to be known as the Jackass-Chiquito Water Conservation and Hydroelectric Development Project, FERC No. 2906, located on the Jackass and Chiquito Creeks, near Southern California Edison Company's Mammoth Pool Reservoir (existing licensed FERC Project No. 2085), in the county of Madera, California. Lands of the United States which may be affected by the proposed project are located in the Sierra National Forest, under the jurisdiction of the United States Forest Service. Correspondence with the Applicant should be directed to: John Boudreau, Manager, Terra Bella Irrigation District, 24790 Avenue 95, Terra Bella, California 93270 and Paul R. Minasian, Esquire, Minasian, Minasian, Minasian, Spruance and Baber, Attorneys at Law, Post Office Box 1679, Oroville, California 95965.

Purpose of the Project—A portion of project energy would be used for distribution to the Applicant's major pumping stations for irrigational purposes. Remaining power would be sold to other public agencies or utility companies.

Proposed Scope and Cost of Studies Under Permit—The Applicant seeks issuance of a preliminary permit for a period of three years, during which it would prepare a definitive project report, prepare preliminary designs, conduct geological explorations, collect environmental data and prepare an environmental report, obtain agreements with various Federal, State, and local agencies, and prepare a FERC license application. The cost of these activities is estimated by the Applicant to be about $1,000,000.

Project Description—The principal project works would consist of: (1) a concrete overflow dam diverting flow from East Fork Granite Creek through a 9,300-foot-long, 11-foot-diameter tunnel to West Fork Granite Reservoir; (2) a concrete overflow dam diverting flow from Middle Fork Granite Creek through a 12-inch pipeline connecting to a bore hole in the 11-foot-diameter tunnel; (3) West Fork Granite Reservoir (6-acre surface area) to be created by a third concrete overflow diversion dam; (4) a 14-foot-diameter tunnel approximately 10,300 feet long, carrying water from West Fork Granite Reservoir to; (5) the Jackass Reservoir which would have a capacity of 100,000 acre-feet, a maximum surface area of about 1,430 acres, and formed by a homogeneous rolled earthfill structure designated Jackass Dam; (6) a horseshoe tunnel 9 feet 6 inches in diameter and approximately 10,900 feet long, leading to an above-ground penstock approximately 6,700 feet long, varying in diameter from 6 feet 6 inches to 6 feet 0 inches, connected to an underground 6-foot-diameter steel-lined penstock serving; (7) the underground Jackass Powerhouse containing two impulse type turbine-generator units, having a total installed capacity of 80 megawatts; (8) a tailrace tunnel about 4,100 feet long leading to; (9) Chiquito Reservoir having a surface area of 1,030 acres and storage capacity of 80,000 acre-feet, formed by a zone-type composite earth and rockfill structure designated Chiquito Dam; (10) a horseshoe tunnel 13 feet in diameter and about 22,590 feet long, connected to an approximately 4,195-foot-long, above-ground penstock varying in diameter from 7 feet 6 inches to 8 feet 6 inches leading to; (11) Chiquito Powerhouse containing two impulse-type turbine-generator units, having a total installed capacity of 120 megawatts, and located at the headwaters of Mammoth Pool near the junction of Jackass Creek.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other necessary information for inclusion in an application for a license. In this instance, the applicant seeks a 36-month permit.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. A copy of the application may be obtained directly from the Applicant.

Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal requests for comments will be made.

If an agency does not file comments within the time set below, it will be presumed to have no comments.

Protests and Petitions To Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 C.F.R. Section 1.8 or Section 1.10 (1978).

In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules.

Any protest, petition to intervene, or agency comments must be filed on or before August 6, 1979. The Commission's address is: 825 N. Capitol Street, N.E., Washington, D.C. 20426.

The application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

Texas Eastern Transmission Corp.; Proposed Changes in FERC Gas Tariff

June 6, 1979.

Take notice that Texas Eastern Transmission Corporation on May 25, 1979, tendered for filing proposed changes in its FERC Gas Tariff, Fourth Revised Volume No. 1, the following sheet:

Revised Alternate Second Substitute Forty-eighth Revised Sheet No. 14

This tariff sheet is being issued to reflect changes in Texas Eastern's rates under Rate Schedule ISS, pursuant to ordering Paragraph (A) of the Commission's order issued January 27, 1978 at Docket Nos. CP77-313, *et al.* This increase in ISS rates reflects the flow-through of increased costs to Texas Eastern as a result of Consolidated Gas Supply Corporation's (Consolidated) increase in rates under Consolidated's Rate Schedule GSS to become effective July 1, 1979 in Docket No. RP79-22.

The proposed effective date of the above tariff sheet is July 1, 1979.

Copies of the filing were served upon the company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 20, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, D.C. 20426.

Persons objecting to any of those final determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before June 28, 1979. Please reference the FERC Control Number in any correspondence concerning a determination.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-01-M

[Docket No. RP72-133, PGA79-2]

United Gas Pipe Line Co.; Filing of Revised Tariff Sheets

May 25, 1979.

Take notice that on May 21, 1979, United Gas Pipe Line Company (United) tendered for filing Forty-ninth Revised Sheet No. 4 and Alternate Forty-Ninth Revised Sheet No. 4, to its FERC Gas Tariff, First Revised Volume No. 1. These tariff sheets and supporting information are being filed pursuant to the Purchased Gas Adjustment Provisions set out in Section 19 of United's tariff.

United states that the Current Adjustment under each set of tariff sheets reflect rates payable to United's suppliers as of July 1, 1979, in accordance with applicable price regulations under the Natural Gas Policy Act of 1978 (NGPA). Sea Robin Pipeline Company (Sea Robin) one of United's suppliers, has filed alternate tariff sheets to be effective July 1, 1979 under its PGA. The Current Adjustment on Forty-ninth Revised Sheet No. 4 reflects Sea Robin's rates under Sea Robin's Twenty-first Revised Sheet No. 4. The current adjustment on Alternate Forty-ninth Revised Sheet No. 4 reflects Sea Robin's rates under Sea Robin's Alternate Twenty-first Revised Sheet No. 4. The only other difference between Forty-ninth Revised Sheet No. 4 and Alternate Forty-ninth Revised Sheet No. 4 is in the computation of the Surcharge Adjustment.

United further states that during the transition from historical methods of regulation under the Natural Gas Act to regulation under the NGPA, which occured during the surcharge accumulation period for this filing, there have been extended periods of incidents with respect to the rates which may be charged by producers and retroactive charges in those rates under Part 273 of the Commission's regulations, producers which are eligible to collect rates authorized under Sections 102, 103, 107 and 108 of the NGPA may collect such rates from the date of filing for a determination of eligibility with the appropriate juriadictional agency. Such collections may either be made on a current basis through interim collection procedures or retroactively after the determination of eligibility becomes final. In addition, if the filing for a determination of eligibility was made prior to April 1, 1979, the producer may, after final determination, collect the higher rate retroactive to December 1, 1978. The estimated impact of requests for determinations filed by its suppliers under Sections 102, 103, and 107 of the NGPA on United's costs for gas delivered during the months December 1978 through June 1979 is approximately $81,055,000. $42,620,000 of this amount is attributable to deliveries during December 1978 through March 1979 and the jurisdictional portion of this $42 million is reflected in the Surcharge Adjustment under Forty-ninth Revised Sheet No. 4 in accordance with the normal operation of United's PGA. The remaining $38,438,000 is attributable to gas delivered or to be delivered during the months April–June, 1979. Under the normal operation of United's PGA, recovery of the jurisdictional portion of this $38 million would be deferred until United's PGA becomes effective January 1, 1980. Until collected, this deferred amount would accrue interest at 9% per annum. In order to reduce the ultimate economic burden of these large producer increases on its customers, and to reduce the adverse cash flow impact of such increases on United, United has computed the Surcharge Adjustment for the Alternate Forty-ninth Revised Sheet No. 4 to reflect the estimated impact of increased rates, under Sections 102, 103, and 107 of the NGPA for gas purchased from December 1, 1978 through June 30, 1979. In all other respects Alternate Forty-ninth Revised Sheet No. 4 was computed in accordance with the provisions of Section 19 of United's Tariff. United respectfully requests waiver of the requirements of Section 19 of its Tariff and of Section 154.38 of the Commission's regulations to permit Alternate Forty-ninth Revised Sheet No. 4 to become effective July 1, 1979.

Copies of the revised tariff sheets and supporting data are being mailed to United's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 7, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

Office of Hearings and Appeals

Cases Filed for the Week of March 9 through March 16, 1979

Notice is hereby given that during the week of March 9 through March 16, 1979, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the DOE action sought in this case may file with the DOE written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

June 5, 1979.

Melvin Goldstein,

Director, Office of Hearings and Appeals.

List of Cases Received by the Office of Hearings and Appeals

[Week of Mar. 9 through Mar. 16, 1979]

Date	Name and location of applicant	Case No.	Type of submission
3/9/79	Clifton E. Curtis, Washington, D.C.	DFA-0045	Appeal of an Information Request Denial. If granted: The DOE's February 2, 1979, Information Request Denial would be rescinded and Clifton E. Curtis would receive access to certain unspecified DOE documents pursuant to 5 U.S.C. Section 552 and 10 CFR Section 709.10.
3/9/79	Gas del Oro, Inc., Washington, D.C.	DED-0068	Motion for Discovery. If granted: Discovery would be granted to Gas del Oro, Inc. in relation to the Statement of Objections filed by the firm to the Proposed Decision and Order issued to Ozona Gas Processing Company.
3/9/79	J&W Refining Company, Washington, D.C.	DMR-0044	Application for Modification. If granted: The DOE's Decision and Order of February 2, 1979 (Case No. FXE-4459) would be modified.
3/9/79	John O. Farmer, Inc., Russell, Kansas	DES-0227	Exception to the reporting requirements. If granted: John O. Farmer, Inc. would not be required to file Form EIA-23.
3/9/79	Suburban Manufacturing Company, Dayton, Tennessee.	DEE-0202	Exception. If granted: Suburban Manufacturing Company would be granted an exception from the requirement to test vented gas space heaters.
3/12/79	Little America Refining Company, Washington, D.C.	DES-0110	Request for Stay. If granted: Little America Refining Company would be granted a stay of its entitlements purchase obligations pending a final determination on its Application for Exception.
3/12/79	Shechschutte Gas & Oil Company, Washington, D.C	DMR-0043	Application for Modification. If granted: The DOE's Decision and Order issued on March 7, 1979 (Case No. DST-0018) would be modified.
3/12/79	Texaco, Inc., Denver, Colorado	DEE-0242	Price Exception (Section 212.73). If granted: Texaco, Inc. would be permitted to sell the crude oil produced from Dugout Creek Shannon Sand Unit, located in Johnson County, Wyoming, at upper tier ceiling prices.
3/12/79	Texaco, Inc., Denver, Colorado	DEE-0269 through DEE-0281.	Price Exception. If granted: Texaco, Inc. would be permitted to sell the crude oil produced from the C. S. McGee, Owen Kapp, and Owens B Leases located in Dawson County, Montana, at upper tier ceiling prices.
3/13/79	Diamond Drilling Udy Core Drilling, Leadore, Idaho	DEE-0403	Allocation Exception. If granted: Diamond Drilling Udy Core Drilling would be granted an allocation of gas and diesel fuel for its drilling operation.
3/13/79	Gardere, Porter & DeHay, Dallas, Texas	DFA-0044	Appeal of Information Request Denial. If granted: The DOE's February 6, 1979, Information Request Denial would be rescinded and Gardere, Porter & DeHay would receive access to certain DOE data.
3/13/79	Gas Service, Inc., Bluefield, West Virginia	DEE-0401	Price Exception. If granted: Gas Service, Inc. would be granted an increase in the price it charges for propane.
3/13/79	Louisville Tin and Stove Company, Louisville, Kentucky.	DEE-0269	Exception. If granted: Louisville Tin and Stove Company would be granted an exemption from the requirement to test vented gas space heaters.
3/13/79	New York Petroleum Corporation, New Orleans, Louisiana.	DRT-0038	Request for Temporary Stay. If granted: New York Petroleum Corporation would be granted a temporary stay of a Remedial Order issued on July 28, 1977, and upheld on administrative appeal by a Decision and Order issued on January 18, 1979, directing that the firm refund overcharges allegedly made in sales of crude oil.
3/13/79	Public Citizen, Washington, D.C.	DFA-0046	Appeal of Information Request Denial. If granted: the DOE January 31, 1979, Information Request Denial would be rescinded and Public Citizen would receive access to certain DOE information.
3/13/79	Readybuild Products Company, Baltimore, Maryland.	DEE-0400	Exception. If granted: Readybuild Products Company would be granted an exemption from the requirement to test vented gas space heaters.
3/14/79	Charter Oil Company, Jacksonville, Florida	DEX-0147	Supplemental Order. If granted: Charter Oil Company would receive a stay of its entitlement purchase obligations under the provisions of 10 CFR 211.67.
3/14/79	Charter Oil Company, Jacksonville, Florida	DES-0160	Request for Stay. If granted: Charter Oil Company would be granted a stay of its Entitlements Purchase Obligations pending a final determination on its Application for Exception.
3/14/79	Zenith Oil Company, Minneapolis, Minnesota	DEE-0038	Price Exception. If granted: Zenith Oil Company would be relieved of its obligation to refund certain overcharges as required by a Proposed Remedial Order.
3/15/79	Austral Oil Company, Houston, Texas	DEE-0240	Exception to the reporting requirements. If granted: Austral Oil Company would not be required to file Form EIA-23.
3/15/79	Gulf Corporation, Houston, Texas	DEE-0036	Exception to the provisions of 10 CFR 212.83. If granted: Gulf Oil Corporation would be granted an exception to the provisions of 10 CFR 212.83.
3/15/79	Monsanto Company, St. Mary's Parish, Louisiana	DXE-0037	Extension of relief granted in *Monsanto Co.*, 1 DOE Par. (April 28, 1978). If granted: Monsanto Company would be permitted to sell the crude oil produced from the Lucia G, SU C No. 2 located in St. Mary's Parish, Louisiana, at upper tier ceiling prices.
3/16/79	Northland Oil & Refining Company, Tulsa, Oklahoma.	DXE-0039	Exception to the Entitlements Program. If granted: Northland Oil & Refining Company would be granted an exception to the provisions of 10 CFR 211.67, regarding its Entitlements Purchase Obligations for the period January through June 1979.
3/16/79	Shell Company (Puerto Rico), Washington, D.C.	DEE-0241	Price Exception. If granted: Shell Company (Puerto Rico) would be able to purchase gasoline from Commonwealth Oil Refining Company, Inc. at a reasonable price.
3/16/79	Standard Oil Company, (Indiana), Chicago, Illinois	DXE-0284	Extension of relief granted in *Standard Oil Co. (Indiana)*, 1 DOE Par. (December 12, 1978) If granted: Standard Oil Company (Indiana) would be permitted to sell the crude oil produced from the Sleepy Hollow Lansing Unit located at Red Willow County, Nebraska, at upper tier ceiling prices.
3/16/79	Sun Company, Washington, D.C.	DEA-0047, DES-0047 and DES-0169.	Request for Stay; Appeal of ERA Decision and Order. If granted: The Economic Regulatory Administration's February 16 and 21, 1979, Decisions and Orders would be modified and Sun Company would not be required to supply Rock Island Refining Corporation and Gladieux Refinery, Inc. A stay would be granted pending a determination on the Application for Appeal.

If granted: The following firms would receive a temporary stay, a stay, and/or exception from the activation of the Standby Petroleum Product Allocation regulations with respect to motor gasoline.

3/9/79	Amoco Oil Company, Chicago, Illinois	DES-2257 and DST-2257.	Request for Stay and Temporary Stay.
3/9/79	Beedel Enterprises, West Palm Beach, Florida	DST-2221 and DES-2221.	Allocation Exception, Request for Temporary Stay.
3/9/79	Blarney Castle Oil Company, Bear Lake, Michigan	DST-2229	Request for Temporary Stay.
3/9/79	Century Oil Company, Hutchinson, Kansas	DES-0173	Request for Stay.
3/9/79	Commerce Crossroads Service, Inc., Yorktown Heights, New York.	DEE-2230, DES-2260 and DST-2260.	Allocation Exception, Request for Stay and Temporary Stay.

BILLING CODE 6450-01-M

Issuance of Proposed Decisions and Orders; April 23 through April 27, 1979

Notice is hereby given that during the period April 23 through April 27, 1979, the Proposed Decisions and Orders which are summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to Applications for Exception which had been filed with that Office.

Under the procedures which govern the filing and consideration of exception applications (10 CFR, Part 205, Subpart D), any person who will be aggrieved by the issuance of the Proposed Decision

and Order in final form may file a written Notice of Objection within ten days of service. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The applicable procedures also specify that if a Notice of Objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the Proposed Decision and Order in final form. Any aggrieved party that wishes to contest any finding or conclusion contained in a Proposed Decision and Order must also file a detailed Statement of Objections within 30 days of the date of service of the Proposed Decision and Order. In that Statement of Objections an aggrieved party must specify each issue of fact or law contained in the Proposed Decision and Order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these Proposed Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-210, 2000 M Street, N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m. e.d.t., except Federal holidays.

Melvin Goldstein,

Director, Office of Hearings and Appeals.

June 7, 1979.

Proposed Decisions and Orders

Atlantic Oil Co., Los Angeles Calif., DEE-2134, crude oil

Atlantic Oil Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit the firm to sell a certain portion of the crude oil produced for the benefit of the working interest owners from the Coykendall Lease located in Orange County, California, at upper tier ceiling prices. On April, 27, 1979, the DOE issued a Proposed Decision and Order and tentatively determined that exception relief should be granted, in part, with respect to Atlantic's Coykendall Lease.

Glickman, Inc., Wichita, Kans., DEE-2211, crude oil

Glickman, Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Glickman to sell the crude oil produced for the benefit of the working interest owners at the Burch Lease at upper tier ceiling prices. On April 24, 1979, the DOE issued a Proposed Decision and Order which determined that the exception request be granted.

Save O.K. Oil & Gas, Macon, Ga., DEE-2048, motor gasoline

Save O.K. Oil & Gas filed an Application for Exception from the provisions of Standby Regulation Activation Order No. 1. The exception request, if granted, would result in an increase in the firm's base period allocation of motor gasoline for the months of March, April, and May 1979. On April 24, 1979, the DOE issued a Proposed Decision and Order which determined that the exception request be denied.

Exception

The following firms filed Applications for Exception from the provisions of Standby Regulation Activation Order No. 1. The exception requests, if granted, would result in an increase in each firm's base period allocation of motor gasoline for the months of March, April, and May 1979. During the week of April 23-27, 1979, the DOE issued Proposed Decisions and Orders which determined that the exception request be granted:

Red Bluff Mobil Service Center, Pasadena, Tex., DEE-3111
Palm Oil Co., Costa Mesa, Calif., DEE-2497
Sav-Mor Oil Co., Los Angeles, Calif., DEE-3170
Terry's Mobil, Red Lake Falls, Minn., DEE-2900
Walter's North Bellmore Exxon, N. Bellmore, N.Y., DEE-2244
Jesse Morales, Jr., Uvalde, Tex., DEE-3084
L. J. Bonnaffons, New Orleans, La., DEE-3721
Steve's Gulf Service, Tryon, N.C., DEE-2574
Bingo Exxon, Muscle Shoals, Ala., DEE-2726
Givan's Exxon, Watertown, Tex., DEE-3116
Phillips & Munzell Shell, Tuskin, Fla., DEE-2925

[FR Doc. 79-18328 Filed 6-12-79; 8:45 am]

BILLING CODE 6450-01-M

Issuance of Proposed Decisions and Orders; April 30 through May 4, 1979

Notice is hereby given that during the period April 30 through May 4, 1979, the Proposed Decisions and Orders which are summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to Applications for Exception which had been filed with that Office.

Under the procedures which govern the filing and consideration of exception applications (10 CFR, Part 205, Subpart D), any person who will be aggrieved by the issuance of the Proposed Decision and Order in final form may file a written Notice of Objection within ten days of service. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The applicable procedures also specify that if a Notice of Objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the Proposed Decision and Order in final form.

Any aggrieved party that wishes to contest any finding or conclusion contained in a Proposed Decision and Order must also file a detailed Statement of Objections within 30 days of the date of service of the Proposed Decision and Order. In that Statement of Objections an aggrieved party must specify each issue of fact or law contained in the Proposed Decision and Order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these Proposed Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-210, 2000 M Street, N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m. e.d.t., except federal holidays.

June 7, 1979.

Melvin Goldstein,

Director, Office of Hearings and Appeals.

Proposed Decisions and Orders

E. B. Brooks, Jr., Dallas, Tex., DEE-2223, crude oil

E. B. Brooks, Jr., filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Brooks to sell the crude oil produced from the Baptist Foundation Lease for the benefit of the working interest owners at stripper well prices. On May 1, 1979 the DOE issued a Proposed Decision and Order which determined that the Baptist Foundation Lease does not qualify as a stripper well property.

Champlin Petroleum Co., Fort Worth, Tex., DXE-2212

Champlin Petroleum Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in an extension of exception relief previously granted and would permit the firm to sell 62.26 percent of the crude oil which it produces from the State of New Mexico No. 18 Property at upper tier ceiling prices. On April 30, 1979, the DOE issued a Proposed Decision and Order and tentatively determined that an extension of exception relief should be granted with respect to Champlin's State of New Mexico No. 18 Property.

Chevron, U.S.A. Inc., Los Angeles, Calif., DEE-3153, motor gasoline

Chevron U.S.A. Inc. filed an Application for Exception from the provisions of Standby Regulation Activation Order No. 1. The exception request, if granted, would permit Chevron to supply approximately 258 of its branded retail outlets with volumes of motor gasoline in excess of their base period allocation. It would also permit Chevron to become the base period supplier for approximately 184 purchasers which were

buying gasoline from Chevron on January 31, 1979 but which had different base period suppliers. On May 3, 1979, the DOE issued a Proposed Decision and Order which determined that the exception request be granted in part.

Crown Central Petroleum Corp., Bellaire, Tex., DXE–2230

Crown Central Petroleum Corporation filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in an extension of exception relief previously granted and would permit the firm to sell 11.28 percent of the crude oil which it produces from the Santa Ana and Fresno Land Lease at upper tier ceiling prices. On April 30, 1979, the DOE issued a Proposed Decision and Order and tentatively determined that an extension of exception relief should be granted with respect to Crown Central's Santa Ana and Fresno Land Lease.

Pennzoil Producing Co., Houston, Tex., DXE–2169

Pennzoil Producing Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in an extension of exception relief previously granted and would permit the firm to sell 100 percent of the crude oil which it produces from the Perry Sand Waterflood Unit, North Segment, at upper tier ceiling prices. On April, 30, 1979, the DOE issued a Proposed Decision and Order and tentatively determined that an extension of exception relief should be granted with respect to Pennzoil's Perry Sand Waterflood Unit, North Segment.

Phillips Petroleum Co., Bartlesville, Okla., DEE–2169

Phillips Petroleum Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, in which the firm requested that it be permitted to sell the crude oil produced from the Crone "C" lease, located in Columbia County, Arkansas, at prevailing market prices. On April 30, 1979, the DOE issued a Proposed Decision and Order which determined that the Phillips request be granted.

Phillips Petroleum Co., Bartlesville, Okla., crude oil, DXE–2174

Phillips Petroleum Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, in which the firm requested that it be permitted to continue to sell at market prices certain of the crude oil produced from the Theimer "D" Lease, located in Oklahoma County, Oklahoma. On May 2, 1979, the DOE issued a Proposed Decision and Order which determined that the Phillips exception request be granted.

S & W Engine Supply Co., Oklahoma City, Okla., crude oil, DXE–3444

S & W Engine Supply Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in the extension of exception relief previously granted and would permit the applicant to continue to sell certain quantities of crude oil which it produces from the Baker Townsend Lease, located in Oklahoma County, Oklahoma, at upper tier ceiling prices. On April 30, 1979, the DOE issued a Proposed Decision and Order which determined that S & W Engine Supply should be permitted to sell 78.37 percent of the crude oil produced and sold for the benefit of the working interest owners from the Baker Townsend Lease at upper tier ceiling prices.

Shell Oil Co., Houston, Tex., DEE–3294, motor gasoline

The Shell Oil Company filed an Application for Exception from the provisions of Standby Regulation Activation Order No. 1. The exception request, if granted, would permit Shell to allocate motor gasoline to approximately 970 branded Shell retail sales outlets on a basis different from that specified in the DOE allocation regulations. On May 2, 1979, the DOE issued a Proposed Decision and Order in which it proposed to grant the request in part.

List of Cases Involving the Standby Petroleum Product Allocation Regulations for Motor Gasoline

Week of April 30 through May 4, 1979

The following firms filed Applications for Exception from the provisions of Standby Regulation Activation Order No. 1. The exception requests, if granted, would result in an increase in the firms' base period allocation of motor gasoline for the months of March, April and May 1979. The DOE issued Proposed Decisions and Order which determined that the exception requests be granted.

Company name	Case No.	Location
Holiday Foods, Inc.	DEE–2752	Des Moines, Wash.
River Oil Co.	DEE–2946	Memphis, Tenn.
Tom's Village Arco	DEE–3181	Starkweather, Wis.
Bud Wolfe's Arco Mini-Market	DEE–3367	Redlands, Calif.

BILLING CODE 6450-01-M

Objection to Proposed Remedial Orders; Week of May 11 through May 18, 1979

Notice is hereby given that during the week of May 11 through May 18, 1979, the Notices of Objection to Proposed Remedial Orders listed in the Appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

By July 3, 1979, any person who wishes to participate in the proceeding which the Department of Energy will conduct concerning the Proposed Remedial Orders described in the Appendix to this notice must file a request to participate pursuant to 10 CFR 205.194 (44 FR 7926, February 7, 1979). By July 13, 1979, the Office of Hearings and Appeals will determine those persons who may participate on an active basis in this proceeding, and will prepare an official service list which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown. All requests regarding this proceeding shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

Issued in Washington, D.C. June 7, 1979.

Melvin Goldstein,

Office of Hearings and Appeals.

Red Triangle Oil Co., Fresno, Calif., DRO–0213, motor gasoline

On May 15, 1979, Red Triangle Oil Co., 2609 South Chestnut Street, Fresno, California 93745, filed a Notice of Objection to a Proposed Remedial Order which the DOE Western Enforcement District issued to Red Triangle on April 13, 1979. In the Proposed Remedial Order, the Enforcement District found that during the period from November 1, 1973 through April 30, 1974, Red Triangle committed pricing violations in the State of California in connection with resales of motor gasoline. According to the Proposed Remedial Order, Red Triangle's violations resulted in overcharges of $01,298.00.

Lowe Oil Co., Clinton, Mo., DRO–0215, motor oils and motor gasoline

ON May 17, 1979, Lowe Oil Company, 510 Price Lane, Clinton, Missouri 64735, filed a Notice of Objection to a Proposed Remedial Order which the Central Enforcement District of the Economic Regulatory Administration of the Department of Energy issued to the firm on April 17, 1979. In the Proposed Remedial Order, the Enforcement District found that during the time period November 1, 1973 through April 30, 1974, Lowe Oil Company committed pricing violations in sales of motor oils and motor gasoline to customers in the State of Missouri. According to the Proposed Remedial Order, Lowe Oil Company's violations of the provisions of 10 CFR Part

212 resulted in overcharges to its customers of $83,298.31.

[FR Doc. 79-18328 Filed 6-12-79; 8:45 am]

BILLING CODE 6450-01-M

Objection to Proposed Remedial Orders Filed; Week of May 18 through May 25, 1979

Notice is hereby given that during the week of May 18 through May 25, 1979, the Notices of Objection to Proposed Remedial Orders listed in the Appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

By July 3, 1979, any person who wishes to participate in the proceeding which the Department of Energy will conduct concerning the Proposed Remedial Orders described in the Appendix to this notice must file a request to participate pursuant to 10 CFR 205.194 (44 FR 7926, February 7, 1979). By July 13, 1979, the Office of Hearings and Appeals will determine those persons who may participate on an active basis in this proceeding, and will prepare an official service list which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown. All requests regarding this proceeding shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

Issued in Washington, D.C. June 7, 1979.

Melvin Goldstein,

Director, Office of Hearings and Appeals.

Bill J. Graham, Midland, Tex., DRO-0216, crude oil

On May 22, 1979, Bill J. Graham, P.O. Box 5321, Midland, Texas 79702, filed a Notice of Objection to a Proposed Remedial Order which the DOE Southwest Enforcement District issued to Graham on May 3, 1979. In the Proposed Remedial Order, the Enforcement District found that during the period from September 1, 1973, through February 28, 1977, Graham committed pricing violations in Texas and New Mexico in connection with the sale of crude oil. According to the Proposed Remedial Order, Graham's violations resulted in overcharges to his customers, the Permian Corporation and the Scurlock Oil Company, of $117,520.10.

Michaelson Producing Co., Midland, Tex., DRO-0217, crude oil

On May 22, 1979, Michaelson Producing Company, 1404 Gihis Tower West, Midland, Texas 79701, filed a Notice of Objection to a Revised Proposed Remedial Order which the DOE Southwest Enforcement District issued to the firm on May 7, 1979. In the Revised Proposed Remedial Order, the Enforcement District found that during the period from September 1, 1973, through December 31, 1975, Michaelson committed pricing violations in the State of Texas in connection with the production and sale of crude oil. According to the Revised Proposed Remedial Order, the firm's violations resulted in overcharges to its customer, the Permian Corporation, of $929,580.84.

RPL Oil Co., Inc., Midland, Tex., DRO-0218, crude oil

On May 17, 1979, RPL Oil Company, Inc., P.O. Box 5456, Midland, Texas 79701, filed a Notice of Objection to a Proposed Remedial Order which the DOE Southwest Enforcement District issued to it on May 11, 1979. In the Proposed Remedial Order, the Enforcement District found that during the period January 1, 1974, through December 31, 1974, RPL committed pricing violations in the State of Texas in connection with the production and sale of crude oil. According to the Proposed Remedial Order, the firm's violations resulted in overcharges to its customers of $82,363.80.

Texas City Refining, Inc., Texas City, Tex., DRO-0219, motor gasoline

On May 24, 1979, Texas City Refining, Inc. (TCR), P.O. Box 1271, Texas City, Texas 75590, filed a Notice of Objection to an Interim Remedial Order for Immediate Compliance (IROIC) which the Office of Special Counsel for Compliance (OSC) issued to the firm on May 14, 1979. In the IROIC, the OSC ordered TCR to supply motor gasoline to the Edmunds Street Oil Corporation (ESO), a wholesale purchaser-reseller. The IROIC was based upon a funding that ESO had acquired the entire ongoing business operations of Edmondson's Oil Company, a base period purchaser of TCR, and that ESO was therefore entitled to purchase Edmondson's base period entitlement of motor gasoline from TCR.

[FR Doc. 79-18330 Filed 6-12-79; 8:45 am]

BILLING CODE 6450-01-M

Objection to Proposed Remedial Orders Filed; Week of May 25 through June 1, 1979

Notice is hereby given that during the week of May 25 through June 1, 1979, the Notices of Objection to Proposed Remedial Orders listed in the Appendix to this notice were filed with the Office of Hearings and Appeals of the Department of Energy.

By July 3, 1979, any person who wishes to participate in the proceeding which the Department of Energy will conduct concerning the Proposed Remedial Orders described in the Appendix to this notice must file a request to participate pursuant to 10 CFR 205.194 (44 FR 7926, February 7, 1979). By July 13, 1979, the Office of Hearings and Appeals will determine those persons who may participate on an active basis in this proceeding, and will prepare an official service list which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown. All requests regarding this proceeding shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461. Issued in Washington, D.C. June 7, 1979.

Melvin Goldstein,

Director, Office of Hearings and Appeals.

On May 29, 1979, each of the seven firms listed below filed a Notice of Objection to the Proposed Remedial Order that the DOE Office of Special Counsel (OSC) issued to that firm on May 1, 1979. By filing Notices of Objection, these seven firms have declared their intent to contest the findings of fact and conclusions of law contained in the Proposed Remedial Order that was issued to it. The OSC found in each of the Proposed Remedial orders that the firm involved had committed pricing violations during the period September 1973 through March 1979 in sales of crude oil produced from a number of properties located throughout the United States. As restitution for the overcharges, including interest accrued thereon, the OSC directed the seven firms to pay to the United States Treasury the sums of money indicated below:

Atlantic Richfield Company, 515 South Flower Street, Los Angeles, California 90071. (Case No. DRO-0193)—$42,023,718.03.

Gulf Oil Corporation and Gulf Exploration & Production Co., Gulf Building, Post Office Box 1166, Pittsburgh, Pennsylvania 15230. (Case No. DRO-0194)—$577,969,479.83.

Marathon Oil Company, Inc., 539 South Main Street, Findlay, Ohio 45840. (Case No. DRO-0195)—$29,063,515.63.

Standard Oil Company of California and Chevron, U.S.A., Inc., 235 Bush Street, San Francisco, California 94104. (Case No. DRO-0196)—$101,618,243.07.

Standard Oil Company of Indiana and Amoco Production Company, 200 East Randolph Drive, Chicago, Illinois 60601. (Case No. DRO-0198)—$23,854,306.70.

Standard Oil Company (Ohio), Midland Building, Cleveland, Ohio 44115. (Case No. DRO-0197)—$16,969,407.46.

Texaco, Inc., 2000 Westchester Avenue, White Plains, New York 10650. (Case No. DRO-0199)—$[illegible].00.

In addition to the Notices of Objection filed by the seven firms lited above, further Notices of Objection to the OSC's May 1, 1979 Proposed Remedial Orders were filed by the following firms on May 29 and May 30, 1979:

Southland Royalty Company, 1000 Fort Worth Club Tower, Fort Worth, Texas 76102.

with respect to the Proposed Remedial Order issued to Gulf Oil Corporation;

Louisiana Land and Exploration Company, Box 60350, New Orleans, Louisiana 70160.

with respect to the Proposed Remedial Orders issued to Marathon Oil Company and to Texaco, Inc.; and

The State of Louisiana, Department of Justice, State Capitol, P.O. Box 44005, Baton Rouge, Louisiana 70804.

with respect to the Proposed Remedial Order issued to Texaco, Inc.

Exxon Co., U.S.A., Houston, Tex., DRO-0221, Motor Gasoline

On May 29, 1979, Exxon Company, U.S.A., 800 Bell Street, Houston, Texas 77002, filed a Notice of Objection in which it indicates that it will contest an Interim Remedial Order for Immediate Compliance (IROIC) which the DOE Office of Special Counsel, Southwest Refiner District, issued to it on May 16, 1979. In the IROIC, the Special Counsel found that (i) during the period from March through May 1979, Exxon violated the DOE Mandatory Petroleum Allocation Regulations by refusing to supply the Hydrocarbon Trading and Transport Company of Houston, Texas, with its base period volume of motor gasoline, as reduced by the application of Exxon's allocation fraction, (ii) that the violation was continuing, and (iii) that Hydrocarbon would be irreparably harmed unless an IROIC were issued immediately. the IROIC directed Exxon to make available to Hydrocarbon the volumes of motor gasoline which it was entitled to receive under Part 211 in March and April 1974, as well as that firm's May 1979 allocation level.

Dalton J. Woods, Shreveport, La., DRO-0222, crude oil

On May 30, 1979, Dalton J. Woods, 1412 Mid South Tower, Shreveport, Louisiana 71101, filed a Notice of Objection to a Proposed Remedial Order which the DOE Southwest Enforcement District issued to him on May 15, 1979. In the Proposed Remedial Order, the Enforcement District found that during the time period January 1975 through July 1976, Woods committed pricing violations in the State of Louisiana in connection with the production and sale of crude oil. According to the Proposed Remedial Order, Woods' violations resulted in overcharges to its customers of $51,392.91.

BILLING CODE 6450-01-M

Office of Assistant Secretary for International Affairs

Proposed Subsequent Arrangements

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160), notice is hereby given of proposed "subsequent arrangements" under the Agreement for Cooperation Between the Governments of the United States of America and Republic of Korea Concerning the Peaceful Uses of Atomic Energy.

The subsequent arrangements to be carried out under the above mentioned agreement involve contractual arrangements under which DOE will consent to the assignment of two uranium enrichment services contracts with two U.S. utilities involving approximately 3 million separate work units under each contract, and two uranium enrichment services contracts involving approximately 2.9 million separate work units under each contract with a non-U.S. customer to the Korea Electric Company for four Korean nuclear units 7, 8, 9 and 10.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that these subsequent arrangements will not be inimical to the common defense and security of the United States.

These susbsequent arrangements will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: June 8, 1979.

Harold D. Bengelsdorf,

Director for Nuclear Affairs, International Nuclear and Technical Programs.

[FR Doc. 79-18978 Filed 6-11-79; 10:50 am]

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL 1246-8]

Detroit Lime Co.; Application

In the matter of the applicability of Title 1, Part C of the Clean Air Act (Act), as amended, 42 U.S.C. 7401 *et seq.*, and the Federal regulations promulgated thereunder at 40 CFR 52.21 (43 FR 26388, June 19, 1978) for Prevention of Significant Deterioration of Air Quality (PSD), to Detroit Lime Company, Detroit, Michigan.

On August 1, 1978, Detroit Lime Company submitted an application to the United States Environmental Protection Agency (U.S. EPA), Region V office, for an approval to construct a rotary lime kiln and limestone preheater. The application was submitted pursuant to the regulations for PSD.

On November 21, 1978, Detroit Lime Company was notified that its application was complete, and preliminary approval was granted.

On December 12, 1978, U.S. EPA published notice of its decision to grant a preliminary approval to Detroit Lime Company. Several comments were received and a public hearing was requested as a result of the preliminary approval. On February 14, 1979, U.S. EPA conducted the hearing in Detroit, Michigan.

After review and analysis of all materials submitted by Detroit Lime Company, the public record established at the hearing, and written comments, Detroit Lime Company was notified on April 20, 1979, that U.S. EPA had determined that the proposed new construction in Detroit, Michigan, would be utilizing the best available control technology and that emissions from the facility will not adversely impact air quality, as required by Section 165 of the Act.

This approval to construct does not relieve Detroit Lime Company of the responsibility to comply with the control strategy and all local, State and Federal regulations which are part of the applicable State Implementation Plan, as well as all other applicable Federal, State and local requirements.

This determination may now be considered final agency action which is locally applicable under Section 307(b)(1) of the Act and therefore a petition for review may be filed in the U.S. Court of Appeals for the Seventh Circuit by any appropriate party. In accordance with Section 307(b)(1), petitions for review must be filed sixty days from the date of this notice.

John McGuire,

Regional Administrator, Region V.

United States Environmental Protection Agency

In the matter of Detroit Lime Company, Detroit, Michigan; Proceeding pursuant to the Clean Air Act, as amended; Approval to Construct EPA-5-79-A-13.

Authority

The approval to construct is issued pursuant to the Clean Air Act, as amended, 42 U.S.C. 7401 *et. seq.*, (The Act), and the federal regulations promulgated thereunder at 40 CFR 52.21 for the Prevention of Significant Deterioration of Air Quality (PSD).

Findings

1. The Detroit Lime Company (Detroit Lime) proposes to construct a 1,000 tons per day rotary lime kiln and limestone preheater in Detroit, Michigan at 125 South Dix Road.

2. The section of Detroit in which Detroit Lime will construct is a Class II area as determined pursuant to the Act and has been designated a non-attainment area for total suspended particulate matter, and an attainment area for sulfur dioxide by the State of Michigan pursuant to Section 107 of the Act.

3. The proposed rotary lime kiln and preheater are subject to the requirements of 40 CFR 52.21 and the applicable sections of the Act. The proposed source is not subject to the Interpretive Ruling (41 F.R. 55524, December 21, 1976), because its allowable emission rate for particulate matter is less than 100 tons per year, and because it will meet all applicable emission standards. Therefore the proposed source is subject to Tier II PSD review for total suspended particulates and sulfur dioxide.

4. Detroit Lime's PSD application was determined to be complete and preliminarily approved on November 21, 1978. On December 12, 1978, public notice appeared in the *Detroit Free Press*. A public hearing was requested and one was held on February 14, 1979, at the Campbell Branch of the Detroit Public Library at 6625 W. Fort in Detroit. The public comment period was extended to February 21, 1979.

5. After review and analysis of all material submitted by Detroit Lime, U.S. EPA has determined that emissions from the construction and operation of the proposed rotary lime kiln and preheater will not violate the Air quality increments applicable in the area where the source will be located, or will it violate the air quality increments applicable in any other area.

Detroit Lime's rotary lime kiln will meet an emission limit at least as restrictive as the new source performance standard for lime manufacturing plants (40 CFR Part 60).

Conditions

Particulate emissions from the baghouse stack shall be limited to 15 lbs. per ton of limestone feed.

Sulfur dioxide emissions from the baghouse stack shall be limited 0.25 lbs. per ton of actual process weight input. Process weight defined as the weight of the total solid materials input into the production process.

Prior to operation, the following fugitive particulate emission control measures shall be implemented:

(a) A negative pressure shall be maintained within the new firing building hood.

(b) The new limestone feed conveyor shall be enclosed with a 180° enclosure over the top of the conveyor. The new lime takeaway belt shall be enclosed with a 360° enclosure.

(c) All normally used roadways and work areas on Detroit Lime's property shall be hard surfaced and maintained in a dust free manner by periodic cleaning with an appropriately controlled vacuum pick-up system.

(d) The surfaces of the coal piles shall be sprayed with a surfactant to minimize fugitive dust.

(e) Storage of waste dust and coal fines shall be enclosed.

(f) A negative pressure shall be maintained within the lime storage silo building. The building shall have automatic door closer devices, and the conveyor room atop the silos shall be ventilated to a baghouse collector.

(g) a negative pressure shall be maintained in the head house building. All dust pick-up points presently vented to a baghouse shall be repaired and maintained for the life of the plant.

(h) The shipping house screen discharge belt (transfer belt) shall be enclosed and ventilated to a baghouse.

(i) The inlet air ports of the existing rotary kiln preheater shall be partially closed so as to increase indraft velocity and reduce accumulation of wastes and fines. Cleanout chutes emptying into collection containers shall be installed so as to control potential fugitive emissions from cleanout of the preheater.

(j) From the existing rotary kiln baghouse:

(1) the discharge from the ventilating fan for the area under the baghouse hoppers shall be controlled or eliminated.

(2) The bottom of the bucket elevator for conveying collected dust shall be enclosed.

(3) A dust-free loading device for truck loading shall be maintained at all times.

(k) Automatic door closers shall be installed and the building maintained so fugitive emissions are not emitted from the pebble lime briquette building.

(l) The following conveyors shall be completely enclosed (360°) and transfer points shall be ventilated to the baghouse collection system:

(1) Belts Nos. 11 and 12 from the existing rotary kiln to the surge tank and to the head house.

(2) The pan (apron) conveyor from the vertical kiln to the head house.

(3) The shuttle conveyor at the loading station.

(4) Shipping belt No. 4 (head house to shipping house) for transporting product.

(m) The handling and disposal from the existing waste dust shed shall be revised to minimize dust from the loading operation.

The control measures stated in conditions 7–9 above represent emissions limitations at least as stringent as those required by the application of Best Available Control Technology [40 CFR 52.21(d)(ii)].

10. (a) The new rotary lime kiln shall be limited to a maximum daily production rate in accordance with the schedule in Attachment A and shall not exceed 1128 tons per day maximum production rate.

(b) The existing vertical kiln shall be operated in conjunction with the new rotary kiln in accordance with the schedule in Attachment A.

(c) The company shall maintain appropriate operating logs for verifying the above production rate data. Such logs shall be sent to the Wayne County Air Pollution Control Board on a yearly basis and shall be made available for on-site examination at any time upon request by the Wayne County Air Pollution Control Board or the U.S. EPA, Region V.

Condition 10 is required in order to ensure that Detroit Lime operates the rotary lime kiln and limestone preheater in accordance with the descriptions presented in their application for approval to construct.

Approval

11. Approval to construct a rotary lime kiln and limestone preheater is hereby granted to the Detroit Lime Company subject to the conditions expressed herein and consistent with the materials and data included in the application filed by this Company. Any departure from the conditions of this approval or the terms expressed in Detroit Lime's application must receive the prior written authorization of U.S. EPA.

12. This approval to construct does not relieve Detroit Lime of the responsibility to comply with the control strategy and all local, State and Federal regulations which are part of the applicable State Implementation Plan, as well as all other State and Federal requirements.

13. A copy of this approval has been forwarded to the Campbell Branch of the Detroit Public Library, 6625 W. Fort, Detroit, Michigan 48209.

Dated: April 20, 1979.

John McGuire,

Regional Administrator.

Issuance of Experimental Use Permits

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 8730—EUP-7. Herculite Products, Inc., New York, New York 10010. This experimental use permit allows the use of 14.53 pounds of the insecticide n-tetradecyl formate on forested areas and wooded residential areas to evaluate control of gypsy moths. A total of 505 acres is involved; the program is authorized only in the States of Maryland, Massachusetts, and Wisconsin. The experimental use permit is effective from April 3, 1979 to April 3, 1980. (PM-17, Room: E-229, Telephone: 202/426-9425)

No. 42048-EUP-1. University of Idaho, Moscow, Idaho 83843. This experimental use permit allows the use of 0.10 pound of the rodenticide strychnine alkaloid on forest plantations to evaluate control of pocket gophers. A total of 18 acres is involved; the program is authorized only in the State of Idaho. The experimental use permit is effective from March 22, 1979 to October 1, 1981. (PM-16, Room: E-229, Telephone: 202/755-9315)

No. 1016-50. Union Carbide Corp., Arlington, Virginia 22202. This experimental use permit allows the use of 12,420 pounds of the insecticide carbaryl on alfalfa, corn (field and sweet), cotton, forests, pastures, peanuts, rangeland, rice, and sorghum to evaluate control of various insect pests. A total of 2,765 acres is involved; the program is authorized only in the States of Colorado, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Louisiana, Maine, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Mexico, New York, Oklahoma, Pennsylvania, Texas, Utah, Wisconsin, and Wyoming. The experimental use permit is effective from May 1, 1979 to May 1, 1980. Permanent tolerances for residues of the active ingredient in or on alfalfa, corn (field and sweet), cotton, peanuts, rice, and sorghum have been established (40 CFR 180.169). (PM-12, Room: E-229, Telephone: 202/426-9425)

Interested parties wishing to review the experimental use permits are referred to the designated Product Manager (PM), Registration Division (TS-767), Office of Pesticide Programs EPA, 401 M Street, S.W., Washington, D.C. 20460. The descriptive paragraph for each permit contains a telephone number and room number for information purposes. It is suggested that interested persons call before visiting the EPA Headquarters Office, so that the appropriate permit may be made conveniently available for review purposes. The files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

[Section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136)]

Dated: June 4, 1979.

Issuance of Experimental Use Permits

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 264-EUP-55. Union Carbide Co., Inc., Ambler, Pennsylvania 19002. This experimental use permit allows the use of 17,200 pounds of the plant regulator ethephon on cotton to evaluate its effectiveness for accelerating the opening of mature cotton bolls and preconditioning cotton for defoliation. A total of 8,600 acres is involved; the program is authorized only in the States of Alabama, Arizona, Arkansas, California, Georgia, Louisiana, Mississippi, Missouri, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas. This program was authorized in a previous expermimental use program which was effective from July 15, 1978 to July 14, 1979. It is now authorized until June 15, 1980. A temporary tolerance for residues of the active ingredient in or on cottonseed has been established. (PM-25, Room: E-301, Telephone: 202/755-2196)

No. 7452-EUP-6. The Freers Co., Muscatine, Iowa 52761. This experimental use permit allows the use of 22 pounds of the fungicide thiabendazole on oak trees to evaluate control of oak wilt. A total of 225 oak trees is involved; the program is authorized only in the State of Iowa. The experimental use permit is effective from May 7, 1979 to May 7, 1981. (PM-21, Room: E-205, Telephone: 202/755-2562)

No. 38566-EUP-1. University of Maine, Orono, Maine 04469. This experimental use permit allows the use of 9.089 billion international units of the insecticide *Bacillus thuringiensis* Berliner on fir-spruce forest land to evaluate control of Eastern spruce budworm. A total of 1,200 acres is involved; the program is authorized only in the State of Maine. The experimental use permit is effective from May 10, 1979 to June 30, 1979. (PM-17, Room: E-229, Telephone: 202/426-9425)

Interested parties wishing to review the experimental use permits are referred to the designated Product Manager (PM), Registration Division (TS-767), Office of Pesticide Prgorams, EPA, 401 M Street, S.W., Washington, D.C. 20460. The descriptive paragraph for each permit contains a telephone number and room number for information purposes. It is suggested that interested persons call before visiting the EPA Headquarters Office, so that the appropriate permit may be made conveniently available for review purposes. The files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Amendment to Experimental Use Permit Issued to Mobil Chemical Co.

On Monday, September 25, 1978 (43 FR 45380), information appeared pertaining to the issuance of an experimental use permit, No. 2224-EUP-10, to Mobil Chemical Company. The permit was amended on Friday, April 13, 1979 (44 FR 22175). At the request of the company, that permit has been further amended. The experimental use permit now allows the use of 2,198 pounds of the herbicide bifenox on corn and grain sorghum to evaluate control of various weeds. A total of 185 acres is involved; the program is authorized only in the States of Colorado, Kansas, Nebraska, Oklahoma and Texas. The experimental use permit is effective from March 22, 1979 to March 22, 1980. Permanent tolerances for residues of the active ingredient in or on corn and grain sorghum have been established (40 FR 180.351). (PM-25, Room: E-301, Telephone: 202/755-2196)

FEDERAL MARITIME COMMISSION

[Docket No. 79-61]

Rene Lopez and David Romano d/b/a United Dispatch Services—Independent Ocean Freight Forwarder License No. 1381; Order of Investigation and Hearing

Rene Lopez and David Romano d/b/a United Dispatch Services, located at 1349 N.W. 8th Avenue, Miami, Florida 33126, is an independent ocean freight forwarder operating under FMC License No. 1381, issued on March 22, 1972, pursuant to section 44(b) of the Shipping Act, 1916, and FMC General Order 4, 46 CFR Part 510.

An investigation of the licensee conducted by the Commission's Gulf District Office in October 1978 indicated that Rene Lopez and David Romano d/b/a United Dispatch Services entered into an arrangement which allowed a nonlicensed forwarder, Foreign Freight Forwarders, Inc. (FFF) to use United Dispatch Services' name and FMC license number in the performance of ocean freight forwarding services. Under this arrangement, United Dispatch Services received $2,360.47 in compensation from ocean carriers involving at least 85 shipments between June 2, 1978 and September 9, 1978, by certifying to ocean carriers that United Disptach Services was entitled to compensation on shipments handled by FFF for which United Dispatch Services did not provide any forwarding services.

Based on the information stated above, United Dispatch Services permitted a nonlicensed forwarder to use the licensee's name and FMC license number in apparent violation of section 510.23(a) [1] and certified to ocean carriers that it had performed the forwarding services necessary to receive ocean carrier compensation and accepted ocean carrier compensation on these shipments for which it did not provide freight forwarding services in apparent violation of section 44(e), Shipping Act, 1916, and § 510.24(e) of General Order 4.[2]

Section 44(d) of the Shipping Act provides that a license may be revoked, suspended or modified after notice and hearing for failure to comply with any lawful rules, regulations or orders of the Commission. Section 510.9 of General Order 4 provides that a license may be revoked or suspended after notice and hearing for such conduct as the Commission shall find renders the licensee unfit or unable to carry on the business of forwarding.

Therefore, it is ordered, Pursuant to sections 22 and 44 of the Shipping Act, 1916 (46 U.S.C. 821 and 841(b)) and sections 510.9, 510.23(a) and 510.24(e) of the Commission's General Order 4 (46 CFR 510.9, 510.23(a) and 510.24(e)) that a proceeding be instituted to determine:

1. Whether Rene Lopez and David Romano d/b/a United Dispatch Services has violated section 510.23(a) of General Order 4 by permitting its name and license number to be used by a person not employed by it for the performance of ocean freight forwarding services.

2. Whether Rene Lopez and David Romano d/b/a United Dispatch Services has violated section 44(e) of the Shipping Act, 1916, and section 510.24(e) of General Order 4 by falsely certifying to ocean carriers that it had performed forwarding services necessary to receive ocean carrier compensation and accepting ocean carrier compensation on such shipments for which it did not provide freight forwarding services; and

3. Whether Rene Lopez and David Romano d/b/a United Dispatch Services' independent ocean freight forwarder license should be revoked or suspended pursuant to section 44(d) of the Shipping Act, 1916, and § 510.9 of General Order 4 for failure to comply with any lawful rules, regulations or orders of the Commission and for conduct which renders the licensee unfit to carry on the business of forwarding.

It is further ordered, That Rene Lopez and David Romano d/b/a United Dispatch Services to named Respondent in this proceeding;

It is further ordered, That this proceeding be assigned for public hearing before an Administrative Law Judge of the Commission's Office of Administrative Law Judges and that the proceeding shall initially be limited to the submission of affidavits of fact and memoranda of law;

It is further ordered, That the following schedule be adhered to:

July 13, 1979—Opening memorandum of law and affidavits of fact from the Commission's Bureau of Hearing Counsel;

June 22, 1979—Petitions to Intervene;

August 10, 1979—Memoranda of law and affidavits of fact from Respondent and any intervenors;

It is further ordered, That within two weeks following the submission of the affidavits of fact and memoranda of law of Respondent and intervenors, the parties will submit to the Administrative Law Judge written statements identifying any unresolved issues and specifying the type of procedure best suited to resolve them. After consideration of these recommendations, the Administrative Law Judge will issue an appropriate order establishing the procedure for their resolution. However, any additional procedure shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon a showing that there are issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents, or that the nature of the matters in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record;

It is further ordered, That any persons other than Respondent and Hearing Counsel who desire to become parties to this proceeding and to participate therein shall file a Petition to Intervene pursuant to Rule 72 of the Commission's Rules of Practice and Procedure (46 CFR 502.72);

It is further ordered, That a notice of this Order be published in the Federal Register and that a copy thereof be served upon Respondent and Hearing Counsel;

It is further ordered, That all documents submitted by any party of record in this proceeding shall be directed to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, in an original and 15 copies as well as being mailed directly to all parties of record.

By the Commission.
Francis C. Hurney,
Secretary.

BILLING CODE 6730-01-M

[1] Section 510.23(a) of General Order 4 provides that: "No licensee shall permit his license or name to be used by any person not employed by him for the performance of any freight forwarding service."

[2] Section 44(a) of the Shipping Act, 1916, and section 510.24(a) of General Order 4 provide that before a licensee may receive compensation from the ocean common carrier, the licensee shall certify in writing to the ocean common carrier that he is licensed by the Federal Maritime Commission and that he had solicited and secured the cargo for the ship or booked or otherwise arranged for space for such cargo and performed two of five enumerated services.

Security for the Protection of the Public Financial Responsibility to Meet Liability Incurred for Death or Injury to Passengers or Other Persons on Voyages; Issuance of Certificate [Casualty]

Notice is hereby given that the following have been issued a Certificate of Financial Responsibility to Meet Liability Incurred for Death or Injury to Passengers or Other Persons on Voyages pursuant to the provisions of Section 2, Public Law 89-777 (80 Stat. 1356, 1357) and Federal Maritime Commission General Order 20, as amended (46 CFR 540):

Glacier Bay Lodge, Inc., Suite 312, Park Place Building, Seattle, Washington 98101. Dated: June 7, 1979.

Francis C. Hurney,
Secretary.

FEDERAL RESERVE SYSTEM

American National Sidney Corp.; Formation of Bank Holding Company

American National Sidney Corp., Sidney, Nebraska, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 95 per cent or more of the voting shares of the American National Bank of Sidney, Sidney, Nebraska. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than July 6, 1979. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, June 6, 1979.

Edward T. Mulrenin,
Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed De Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than July 5, 1979.

A. *Federal Reserve Bank of New York*, 33 Liberty Street, New York, New York 10045:

Schroders Incorporated, New York, New York, and Schroders Limited, Schroders International Limited, and Schroders International Holdings Limited, London, England (investment advisory activities; national, international): to offer portfolio investment advice to United States clients who wish to invest in foreign securities, through an office in London, England, of the Schroders Naess and Thomas division of Schroders Incorporated.

B. *Federal Reserve Bank of Chicago*, 230 South LaSalle Street, Chicago, Illinois 60690:

Harris Bankcorp, Inc., Chicago, Illinois (trust company and investment advisory activities; southwestern United States): to engage, through its subsidiary, Harris Trust Company of Arizona, in activities that may be performed or carried on by a trust company (including activities of a fiduciary, investment advisory, agency, or custodian nature). These activities would be conducted from an office in Scottsdale, Arizona, serving the southwestern United States.

C. *Other Federal Reserve Banks:* None.

Board of Governors of the Federal Reserve System, June 8, 1979.

ONB Bancorp, Inc.; Formation of Bank Holding Company

ONB Bancorp, Inc., Chickasha, Oklahoma, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1) to become a bank holding company by acquiring 100 per cent of the voting shares of Oklahoma National Bank and Trust Company, Chickasha, Oklahoma. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

ONB Bancorp, Inc., Chickasha, Oklahoma, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR § 225.4(b)(1)), for permission to indirectly acquire voting shares of ONB Insurance Agency, Inc., Chickasha, Oklahoma.

Applicant states that the proposed subsidiary would engage in the activities of selling as agent life, accident and health insurance inconnection with extensions of credit by Oklahoma National Bank and Trust Company. these activities would be performed from offices of Applicant's subsidiary in Chickasha, Oklahoma, and the geographic areas to be served in Grady County, Oklahoma. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than July 2, 1979.

Board of Governors of the Federal Reserve System, June 4, 1979.

Regulatory Reports Review; Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on June 6, 1979. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the Federal Register is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable, and the frequency with which the information is proposed to be collected.

Written comments on the proposed FCC request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before July 2, 1979, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street, NW, Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

Federal Communications Commission

The FCC requests an extension without change clearance of Form P, Annual Report of Miscellaneous Common Carriers. Form P is an annual report for obtaining operating and financial data from miscellaneous and specialized common carriers. Form P is required by Sections 219(b), 303 (j), (r), and 308(b) of the Communications Act

of 1934, as amended, and Sections 1.785, 21.300, and 43.21 of the FCC's Rules and Regulations. The data collected by Form P is used for analyses of required applications for construction permits and licenses, reviewing operating data and revenues, and for compilation of periodical statistical reports. The FCC estimates approximately 100 respondents will complete Form P and that reporting burden will average 15 hours per response.

John M. Lovelady,

Assistant Director, Regulatory Reports Review.

BILLING CODE 1610-01-M

GENERAL SERVICES ADMINISTRATION

Federal Property Management Regulations; Temporary Regulation F-486

Subject: Delegation of authority.

1. *Purpose.* This regulation delegates authority to the Secretary of Defense to represent the interests of the executive agencies of the Federal Government in a telecommunications proceeding.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.*

a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the Illinois Commerce Commission, Docket No. 79-0143, involving the application of the Illinois Bell Telephone Company for an increase in intrastate telecommunication service rates for private line and mileage services.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

Dated: May 25, 1979.

Paul E. Goulding,

Acting Administrator of General Services.

BILLING CODE 6820-01-M

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

Bureau of Occupational and Adult Education

AGENCY: Office of Education, HEW.

ACTION: Notice of request for suggestions regarding implementation of eight Bureau of Occupational and Adult Education (BOAE) priorities for vocational education.

SUMMARY: In accordance with his national leadership role, the Commissioner of Education, in conjunction with the Coordinating Committee on Research in Vocational Education, is requesting comments relating to eight designated priorities for vocational education. Specific comments are requested for: 1) suggested leadership activities and initiatives that can be implemented nationwide; 2) possible research ideas; and 3) documentation of need in these areas.

DATE: Comments must be received on or before August 1, 1979.
